The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N. Y., Sec'y

Thirty-seventh annual convention to be held at Boston, Mass., 1912.

THE Civil Service Commission will hold an examination for assistant forest ranger October 23-24, 1911. It is estimated that 400 eligibles will be needed during the field season of 1912 at an entrance salary of $1,100 per annum. The examination will be held at National forest headquarters in Alaska, Arizona, Arkansas, California, Colorado, Florida, Idaho, Kansas, Minnesota, Montana, Nebraska, Nevada, New Mexico, Oklahoma, Oregon, South Dakota, Utah, Washington and Wyoming.

Peonies.

When the foliage of the peonies has been killed by the frost the tops should be removed and a good top-dressing of manure given them. While the peony is perfectly hardy and needs no covering for protection, yet it is a gross feeder and revels in a rich soil, and the old established plants give much better bloom when liberally manured every year, and to top-dress them the old growth is better removed, and in doing this the natural covering is taken from the roots. In early spring the manure should be forked into the ground. In sections of the country where the weather is not yet severe it is not too late to divide or move the old plants, but it should be attended to at once for the plants are making active root growth at this time and should be given a chance to get established in their new locations before hard freezing weather sets in.

Zenobia Speciosa.

The order Ericaceae furnishes many beautiful flowering shrubs, a number of which may be considered as the aristocrats of the garden, for they are of distinct appearance and of a highly decorative character without being coarse. Zenobia speciosa, remarks a writer in The Garden may be considered as one of these, for it has a great many points in its favor. A native of the Southern United States, it forms a bush two feet to three feet high, with oval leaves and white bell-shaped flowers, which are borne in profusion from the leaf-axils of the previous year's growth. The flowers have a peculiar waxy appearance and are thick in texture, a fact which assists in prolonging the flowering period. The normal blossoming time is the end of May and early June, but of late years, the shrub has become popular for forcing. It is doubtful, however, whether it will ever be cheap enough to be forced extensively, for it is of very slow growth when young; consequently, a period of several years must elapse between the sowing of the seeds and the plants being large enough to warrant their being forced. The variety pulverulenta is of even more distinguished appearance than the type, for its leaves are of a pretty glaucous hue. If seeds of this variety are sown, both the variety and type may be obtained from them.

Duty on Rosa Rugosa.

In the matter of the protest of F. B. Vandergrift & Co. against the assessment of duty on the importation of rosa rugosa as rose plants, budded, grafted or grown on their own roots at four cents each the general appraisers have rendered the following decision:

"The merchandise in question is invoiced as '2500 rosa rugosa.' These are rose plants, and were assessed under the provision in paragraph 264, tariff act of 1909, for 'rose plants, budded, grafted, or grown on their own roots, four cents each.' They are claimed by the importers to be dutiable under the further provision in the same paragraph for 'stocks, cuttings, or seedlings of * * * briar rose, three years old or less, one dollar per thousand plants.'

"Some testimony was taken in this case; and the board has had before it at various times heretofore a commodity known as the rosa rugosa. The rosa rugosa, it seems, is not the true briar rose which is raised in this country as a seedling for stock upon which to graft other roses for the production of rose plants, but is a native of the Orient; and while it is grown from the seed, it embraces several varieties, some of which are desirable as rose plants for the culture of roses to be used as cut flowers and for ornamental purposes. These desirable varieties are perpetuated and prolongated by means of grafting or budding upon other stalks or stems, as in this case. When that operation is performed we are satisfied the goods are not covered by that portion of the paragraph claimed by the importers, but have then become rose plants, budded or grafted. The testimony upon the part of the importers is clear that the plants here in question are the budded and grafted rose plants of a particular variety of rosa rugosa, desirable as a rose in rose culture and for ornamental purposes. In the cases heretofore considered by the board where the rosa rugosa was held to be dutiable as a briar rose the plants have been seedlings, and we think we can not extend that ruling to include budded and grafted rose plants such as are in question here. The protest is therefore overruled."

Secretary Wilson's Reply.

At the convention of the American Association of Nurserymen held at St. Louis, Mo., June 14-16, the legislative committee reported on the proposed legislation regarding federal inspection and quarantine of nursery stock, and it was thought that too arbitrary power was given the department by the proposed bill. In Circular 37 issued by the Department of Agriculture Secretary James Wilson outlines the necessity of a federal law and what is proposed by the measure now before congress, and concludes as follows:

"The fear that is expressed that some one person will have arbitrary powers over the entire importing business is quite unfounded. The features of the bill which come under the authority of the Secretary of Agriculture under the supervision of the Secretary of Agriculture by designated officials representing the Bureau of Entomology and Plant Industry and the Forest Service of the department. The department by the present service and notifications received will become a sort of clearing house for information for the benefit of state inspectors. The department will also control the subjects of labeling and foreign inspection.

"All inspection in this country after the goods are delivered has been left to the different states, and the department will have no function in this particular except in an advisory capacity. The provisions for foreign quarantine and for quarantine of limited districts within the United States are properly matters for federal control.

"In view of the success of the United States Department of Agriculture in past years in building up every form of agricultural industry in this country, and its constant and earnest efforts in this direction, there is no ground whatever for the fear that in this particular instance the department will become an enemy of the important nursery business and take any unreasonable action to its detriment. The subject of regulation and control will be carried out with the sole idea of protecting the fruit, forest and nursery business."

MELROSE, MASS.—A. M. Tuttle Co., who sold their greenhouse to Charles Rapp some time ago, will continue the nursery business at 11 Sargent street.

Henry A. Dreer, Inc.

714 Chestnut St., PHILADELPHIA, PA.

Los Angeles, Calif.

After perhaps the best summer's business on record, the latter half of September was a little quiet, but October has been good so far with every prospect of better things to come. Half an inch of rain the last week in September brightened up the outside stock considerably and did practically no harm to the chrysanthemums. Cosmos, white and pink, are both in fine condition now and make a little change from carnations and other outdoor crops. Indoor carnations are much improved and the quality of the Victory coming from the local growers would be hard to beat anywhere at this time of the year. Among roses there are splendid American Beauties from inside, while Killarney and White Killarney from young stock are excellent. Richmond is not quite as good as it has been, the nights being almost too cool for this variety where firing has not begun. A number of fine roses continue to arrive from outdoors, the foliage being remarkably good for the section. Chrysanthemums are not as yet a glut on the market, but their numbers are increasing daily and the avalanche will soon be due. Violets are plentiful, but good lily of the valley is scarce; there is a good deal coming in from the north of the state, but it is decidedly poor, with yellow, sickly-looking foliage. In orchids, Cattleya labiata is the principal offering, there being but little demand for any others in this city. Plant trade is slow, a few pot chrysanthemums, coleuses and ferns being the best offerings.

NOTES.

E. C. Cloud, who has been running the Dolphin Flower Shop on Spring street, disappeared between days recently and there are several people, including growers, who would like to know where he is. His plan, apparently, was to get all he could in ready cash, jewelry and other easily portable property and then decamp.

Wm. Haerle is cutting fine C. Touset chrysanthemums and the roses are in good shape. There is also a good cut of Cattleya labiata and cold storage Lilium giganteum.

Morris Goldenson reports a large increase in trade since taking over the Wolfskill business. Morris is naturally a little elated over having the order for cornucopias for President Taft's personal carriage on his visit to this city October 16. Good funeral work and plenty of it has kept the staff here busy. Some fine Nephrolepis superbissima, small healthy stock in fives and sixes, make a good show and are a novelty in this neck of the woods.

Wright's Flower Shop had the decorations at a pretty wedding October 4, using pink roses in all excepting one room, which was treated with white cosmos. Several other weddings and club dances are on the cards, and by the look of the advance orders which are in for November business will surely be brisk here. The stock from the greenhouses at Gardena is coming in fine.

At the Los Angeles Flower Market business has been booming and there is always a good supply of stock of all kinds on hand. C. Morton says they have 137,000 chrysanthemums contracted for, which will mean some tall hustling. If they are all as good as those now being shown, however, the quality will surely help to sell them.

Albert Knopf, of the Redondo Floral Co., reports trade as excellent. Besides a heavy run of funeral work this firm had the decorations at the Sierra Madre club October 5. Tokay grapes were used with good effect, with the flowers for table decoration. Batiste has been sick for a week, but is back at his post again.

Business is booming with Thee Florists, one of the best orders received during the current week being for a fine pall of lily of the valley and orchids. Good chrysanthemums, pots and cut, fine Lilium rubrum and cosmos are among the best stock shown in this elegant store.

Mrs. Chas. Brazee, of Wilmington, has been down with typhoid fever for several weeks, but is now convalescent. Mr. Brazee is adding another three acres of bulbous stock to his already immense plantings this season. All his flowers are contracted for by the Los Angeles Flower Market.

Geo. C. Watson, of Boyle Heights, is sending to Morris Goldenson some magnificent American Beauties, fine flowers of good color and on long, well-leaved stems. His Victory carnations are also first class.

Jack D'Ortignac in his little store opposite the Alexandria hotel on Fifth street is picking up quite a nice little business.

C. A. Brunger, of Monrovia, says his chrysanthemums are in fine shape this year.

We have received our first car of Belgian Azaleas, fine plants, **personally picked and selected in Ghent** by a member of our company; **re-assorted here**, and none delivered to our customers that do not come up to the highest standard of excellence—**shapely, well-balanced, abundantly-budded plants.**

MR. W. A. SALTFORD of "The Saltford Flower Shop" (whom we quote by permission) said last year: "The Azaleas we bought from Jackson & Perkins Company were the finest lot we ever forced, and we have given them a duplicate order for four hundred plants this year." (And Mr Saltford was so well pleased with that lot that he gave us another large order for Azaleas this year.)

VARIETIES:

This list, and a few more, and while they last at these prices:

Apollo. Double; dark red; late.
Bernard Andreas Alba Double; pure white. late.
Deutsche Perle. Double; pure white; one of the best.
Doctor Moore. Double; deep rose; fine; late.
Empereur du Bresil. Double; soft rose; extra fine; late.
Empress of India. Double; rich, rosy salmon; late.
Ernest Eeckhautte. Double; brilliant red.
Madame Petrick. Semi-double; deep rose; very early.
Madame Van der Cruyssen. Semi-double; bright red; early.
Niobe. Fine; double white; late.
Prof. Wolters. Single: rose, bordered with white; early.
Simon Mardner. Double pink; early.
Vervaeneana. Double; rosy salmon, white margin; early.
Vervaeneana Alba. New, very desirable early kind.

Prices:

	Per doz.	Per 100		Per doz.	Per 100
10 to 12 inches in diameter	$5.00	$38.00	14 to 16 inches in diameter	$ 7.50	$60.00
12 to 14 inches in diameter	6.00	48.00	16 to 18 inches in diameter	12.00	90.00

"The Azaleas you shipped me this fall are certainly fine: the Madame Petrick were brought into bloom for Christmas **without forcing.** We had the best Azaleas in Worcester for the holidays, and I can assure you of my order for next season."
CHAS. D. MACKIE Worcester, Mass., Dec 31, 1910.

"The car of plants came through in fine shape; the Azaleas and Rhododendrons were very **fine**; in fact **beyond criticism.**"
T. R. HOPKINS Seattle, Washington Jan. 11, 1911.

Prompt orders are invited, while the assortment is complete, and while the plants are fresh and perfect. Get them started for the holidays. **Nothing easier to bring into bloom,** and **nothing more salable or more profitable** than these handsome plants when in bloom.

Landscape Gardening

PROF. CRAIG.

A course for Gardeners, Florists and Home-makers, taught by Prof. Craig and Prof. Beal of Cornell University.

Progressive Florists recognize the growing importance of a knowledge of Landscape Art. Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

The Home Correspondence School
Dept. A. F., Springfield, Mass.

Davenport, Ia.

The florists in this vicinity are looking forward to a good freeze to put an end to the endless amount of outdoor flowers. Business has been very dull the past few weeks owing, no doubt, to the fine weather, and the over-abundance of dahlias, cosmos and the large variety of outdoor stock which are all exceptionally fine this fall. Some very fine roses are coming in, carnations are improving every day, and chrysanthemums are good and plentiful. Some fairly nice violets are also coming along.

FLORISTS' CLUB MEETING.

The October meeting of the Tri-City Florists' Club was held at the home of Ludwig Stapp, of Rock Island, and was well attended, quite a number going out in the afternoon so as to be able to inspect the fine, large, new range, which was found to be in first class shape and prospects very bright for a fine large cut the coming season. Mr. Stapp no doubt has the largest, finest establishment in western Illinois. Every member gave Uncle John Temple the glad hand and were all delighted to see him and to learn of his recovery. Uncle John has been at a local hospital for over ten weeks. The forcing of shrubs for commercial purposes was the evening's topic, which brought out a lengthy and heated discussion. C. O. E. Boehm, superintendent of Davenport parks, extended an invitation to meet at his home on November 16 at the time of the annual chrysanthemum show, which is always a great feature at the park and which the florists are always glad to attend, as there are some 90 varieties of chrysanthemums grown which give the florist a fine chance to see what varieties are best suited for his individual needs. Mr. Boehm's kind invitation was accepted and the club adjourned, after which Mrs. Stapp served a fine supper and a social hour was enjoyed.

NOTES.

Ewoldt Bros. did some hustling the past few weeks, having completed a new house 28x100 in nine days from the time the first post was set, and in 12 days from the start everything was planted and in running order.

Henry Pauli has been busy building cement walks in his new range. His "mud-walking" days are over, he says. Mr. Pauli is bound to keep his place in the front rank.

Mamie Tierney, chief clerk at Bills Floral Co., has returned from her annual vacation which was spent at Kansas City.

William Knees, of Moline, is building cement walls in his greenhouses and getting everything in fine shape for the coming winter.

R. M. C. Rohlffs, of the Alta Vista Nurseries, has recovered from his recent sickness and is able to attend to his duties again. T. E.

25 at 100 rates. **Cash with order, please.**

All plants must travel at purchaser's risk.

GODFREY ASCHMANN

Wholesale Grower and Importer of Potted Plants, **1012 W, Ontario St., PHILADELPHIA, PA.**

Mention the American Florist when writing

Fargo, N. D.

There has been no killing frost up to this time, the middle of October, while generally we have a frost early in September, consequently while trade is slowly picking up it is not as good as usual and we are awaiting a good frost to give it a little life.

W. B. Shotwell took an automobile trip to Aberdeen, S. D., last week, and although the summer was extremely dry, the florists' stock looks well and they report trade as good.

The Shotwell Floral Co. has erected a new house 25x100 feet to be devoted to the culture of pot plants.

The Grand Forks florists are all looking forward to a good season. S.

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

Moninger Guaranteed Paint

If you have never used our paint, now is the time to try it. Made and prepared just for greenhouse work. The best and only thing to use on Cypress woodwork.

Lasts Longest! Goes Farthest! Least Cost!

The paint is ready mixed and put up in 1 gallon cans, 5 gallon tubs, 10 gallon kits, half barrels and in barrels. It is weather proof; Does not chalk like white lead and oil. In a word, it beats anything ever made for greenhouse work. Try it once and be convinced.

Everything for the Greenhouse

JOHN C. MONINGER CO., 902 Blackhawk St., **Chicago**

Cattle Manure in Bags
Shredded or Pulverized

Pure—dry—uniform and reliable. The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

Pulverized Sheep Manure

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for liquid top-dressing. Unequalled for all field use. Write for circulars and prices.

THE RICHMOND CARNATION SUPPORT

Under patent issued April 4th, 1911.

To release the rings for adjustment, after using salt water, grip the sides of the stake together sufficiently to break the crust, bring the rings around in circular manner, to relieve the spring pressure, as shown in cut; and you will be surprised to see how easily and quickly they can be released and adjusted.

It is said, that for 'Mums these supports can't be beat.

Write for prices, also on rose and 'mum stakes, and wire for concrete work.

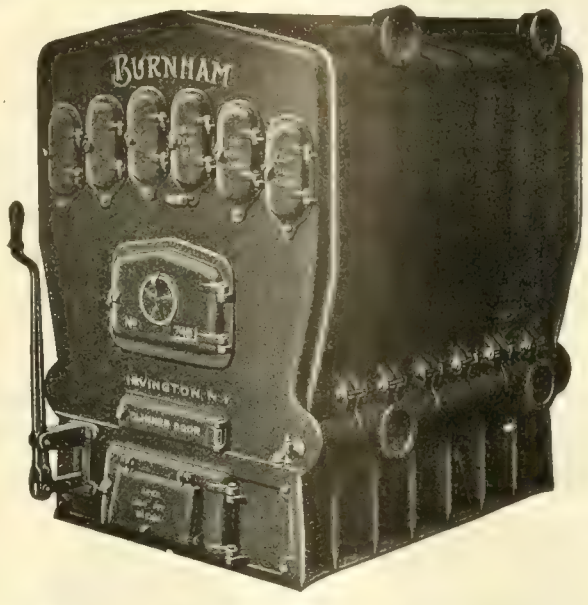
Wm. Schlatter & Son, Springfield Mass.



The Burnham

"Have Used Fifteen Years and Never Regretted It," Say The Kingston Florists, Valentin Burgevin's Sons.

"We take it upon ourselves to tell you how very satisfactory the heating system, that you installed for us last last year, has proven. We had no trouble in keeping the required temperature without the use of the pump, which you also put in to act as an auxiliary to increase the circulation in the hot water system.

"Some fifteen years ago we began to use your boilers, and we wish to say we have never regretted it. While there were instances when we did not get as good results as we required, you were always ready to adjust it entirely to our satisfacton.

"Our experience has been that in dealing with The Lord & Burnham Co., we not only get modern and up-to-date equipments, but also a square deal."

Where There Is Condensation

——there is need for a **Morehead Steam Trap**
Condensation in steam lines is akin to matter out of place—means wasted energy.

If your lines are sluggish—if your houses are not of uniform temperature, write us. We guarantee to drain your lines perfectly—return the pure, hot condensation to your boiler without pump or injector or make no charge for the trial. Obey that impulse—write now.

Send for "Book on Condensation."

The Mastin Automatic White-wash and Spraying Machine

Is Reliable, Practical and Durable.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

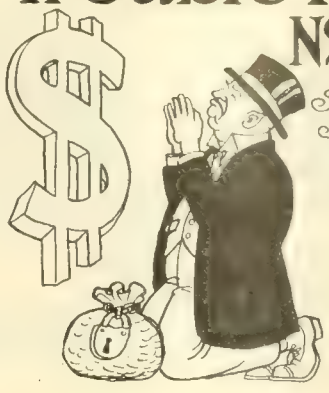
Trouble Talk No 10
Second Series



This time it is the difference between $4,500 and $5,506. Or what the difference really is.

Yesterday afternoon Jackson and I were talking about several of the Hudson River growers when he asked, "How did that Sanders' job ever turn out?"

My answer was: "Well first it **turned us out,** and then it **turned us in**—and by the look of things we are now in, to stay in." Then I told Jackson just how it all happened, and he seemed to think it was a cracking good trouble talk. So I'll tell it to you as nearly as possible, just as I told it to him.

"You, of course, remember Jackson, what a complicated bit of heating that job was. Steam, it was, with long runs and big expansion and contraction to contend against. There were also a lot of special things and no end of kinks that had to be handled just right or there would be trouble. The boiler was to be 100 h. p. tubular and we had an option on one made by the C—— Co. that we could buy at a special figure—a bargain, in fact. Some one ordered it made special and then went bankrupt or something like that.

"We figured on placing 7 pipes on the sides and supporting them by spool hangers so they would slide along without breaking the hooks or tearing them loose. Then there were to be 4 under each bench hung on those No. 1100 special swing hangers of ours. Each coil was 300 feet long, which required special connection to take care of expansion and contraction.

"Our figure for the entire job was something like $5,206. Our competitor's was $4,500. A difference of over $700. We refused to cut our figure because it was a close one, and on a job where you have to have a little surplus for extras that are bound to turn up.

"The other fellow got the business.

"The owner was governed by price and price alone. He wouldn't listen to my talk of the superior quality of our work, or our reliability.

"That winter they had no end of trouble; and finally lost half the crop.

"The expansion and contraction had not been properly allowed for, resulting in numerous leaks and traps. The side pipes were on hooks instead of spools and 20% of the hooks tore loose from the posts. The pipes short-circuited, and so on. It was a bad job from A to Z.

"That spring we were called in to look it over. A more disgusted man than that owner was, you never saw. He had had enough. He said: 'Go ahead and make it right.'

"Before he got through it cost him $1,317, which brought the total cost up to $5,817, or $317 above our original price."

I would tell you this man's right name right now, but he prefers to have it kept quiet. But there is a little object lesson in this true story which it might be well to tuck away in your memory box.

If you want to be helped out of trouble or kept out of it—in either case I can help you. Write to me personally, directing it like this and it will surely reach my desk promptly: The Trouble Man — Hitchings & Company, Elizabeth, N. J.

The chances are this is the last trouble talk of this series. But it's not saying there won't be another series —for every so often I just plain must tell my troubles to some one.

This is the U-Bar the bar that makes U-BarGreenhouses the Famous Greenhouses They Are.

You can talk about the things cold frames will do for you "until the cows come home," but if you want real flowers, real bedding plants that you can count on being top notch year in and year out—then a greenhouse is the only thing. The only thing because it is the **sure thing.** With a greenhouse your frames become doubly valuable, as then one helps the other, greatly to the advantage of both. With a greenhouse you control temperatures and conditions and can have what you want when you want it. But don't allow anyone to persuade you that any other curved eave house is just as good as the U-Bar. It is not so. We want to show you exactly why. Send for the catalog as a starter.

SUGGESTIONS FOR PLANT GROWERS.

Outdoor Roses.

The hybrid perpetual roses should now be made ready for the winter. Many growers lay the canes down and cover them with earth. While this may be necessary in extremely cold sections yet in the majority of places in the country it will not be required. Under no circumstances cut the canes back, but leave all the wood that has been made on the plant, for it will winter kill to some extent, and it is but six or eight inches at the base that is wanted for next year's growth. This six or eight inches should be well protected from the freezing weather. If the bushes are planted in rows, the earth should be spaded out between them and thrown around the bushes making ridges about 10 inches above the level of the soil. This will make a trench between the rows about 18 inches deep, which should be filled with manure. The manure should be barnyard manure with more or less straw in it, and will make a fine covering for the ground. Where the bushes are planted individually the soil should be banked around them in a similar manner and the trench around the bush filled with manure, allowing some of the manure to come up around the bush. In the spring the manure will have almost all disappeared and the soil can be spaded back into the trenches and the remaining manure spaded in. This will carry the rose bushes through almost any winter and give them a good manuring for the next season's growth.

Violets.

The temperatures of both night and day have now become settled enough to keep the violet houses in the best growing conditions, and the plants should have made a strong healthy growth, and be producing blooms of good quality. The first sign of disease will sometimes make its appearance as early as the first of November, yet it ordinarily does not show up until later in the year during the dark, dull weather. All leaves which show disease should be picked off at once, and if there appear to be any great amount making its appearance, run the plant a little dry, and under no circumstances allow moisture to remain on the foliage over night. Water only on bright days and then early in the morning. Give all the air possible during the day, and if the disease continues raise the temperature a little at night and do not open the houses quite as much or as early in the morning. A little warmer temperature will induce a new root action, and if this takes place the plant will begin to make a new growth and the disease will disappear. The disease only makes any great headway while the plants are not growing, for when "the elegant spring," as one grower always used to express it, comes, the plants take on new vigor and the disease is no more. As soon as the plants begin to grow the temperature can be dropped to normal for the culture of these plants, which should be about 40° at night. Be careful in removing the leaves not to disturb the plants any more than possible, do not pull them off carelessly but pinch them off with the thumb and forefinger.

Ferns.

A good stock of small ferns is a necessity at this season of the year to the florist having a retail trade, for the fern dishes will now be coming in to be refilled and this has become quite a feature of the business. While this branch of the trade is in many cases very unsatisfactory, yet it is greatly the fault of the dealer that it is so, and with a little care and method can be made very remunerative and satisfactory to himself and his customers. In the first place a book should be kept giving the date when such customer's dish was filled, and above all things do not endeavor to buoy the customer up with any false hopes as to how long the dish will keep in good condition. In many cases the dish is placed on the center of the table 15 to 20 feet away from any light, the care left to domestics, and it may never be watered from the time it reaches the house until it is returned to be filled, and ofttimes the customers will say it was only a week or two since it was filled, when by reference to the book it will be found to

have been two months. When the dish is returned make a note as to what varieties seem to have succeeded the best and use these in refilling. It is wonderful to note the effect on the different varieties in different houses, what will live and thrive in one house will often be the first to die in another. Have a few dishes put up ready for sale, it is often possible to make a sale when the customer sees them all ready, who either would not wait to have one made up or would never think of it unless their attention was drawn to it. Beside the ferns, have a good stock of Asparagus plumosus and Sprengeri in small pots; these will often grow where ferns will not live at all. And also a fine lot of small palms, cocos and kentias, and small dracænas for the centers of the fern dishes.

Azaleas.

The imported plants of azaleas will soon be received and preparations should be made to pot and care for them upon their arrival. It is the general opinion that owing to the very dry weather which has been experienced this summer throughout Europe, that the plants this year will be somewhat smaller than usual. The plants have been out of the soil now for four or more weeks, and although all the attention possible is given in the packing and shipping, yet the plants suffer considerably and should be handled at once upon their receipt. Have a stock of azalea pots on hand of the different sizes to meet all requirements. The full-sized pot is no longer used to grow azaleas, the plant making a much better appearance in the azalea or half-size pot. Any kind of soil will do, but if the plant is to grow on after blooming a fibrous peat is to be preferred. When the plants are unpacked they should be immediately carried to the potting shed. Some will probably have too large a ball for pots that will look best with the size plant. The roots can be cut off with a sharp hatchet to fit the pot. Have a tub of water in which the ball of earth can be stood until thoroughly soaked. Many growers neglect this, deeming it unnecessary, but in our experience if not done the water runs down the outside of the pot in the new soil and it takes many waterings and considerable time to soak up the old ball, and the plants are meantime suffering for moisture. Pot very firmly, ramming the soil down hard and after potting the soil should be thoroughly watered until all the soil in the pot has become saturated. The inclination is to place the early varieties immediately into the heat, but six weeks in a house at 65° or 70° will bring them into bloom for Christmas and if the plants are received by November 1 ten days in a cool house will enable them to recover from the effects of the long shipment and become re-established and they will force much more readily and successfully. The dropping off of buds is often attributed to this placing them in the very hot houses before they have become settled in the new soil. Frequent syringings will be required after being placed in the warm house. The later varieties should be placed in cool houses or pits until the time to bring them in to the warmer temperature.

COHOES, N. Y.—Fenton Fennell is receiving much well-deserved praise for his decoration of St. John's church for the archdeaconry meeting in October.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Appearances in the Store.

Good appearance, when relating to either the store, the proprietor or the help, embodies neatness and cleanliness. A store that has neat help and neat surroundings will always appeal to the critical and the world is getting more critical every day. One may hear, times without number, people say: "Let's go there, their store always looks so nice and neat and their sales people seem so much more particular in the way their clothes look."

In the smaller towns, or at least in the stores having greenhouses attached, where a man is striving single-handed for success, we have often seen the proprietor waiting upon a nice customer, wearing overalls and boots, both covered with mud. Of course, we do not mean to criticise in an unreasonable way, but the welfare of the business demands that there be someone who can take care of the customers—a growing son or daughter, or perhaps a wife who can arrange her household duties so as to look after the store end of the business.

The Hitchings' Cup.

To Be Awarded to the Best 30 Chrysanthemum Blooms, Six Varieties, Five Blooms Each, by the Chrysanthemum Society of America at St. Louis, Mo., November 7-11, 1911. Donated by Hitchings & Co., New York.

Windows should be cleaned every day, inside and outside. For this purpose nothing is better than Bon Ami,—it makes less work and is cleaner. Move things around, don't take the first judgment as final in placing furnishings—keep changing until it makes one nervous and then change again. During busy times, of course, there will not be time to do this, but the customers will at least notice that the proprietor is trying to get there and has the necessary courage.

Don't load the place down with crockery and jardinieres; a few well chosen pieces of crockery suitable for one or more ferns will always sell well, but don't buy all the man has—jardinieres are the ruination of plants in the house because the average person does not realize that the plant is standing in water. Then the plant pot will fit too tight in the jardiniere; this prevents the roots of the plant from getting the necessary air, which they breathe through the pot, and in consequence the plant will soon rot away. Basket pot covers are more suitable for this purpose. A pie plate can be fitted into the bottom to receive the water that drains through the soil.

Keep the plants clean, the same as everything else should be. Have regular days for this work. When a thorough housecleaning is planned it usually upsets things too much to try doing it all with a rush. Invariably there will loom up an extra large order for floral designs to be delivered at once and then the cleaning up must be dropped. In consequence the store will look as if a cyclone had struck it.

Nothing adds to flowers so much as a little ribbon, used with judgment both with regards as to quantity and color. If the occasion arises where something nice may be suggested for a young lady who is about to be presented to society, nothing is more attractive than a few choice pink roses tied with pale blue ribbon. This same effect can be used in corsages for luncheons, etc. Silver green ribbon is very nobby looking and goes with anything, especially lily of the valley. It is also effective on red roses. When using ribbon to match the flowers, be sure it is the same shade else use a lighter shade. When a darker shade than the flowers is used it makes the flowers look faded. Have the ribbon case in a fairly prominent place but be sure it looks clean and well stocked. It takes a little more capital to be well supplied but in the end it pays.

STOREMAN.

Floral Pillow.

Second only probably to the wreath, the pillow is the most popular arrangement of flowers designed by the florist, and it often occurs that an order for more than one of these is to be forwarded to the same service. It therefore becomes necessary that the floral artist should arrange them in such a manner that duplication is avoided. The old flat arrangement of this design with the lettering placed in the center, so much employed for many years, has long since been superseded by light artistic work, and many pillows are now designed with no inscriptions upon the flowers. This gives the designer an opportunity to demonstrate his artistic ability and to never arrange two of the floral pieces just alike. Many pillows are arranged at the present time with no lettering upon them, but in the same manner that tablets or placques are designed, and if an inscription is desired a knot of ribbon is used upon the streamer, on which are laid and fastened the gold and purple letters forming the word or words. The pillow which we illustrate was arranged by George M. Geraghty, the artistic manager of Dunlop's, Toronto, Ont., and was composed of white roses, marguerites lightened with sprays of asparagus and backed with cycas leaves.

This beautiful arrangement of this well-known form grants to the designer unlimited latitude in the selection of flowers, and at the present day when so many high colored flowers are used for funeral work, everything in the floral line in season can be used when good judgment and proper artistic ability is shown. The employment of

PILLOW OF WHITE ROSES, MARGUERITES AND CYCAS LEAVES.

the nicer flowers will of course make the design look richer, and the price will be accordingly more, but nearly all the smaller and cheaper flowers can be used if properly arranged. In the pillow illustrated the marguerites are a beautiful addition, their dark centers making a strong contrast to the white roses and the fine white petals of their own flowers, with the light arrangement of asparagus plumosus. The cycas leaves at the back extend the design and give the whole arrangement a proper setting. Particular notice should be taken how some of the more beautiful flowers stand above the others, making them much more prominent and thereby avoiding the too flat, compact effect. It must be thoroughly understood that the flowers want to be of a better grade in these lighter arrangements than in those where the flowers are packed as closely as is possible, for the flowers stand out each one for itself, showing its individual beauty, and it is impossible to use the quality of flowers so often employed in funeral work. But the designer is given a much better chance to show his ability in arranging the flowers in an artistic manner.

Some Flower Show Pointers.

Perhaps the most exasperating thing to the exhibitor who regards the rules as something to be obeyed, rather than a little printed matter put in to fill out otherwise blank pages in the schedule, is the non-enforcement of the rules as to time of staging exhibits.

When the florist has a dinner or wedding decoration he gets on the job and has it done on time—because he must. When he has a flower show exhibit to stage he gets around any old time and finishes his work when he gets good and ready. This is not fair to the other exhibitors—to the judges nor the public.

It is up to the management to consider carefully what times shall be set for the staging of the various exhibits and when a decision is made and published, hold the exhibitors up to the hour and the minute. Much of the delay in staging exhibits is simply carelessness, but often it is not. Many clever exhibitors deliberately plan to stage late, when they think the management is easy, and thus secure an advantage over the man who obeys the rules and gets his flowers up on time.

The judge has no choice except to consider each exhibit as it is when he reaches it. He has no right to make awards on what a thing has been, or what it will be. Experienced exhibitors time their stuff very closely, so that it shall be at the top notch when staged. If the air in the hall is bad, or the temperature high, fully developed flowers go back very rapidly, and we often see the second or third best bunch of blooms winning out, simply because they were staged later and had not suffered so much after staging. This is not fair. Under no reasoning can one justify favoring the man who violates the rules and penalizing the man who obeys them. Sometimes the express company is late with delivery. This happens to every one who ships flowers and is one of the risks of the game. The management may be as sorry for him as they choose, but they have no right to be unfair to all the other exhibitors, simply because one man has been unfortunate.

This brings us to another point of view also. The show manager can not hold the exhibitor up to the mark un-

less his part of the work is properly attended to. One too often sees the staging unreasonably delayed because the vases and tables are not ready and no one knows where space has been assigned. Every one stands idle until the manager arrives, he having overslept, possibly by reason of celebrating too late the night before. There are several morals to this. One is, don't celebrate the night before, if you have to superintend the staging of exhibits the next morning. The next is, get on the job early in the morning any way—no matter how good the feathers look to you.

Finally—and most important—get everything in shape the night before. Elmer Smith or Gurney Hill are likely to want to start work at five o'clock in the morning on opening day, and all kinds of unforeseen things are likely to happen in the morning. The rules now generally require all entries to be in by noon of the previous day. It is a simple matter to get from the secretary a list of the number of entries in each class and the names of the exhibitors. One can then quickly determine what tables are needed and how many and what size vases. Every table should be in place, and covered, every vase in place on the table, and each man's space marked with a card. One reliable man should be detailed the night before to fill all the vases with water the first thing in the morning. No exhibitor should be compelled to drag vases out of the store room nor to fight for possession of the one rusty can, so that he can cart water from the tap in the basement in the southeast corner of the hall to his empty vases in the northwest corner.

The right kind of a manager gets on the job early and stays on it late. Be ready with everything and be ready ahead of time. Plan each day for the next day's work. Give each man his station and his orders the night before, and above all have some one who knows your plans in the hall while you are out, so that he can take your place and give necessary orders in an emergency. W. N. RUDD.

Paper White Narcissus.

The early planted Paper White narcissus should be now well enough rooted to stand being brought into the houses and forced into flower. If placed in a very warm location they can be brought into flower in 15 days to three weeks, but subjecting them to too much heat often results in blasting the buds. If grown a little cooler, say, in 65°, the flowers will be much larger and of greater substance, yet they cannot be flowered at all if given the cool treatment in which the mid-winter bulbs are grown. When they are first brought in they can be placed under a bench on the heating pipes until the flower spikes begin to show and then brought up to the light in a warm temperature, if the pipes are heated with steam a board will of necessity have to be placed on them, or the intense heat will burn the roots of the bulb. Give them plenty of water while in this warm location.

BROCKTON, MASS.—Over 1,000 roses were distributed at the opening of W. J. Woods Co.'s store and the display of flowers and floral pieces was magnificent.

Azaleas.

One of the most important plants for the Christmas trade is the azalea, for there are none more satisfactory to the purchaser, dealer or grower at the holiday season than one of these plants when well covered with its bright flowers. It invariably does well in the residences unless neglected, and it shows off well in the store and there is no other plant that makes a like display for the money expended, nor can so much show be made with any of the cut flowers for the same price during early winter. The culture of these plants, especially those that are imported, is extremely easy, they being fully set with buds when they arrive, and in order to have them in bloom for Christmas only requires a house where a warm, moist temperature can be maintained and frequent syringing and watering.

The importations are now arriving and should be immediately potted upon receipt. Those who buy the plants in Belgium are well acquainted with the varieties that they wish to grow, but thousands of these plants are bought through dealers on this side, and a slight resume of the better varieties for greenhouse culture may not be amiss at this time. First will be the early blooming kinds or those that may be had for Christmas. The three varities most easily and surely grown for this period are Deutsche Perle, white; Simon Mardner, dark pink, and Vervæneana, white blotched with pink. To these may be added Mme. Petrick, rose; and Hexe, also known as Firefly, which are forced by a great many growers, the former being a comparatively new variety and the latter is forced in smaller sizes the flowers being single and of bright red color, but this variety will require a much warmer house to have it in for the holidays than the others. Sigismund Rucker, a single rose with white margin, can also be included in the early varieties. Some growers, by harder forcing, also get many of what are termed the mid-season vareties in for the holidays. Of these Mme. Van der Cruyssen stands at the head, a double deep rose; Apollo, dark red; Niobe, white; Professor Wolters, a fine single rose bordered white; Empereur de Bresil, flesh; Empress of India, salmon pink. For late blooming all of the mid-season varieties can be retarded and Bernard Andrea alba, white; Doctor Moore, deep rose, are especially grown for late flowering. There are many other fine varieties that can be successfully grown in the greenhouses but this list includes the favorites with those that force these plants in quantities.

The season just passed in Belgium has been exceedingly dry and all vegetation has suffered severely. This has affected the plants of azaleas, many growers not being able to fulfil their contracts, for the plants have not made the customary growth. It is reported that much substitution is being practiced not only in varieties, which has been carried on for some years to more or less extent, but where orders for certain sizes could not be filled smaller sizes are being sent in their stead. The substitution of varieties has always caused trouble for there are a great many kinds that are beautiful in their home country that will not stand the long transportation, dropping their leaves badly and sometimes all the flowering buds, but it will be very disappointing to the grower who has educated his trade to a certain size plant to find that he is obliged to show them this year a smaller size, and may result in the loss of considerable trade.

The imported plants have been out of the ground for four or more weeks

AZALEA TIED DOWN.

when received and should be potted and established as soon as possible, for although grown in a peaty soil that retains the moisture, yet frequently they have become quite dry. The plants should immediately be unpacked and carried to the potting room, and as the covering around the roots is removed the ball should be stood in a tub of water until thoroughly soaked. If this is not done and the roots are at all dry, after potting the water will soak through the new soil at the edge of the pot and it will take some time to wet the dry earth in which are the roots, and the plant will lose much of its foliage and sometimes the buds, and perhaps receive a check that will be manifest when it comes to bloom. While the roots have been cut to small sizes yet if too large for a pot in which the plant would look well in bloom they can be further trimmed off. The better way to do this is to take a hatchet and cut the ball off until it will go into the pot, leaving room to pack a little new soil between the ball and the pot. It will make but little difference as regards the bloom this year as to what soil is used in potting, many growers using coal ashes at the bottom, but if it is intended to grow the plant on after blooming a good fibrous loam, of a peaty nature if possible, is the best. No manure is necessary for if the plant in after years gets pot bound watering with liquid manure is to be preferred to mixing manure in the soil.

The plant will have a much neater and better appearance if potted in azalea pots, so-called, that is, pots that are only about one-half to two-thirds as high as they are in width, a pot intermediate between the bulb pans and the standard pots. It potting ram the soil down as hard as possible. All hard-wooded plants require firm potting and this will also retain the moisture more readily. As soon as potted the plants should be placed in the greenhouse; the later varieties in a cool house, or as many growers have, a light shed where a low temperature can be maintained, but not much below 40° at night. The early varieties will require about six weeks in a warm greenhouse to bring them into bloom but they will be greatly benefited if they can stand in cool, light quarters for a week or 10 days until they have fully recovered from their long journey. This can quickly be seen when the foliage begins to stand erect and again take on the bright glossy appearance. They should, however, be kept well watered and the foliage syringed to assist them in this recovery.

A house with a night temperature of 60° to 65° will readily bring the early varieties in on time with the possible exception of Hexe, which should have a warmer location. Never allow the plants to suffer for want of water and frequently syringe them. After the flowers have begun to open and the buds all show color, the plants can be moved into a cooler house and this will harden them up and they will be much more satisfactory in the residences. Sometimes they seem to come into bloom very slowly and in this case watering with warm water will greatly assist them in getting in on time, or if this cannot be done a syringing when steam is in the pipes and thus fill the house with steam will hurry them along, but where this is done the temperature must be maintained. Keep the house well closed down in the daytime, just allowing a "crack of air" to keep the atmosphere buoyant and fresh, but the warmth and humidity are necessary to get the plants in bloom early.

The later varieties are much better if brought into bloom in cooler houses and given more time, the flowers having more substance and the foliage much better color. They can be brought along as wanted and by proper manipulation the grower can have azalea plants in flower from Christmas to Easter, but the early plants will require much forcing to get them in on time.

F. O.

AZALEA CARL ENCKE.

The Origin of Cultivated Begonias.

Among the subjects discussed at the Congress of Horticulture held in Paris in May last, one of the most interesting was that concerning the origin of cultivated begonias, according to the London Gardeners' Chronicle. Monsieur Bellair, who introduced the subject, pointed out the large part hybridization had played in the production of present-day forms. Of the hybrids which have been raised, two classes may be distinguished, those which are fertile and those which are sterile. The fertile hybrids include the tuberous-rooted section, which has been produced by crossing and recrossing at least five wild species, Begonias Boliviensis, Veitchii, rosaeflora, Davisii, and Pearcei. Besides the tuberous-rooted begonias, another fertile race is that known as gracilis, produced by crossing Begonia semperflorens with B. Schmidtiana and appearing in three colored forms, white-flowered, rose-flowered and red-flowered. Other fertile hybrids of probably a similar origin are Lumineux and Lubecca, and perhaps Gloire de Chatelaine. The last-named has but a very reduced fertility. According to Monsieur Bellaire, the two best-known reputed sterile begonia hybrids are Gloire de Lorraine and Patrie, both of which claim Begonia Socotrana as the female parent. Gloire de Lorraine is believed to have been obtained by crossing B. Socotrana with B. Dregei; Patrie from B. Socotrana and B. Pearcei. Not infrequently the female flowers are absent, and even when they occur they are few in number, and are said to be sterile to their own pollen. Monsieur Bellaire pointed out that the hybrids of the tuberous-rooted section are derived from parents which do not present marked dissimilarities one from the other; whereas the species from which come such sterile begonias as Patrie, differ from one another markedly and in many ways; in the shape of their leaves, in their season of flowering (Begonia Socotrana being a winter flowering and B. Pearcei being a spring flowering species), and in form of their rhizomes. It is to the fundamental differences in constitution between the parents of B. Patrie and other hybrids of this class that M. Bellair attributes the sterility of hybrids. Sterility is, however, a very subtle and erratic phenomenon, as to the cause of which we have as yet little or no certain knowledge.

DOBBS FERRY, N. Y.—The fifth annual flower show of the Dobbs Ferry Horticultural Society will be held November 3-4.

YOUNGSTOWN, O.—The erection of a conservatory for park purposes is being advocated by those interested in parks of the city.

ORCHID NOTES.

LAELIA PURPURATA is said to be getting very scarce in its native habitat in Brazil.

LIVE ephagium moss is a good material to use around some orchids, such as the vandas, but decayed and dry moss is useless for any.

A LITTLE air-slaked lime may be strewed around underneath the benches in the orchid houses. It sweetens the atmosphere and helps to keep slugs away.

A FEW French tree frogs are useful around the orchid houses, as they climb about the plants and eat many insects that are missed by the larger toads that stay on the ground.

NEW importations of the old Dendrobium superbiens from Australia should help to popularize this beautiful section of the genus. It is a handsome species and one of the best dendrobes for cutting.

Orchids in October.

CATTLEYAS.

While there is still considerable growth being made and to be made on cattleyas, the summit of the growing season is passed and the plants must be prepared for the winter season. In most places a few newly imported plants are procured each year and there is always a slight difference in the season with these and established stock. Take C. Trianæ for instance: The plants that have been imported three years and upward are practically all finished, that is the bulbs have attained their full development and the flower sheaths are standing erect. With the present year's importations, on the other hand, there are many bulbs completed and showing sheaths and many others in various stages of development, from the shoots just starting to the cup-shaped growth with flower sheath just showing. It is well to group these backward plants together as much as possible, as they need more water, both at the roots and in the atmosphere, than those which have completed their growth.

We hear a lot about "timing" orchids to get them in bloom by certain dates, some growers apparently thinking they can make them flower early by giving quantities of heat and moisture or retard them by withholding these, much as lilies and other stock are grown. But this is not easy, for orchids have a way of doing things that are least expected of them and often refuse to be forced or retarded at the will of the operator. The best that can be done along these lines is to select the most forward in growth and give them the best position in the house for hastening them and to select the latest and give them the opposite conditions to retard them. Then depend upon the well known long-keeping qualities of the blooms to be "in" for any special date. We have frequently kept cattleyas from two to three weeks after opening by placing the plants in a cool, shady place when in bloom. But where flowers are needed over a long period the best way is to have a good stock of plants when many will be later than others.

C. labiata is the great attraction for October and the plants are flowering magnificently this year. While we have the immense spikes of C. gigas still in mind we do not enthuse much over those of C. labiata, but some of the better varieties and long spikes are pretty nearly up to the gigas standard. Fine flowers, erect, eight inches across, make a beautiful spray and are big enough. As the plants go out of bloom keep them by themselves and a little on the dry side. Should any need repotting let this be attended to, but even after potting keep them fairly dry in order to encourage root action, which will rapidly re-establish them. C. Schroderæ requires practically the same treatment as C. Trianæ, but it is a little later both in growth and flowering. C. gigas must be kept on the dry side as long as it is at rest, but if it does start to grow, as it often will, then the treatment must be altered accordingly. But in collections where there has been trouble from fly, it is well to be quite sure that the new growth is not caused by the attentions of this pernicious insect, as this frequently happens.

C. Mossiæ has quite a good deal to do yet; the growths are well advanced and the flower sheaths are showing, but the careful grower likes to see this plant well finished in fall with fine, well developed pseudobulbs as these will stand fairly dry treatment in winter and early spring and still have sufficient vitality to produce fine flowers. These two species should have the lightest and best part of the house now and for company C. Dowiana, C. aurea and the little grown but lovely C. superba. These three, and especially the last named, need more sunlight and heat than any other cattleya and we never had so fine a batch of C. superba as one grown in the south end of a span roofed house, totally unshaded except for a line of Thunia Marshalliana, which broke the rays a little. C. Gaskelliana is at rest after flowering and no endeavor must be made to start it growing. Keep it dormant until after the turn of the year and it will come away all the stronger and better when it does start.

PHALAENOPSIS.

A regularly moist and warm atmosphere, with a little more exposure to light, is best for the popular species of phalænopsis now. The spikes are already showing on P. amabilis and P. Schilleriana and the leaves are still growing so that no drying off must be attempted. Let them get well on the dry side before watering and then dip the basket or pan in a pail or tank in order to wet every portion of the compost and drive out the air to be replaced by fresh as the plants are taken out of the water. Never allow the water from suspended plants like these to drip upon others on the benches beneath. They ought always to hang over the walks when there is head room, but if there is not and they have to hang over other plants, then place them on the floor for an hour after watering in order that the superfluous water drains away. Keep the foliage dry from now on and a sharp lookout for slugs night and day or many of the flower spikes will be lost.

DENDROBIUMS.

Nearly all the deciduous dendrobiums will by now be making the last leaves in the cylindrical stems and must be placed in the full sun to ripen. If there is one point more important than another in the culture of this charming group of orchids it is to see that the growth each season is well consolidated by exposure to sun and air. This renders it immune from danger if the temperature happens to go a little below the mark in winter, stores up lots of nutriment for the use of the plant when producing its myriads of flowers and renders it more healthy and satisfactory in every way. D. formosum is showing flower and must be kept moist at the roots. This is not strictly deciduous under culti-

PHALÆNOPSIS AMABILIS.

CATTLEYA LABIATA AT POEHLMANN BROS. CO., MORTON GROVE, ILL.

vation, whatever it may be in its native habitat, and rather than dry it off it should be kept as quiet as possible during winter, but with the leaves on the old pseudobulbs. This treatment is also correct for the other members of the nigro-hirsute groups, like D. Jamesianum and D. infundibulum, though both these like less heat than D. formosum. H. R. R.

Orchids at Poehlmann's, Morton Grove, Ill.

It is not so many years ago, and certainly within the remembrance of a large proportion of those now identified with the florist business, that any function at which orchids were used in the floral decorations was the subject of much comment in the daily press as well as the trade papers. Orchids grown commercially were few and far between, but few florists attempting them at all, and those that did only in a very small and meagre way, made as an experiment and as a novelty by which to advertise their business, the only collections of this highly-prized plant being in the private greenhouse of the millionaire or wealthy people. But the demand for these exotics has increased, and it would be a revelation to the enterprising florist of but a generation ago to have the opportunity to look into the establishment of Poehlmann Bros. Co., at Morton Grove, Ill., and see 20,000 plants of cattleyas under cultivation.

This enterprising firm, seeing this increased demand, and in this as in all other matters pertaining to floriculture, determined to be abreast of the times, and began three years ago the culture of these, the most prized plants and flowers of the floral kingdom. The first venture was a success and the next year two houses were devoted to the growing of these lovely flowers. Last year collectors were obtained and they were sent into the jungles and forests of South America by this firm and some 300 cases of plants were the result of these collectors' labors, and these have now become established and are growing in the six houses which are devoted to orchid culture.

Cattleyas are the specialty of this firm, for these are the most desired by the trade of all the orchids, and with the exception of a few hundred plants of dendrobiums the entire six houses are given to the culture of cattelyas. The varieties grown are, of course, those most in demand by the trade and as the blooming season of the several most desirable varieties covers nearly the entire year, these are the ones selected to be grown in these houses and embrace the following varieties: C. labiata, C. Mossiae, C. Trianæ, C. Percivaliana, C. Schroedereæ, C. Gaskelliana and C. gigas. C. labiata is the autumnal flowering variety of this large family and at the present the thousands of plants of this variety are in bud and flower and it is a most glorious sight to gaze upon these large flowers, shading from purple through the lavenders to nearly white with their highly-colored throats and see these beautiful blooms that are sure to attract so much attention when displayed in the florist's store or used in the bridal ceremonies or other social functions. While it is yet early to see a great display of these plants in bloom, yet they are all in the best of health and growing luxuriantly, and the illustrations give but a small idea of the beauty of these houses at present or what they will be later in the season when the greater number will be in bloom bearing their magnificent spikes of flowers which are now protruding from the splendid growths. But those that are now in bloom illustrate both by the quantity and quality of the flowers the excellence of the culture, the plants bearing stems reaching over 12 inches high, upon which are borne five flowers, the individual flowers of those now in bloom, C. labiata, measuring up to eight inches across. The cut of these beautiful flowers is but just commencing but the shipments now are from 150 to 200 flowers a day, and these are all disposed of upon their arrival at the store.

The culture of these six houses is in the able hands of A. K. Andersen, the grower in charge, he having had years of experience in the cultivation of orchids in England and on the continent of Europe, and the outlook for the present year is certainly fine for a large quantity of magnificent blooms. The firm has built up a large trade in these flowers and the demand which John Poehlmann has created with his customers for these most beautiful blooms at the store at 32-34-36 East Randolph street fully taxes the capacity of the houses in which they are grown, for they rarely are to be seen in any quantity, being sold and shipped upon their arrival from the greenhouse. The firm certainly deserve credit for their great enterprise in gathering together the largest collection in the middle west and supplying the trade with these, the most beautiful flowers of nature.

FISHKILL-ON-HUDSON, N. Y.—Benjamin Hammond is getting a good rest at Mackinac island.

CHRYSANTHEMUMS

Chrysanthemum White Gloria.

Chrysanthemum White Gloria, which we illustrate, is a sport from Gloria, indentical in every particular with its parent except color, which is white with a slightly creamy cast. Elmer D. Smith & Co., sponsors.

Why Chrysanthemums Blooms Wilt.

Having answered the question, "Why do chrysanthemum blooms wilt?" several times during the past few weeks, suggestions to others may be helpful. The prime cause is due to cutting before the blooms are fully matured. The petals ripen the same as the foliage when permitted to develop to their fullest extent, and when thus treated and stored in water a few hours there is little danger from this defect. Too nitrogenous food will also make them soft and lack of air has in a degree the same effect.

Some varieties lack in substance, and sometimes suffer when properly grown if subjected to drafts and the heated atmosphere of living rooms. It is advisable to store all blooms in water in some cool place at least twenty-four hours before disposing of them. They are then in the best condition to withstand the adverse surroundings to which they are likely to be subjected.

Varieties which are inclined to show the open center should be cut before they are fully finished and while this does not add to their keeping qualities it prevents this objectional feature.

It is a great temptation to be first on the market with each successive variety, but it is a question if undeveloped blooms bring the best returns. Full development gives greater diameter and depth, which makes finished blooms, and to our mind those which are not allowed to remain until they have reached their full beauty are unsatisfactory to the grower, wholesaler and consumer alike.

ELMER D. SMITH.

Diseased Chrysanthemums.

ED. AMERICAN FLORIST:—

I forward you leaves of chrysanthemums which are diseased. It starts with a brown streak and extends through the leaf, turning the leaf brown and causing it to be nearly transparent. Can you inform me what the trouble is? What is the best remedy to use? G. C. L.

Indiana.

The leaves of chrysanthemums which were forwarded by "G. C. L." show mines of what may be called the chrysanthemum leaf-miner, known scientifically as Phytomyza chrysanthemi. The only remedy which we have ever found satisfactory is pulling off and destroying the infested leaves as rapidly as the mines are discovered. The writer has studied a related species which attacks parsnips and similar crops, and has noted that the miner always shows a fondness for plants which run to seed. I would advise the trial of a spray of kerosene emulsion or of carbolized kerosene emulsion. This is prepared by adding to one pound of soap boiled in one gallon of water, one gallon of crude carbolic acid, and diluting the whole with from 35 to 50 parts of water. These applications would act as deterrents. C.

Playgrounds for the City Child.

Paper read by Sidney A. Teller, Chicago, before the Wisconsin State Horticultural Society at Oskosh, Wis., August 17, 1911.

The first American child had the chance, right and opportunity to play. The young American Indians enjoyed unlimited playgrounds and supervised play. Physical development was an important factor in the education and training of the child. With the civilization of America and the growth from the rural village to the cosmopolitan city we have made progress in all things except proper provision for places for children to play.

Why should we have playgrounds and supervised play? Would not the streets, alleys, vacant lots and back yards do? All these things at their best are makeshifts and lack the two greatest factors in the value of a playground, supervision and the social and civic emphasis to the play. Streets are not a safe place, neither for life nor morality, and delinquency starts with degenerated street play. The "gang" is an expression of unsupervised street play and is known for the bad things which it does. The street is bordered by saloons and other undesirable places for the child's environment, and the "vacant lot" is usually full of debris and filth, making it a poor place for children to play. Alleys are the places for garbage and wagons and the back yard too small for the social group. The child who plays alone develops the spoiled child, one who does not know how to either share playthings or learn the value of being part of a team or side. The large parks are usually too far away, for children will not go over a half mile to play and the large parks are usually full of "keep off the grass" signs and are built to admire and not to use. These may do for stiff, formal play on Sundays or when the parent can be with the child, but for spontaneous, wholesome play the child wants a playground equipped with playthings, play opportunities and a play leader as well as other play-fellows.

Play is a serious thing in the life and development and is the fundamental right of the child. It is the inalienable right of "life, liberty and the pursuit of happiness." The first civic expression comes on the playground. The sandpile republic precedes the public school and the junior citizen of three or four years of age learns to build a city out of sand houses, with other children, on the sandpile. The playground becomes the outdoor schoolroom, open and used after school hours and during the long school vacation.

CATTLEYA LABIATA AT POEHLMANN BROS. CO., MORTON GROVE, ILL.

Under the guidance of a play leader, the old "gang" becomes a "team" and the old impulse of the boy to do things is given a good and proper outlet. The degenerated street play and games take on a new aspect and we give back to childhood that of which the city has robbed it. Health and morality replace delinquency and disease, and fair play means ethical development.

The child of today is the citizen of tomorrow and the greatest investments we can make is in good citizenship. Land values are increasing and we buy land for factories and railroads before it rises in value. Why not plan cities with reference to the child and see that sufficient playground, the lungs and breathing spots of the city, are purchased now before the problems of congestion and transportation are too serious? A city is judged by its children and the primal thing is the development of the play instinct. Children can not plead or plan for themselves. We, the adult citizens of the community, men and women, demand that the child be protected in its rights to play. We ask conservation in child life, the greatest natural asset this country has. We ask for the welfare of the child, not more hospitals, juvenile courts and jails, but the great factor of prevention, playgrounds. Let a little child lead us and the problems will not seem so hard. There is no man so bad that he would not make a child happy. There is no city that is progressive that is not providing playgrounds, and more than 500 cities in the United States have them today. Thousands of children ask for fair play from their parents. Their plea is for playgrounds now.

Carnation Plants Dying.

ED. AMERICAN FLORIST:

We purchased plants of Rose Pink Enchantress four weeks ago which seemed to be in first-class condition upon arrival and planted them right away. The bottom leaves are dying, the buds drying up and we are losing many of the plants. Can you inform us what is the cause? Could you inform us what would be the best chemical fertilizer on these plants, as we are afraid to use stable manure?

Indiana. W. S.

If these plants were not overheated or dried out in travel and did not show it plainly upon arrival then the indications point to an over rich soil condition. Too much water before the roots have got a thorough root hold of the soil will cause the same trouble. Examine the condition of the soil around the plants below the surface to see if the trouble can be traced to too much or not enough moisture. It is a very difficult matter to solve a problem of this sort unless you are on the spot to see the trouble as it is. Carnation plants left in the field to as late a date as these were and the buds allowed to come are very difficult to transplant and the check to them is severe. Let the principle aim be to get the roots well hold of the soil by keeping the soil sweet and open, and do not try to do any forcing. Referring to the best chemical fertilizer, it is altogether too early to start any feeding and unless you know thoroughly how much of the chemical fertilizer your soil requires I would advise you to stick to the stable manure.

C. W. JOHNSON.

CHRYSANTHEMUM WHITE GLORIA.

OBITUARY.

Robert MacMillan.

Robert MacMillan of MacMillan & Co., Greenwich, Conn., died at his home October 9, aged 51 years. Mr. MacMillan was born in Scotland and at the age of 22 came to this country and settled at Boston. He later went to Pearl River, N. Y., where he acquired a reputation as a grower of chrysanthemums and mignonette. Six years ago he opened up a florist establishment at Greenwich, Conn, and had built up a prosperous business. Five months ago he was rendered helpless by an ailment that was then, as it has been since, puzzling to his physicians. He was a member of Red Men and Knights of Pythias. He is survived by his wife. The funeral services were held Thursday, October 12, and the interment was in Putnam cemetery.

Charles A. Fox.

Charles A. Fox, one of the oldest florists of Baltimore, Md., died at his home, 1202 Bolton street, Saturday, October 14, aged 80 years. For more than half a century he had conducted a florist's shop at Bolton and Dolphin streets. He is survived by his wife, two sons and three daughters. The funeral services were held Tuesday, October 17, requiem mass being celebrated in the Church of the Immaculate Conception, and the burial in Bonnie Brae cemetery.

GREENWICH, CONN.—Alexander Mead & Son moved into their new store on Greenwich avenue, September 28.

OLEAN, N. Y.—E. A. Llewellyn has commenced the erection of another large greenhouse, part of which will be used as a show house. A basement for the storing of cut flowers is also being constructed.

ROCHESTER, N. Y.—Articles of incorporation have been granted to Campbell the Florist with a capital of $1,000, and three directors, Edward S. Campbell, Jessie P. Campbell of Rochester and Charles Gallery of Gates.

GREAT BARRINGTON, MASS.—Edward Dolby, who conducts a greenhouse here, was married October 19 at North Adams to Miss Jessie Chase of that city, and the couple will make their home on Humphrey street after the wedding trip.

THE premium list of the fifth fall floral exhibition of the St. Louis Horticultural Society to be held jointly with the Chrysanthemum Society of America at St. Louis, November 7-11, is issued. Intending exhibitors should procure a copy from Otto G. Koenig, 6473 Florissant avenue, St. Louis, Mo., and carefully note the dates upon which the several classes are to be staged.

Society of American Florists.

DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the roses Genevieve Clark and Sunshine by Jackson & Perkins Company of Newark, Wayne County, N. Y., becomes complete.

H. B. DORNER, Sec'y.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Elmer D. Smith announces the committees to examine new chrysanthemums for the ensuing year which are as follows:

Boston—Wm. Nicholson (chairman), James Wheeler, Alex. Montgomery. Ship flowers to Boston Flower Exchange, C. Park street, care of chairman.

New York — Eugene Dailledouze (chairman), Wm. H. Duckham, A. Herrington. Ship flowers to New York Cut Flower Co., 55 Twenty-second street, care of chairman.

Philadelphia—A. B. Cartledge (chairman), John Westcott, S. S. Pennock. Ship flowers to A. B. Cartledge, 1514 Chestnut street.

Cincinnati—R. Witterstaetter (chairman), James Allen, Henry Schwarz. Ship flowers to chairman, Jabez Elliott, Flower Market, care janitor.

Chicago—J. B. Deamud (chairman), T. E. Waters. Ship flowers to J. B. Deamud, 160 N. Wabash avenue, Chicago.

Shipments should be made to arrive by 2 p. m. on examination days to receive attention from the committee. Must be prepaid to destination and an entry fee of $2.00 should be forwarded to the secretary not later than Tuesday of the week they are to be examined, or it may accompany the blooms.

Seedlings and sports are both eligible to be shown before these committees, provided the raiser has given them two years' trial to determine their true character. Special attention is called to the rule that sports to receive a certificate must pass at least three of the five committees.

The committees will be in session to examine such exhibits as may be submitted on each Saturday during October and November, the dates of which will be October 7, 14, 21, 28, and November 4, 11, 18, 25.

C. W. JOHNSON, Sec'y.

Reporting Exhibitions.

To save time and trouble in reporting the awards at exhibitions, correspondents should adopt the one correct style throughout, which is given below on this sheet. It will be noted that the addresses of firms appear only once, that the addresses of gardeners of private exhibitors appear only once and that the awards follow (not precede) names of prize-winners. Referring to the time of any event, give the date of the month, not the days of the week.

AWARDS.

Cut Blooms—Chrysanthemums.

Fifty yellow—Chas. H. Totty, Madison, N. J., first, with Robt. Halliday; E. G. Hill Co., Richmond, Ind., second; Elmer D. Smith & Co., Adrian, Mich., third.

ROSES IN SHORTER SUPPLY.

Business the first part of the week was rather slow, as there was but very little funeral work which made things rather quiet. There are lots of chrysanthemums coming in at the present time and this eases up the demand for carnations and roses, which have commenced to shorten up considerably. There are plenty of lilies and long stemmed American Beauties coming in at present, and enough lily of the valley to fill all orders. There are also roses enough to meet all demands, the call being mostly for short-stemmed stock. The carnations coming in at present are selling rapidly and are of a nice grade.

NOTES.

The plans for the decorations at the flower show to be held in the Auditorium November 13-19 are about completed. As outlined by August Kellner, it will picture a large park, with four shower fountains occupying knolls equidistant from a central conservatory. The walls will be draped with boughs and greens, and the ceiling with a canopy representing the heavens with twinkling electric stars. Four pergolas will be erected at the entrances.

Theodore Van Bech, for many years connected with the vegetable and flower business in Milwaukee growing stock for the local dealers, died Friday, October 20, at the age of 68 years. Mr. Shadweiler, a son-in-law, has charge of the carnation plant and T. VanBeck will conduct the greenhouse business as before.

Holton & Hunkel Co. is cutting some fine chrysanthemums and American Beauty roses. Some extra fine pompon chrysanthemums are selling well and they expect to have a fine lot of all varieties in the near future.

Aug. Kellner says he is a busy man at present taking care of his landscape work and decorating. He had a large decoration at the Auditorium at a reception to the superintendent of public schools which used a large amount of flowers and green.

C. C. Polworth Co. reports business as good. This firm is cutting some very fancy chrysanthemums which are selling readily. They are also cutting some fine carnations and roses.

W. C. Zimmerman is well pleased with business to date. He has invested in a new delivery outfit in the line of a Ford automobile which will be on the job in a few days.

J. M. Fox & Son moved into their new quarters October 22 and are very much pleased to get into their new place, where they are ready for business.

Miss Nora Piehl, the young lady formerly with the Loveland Floral Co., is now in charge of the Flora Bonn floral department.

The E. Welke Co. reports business as satisfactory and is contemplating the purchase of an automobile for delivery purposes.

G. Rusch & Co. report good business, they are receiving some fine carnations and chrysanthemums and some Hudson River violets which are selling well.

Edlefsen & Leidiger Co. reports business brisk, having had considerable orders for funeral work to ship out.

M. A. McKenney Co. report business good, their store now being all complete and very attractive.

The bowling scores this week were as follows:

P. Nobos	153	141	191	L. Manos	89	119	112
G. Hunkel	123	138	174	W. H'l'd'y	108	120	136
A. Hare	105	135	108	R. Lietz	98	128	90
D. Eggeb't	125	92	175	R. Currie	141	124	
W. Shmitz	143		169	F. Holton			152
G. Pohl	133	133	113				

G. R.

Sedalia, Mo.

The Missouri State Fair was held in this city September 30-October 6, and as President Taft was the honored guest upon the opening day, a large attendance was present. The Archias Floral Co. were large winners of premiums in all classes, being awarded first prize for general collection of greenhouse plants, most artistic designs, Bride and Bridesmaid and Perle des Jardins roses, white and pink carnations, and largest and best display of farm and garden seeds.

The table decorations at the breakfast at the Sedalia Country Club and the dinner at the residence of C. E. West in honor of President Taft was very beautifully arranged by the Archias Floral Co. and consisted of lily of the valley and maiden hair fern at the former, and American Beauty and Mrs. Taft roses and decorative plants at the dinner. A.

Shenandoah, Ia.

Trade has been fairly good, especially in funeral work, there having been many orders from the twenty surrounding towns. The backward spring was followed by early, hot, dry weather which shortened the season for plant trade, and the unusual summer drouth cut down the summer supply of flowers until the fall rains when there were more than was expected. The first killing frost occurred October 21 and we shall have to depend on greenhouse stock from now on.

The Shenandoah greenhouse has a fine lot of chrysanthemums and a good supply. A new reinforced concrete chimney has just been completed, circular in shape, 45 feet high with a diameter of 22 inches, enclosed in eight-inch walls. S.

Northern Indiana Florists' Association.

The Northern Indiana Florists' Association held its quarterly meeting at Fort Wayne October 18. The regular business being transacted, a committee was appointed to prepare a programme for the next meeting, to be held at South Bend, January 17, 1912, and reported as follows: Paper on "System," by W. W. Coles; "How We Conduct Our Retail Business," by J. S. Stuart; "Carnation Growing," by W. J. Vesey, Jr.

A poll was taken to ascertain the improvements made by the members of the association during the year, which was as follows:

Connor-Ulsh Flo. Co., rebuilding	$10,000
Muncie Floral Co., improvements	100
Ten Eyck & Son, rebuilding	1,000
Frank & Sons, new houses	15,000
Jno. S. Leach, new houses	1,500
Johnson Flo. Co., improvements	100
Beiberick & Weber, new house	600
Terrill & Son, new house	500
King, Winona Lake, improvements	200
W. W. Dederick, new house	800
Stuart & Haugh, rebuilding	3,000
W. H. Troyer, new houses	8,500
W. J. Vesey, Jr., glass	2,000
Wagoner Flo. Co., improvements	500
Total	$43,800

Fitting resolutions were adopted on the death of Clyde Isenberger, who had passed away since the last meeting, and were ordered spread on the minutes and a copy of the same mailed to the bereft wife.

The display of flowers on a whole was very good and made a fine showing, and the committee on exhibition submitted the following awards:

Chrysanthemums — Clementine Touset, W. J. & M. S. Vesey, first; Muncie Floral Co., second. Virginia Poehlmann, W. J. & M. S. Vesey, first. Omega, W. J. & M. S. Vesey, first; Flick Floral Co., second. E. G. Hill Co. showed fine new early pink and white chrysanthemums; Kinyon Bros., a vase of mixed blooms, and W. J. & M. S. Vesey, well grown pot plants.

Roses—American Beauty, Bassett & Washburn, first. Kaiserin Augusta Victoria, Muncie Floral Co., first. Richmond, W. Frank & Sons, first; Bassett & Washburn, second; W. J. & M. S. Vesey, third. Killarney, W. Frank & Sons, first; Bassett & Washburn, second. My Maryland, W. J. & M. S. Vesey, first. White Killarney, W. Frank & Sons, first; W. J. & M. S. Vesey, second. Brides and Bridesmaids, W. Frank & Sons, first; Kinyon Bros., second. Mrs. Aaron Ward, E. G. Hill Co., first. E. G. Hill Co. exhibited a vase of Sunburst, which was the finest vase shown. Kinyon Bros., a vase of mixed roses.

Carnations—Enchantress, W. J. & M. S. Vesey, first; Beiberick & Weber, second; W. H. Troyer, third. Victory, Beiberick & Weber, first. White Enchantress, W. J. & M. S. Vesey, first; W. Frank & Sons, second; W. H. Troyer, third. W. Frank & Sons showed good White Perfection, White Wonder and a red seedling of merit.

W. J. & M. S. Vesey's table of orchids in variety were fine and attracted a great deal of attention. They also showed pans of Nephrolepis Scholzeli, N. Whitmani and Bostoniensis. Their fine banks of palms added much to the display. The Muncie Floral Co. made a good display of poinsettias, Asparagus plumosus and Sprengeri, painted labels, pot covers and bulbs.

A. J. WAGONER, Sec'y.

Lawrence Cotter.

The Genial Manager of the Lakeview Rose Gardens, Jamestown, N. Y.

Kennett Square, Pa.

J. Monroe Palmer has about completed four houses 20x140 feet, Lord & Burnham construction, in which they intend to grow carnations.

Roy Mercer has built a house 28x100 feet, King construction, and will have it planted with tomatoes very soon.

Way Bros. have completed and planted a new Lord & Burnham house 18x100 feet to cucumbers.

Y.

HAVERHILL, MASS. — Nathaniel W. Hannaford, of Portland, Me., and Waldo I. Chase, of Grafton, will open a flower shop at 57 White street under the firm name of Hannaford & Chase.

BASSETT & WASHBURN,

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois

Chicago.

A MUCH SHORTER SUPPLY.

The excessive amount of rainy and cloudy weather is not only aggravating to baseball fans who are so anxious to see the final outcome of the season in the east, but with less than one-third of the days in which the sun shines the rose and carnation growers are beginning to worry, for the cut has reduced materially, and notwithstanding the immense quantities of chrysanthemums that are now on the market, there is demand for all the roses and carnations that arrive and the prices of these flowers are gradually rising. Ordinarily during the chrysanthemum season the prices of both roses and carnations fall, but they not only have held their own this year, but have advanced. Sales of carnations of first-class quality are reported at $4.00 per 100, which is a mid-winter figure. Chrysanthemums also are coming in peculiarly, the early mid-season and late varieties being sadly mixed. Whether the unusual weather is the cause of this it is hard to state, but there are still to be found on the market Golden Glow, Clementine Touset and other early kinds right beside of Col. D. Appleton and other midseason varieties, and one house has W. H. Chadwick, one of the latest whites on sale. Chrysanthemums can be had in all sizes, grades and quality, from the pompon to the large blooms fit for the exhibition table, and there are some noble specimens of the latter to be procured, which are bringing good prices, $5.00 a dozen being quoted for some. Elegant blooms of Clementine Touset, Chrysolora and R. F. Felton are being offered and are finding purchasers as soon as placed on sale. American Beauties are not any too plentiful, the demand fully equalling the supply, and the call for all the roses is not far behind the receipts, there being no accumulation of this stock and but little waste. Carnations of the best quality are sold as soon as received and the only stock left is the short-stemmed and inferior grades. Orchids are selling well, the demand being fully equal to the receipts, and but few can be seen after the orders are picked out and shipped. Violets are much improved, but the call for them is as yet not large. Lilies are of excellent quality, but with the large white chrysanthemums in the market that can be used in large work and decorations, the call for these is not heavy. Lily of the valley can be obtained in excellent quality and is having a good request. Bouvardia of excellent quality is to be seen and is being picked up by the buyers as fast as shown. Dahlias and cosmos are still to be had in quantity, but as one dealer puts it, "The trade is getting sick of outside and coarser stock," and they are used only in the cheaper work and in the window displays. The stock of greens is large and of excellent quality, the only shortage being in bronze galax, of which there is no great quantity on the market. A frost on the morning of October 24 cut down nearly all the outside stock, and it will be but a few days when the last will be seen.

NOTES.

Wietor Bros. will soon be cutting heavily in chrysanthemums and Killarney, White Killarney, Richmond, Uncle John and American Beauty roses. The latter are arriving at the store in very good condition, with fine color, foliage and stems. The demand for this rose has been very heavy of late and this firm was among the fortunate ones to have a large supply of choice stock.

Chas. H. Totty, Madison, N. J.; Baur & Steinkamp and Smith & Co., Indianapolis, Ind.; and Elmer D. Smith & Co., Adrian Mich., will have exhibits at the chrysanthemum show that will be held at the next meeting of the Florists' Club at the Union Restaurant, Thursday, November 2. E. G. Hill Co., the well known growers of Richmond, Ind., will also be on hand with an exhibit and will show some new roses and chrysanthemums.

Peter Pearson is looking forward to a good profit from the sale of his stock in his greenhouses on Gunnison street, which is now in very fine condition. He sells entirely at wholesale and grows nothing but greenhouse plants and hardy perennials.

Bassett & Washburn are showing an extra fancy grade of R. L. Felton chrysanthemums that are attracting much attention and meeting with ready sale from the buyers who patronize this well-known house.

F. S. Ayers left October 26 for northeastern Texas to visit his mother and assist her in settling up an estate that has been in litigation for some time past.

G. C. Peterson of Escanaba, Mich., passed through the city this week en route to his home after returning from a most enjoyable visit in the Dakotas.

J. A. Budlong is filling a large number of orders for a fine grade of pink bouvardias and a large quantity of smilax.

W. F. Kasting, Buffalo, N. Y., treasurer of the Society of American Florists, was a most welcome visitor this week.

President Asmus of the Society of American Florists is suffering considerably with rheumatism.

Otto Goerisch of the A. L. Randall Co. is back from a successful business trip to Milwaukee.

Wm. F. Schofield, North State street, has just completed work on a new store front.

POEHLMANN'S FANCY VALLEY
EXTRA FINE HARRISII LILIES
We make these a specialty. Can supply them all the Year. Once tried you will have no other

The Des Plaines Floral Co. has met with much success with the new varieties of carnations that they are growing this year and is more than satisfied with the results obtained for so early in the season. Beacon, the old standby, is doing its best at this establishment and the proprietors are particularly proud of the splendid blooms that they are shipping to this market. Harry Blewitt, the senior member of the firm, says that the demand for carnation plants is very good and that his firm expects to clean out the surplus that they still have on hand.

Otto Wittbold, superintendent of the Geo. Wittbold Co.'s greenhouses and nursery at Edgebrook, says that business is picking up rapidly and that the shipping trade is better than it has been for many months past. The sales in the cut flower department are also very large, trade at the stores on North Clark street and Buckingham place in this city being very good.

The Chicago Flower Growers' Association has a fine assortment of all seasonable stock, the growers now sending in an exceptionally fine grade of roses and carnations. Some very handsome Chrysolora chrysanthemums from Elmer D. Smith & Co., Adrian, Mich., were displayed this week, which were quickly disposed of to the buyers.

Stollery Bros. have had some very large decorations the past week that helped out considerably to offset the general quietness that prevails in many quarters at present. It took two autos to hold the many funeral designs that this firm delivered to the home of a well-known resident that passed away on the south side last week.

D. E. Freres, who handles a part of Adam Zender's choice stock, is supplying his customers with a fancy grade of Richmond, Killarney and White Killarney roses. Miss Tonner, who has a stand in the same store, is showing a very good grade of cosmos and carnations.

Zech & Mann are among the fortunate ones to have a large supply of bronze galax to supply their many customers. The demand for this has been very good and the firm expect to have but little trouble in disposing of the supply that yet remains on hand.

W. S. Garland takes great pleasure in showing his friends through his carnations houses and he has good reasons to feel proud of his stock, for it is in exceptionally fine condition and promises a large cut for the coming season.

Fletcher C. James is putting the finishing touches on his handsome new greenhouse, 34x125 feet, which he is using for the culture of sweet peas and chrysanthemums.

Work is progressing rapidly on the addition and improvements that the Geo. M. Garland Co. is making to their factory in Des Plaines.

Hunt Bros. of Park Ridge are cutting a fancy grade of chrysanthemums and a fair supply of sweet peas of a medium grade.

E. S. Endress, Lincoln, Neb., has placed an order with the John C. Moninger Co. for material for a new house 28x400 feet.

Felsch Bros. of Maywood have added 3,500 feet of glass this season to their rapidly increasing bedding plant trade.

Kyle & Forster are receiving a very good grade of seasonable stock with Killarney roses showing up exceptionally well.

Geo. F. Faber of Faber Bros., Kankakee, was in the city on October 23 on a combined trip of business and pleasure.

H. C. Blewitt will use the Garland construction in the new greenhouse which he will build next season.

The Des Plaines Violet Co. is building a new shed for the boiler that will be installed this week.

John Fink is recovering from a sprained leg.

August Poehlmann scored 42 October 21.

WIETOR BROS.

162 N. Wabash Ave., CHICAGO.

H. V. Hunkel, the hustling manager of the Milwaukee Flower Show, is keeping right after the local growers, urging them to exhibit at their show which will be held in the Wisconsin city on November 15, 16, 17, 18 and 19, inclusive. There is considerable talk among the local florists in regard to attending the show in a body and it is expected that something will be done in regard to this at the next meeting of the Florists' Club.

George Fischer says his firm, the H. A. Fischer Co., will have a grand opening at their new store in Kalamazoo, Mich., on October 28 when every visitor will be presented a suitable souvenir in honor of the occasion. The members of this enterprising firm are proud of their new quarters and take great pleasure in telling their many friends about the finest store in that part of Michigan.

The Chicago Carnation Co. is supplying their customers with an extra fancy grade of White Wonder, Washington, Mayday and other choice varieties of carnations. Superintendent Olsem is expecting great things from his crops this year, for they are in unusually good condition and promise heavy cuts for the season.

Canger & Gormley's prettily arranged windows are attracting the attention of the public who happen to pass by their store. W. Gray, who recently accepted a position with this firm, is proving to be a most valuable assistant when it comes to arranging the high-class decorative work.

A. Piddington, gardener for E. C. Waller, is spending his vacation at Des Plaines, assisting his friends, the proprietors of the Des Plaines Floral Co., with a lot of work that they have on hand at present.

Frank Garland has about completed work on his piping system and is now devoting his spare time experimenting on a new grate that he intends to use in his boilers this fall.

Miss Ida Evert has leased space in the Batavia Greenhouse Co.'s store at 30 East Randolph street, and is now engaged in disposing of her brother's stock.

Have you noticed how the Cub fans hide away in some remote corner when they read the White Sox souvenir edition of the Chicago American?

Ignazc Stackowiah says that the L. Hrudka Pottery Co. is very busy and that the demand for pots is keeping pace with the increase in glass.

H. Van Gelder of Percy Jones, Inc., is receiving very large shipments of carnations which are greatly appreciated by his many customers.

Kennicott Bros. Co. is receiving a very fancy grade of chrysanthemums from Norby & Hoefle, the enterprising growers of Des Plaines.

Peter Reinberg's stock of roses and carnations is arriving at the store in very good condition and is sold at a very early hour.

C. W. McKellar's shipments of orchids disappear almost as soon as they reach the store, the demand being unusually heavy.

Vaughan & Sperry are enjoying a very good season and report both the local and shipping trade very satisfactory.

F. A. Longren, E. H. Hunt's popular traveling representative, started out on another business trip this week.

John Michelsen of the E. C. Armstrong Co. is finding a ready sale for his choice Hudson River violets.

Sol. Garland is cutting some very choice blooms of chrysanthemums that are bringing fancy prices.

Martin Reukauf, with H. Bayersdorfer & Co., Philadelphia, Pa., called on the trade here this week.

George Reinberg is cutting from a new crop of Richmond roses.

Visitors: W. F. Kasting, Buffalo, N. Y.; J. J. Hess, Omaha, Neb., returning from Wisconsin; E. H. Cushman, Sylvania, O. Thos. H. Joy and wife, Nashville, Tenn., on their wedding trip.

Chicago Bowling.

The Orchids and Violets each won three straight games on Wednesday evening, October 18, when the former defeated the Roses, and the latter the Carnations. Wm. Graff bowled 221 in the second and Victor Bergman 206 in the last game played. The line-up on October 25 was Carnations vs. Roses and Orchids vs. Violets.

The following table shows the number of games won and lost by each team to date:

	Won	Lost		Won	Lost
Orchids	9	0	Roses	2	7
Violets	6	3	Carnations	1	8

Individual and team scores for games played October 18:

Peter Reinberg,

30 E. Randolph St., CHICAGO.

Philadelphia.

DAHLIAS STILL PLENTIFUL.

Everybody, but the growers particularly, are looking for a heavy frost to kill off the outside stock, and especially the dahlias, which they think have held the field quite long enough. They have never been seen in such quality and quantity before. Some of the new French sorts are wonderfully fine and should find ready sale at good prices if they are produced in any quantity. At this writing, October 23, after five days of continuous rain it has cleared and the sun has shone all day and with a clear sky frost may be expected any night. The dahlia will not be missed as chrysanthemums are now coming in quantities and will dominate the market for the next month. The quality of the stock is fine. Pacific Supreme, Robert Halliday, Early Snow, Mrs. Henry Robinson, Cremo and Ivory are leaders with a number of other sorts from last week. The real large ones will be here in a few days. There are roses in great quantities particularly Killarney and My Maryland, of which two varieties all growers appear to have in crop. Richmond is also coming in good shape. The new ones Melody, Mrs. Taft and Harry Kirk are good sellers making variety for the bunches for the debutantes. Carnations are improving but will not forge ahead much in competition with the chrysanthemums. Violets are quite a bit better and in good demand. Cattleyas are sold at a price that they can be handled in quantity lots and the quality is fine. Lily of the valley of high and low grade keeps about in pace with the demand. There seems to be quantities of it but light shipments for a day or two get the stores on the anxious bench at once and it is seen how necessary it is to the business. Cosmos is to be had by the wagon load, most everybody carries a bunch home as it is to be had at all the street corners and has been very fine until the recent rains which battered it a good deal.

NOTES.

Louis Berger, who is the agent in this country for the Van Waveren & Kruijff Co., bulb growers of Holland, will occupy a portion of the Berger Brothers' new establishment, 140-142 North Thirteenth place. The Messrs. Berger will move their commission business and occupy the new quarters about November 1st.

The new box trees arrived last week and window box work is now in full swing. The Robert Craig Co. imported a fine lot as did also Yates & Co. of Chestnut Hill. They say the trade is buying them up fast, as the crop is short and while not as good value can be given as last season they must have them for the orders.

The Thilow committee are working hard in preparation for the coming chrysanthemum show. Some novel effects in arrangement of the exhibits and the proper setting in the decoration of the hall will be shown. Let everybody give them a hand and make the exhibition a grand success.

Palm stock ferns and other foliage plants are going out fast, particularly for distant points, H. A. Dreer, the Jos. Heacock Co., The Robert Craig Co., Chas. D. Ball and Lemuel Ball estate all report shipping trade as being excellent and showing quite an increase over last season.

Jos. G. Neidinger's ivory toned baskets have made quite a hit. A little genius and a little paint and other fixings gotten together in the right proportions are sure to produce results and Mr. Neidinger is to be congratulated on his success.

Eddie Fancourt of the Pennock-Meehan force is sending in large orders for fancy ribbons. P.-M. quality ribbons have all the hues of the rainbow and they are to the fore in all the good stores of the country.

The Leo. Niessen Co. are showing some excellent American Beauty roses at this time, almost mid-winter quality. An auto car is soon to be added to the delivery service.

M. Rice & Co. are having quite a run on their new cycas. They are the nearest imitation to the fresh cut natural leaf that has yet been offered.

New Orleans.

WARM AND RAINY WEATHER.

The weather here for September and October has been something unusual, raining almost every day, and the temperature as hot as in July and August. Consequently the vegetation has been quite vigorous and to some extent this has been detrimental to the chrysanthemums, which are somewhat late this year and the stock will fall short for November 1 (All Saints' day). Business, in a general way, is at a standstill at present, as it has been too warm for any kind of renovating work, and the gardeners are backward in their fall work. The florists are busy preparing for a brisk trade for All Saints' day, and the demand is for a better grade of flowers than heretofore. Our summer tourists are returning quite fast and business promises to be very brisk this winter. The social season commences with the opening of the French opera next month.

Henry Krack, the gardener for Lawrence Fabacher, made one of the finest house and church decorations ever seen in this city on the occasion of the marriage of Mr. Fabacher's daughter.

Abele Bros. have a fine stock of assorted plants for the fall and winter trade. Their chrysanthemums are about the best in the city.

The Metairie Nursery Co. have moved to their new quarters on Carondelet street, which is quite an improvement on their old store.

Chas. Eble has a most beautiful display of fancy plants and flowers in his elegant store under the Grunewald hotel.

Robt. Reinecke has bought 40 acres of land in St. Bernard and will soon start a nursery on a large scale.

C. W. Eichling is enjoying good business and is well prepared for anything that comes along.

James Newsham has a fine assortment of orchids in bloom and is doing a good business.

U. J. Virgin is still holding his own in arecas and other palms for decorative purposes.

C. M. Wichers of Gretna contemplates taking a better half in the near future.

John Renck has put in a new hot water boiler for his two houses.

D.

Fort Worth, Tex.

We, in all probability, have had one of the hardest seasons that has ever been experienced in the florist trade in Texas, and we are now starting in apparently on our third year's drought—something unheard of in this section of the country. We have had some rain, but mostly local showers, and at no time within the last twenty-four months has the ground been wet, that is, a thoroughly good season for growing. Yet, with all that, where good cultivation has been kept up, plants have done remarkably well with now and then a little shower to supply surface moisture, and it seems almost incredible to say that trees, shrubs and roses have made the average growth. Of course there has been heavy losses, but we should compliment ourselves that the prospects are as good as they are.

Texas is a wonderful country. She may not promise very much, but when it comes to the final round-up she is always there with the goods. We feel safe in saying there is no state in the Union which will stand the dry weather that Texas can and then produce the crops.

The flower trade is very quiet. A little funeral work occasionally and then a few weddings. However, the prospects look good for another "banner" year.

D.

Denver.

The florists in this vicinity, at least a large majority of them, are fairly well content with the present business conditions. The weather has been pleasant, the demand for flowers good, and prices on the whole satisfactory. The wholesale business has broken all previous records, September's increase being very large, and judging from present conditions October will run it a close second.

The Elitch-Long Flower Store reports an excellent business in all branches, particularly in decorative work. Among other work they were awarded for the second time the decorating of the big Auditorium for the annual Electric Show. This was an elaborate affair, the decorations consisting of spruce boughs and pots of white and yellow chrysanthemums, making a very pleasing combination which elicited much praise from the press as well as the general public.

L.

Binghamton, N. Y.

Business in the city and adjacent towns has been good all summer, showing an increase of 20 per cent over last year, and the fall trade has opened up nicely with prices almost as good as in the winter. There are not enough roses grown here and carnations about equal the demand, but there were far too many asters. The trade from the small towns is good and there is considerable funeral work. There is some call for bulbs, but not as much as usual.

One of the large growers who supplies the florists in this city with roses and carnations is selling the same stock to one of the department stores, which retail the same at about the same price that the florists have to pay the grower. This seems hardly fair to the florists.

G.

Extra Fancy 'Mums

WHITE. YELLOW. PINK.

LARGE SUPPLY OF BEAUTIES

Roses, Carnations, Valley.

In fact, we are well fixed on everything mentioned in the price list below:

CURRENT PRICE LIST

AMERICAN BEAUTIES	Per doz.

VAUGHAN & SPERRY

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

Tacoma, Wash.

The Tacoma florists have had excellent business continuously to within the last two months. There has been a large quantity of outdoor flowers lately, but Jack Frost has been getting busy and now that so many outdoor flowers are cut down we notice an increase in demand. Carnations are scarce and rather inferior in quality. Good roses are never in sufficient supply and many come from Portland or Cle Elum, Wash. Some few chrysanthemums are to be seen. Good smilax and asparagus are scarce as usual.

NOTES.

S. L. Harper has booked a number of orders for his new rose which is being disseminated this year by the California Rose Co., of Pomona, Calif. This is a yellow sport of Souvenir de President Carnot, named by the originator Golden Freedom. In this climate the rose is simply grand.

A visit to the local greenhouses discloses the fact that no new carnations, roses or chrysanthemums are to be seen. We believe the newest in the way of carnations is Beacon.

H. W. Manike has his stock in excellent condition, with good chrysanthemums in sight. Carnations in the best of health, with some very good flowers of Enchantress.

Watson, Florist, had a fine lot of asters and business has been good right along. They are the only florists now at the Public Market.

California Florists report good business right along. They arranged the decoration at the Tacoma hotel for the Taft banquet.

Tacoma is fast becoming the greatest rose city in the West and the rose society is doing much to help the good work along.

Headquarters for **ORCHIDS** and Fancy Stock

CHAS. W. McKELLAR,

162 N. Wabash Avenue, CHICAGO.

F. C. Smith says that stock is somewhat more abundant than customers.

H. H. Hinze has a very good lot of ferns.

S. L. H.

Nashville, Tenn.

Florists in this city report a rather dull week, with only a limited demand. Flowers have been fairly plentiful, and the quality is much improved. Chrysanthemums are coming in finely now, both white and yellow. There has been no frost as yet. Dahlias have been blooming beautifully and have served for many purposes, both as cut flowers and in funeral work. The long drawn-out fall has enabled all the growers to have their greenhouses in readiness, and all are fully prepared for the winter season.

NOTES.

The latest acquisition to the uptown floral stores is that of L. Haury & Son, who will soon be in full operation and ready for business. They have secured the beautiful store-room in the Tulane Hotel building, once occupied by the Geny Bros. The floor is tiled. They have spared no expense in fitting the store up in beautiful style. They have had installed a large refrigerator in the rear of the store and will have another display refrigerator near the front. Their stock of baskets and floral supplies, of which they will have the best and most up-to-date assortment, have not yet been installed. They expect to have a formal opening and there is no doubt they will do a good business.

A pleasant little romance in the floral world was the marriage last week of Thos. H. Joy, of the Joy Floral Company, to Miss Monica McGinnis, a popular young lady of the East Side. Young Mr. Joy for some months has been the popular manager of the floral store of the Joy Floral Company. He has many friends in the community, whose good wishes go with him in his marriage. Harold Joy, a younger brother, also assists in the store. These two young men have proven good managers.

M. C. D.

AMHERST, MASS.—M. B. Kingman has reopened his florist store in Hunt's block.

NEW YORK.—A break in the water main opposite the store of The Rosary Flower Co. on East Thirty-fourth street flooded the store, and stock to the value of $2,000 was ruined.

ALBANY, N. Y.—Amos E. Balfoort has displayed in his window trees of Ponderosa lemon bearing fruit that attract attention, the fruit being of unusual size.

GREENSBORO, N. C.—The J. Van Lindley Nursery Co. has erected a new greenhouse and has planted 21,000 carnation plants for this season's blooming.

The Chicago Flower Growers' Association

OTTO W. FRESE Gen. Manager.

Phone Randolph 5449.
176 N. Michigan Ave., Chicago

Buffalo.

SUMMER WEATHER, FLOWERS PLENTIFUL.

Weather that could not be surpassed in midsummer has been what we have had for the past two weeks. Consequently flowers have been plentiful. Chrysanthemums have tried in vain to replace dahlias, tritomas, cosmos and salvia, but Old Sol continues to shine, and while these flowers can be had outdoors it is still summer. Carnations and roses are fine and are in plentiful supply, so there has been no scarcity of flowers. Trade conditions have been good for October, any number of weddings of various proportions, together with debutantes, luncheons and several large dinners, have kept the florists quite busy and all feel satisfied with business so far this season. Funeral work has been quite heavy the past week.

NOTES.

The Wm. Scott Co. have got quite an idea for the public, that is, they have offered several prizes of chrysanthemums to the ones who get the most words out of the word "chrysanthemum." It will certainly make the high and public school scholars work to have flowers for Thanksgiving day. There are several prizes and it is an original idea with the boys.

Orchids are looking good in Buffalo at present. The Wm. Scott Co. have been cutting some fine ones and Chas. Sandiford, gardener to J. J. Albright, has a fine lot at his place and well worth a trip to see.

Stroh's Quality Flower Shop has a fine lot of pink cosmos which they bring in from outside and have flowering in good shape. They certainly are the finest that has been seen in Buffalo.

Visitors: P. Welch and wife of Boston, who have been making a trip from Ottawa and other eastern Canadian cities; Thos. Mansfield, Lockport; F. B. Lewis, Portland.

The flower department in the Wm. Hengerer Co. store has been discontinued, the firm needing all the space for their business.

W. F. Kasting has been called to Chicago on business. BISON.

Cincinnati.

OUTSIDE STOCK LOWERS PRICES.

Summer and fall flowers are still in the market and are playing havoc with some of the chrysanthemum prices. It is not that these prices are so very low but they are not quite all they should be at this time of the year. The prices on carnations are lower than at the corresponding time last year. The cut of white in this flower exceeds any of the other colors. In chrysanthemums, Glory of the Pacific, Virginia Poehlmann and Clementine Touset are the best that are offered in large quantities. Smaller lots of other good ones may be had. Estelle is a glut on the market. As soon as these are out, and that will be shortly, and the cosmos, dahlias and asters are frozen up, the market will clean up from day to day. Roses are good and sell very well, they seem to hold their prices nicely and everything of real quality moves quickly at the prevailing prices. The quantity of American Beauty offerings is shortening considerably. Other stock in the market includes lilies, violets, both single and double, lily of the valley and orchids. The green goods supply is adequate. Taking the market as a whole, the demand for the large supply is gratifying. Considerable quantity is shipped to out-of-town buyers, which helps considerably. Some days the offerings move slowly and on others much is taken up right after the trade opens.

SPECIAL CLUB MEETING.

The show committee reported that they had received another silver cup for the show, the Sefton Manufacturing Co. donating it. It is to be given for the best table decoration. Wm. Murphy, the superintendent of the show, desires that those who desire display space should advise him at once. The Bismarck Rathskeller has been selected by the club as the place for entertaining visiting florists during the show with a Dutch lunch and smoker and Thursday, November 16, was selected as the day. The committee in charge is Chas. H. Hoffmeister, C. E. Critchell and P. J. Olinger. With these three at the head the affair should be a howling success and one that will be remembered.

NOTES.

Scene—Basement under the sidewalk in front of a vacant building on Third avenue. Cast—Dramatis personæ, a burglar. Plot—A burglar who "burgled" about 35 feet of telephone cable so successfully that C. E. Critchell and the Cincinnati Cut Flower Exchange were without telephone service for the entire Saturday afternoon.

Ray Murphy and wife have the sincerest sympathy of the trade in their bereavement over the loss of their baby daughter, Evelyn Ruth Murphy.

J. A. Peterson and wife have returned from their European trip. Mr. Peterson brought with him many novelties in plants from Europe.

Visitors: W. G. Matthews, Jr., Dayton; Ed. Farncourt, Philadelphia, Pa., and C. W. Witsch, New York.

Tom Windram and Dan Ruttle have both been bringing in large quantities of Estelle chrysanthemums.

Chas. Pfeiffer is spending a few weeks at Bliss, Idaho, with friends.

Roger Peterson departed on an extended business trip October 23. H.

BAD WEATHER.

The heavy rain of Saturday was a great drawback to trade and both wholesalers and retailers suffered alike but Sunday was clear and cold, with a prediction of heavy frost on Monday. Chrysanthemums are here, but no real fancy blooms have arrived as yet. Violets are improving slowly.

NOTES.

George H. Angermueller is receiving some extra good stock these days. Fred Alves and A. Gumz, his salesmen, expect a good trade this season.

Paul Schneider of the Oakland Floral Co. was inquiring for the premium list of the St. Louis Horticultural Society, as he expects to exhibit.

C. Young & Sons Co. had several large decorations during the past week. Their show windows in the down town store are a beautiful sight.

C. A. Kuehn is headquarters for fancy lily of the valley. George Schriever is busy with advance orders for this favorite flower.

J. F. Ammann of Edwardsville, Ill., expects his American Beauty crop to shorten up considerably, owing to the late heavy blooming.

Mullanphy Florist has a very pretty decorated window and always keeps an extensive supply of cut flowers and plants on hand.

Rudolph Windt has severed his connection with city forestry department in order to give his florist business more attention.

Andrew Meyer Sr. is building a new house south of his residence which will be occupied by his son, Andrew Meyer Jr.

W. C. Smith Wholesale Floral Co. are receiving some extra fine home-grown roses and carnations.

Grimm & Gorly's new automobile is a swell one and has heating and cooling facilities.

It is expected that many of the retailers will make displays at the flower show.

H. G. Berning is receiving some very nice yellow and white chrysanthemums.

W. F.

INCLEMENT WEATHER.

This section has had a week's bad weather—no sunshine, with rain from a drizzle to a down-pour. It is more like what would be expected in the old country instead of the fine October weather which we usually have. It keeps greenhouse men guessing what to expect next, and the crops are beginning to show the effects of the unusual weather conditions. Chrysanthemums are the predominant flower at present. All colors and shades are represented and the price is acocrding to the ability of the salesman. Business is holding up fairly well and stock is being cleaned up without much loss. Roses continue to be of good quality. Carnations of the leading sorts are available and good, and the call for the two latter flowers has been better than in the past week. Business in the manufacturing and mercantile trades is improving for October and that has been the means of more buying of flowers. Many branches of manufacturing are working overtime, which shows confidence in the business future. So long as these conditions last so long will the florist get his share for the sale of his products. It is estimated, between harbor improvement and general business building in Boston, that seventy-five million dollars is to be spent the coming year. So there is money somewhere. Most of the growers, wholesale and others, are confident of a good winter's business.

NOTES.

Most of our florists who are Scotchmen, prominent and otherwise, went to hear Harry Lauder this week, and some of the Sons of Abraham in the trade went to hear him also. These two classes are akin when it comes to money matters, but then it may be that there is a link between those two races. The Jews claim the invention of the bagpipes, probably in crossing Jordan they were made to step lively with music from that instrument.

At their beautiful home at Ellis, Monday, October 23, Mr. and Mrs. Peter Fisher received the congratulations of their many friends on the 25th anniversary of their marriage. We hope to see them celebrate their golden wedding.

Mr. Frystedt of Somerville reports business in his immortelle letter line as satisfactory. His health has improved greatly and he is looking forward to a good season's trade. This gentleman was the pioneer in this branch of the business.

AN OVERSUPPLY OF STOCK.

"Rotten" was a very common word here all last week. From the classy decorator to the street fakir, it was the same, "rotten." To start with, there has been no frost, and the outside flowers are coming in not only by the thousands but by the tons. The farmers who bring their stock to market may think it is all right, but not so the florist, who cannot afford to sell dahlias for five and ten cents per dozen, with a bunch of cosmos thrown in. On top of this is an abundance of early chrysanthemums and a big crop of roses and lilies; the latter flower absolutely refuses to move at any price. Violets and lily of the valley are both good with fair sales.

NOTES.

E. West of A. W. Smith Co. has been kept busy jumping from one town to another rehearsing weddings during the week, and Arthur Hall of the same firm has just returned from a European tour.

Harry J. Hamm is putting on another wagon and team. He does not let much time go by without adding some new improvement.

Chas. Edgar, well known here and in Philadelphia, is now with Randolph & McClements.

G. & J. W. Ludwig state that they expect to dispose of two of their stands in the market. J.

HORNELL, N. Y.—The Wettlin Floral Co. have purchased eight acres of land near Canisteo on which they intend to erect greenhouses and establish a nursery.

BOSTON, MASS.—The store of Julius Zinn was broken into by thieves on the night of October 15, the cash drawer was stripped of its contents and a box containing several hundred railroad tickets was taken away and books and papers were scattered.

New York.

A FLOOD OF CHRYSANTHEMUMS.

The cut flower market is very unsatisfactory, though it is remarkable how well the supply is used up, notwithstanding the unfavorable weather conditions. The prices on everything have a downward tendency. Chrysanthemums are flooding the market and the ordinary varieties can be had at practically the buyer's own prices; but the novelties and the especially fine blooms are quickly disposed of at good prices. American Beauties are much better in quality, of good supply and demand at a little lower average price than formerly. Carnations probably are affected most by the condition of the market, only the finest blooms meeting with ready sale. Lily of the valley is exceptionally good and the same can be said of L. longiflorum. Violets of good quality are everywhere and the prices are very unsatisfactory. Roses generally are away off in quality, especially the color. Top grades of Killarney, My Maryland and Richmond are in fair demand. There seems to be no call for fancy Brides or Bridesmaids. Orchids seem to be doing as well as anything, and are growing more in favor each day. There are still enormous shipments of dahlias of the finest varieties coming to the market that are cleared out at low prices. Cosmos is also very plentiful. It is amazing to think of the magnitude of the cut flower business in this city, and it is hard to realize the fact that all the tremendous shipments of flowers are disposed of in practically less than three hours each morning, and as most of the large growers are constantly building and each year several new establishments are added to the list, it would seem the business is still only in its infancy.

NOTES.

A. L. Miller, Robert Simpson, Frank H. Traendly, Alex. Hogg, Harry Weston and William Duckham visited the greenhouses of Chas. H. Totty, Madison, N. J., to view the rose Sunburst growing. They will make their report at the next meeting of the Florists' Club. These gentlemen were very favorably impressed with the conditions of Mr. Totty's place, which is most up-to-date in every respect.

Al. Rickards, who is chairman, secretary and treasurer of the house committee, is making elaborate arrangements for the entertainment of the ladies at the next meeting of the Florists' Club, with the assistance of President Nugent, a fine musical programme is being arranged. The same evening J. Otto Thilow of Philadelphia will deliver an illustrated lecture on his travels in the west.

Great interest is being manifested in the coming twenty-fifth anniversary of the Florists' Club, and the growers and dealers who were the organizers of the club, many of whom were just starting into the business, but have long since made their pile and retired, will assist in making this a red letter event. John N. May was the first president in 1887.

Ben Gary, who has been superintendent for Mr. Holmes at Madison for twenty years, has finally abandoned the growing of Caroline Testout and Souvenir de President Carnot, and has planted the entire place with Brides and Bridesmaids, which do so very well with him. Bonnett & Blake of Brooklyn handle the output from this place.

The Yokohoma Nursery Co. report the arrival of four carloads of lily bulbs at New York, one at Philadelphia and two at Chicago. C. W. Scott of this firm has bought a beautiful home at Whitestone, L. I., and commutes from that place daily.

A Great Exposition

The first show of the American Land and Irrigation Co., will be held Nov. 3rd to 12th in Madison Square Garden, where the products of the soil from all parts of the country will be displayed.

SEE our exhibit at booth 19 where will be displayed the products of our seed, showing the results of years of careful selection. $20,000 in awards.

W. E. MARSHALL & CO., 146 West 23rd Street, NEW YORK.

There are rumors that a firm now located in a large eastern city will open a branch establishment in Twenty-eighth street for the sale of cut flowers at wholesale and also handle a general line of florists' supplies.

The American Land and Irrigation Co. will hold their first show in the Madison Square Garden November 3-12. W. E. Marshall & Co. have taken space in the hall to make a trade exhibit.

John H. Bell, the popular bookkeeper of Rickards Bros., who was stricken a short time ago with paralysis of the arm, is slowly improving.

Carl Jurgens and Mrs. Jurgens of Newport have been here a few days en route to Roanoke, Va., where they will stay for a few weeks.

"Jack" Allen of Newport surprised his friends on October 17 by coming to New York and getting married.

Visitors: D. Coughlin, Benj. Anthony, Newport, R. I.; H. M. Robinson and A. Silber, Boston.

BOWLING.

C. W. Scott and Bert Chadwick are working hard to make the bowling club a success and are very much pleased with the result of their efforts. There was a good attendance October 20, but many of the good bowlers were nervous or "rattled" on account of a near-by fire, which acounts for their low scores.

Y.

Colorado Springs, Colo.

The frost has now killed down all the outdoor flowers and business is picking up with prospect for a good trade. Chrysanthemums are coming in fine and are looking well, as are also the roses. Carnations are very scarce, there not being near enough to fill the demand.

The Pike's Peak Floral Co. is remodeling the store, making extensive improvements, and are looking forward to a record breaking Christmas trade.

The florists have organized a bowling club which meets once a week and are having a good time. H.

Washington.

STOCK IMPROVING.

Business continues to improve. The weather has been very dark and muggy for the past week, with night temperatures about 50°. Nevertheless, an immense volume of stock has poured in. The dahlias, which come in all weathers until frost, have been simply a glut and interfered more or less with other stocks. The chrysanthemums are now coming very fast and better stock is noticed. Roses and carnations steadily improve.

NOTES.

At the funeral of Justice Harlan there were a number of very nice floral pieces, very largely of chrysanthemums. Having been present, we know whereof we speak, and will say that we most emphatically take exceptions to the way the flowers were handled and to the way they are handled at some other funerals; but from the high character and standing of the late Justice Harlan and the love and respect shown him by numerous friends, this case will serve to point a moral. A florist sends a bunch of ignoramuses to take the flowers from the church. They grab them from the altar and rush to the wagons, hitting everything that comes in their way and shedding petals by the handful. Surely for the short time at best that a remembrance of flowers lasts, they might be handled decently.

Robert Lacey, a well known rose grower of this district, who has for some time been rose grower for F. H. Kramer, has taken what is known as the Bryan place and will grow roses, carnations, sweet peas and bedding plants. Mr. Lacey will serve through the winter with Mr. Kramer, his son looking after the new place. From his previous success as a florist we may expect good things of Mr. Lacey.

Leupley & Myer have recently been doing some fine decorative work. Last week they had a sale and exhibition of dahlias, when over sixty varieties were noticed.

It is reported that several thousand tulip bulbs were stolen from the storage house of the D'Alcorn Co. one night last week.

Alex. B. Garden, for whom R. G. Kidwell is rose grower, has been sending in fine stock of pink and white Killarney.

Very fine dahlias have recently been coming in from R. Vincent Jr. & Sons Co.'s White Marsh farm.

STOCK GOOD AND PLENTIFUL.

Dahlias and chrysanthemums are the most plentiful of all flowers. Chrysanthemums in all colors and grades, bad and indifferent, are arriving by the thousands, and are selling well at slightly lower prices than last week. Dahlias were never larger or better than those now on the market, and these also meet with a good steady demand. Carnations are becoming more plentiful and stock is exceptionally good. Easter lilies are selling a little slow. A few callas and sweet peas are coming in. Cosmos is very plentiful and the stock is good. Lily of the valley is meeting with a fair demand. American Beauties are a little short of the request. Several good sized decorations and weddings the past week kept the market cleaned up on the best and longest stock. Kaiserin are still the best stock in white roses. Killarney and White Killarney are in good shape and in good demand, especially the long stemmed stock. Adiantum and asparagus are plentiful. C. F. B.

European Horticulture.

Lobelia Tenuior.—Not so many years ago this Lobelia was comparatively unknown. I have seen it grown out-of-doors during the summer months, but under these conditions it was not seen to so much advantage as under glass, the loose habit and comparatively large flowers being liable to injury from wind and rain. In the greenhouse, however, grown either in pots or in suspended baskets, it is generally admired. The flowers of this lobelia vary somewhat in color, the most attractive, and what, I believe, is regarded as the typical kind having blossoms of a clear cobalt-blue color. I have seen a pink-flowered variety—in fact, it was given an award of merit half-a-dozen years ago—but the color is far less pleasing than the blue. Lobelia tenuior is a native of the Swan river district of Australia, and is said to have been introduced in 1838, but it would appear to have dropped out of cultivation, for it is only within the last decade or so that it has been generally grown. It is readily raised from seeds, and three or four plants in a pot five inches in diameter form a neat specimen. When necessary to move this lobelia, it should be supported by four sticks with a strand of raffia around, otherwise it is liable to become top-heavy.

Begonia Worthina.

The aim of the cultivator in the raising of new begonias has been principally directed towards the production of large, round flowers, which hold themselves in a partially erect manner, and are thus seen to the best advantage. Under glass no exception can be taken to this section, but when employed in the flower garden the large blooms are easily injured by wind and rain, whereas the smaller and drooping blossoms will not suffer in the least. For this reason B. Worthiana is popular as a bedding variety, for the flowers, of an orange scarlet color, though numerous, are not large, and stand the weather well.—Gardening Illustrated.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan Chicago President; Marshall H Duryea New York First Vice-President; Edgar Gregory Marblehead, Mass., Second Vice President; C. E Kendel, Cleveland O., Secretary and Treasurer.

Next annual convention, June, 1912.

THE tuberose crop is not likely to exceed that of last year, if as large, as indicated by preliminary digging.

WISCONSIN has passed an insecticide law. Law department managers of all seed houses should write for same.

FRENCH houses are out with still further reductions on their deliveries of present year vegetable seed crops.

VISITED CHICAGO: A. J. Brown, Grand Rapids, Mich.; E. F. Crossland, of Steele, Briggs Seed Co., Toronto, Ont., Can.

NEW YORK.—Sam Whitefield, for eleven years bookkeeper for Weeber & Dow, now has charge of the office of Wm. E. Marshall & Co.

THE gladiolus trade opens slowly; there is a margin between the views of sellers and buyers. The weather has been very unfavorable for digging and drying.

NEBRASKA sweet corn growers report almost full deliveries on late varieties. They have not experienced the continued rains of the middle and eastern sections.

CHICAGO.—Prices on the Board of Trade, October 25, for grass seed were noted as follows: Timothy, $13.50 to $15.50 per 100 pounds.—Mrs. A. H. Goodwin arrived from Europe last week.

FALL bulbs for florists' use are selling well. The stocks of narcissus, Von Sion (very small bulbs generally this year), Paper White Grandiflora and Grand Soliel d'Or, as well as several other sorts, including most trumpet varieties, are pretty well cleaned up.

DUTCH bulb prices for 1912 are being guessed at by the Holland growers at this early date. Tulips will be in good supply, only a few higher. The good sellers in narcissus sorts this year will likely advance next summer. Hyacinths should advance, as all sizes were pretty well cleaned out this fall.

Frederick Roemer's Novelties.

Among the novelties in flower seeds offered by Frederick Roemer, Quedlingburg, Germany, for 1912, the following are noted:

Antirrhinum majus nanum Salmon Queen—a beautiful salmon rose in the semi-dwarf strain of snapdragons.

Branching aster brownish-violet—a new and beautiful color in the late flowering asters, with fine double flowers borne on long stems, excellent for cutting.

Godetia grandiflora carminea fl. pl.—the plants are free flowering of pyramidal habit, attaining a height of 26 inches, bearing flowers two to two and a half inches across, of bright carmine color broadly edged with rose.

Superb giant prize pansy Solfatara—This is a distinct color in the five spotted pansy, being of delicate sulphur yellow or primrose color with each petal marked with a large deep blue spot.

Petunia hybrida grandiflora concordia fimbriata venosa fl. pl.—a veined petunia of reddish lilac or mauve color, the veins being strongly marked with deeper shade, the flowers are double and finely fringed.

Canadian Seed Law.

Last week, page 694, we printed the prohibitory clauses of the new Canadian seed law and now give the sections relating to offenses and penalties:—

OFFENCES AND PENALTIES.

Except as in this section otherwise provided, every person who, by himself or through the agency of another person, sells, offers, exposes or has in possession for sale, seeds in violation of any of the provisions of this act, shall be guilty of an offence, and upon such summary conviction therefor be liable for a first offence to a fine not exceeding one dollar, and for each subsequent offence to a fine not exceeding five dollars, for each receptacle, package, sack or bag in or from which seeds are sold, offered, exposed or had in possession for sale contrary to such provisions, together with the costs of prosecution, and, in default of immediate payment of such fine and costs, shall be liable to imprisonment for a term not exceeding one month unless such fine and costs of enforcing the same are sooner paid. Provided, that the total amount of the fine shall not exceed, in the case of a first offence, five dollars, and in the case of a subsequent offence, twenty-five dollars.

2. If the accused proves to the magistrate before whom he is tried that the package, sack, bag or receptacle containing the seed respecting which the complaint or information is laid, was purchased by him directly from a seed merchant domiciled in Canada, and was not opened, or the state of the seed was not altered, while it was in his possession, and he had no reason to believe that the seed did not comply with the provisions of this act, he shall, upon disclosing the name of the person from whom he purchased the seed, and the place and date of the sale thereof to him, not be liable beyond the costs of prosecution.

3. Every magistrate who has disposed of any case under the foregoing sub-section shall, within one month from the date of his judgment therein, send to the Minister of Agriculture a report of the case, giving the name of the accused, the name of the person who sold the seed to him, and the date and place of such sale.

4. Any prosecution against any person, pursuant to a report made to the Minister of Agriculture respecting that person, under the last foregoing sub-section may be commenced within twelve months from the time when the matter of complaint or information arose, and not later.

Every person who obstructs any person charged with the enforcement of this act in entering any premises to make examination of seeds, receptacles, packages, sacks or bags of seeds, as provided by this act, or who refuses to permit the making of any such examination, or the taking of samples, of seeds as provided by this act, shall, upon summary conviction, be liable to a penalty not exceeding five hundred dollars and not less than twenty-five dollars, together with the costs of prosecution; and in default of payment of the said penalty and costs shall be liable to imprisonment for a term not exceeding six months, unless the said penalty and costs and the costs of enforcing the same are sooner paid.

The person on whose behalf any seed is sold, offered, exposed or had in possession for sale, contrary to the provisions of this act, shall be prima facie liable for the violation of this act.

REALLY GOOD!

Which will give satisfaction to all who grow them are

GODFREY'S SUPERB

"Canterbury Bells"

(Campanula Medium Calycanthema.)

Without doubt the finest strain of this useful and ever-popular plant yet offered.

ON EVERY POINT SUPERIOR TO ALL OTHERS

The plants are models in growth, of pyramidal form, from 3 to 4 feet in height, and, as pot plants for cool greenhouses, they are extremely valuable.

The flowers are much larger than those of other strains; of perfect form, i. e., sound both in cup and saucer. The colors are very varied, in about ten shades of White, Blush, Rose Pink, Deep Pink, Mauve, Blue, Lavender, Lilac and Violet.

SEED At present can be sold in mixture only. **PRICE: One Shilling and Six Pence per packet. Trade Price, Twelve Shillings per doz.; Ninety Shillings per 100.**

Spraying Tomatoes.

Last year we wrote in these notes that spraying is more important than either pruning or staking of tomatoes to get good fruit. In fact, the time has come when tomatoes need as careful spraying as potatoes to get best results. We have a good example again this season. Owing to the fierce drouth this summer, blight has not been prevalent and spraying was generally neglected; but since the first of September we have had continuous and heavy rains, with high temperature and no air movement, causing no end of damage on all kinds of stock. Tomatoes are practically leafless at this time, with plenty of fruit yet to mature. A horticultural writer of note says this blighting of tomatoes after fruit is half matured is a benefit rather than a damage, and no measures should be taken to stop it. We find it otherwise. The moment the foliage fails the fruit ripens unnaturally and attains a certain wateriness and softness, which the sharp buyer detects instantly, and the goods either are unsalable or only so at one-half price. We can try an experiment ourselves. The sprayed fruit has grainy solid meat of fine flavor and it is a pleasure to eat a tomato or two; the other kind tastes watery and insipid to such a degree as to be unfit to eat from the hand. Our market at this time is practically short of good tomatoes and flooded with the other kind.

Spraying is a treatment that does not respond to a hurry-up job. The proper way is to start early and protect the foliage as it grows, repeating at close intervals in such a way that the mature plant can resist the ravages of blight spores.

As regards varieties, there is little change. The newer Globe varieties, such as Globe, Coreless and Hummer, are not only losing ground in this section, but are practically off the market, owing to defect of cracking at the stem end. Earliana is holding its own as an early sort. Thus the three standards are Earliana, Beauty and Stone. Ponderosa is popular for home gardeners only.

Ever since the rains set in we wash and pack our tomatoes in the field directly. They are picked in strong iron buckets and carried to the ends of rows, where the packer is ready with bushel baskets and a wash tub of water. They can be emptied into water without damage. The poor ones are discarded right there and the whole operation of washing and packing can be done faster and better than by taking the dirty tomatoes to the packing house, besides the free air will dry out the washed fruit.

MARKETMAN.

Artificial Fertilizers in China.

The rich alluvial soils of Shantung and other Chinese provinces have been worked for so many generations now that the time when artificial fertilizers must be used in order to obtain good crops is rapidly approaching, states the Consular and Trade Reports. Unlike most places having similar soil composition, China could postpone this era of manuring longer than would be possible in other parts of the world. The provinces in the great valleys of the Yangtze and Yellow rivers are often flooded, and an enriching of the soil takes place identical to that of Egypt from the overflow of the Nile.

In the northern provinces another important factor must be counted on. All of the provinces of Shantung north and from the Desert of Gobi eastward to the ocean are subject to terrific sand and dust storms. The statement is made that around tombs and other places where the soil is not disturbed the annual deposit of these storms can be distinctly traced for ages, layers of an eighth of an inch being the minimum for any season. Thus the soil is enriched by floods in one part of the country and by sand storms in other parts, the latter being very much less efficient.

Aside from these natural means of retaining the producing qualities of his land, the Chinese farmer uses every means at his disposal to enrich his acres. A regular rotation of crops is in vogue, and every second or third year the land is summer fallowed and allowed to remain unused. Manure of all sorts is gathered and carefully distributed, and artificial fertilizers are coming into use. The greatest loss of strength to the soil probably comes from the fact that all vegetable matter is gathered and used for fuel, so that what the ground has once given up to plant life is lost to it forever.

A start in the right direction is now being made by an American packing house. Several hundred pounds of fertilizer, blood scrap, and bone have been sent here for free distribution among native farmers. Prices are reported to be within the reach of the better situated agricultural people, the mixture is adapted to any soil, and it will not burn crops. Some small orders are already resulting and a market with unlimited possibilities will doubtless be opened.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N. Y., Sec'y. Thirty-seventh annual convention to be held at Boston, Mass., 1912.

DR. E. W. BERGER has been appointed Inspector of Nursery Stock for the state of Florida and has furnished all nurserymen with a copy of the law passed in 1911. His office will be at the State Experiment Station building at Gainesville.

THE twenty-sixth annual meeting of the Oregon State Horticultural Society will be held in conjunction with the Oregon Apple Show at Portland, Ore., November 15-18. Valuable premiums of cash, fruit trees and medals are offered for the exhibits of apples, pears and other fruits.

National Nut Growers' Association.

The tenth annual convention of the National Nut Growers' Association was held at the Battle House, Mobile, Ala., October 5. The attendance was large and representative of all parts of the country. A number of cities tendered invitations for the next meeting and Gulfport, Miss., was selected by the committee and endorsed by the convention. Officers for the ensuing year were elected as follows: H. K. Miller, Monticello, Fla., president; W. N. Hutt, Raleigh, N. C., first vice-president; Chas. A. Van Duzee, St. Paul, Minn., second vice-president; J. F. Wilson, Poulan, Ga., secretary; Nathaniel Brewer, Jr., Newport, Fla., treasurer; Theodore Bechtel, Ocean Springs, Miss., E. W. Kirkpatrick, McKinney, Tex., H. S. Watson, Bloomington, Ia., Robert T. Morris, New York City, and B. W. Stone, Thomasville, Ga., executive committee.

Autumn in the Arnold Arboretum.

A visit to the Arboretum at this time should be valuable to persons interested in seeing the plants best suited for the autumnal decoration of American gardens, states the Bulletin issued October 17, for now many little known trees and shrubs here show the brilliant tints of their fading leaves and the beauty of their ripening fruit.

The contrast in the appearance of the trees and shrubs of eastern North American and eastern Asia with those of Europe at this time of year is interesting. The leaves of the former are now for the most part brilliantly colored or have already colored and fallen, while the leaves of the trees and shrubs of Europe are still green, and in the case of many of these plants the leaves finally wither and fall with little or no change of color. This interesting fact is best seen in the species of the same genus. The American beech now lightens the woods with the light yellow tints of its leaves, while the leaves of the European beech are still almost as green as they were at midsummer. The leaves of the American elm have already shriveled or fallen except in the case of vigorous trees which still show the yellow tints of autumn, while the leaves of all the forms of European elms are still fresh and green.

This habit of European plants to retain their foliage late into the autumn is well illustrated by the viburnums. The leaves of Viburnum Latana, the Wayfaring trees of Europe, are still either dark green or only slightly tinged with red along the margins, while the North American Viburnum Lentago, Viburnum prunifolium and Viburnum cassinoides are splendid in their autumn dress, which is set off by their abundant dark blue fruits. The contrast is even more marked in the viburnums of the Opulus group. In this group the leaves of the European Viburnum Opulus are still dark green and as fresh as in July; those of Viburnum Americanum, the native High-bush cranberry, so-called, have turned to shades of yellow and red and are falling fast, while those of Viburnum Sargentii from northeastern Asia, which were bright orange-red two weeks ago, have now almost disappeared.

The slender branches of a Japanese cherry, Prunus Maximowiczii, are already leafless, and the leaves of another Japanese cherry, Prunus Sargentii, having turned deep orange-red, are now slowly falling, while all the European cherries are still green. The leaves of all the forms of the common lilac derived from a species native to the mountains of Bulgaria drop without change of color, as do those of the large bush honeysuckles which are mostly European and Siberian. Of the lilacs, although the leaves of the Chinese Syringa villosa turn dull yellow in the autumn, only the Chinese Syringa oblata has real value for the autumn color of its leaves. These are large, thick, leathery and lustrous, and in the autumn turn to beautiful shades of dark red or old leather color, a habit which adds greatly to the value of this fine plant as an ornament of gardens.

Few Old World roses make much show of autumn color but just now there is hardly a more beautiful plant in the Arboretum than the common rose of the coast region of the northeastern United States, Rosa Virginiana, or lucida as it is sometimes called, which just now makes a brave show with its leaves of orange and bright red.

Among the shrubs in the Arboretum which should be carefully studied at this time on account of the beauty of their autumn foliage are a few which deserve special attention. Of these Evonymus alatus from Japan is especially interesting for its leaves are now of a light rose color which is not found in those of any other plant in the collection. This is a broad flat-topped shrub of open habit, peculiar in the broad wings which are developed on its branches and to which it owes its name. As a flowering plant it has little to recommend it and the fruit is less conspicuous than that of most of the other Burning Bushes, as Evonymus is often called, but the color of the autumn foliage entitles it to a place in any garden. A large specimen of this plant can be seen in the Evonymus Group on the right-hand side of the Meadow Road. In this group are several other plants which are attractive at this time. The most conspicuous now, perhaps, is Evonymus Bungeanus, a small tree from northern China, covered with small light pink fruit which is set off with pale yellow leaves. Evonymus Yeddoensis and Evonymus Hamiltonianus, two Japanese shrubs or small trees, are now conspicuous also for their colored leaves and brilliant fruits.

Albany, N. Y.

NOTES.

Edward F. Meany and E. P. Tracey, proprietors of the Rosery, Maiden Lane, have made some improvements in their store, including the installation of a seven-foot pier mirror to back one side of the show window, and two others in the store in connection with the ice chest. The delivery equipment has been thoroughly overhauled and improved so that it is practically new. The firm believe in being right up to date.

H. L. Menand, son of Louis Menand of Cemetery avenue, has gone into partnership with Charles Carson in a retail flower store at 464 Fulton street, Troy. Mr. Menand is the third generation of a family of national reputation in the horticultural world.

Azaleas Are In!

Start Them Now for Christmas

We have received our first car of Belgian Azaleas, fine plants, **personally picked and selected in Ghent** by a member of our company; **re-assorted here,** and none delivered to our customers that do not come up to the highest standard of excellence—**shapely, well-balanced, abundantly-budded plants.**

MR. W. A. SALTFORD, of "The Saltford Flower Shop," (whom we quote by permission) said last year: "The Azaleas we bought from Jackson & Perkins Company were the finest lot we ever forced, and we have given them a duplicate order for four hundred plants this year." (And Mr. Saltford was so well pleased with that lot that he gave us another large order for Azaleas this year.)

VARIETIES:

This list, and a few more, and while they last at these prices:

Apollo. Double; dark red; late.
Bernard Andreas Alba. Double; pure white. late.
Deutsche Perle. Double; pure white; one of the best.
Doctor Moore. Double; deep rose; fine; late.
Empereur du Bresil. Double; soft rose; extra fine; late.
Empress of India. Double; rich, rosy salmon; late.
Ernest Eeckhautte. Double; brilliant red.
Madame Petrick. Semi-double; deep rose; very early.
Madame Van der Cruyssen. Semi-double; bright red; early.
Niobe. Fine; double white; late.
Prof. Wolters. Single: rose, bordered with white; early.
Simon Mardner. Double pink; early.
Vervaeneana. Double; rosy salmon, white margin; early.
Vervaeneana Alba. New, very desirable early kind.

Prices:

	Per doz.	Per 100		Per doz.	Per 100
10 to 12 inches in diameter....	$5.00	$38.00	14 to 16 inches in diameter...	$ 7.50	$60.00
12 to 14 inches in diameter....	6.00	48.00	16 to 18 inches in diameter...	12.00	90.00

"The Azaleas you shipped me this fall are certainly fine; the Madame Petrick were brought into bloom for Christmas **without forcing.** We had the best Azaleas in Worcester for the holidays, and I can assure you of my order for next season."
CHAS. D. MACKIE. Worcester, Mass., Dec. 31, 1910.

"The car of plants came through in fine shape: the Azaleas and Rhododendrons were **very fine;** in fact **beyond criticism.**"
T. R. HOPKINS, Seattle, Washington, Jan. 11, 1911.

Prompt orders are invited, while the assortment is complete, and while the plants are fresh and perfect. Get them started for the holidays. **Nothing easier to bring into bloom,** and **nothing more salable or more profitable** than these handsome plants when in bloom.

Landscape Gardening

PROF. CRAIG.

A course for Gardeners, Florists and Home-makers, taught by Prof. Craig and Prof. Beal of Cornell University.

Progressive Florists recognize the growing importance of a knowledge of Landscape Art. Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

Mention the American Florist when writing

Wichita, Kans.

The florists have had plenty to do to keep them out of mischief during the past six weeks. The severe hail storm of September 6 gave them quite a bit of extra work in addition to the usual autumn work of preparation for the winter season. The storm's effect in damage to stock growing outside was not overestimated. The fine hail, driven by a high wind, ruined practically all the stock usually depended upon for a large part of the supply for fall season. Late plantings of gladiolus just coming in, late asters, dahlias, cosmos, etc., suddenly and completely went out of crop. Gladiolus and asters permanently, and dahlias and cosmos had to grow a complete new crop of flowering shoots and buds before any cut of flowers could be made from them. This made it rather tough on the florist who grew his own stock for his retail store, forcing him to buy even the cheaper grades of flowers usually used in design work and other lines. The volume of business is fair, fully as good as last year for same dates. The first cuts of chrysanthemums are beginning, and for the past ten days some excellent cosmos and dahlias have been on the market. A killing frost on Saturday night, however, finished the dahlias and other outdoor crops, unless for a few cosmos which may be cut from small patches which were protected by staging and sash or tarpaulins. Carnations from the greenhouses are now helping out. Enchantress still holds its own for color, and the grower who has a good stand of White Perfection has no cause to blush in comparing it with other white sorts when it comes to a consideration of getting down to business early in the season. It is now furnishing good flowers on reasonably long stems, and if at all properly handled is probably as little inclined to crop as any carnation grown.

NOTES.

The local press prints as a news item a story to the effect that R. M. Reed, recently in the employ of the Furrow Greenhouses at Guthrie, Okla., had left there Sunday evening to come to Wichita to take a position with C. P. Mueller, but had failed to show up in Wichita. This was followed by an item published later stating that further investigation showed that Mr. Reed, instead of coming to Wichita as promised, had gone to Washington state without giving any notice to Mr. Mueller or Mr. Furrow, or assigning any reason for his change of mind.

Bixby & Dugan have installed a tubular boiler and will change their heating system from hot water to steam.

W. H. Culp & Co. are installing oil burning equipment and will try fuel oil instead of natural gas or coal.

— Brackenbury of the Kellogg Flower & Plant Co., Kansas City, was a visitor last week. W. I. CHITA.

PREPARE FOR THE HOLIDAYS

☞ **Second Consignment**—75 cases of **Holiday Azaleas for Christmas, Kentias, Palms, Latania Borbonica,** and, to make the importation complete, a **Third Consignment** of our well known specialty, the **Araucarias, Robusta Compacta, Excelsa Glauca** and **Excelsa,** have just arrived, per steamer Menominee, on Oct. 23rd, from Antwerp, Belgium. 25 at 100 rates. **Cash with order, please.**

All plants must travel at purchaser's risk.

GODFREY ASCHMANN

Wholesale Grower and Importer of Potted Plants.

1012 W. Ontario St., PHILADELPHIA, PA.

Fredericton, N. B.

The weather during September was very unpleasant and frosts severe enough to spoil nearly all the garden flowers were experienced September 14 and 15. The sweet peas survived, but this was followed by more severe frost and cold winds, and outside stock is at an end. Trade in general is very quiet.

The stock at the J. Bebbington & Son's greenhouse is in fine condition. The cyclamen, in all the newer colors, are exceptionally good and chrysanthemums, carnations and roses are in splendid shape. A fine assortment of ferns, Ficus pandurata and novelties are much admired.

The semi-annual provincial exhibition was the best in all respects ever held. J. Bebbington & Son were the largest local prize winners, receiving premiums on palms, ferns, foliage plants and floral work. They also took many prizes for fruits and vegetables.

Miss A. M. Shleyer is enlarging her greenhouse, building an addition 20x50 feet for roses and carnations. B.

Heacock's Palms and Ferns

Home Grown. Strong and Well Established.

Pipe Stems, about 6 feet; per 100, 60c; per 1,000, $5. Vaughan's Seed Store, Chicago.

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, $1.25

CHRISTMAS PRESENT

GET ONE FOR YOUR BOILER

A Test at 18 Below Zero.

Having promised you a letter as soon as we had passed through a good fair test, I consider it now as almost timely.

We had the thermometer 18 degrees below and we've just gone through a blizzard bad enough for most any season, and am very pleased to inform you that our heating system was equal to the occasion. So far as we have gone, am certainly well satisfied with the Kroeschell Boiler, Generator and Heating System. J. E. MATTHEWSON, of Sheboygan, Wis.

Where There Is Condensation

——there is need for a **Morehead Steam Trap**
Condensation in steam lines is akin to matter out of place—means wasted energy.

If your lines are sluggish—if your houses are not of uniform temperature, write us. We guarantee to drain your lines perfectly—return the pure, hot condensation to your boiler without pump or injector or make no charge for the trial. Obey that impulse—write now.

Send for "Book on Condensation."

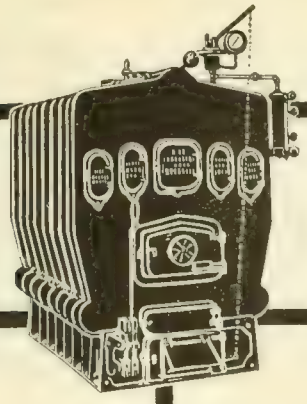
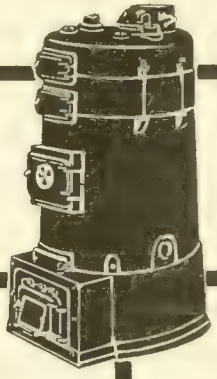
RANDOLPH & McCLEMENTS, Successors to Chas. T. Siebert, Baum & Beatty Sts., Pittsburg.



The Burnham



Three Things You Want to Keep in Mind About Burnham Boilers.

First:

It's a greenhouse boiler—an out-and-out greenhouse boiler and not a residence boiler trying to do greenhouse work.

Second:

There is a Burnham round or square sectional boiler for any job of greenhouse heating from 1,050 square feet up to 27,600. And by connecting them in batteries you can go as far as you like.

Third:

The steam boiler has an honest steam dome. We do not simply put steam trimmings on a water boiler, and sell it as a steamer.

Lots of boiler makers do. It's a thing you want to look into carefully.

Ask them the difference in height between their water and steam boilers and then compare their measurements with The Burnham. It will open your eyes.

We are making prompt shipment these days. That's another thing to remember.

A Tryout Greenhouse

We call it a "tryout" because the owner has rather extensive ideas of the size of house he will eventually have but he had us build this small one for him as a tryout to prove to himself that a greenhouse gives all the fun and satisfaction we say it does. It is so located and arranged that it can be enlarged economically and lose none of its attractiveness. A plan that is planned ahead as it were.

Perhaps you would like a tryout house?

If you write us at once we will send you a catalog by return mail and by a little extra effort your house ought to be ready for use this winter.

When you do write send along the name of your employer so we can mail him a catalog same day yours goes.

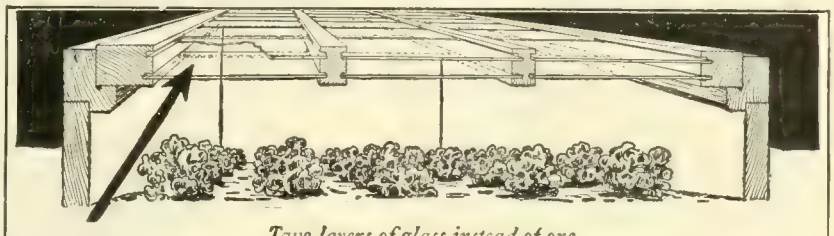
---



Two layers of glass instead of one

You never cover Sunlight Double Glass Sash

You do away with heavy, expensive mats and boards, and your plants get *all the light all the time.*

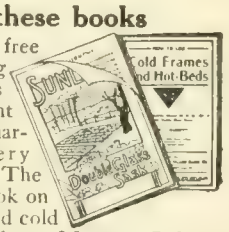
The dry air between the two layers of glass takes the place of mats and boards

It is 5/8 inch thick and is a better non-conductor. The glass is held in place without putty—can't slip out—easily replaced.

Crops on the market weeks ahead

Under Sunlight Double Glass Sash your plants are earlier and sturdier and you can have bigger, better crops on the market weeks ahead while the prices are still high. In many cases the extra profit on one crop has paid for the sash themselves.

Send for these books



One is our free catalog, giving all the details of our freight prepaid and guarantee delivery propositions. The other is a book on hot-beds and cold frames by Professor Massey. It is authoritative and full of vital interest to all growers, gardeners and florists. 4c in stamps will bring Professor Massey's book in addition to the free catalog.

SUGGESTIONS FOR PLANT GROWERS.

Rambler Roses.

The wood of the several rambler roses that are to be forced should be well ripened up. Those that have been grown in the open ground should be lifted and potted. The pot grown stock should be subjected to some freezing weather, but they should not be left out until the weather becomes severe enough to freeze the ground so that the pots become broken. A covering of leaves may be placed over the pots if the wood has not been thoroughly ripened, but they are better stored in deep pits or sheds, where the temperature may be kept just above the freezing point. The small twiggy wood should be cut out, leaving the strong canes and these should be tied to a stake and kept erect. This will greatly reduce the labor when moving them and allow for closer packing when they are packed away and besides prevent the branches from lying on the ground and becoming soft or perhaps causing rot, if too damp. The stock that is lifted and potted should be given a rich rose soil and potted firmly, ramming the soil down hard with a wooden stick. All roses require a firm soil to get the best results. The Baby Ramblers can be carried into the houses and brought into bloom for Christmas. A temperature of 60° to 65° should produce plants with bloom if started at once.

Outside Tulips.

The tulips should be planted in the beds as soon as possible from now on. It will do them no good to remain out of the soil, for they will lose some of their vitality. While we do not like to plant them out when the soil and weather are warm, yet October and early November is the proper time to get them in. There is danger now of the ground becoming frozen at any time and they should all be planted while the ground can be worked, for it is very difficult to set them even after a thin crust has formed on the soil. The covering can, however, be left until freezing weather sets in, and, in fact, is better, for if the ground becomes frozen the bulbs will not make any top growth, which is likely to occur if covered now and kept too warm. Do not cover too deeply. The object of the covering is not to prevent the soil from freezing, but to prevent the alternate thawing and freezing that often occurs and which will in some cases throw the bulbs out of the soil altogether. Leaves three or four inches thick make the best covering, with boughs or boards laid across to prevent the winter winds from blowing them away.

Gladiolus Colvillei.

The winter blooming gladioli make a valuable addition to the late winter and spring flowers and are very useful as a cut flower or in all kinds of floral work. The blooms are much smaller than the Gladiolus Gandavensis and kindred kinds and can be artistically employed. The varieties grown are The Bride, white; Blushing Bride, white, tinged with pink, and Peach Blossom, light pink. The culture of these is very easy and by a succession of plantings the flowers may be had all through early spring up to June. The bulbs can be procured all at once and kept dry and cool, but do not leave them standing around in the room over the boilers or they will rapidly lose their vitality. They can be planted in deep flats and placed in an out-of-the-way place until they begin to grow, when they should be given a light location in a house with a temperature similar to that in which carnations are grown. The flowers will be larger and have more substance if grown cool, but it will take considerably longer to get them into bloom. Some growers plant these bulbs between the rows of the carnations or the violets, but our experience has been that it is far better to grow them in boxes by themselves, for the carnations will need all the nourishment in the soil if growing well, and if not, they as well as the violets when through blooming better be cleaned out and some other crop planted and not have a crop mixed in which would delay the planting or occupying of the

space. These gladioli will be found very useful and well appreciated by the best trade.

Otaheite Oranges.

The fruits of the Otaheite oranges are now fully formed and of good size, but to be at their best stage at Christmas, when the plant is most desired, they should be well colored. They should be given a light location, having plenty of sun, but not too warm. If grown too warm, the fruit colors up slowly; a temperature of 55 to 60 degrees at night, with good ventilation during the day from this time on will bring good results. Keep the plants free from scale, which rapidly covers them if once fully established and not kept off. Where they are seen constant washing will be required, and a weak kerosene emulsion is efficacious in keeping them down. When well fruited and the fruits nicely colored, these small orange trees make one of the finest Christmas plants.

Spiraea Joponica.

When the roots of spiræa arrive, do not leave them lying around in a dry state. This plant never does well if allowed to get too dry, even in a dormant stage, and every grower knows that one of the principal things in growing them is to keep them well supplied with water. Those that are to be grown for Easter are better potted at once and kept cool until the first of the year, but before potting soak the clumps well in tub of water; then after potting water thoroughly and place in a cool, dark place. Those that are to be bloomed for Decoration day or late in spring can be left in the case, but turn the hose on them and give them a good soaking and then put them in a cool, damp cellar until late in winter, when they can be benched or potted as desired.

Violet Houses.

ED. AMERICAN FLORIST:

What size and style of house is best for violets? G. B. T.

Illinois.

It is quite impossible to state what is the best size or style of house for violets. We have nine houses devoted exclusively to double violets and they vary in size from 12x150 feet to 35x200 feet, and we grow just as good quality in one house as in the other. All the houses but two are built high enough to be used in rose or carnation culture should we desire to make the change. Two houses have tile benches and the violets are just as good as those planted in the solid ground.

We feel safe in saying that the growing of good violets is not as dependent on the style or size of the house as upon the grower. We do not know of any plant that requires so much constant care or is so subject to disease or insects as the double violet. No matter for how long a period one has grown violets he is likely to have some kind of trouble during the growing season, many times destroying the whole house and sometimes practically requiring the house to be replanted two or three times. J. V. L.

NORTHAMPTON, MASS.—H. W. Field and family started for Redlands, Calif., Tuesday, October 24, where they intend to remain until May. Mr. Field has been troubled with asthma, and is making the trip for the benefit of his health.

THE RETAIL TRADE

The Empire Shower Bouquet.

A beautiful modification of the shower bouquet for the bride is the empire shower which we illustrate both with front and side views. Instead of the bouquet to be held in the hand a spray of orchids or other fine flowers is used, artistically arranged with adiantum to make a small handle by which it is to be carried in the hollow of the arm, and from this extend the showers which are made of baby ribbon upon which are tied the sprays of lily of the valley and knots of gauzy ribbon. The showers are backed by maline ribbon, this resting upon a satin ribbon upon the ends of which are fastened silver tassels, the showers being made of a length to reach the hem of the gown. This beautiful creation was the work of George M. Geraghty, manager and designer for Dunlop's, Toronto, Ont., whose artistic work is appreciated in that city and vicinity.

OTAHEITE ORANGE.

The empire shower is a bridal offering that cannot be made of many different flowers, the combination illustrated is by far the best, and it is one in which no effort should be made to cheapen it. Gardenias can be used instead of orchids, and white sweet peas will make the showers. It sometimes is arranged without any prominent flowers where the orchids are placed a bow of gauzy ribbon being used instead. When artistically arranged it makes one of the finest floral offerings for the bride.

Preparing Floral Work.

Perhaps one of the fundamental principles in preparing flowers for designs and other work, is the use of wire in its proper thickness. Let us start with wiring galax leaves; toothpicks are unnecessary also take longer; use No. 22 wire cut to 6-inch length. Don't be afraid to use the leaves. Make clusters of three or four with the stems of graduated lengths. The leaves are inexpensive and the design will look presentable for a greater length of time. Carnations, when used for solid work, should be stuck with toothpicks; this gives a better chance to do smooth work, especially if the design is badly mossed. By the way, the only way to make a solid wreath is to make the lower, inner and outer circles first, then the center circle, then round off to both sides. When finished this way the work will never look like a mountain scene or the waves of the ocean. When wiring carnations for work that requires longer stems use No. 22 wire to reinforce the stems and to prevent breaking off of the flower. In making a wreath,

for instance, put two or three carnations in clusters, using No. 20 wire cut nine inches long for holding them together. This length will leave two prongs to place the flowers in the designs. Wire roses in the same manner and where using longer-stemmed flowers in the work make the prong wire No. 18. If intended for the base of a standing design use the 18-inch length for the prongs. By using wire the kindling wood is done away with.

In wiring roses for a spray use No. 22 wire for the head, then if the stems are long and weak, use a heavier wire lower down, in connection with the other. This method will keep the flower in its place. In wiring for bouquets to be carried or corsages, use soft wire, say No. 24. Use just a sufficiently heavy wire to prevent the heads from being broken off in indifferent handling and above all things take all the thorns off. In making a spray of chrysanthemums use oak foliage between the flowers to keep them apart; wait, if there is no oak use southern smilax. It makes no difference how old it is, it will not show if used properly.

Now, to moss a design properly also requires some skill. Be sure the moss is well separated and slightly moistened to prevent waste; then be sure the corners are well filled out. Tie just enough to keep the moss from falling out, then bind, if a wreath, with strips of green wax paper. Cut the strips about three and one-half to four inches wide. This keeps the moss from falling out and also keeps the moss off your books, where it will surely grow if you use primitive methods. Let the following strip hold the previous one until the mass is covered, then tie securely at regular intervals with green thread. The paper is cheaper than ferns, only a few being needed on top of the paper, and also saves violet foil, so often used without good reason. For pillows, bases of designs, etc., use full sized sheets of paper, tying as above. The above suggestions are sure to sooth the nerves of designers, and that's something, anyway. STOREMAN.

Wintering Dahlia Roots.

Immediately after the plants are killed to the ground by frost, lift the clumps, and, after removing the loose soil, expose to the sun and air a few hours to dry. Cut off the stalks quite close to the clump and pack, not too closely, in boxes or barrels and store in a frost-proof place where extremes of temperature may be avoided. A high temperature, with little or no moisture in the air, will not only result in shriveling most varieties, which somewhat impairs their vitality, but will start them into growth too early in the spring; while a temperature close to the freezing point—32 degrees above zero—with an excessive amount of moisture is even worse, and, if allowed to continue for several weeks, is almost certain to prove fatal to most varieties by causing them to rot. A cellar in which there is a moderate amount of moisture, with a temperature of about 45 degrees, states Edgar W. Ela in the Dahlia News, will give best results with most varieties. A covering of dry coal-ashes, sawdust, earth or sand—the two latter preferred—will usually prevent the roots from shriveling by excluding the air and preserving a more even temperature. Be very careful, however, not to cover any clumps not perfectly dry.

A close, plastered room constructed so as to hold all the moisture, but with proper means for ventilation, will give best results, as it is easier in such a room to maintain a uniform degree of temperature and moisture, the two essential factors to be considered in keeping roots through the winter. When temperature and moisture are right there will be no need of covering the roots with anything.

In storing roots in an open cellar in which temperature and moisture are not easily regulated, they may be placed in boxes or barrels and covered with any dry material as directed above.

Another way of storing them which has always been very satisfactory with me, is to place them in piles—elevating them a few inches from the bottom of the cellar as a matter of precaution—and covering them with paper, oil-cloth or any other material that will keep the moisture from evaporating. There will be moisture enough in the pile to keep the roots in fine condition if it is not allowed to escape. It will be well to look at the roots several times during the winter, as it is a pretty safe guess that if the pile is large, there will be something in it that will need attention before spring. When the crowns are found to be moist or are beginning to decay, the infected part should be scraped off clean and freely dusted with dry slaked lime and then placed in a temperature of about 60 degrees for 24 hours, after which they may be returned to the pile and will probably require no further treatment.

Varieties having very large, soft stalks should be split in halves, which will allow the stalk or crown to dry out and become woody, in which condition they keep much better than when packed away undivided.

It should be borne in mind, however, that rules should not be followed blindly; they all need adjustment to circumstances. Even the strict observance of all rules for the keeping of roots through the winter will not avert occasional disaster to some of the less hardy varieties. But good rules—the result of long experience—furnish a starting place for the beginner and often prevent him from doing the dead wrong thing.

THE ROSE.

Preparing the Compost.

October and early November is the last chance we have to do hauling, and we know of no better time for the hauling of soil, manure, etc., for the compositing of next season's requirements. We have repeatedly offered suggestions in reference to preparing the compost both in the spring and autumn, and although there may be some difference of opinion regarding the preparation of soil for filling the rose houses, there is not enough difference in the methods employed to lead anyone astray. A good heavy soil is desirable for our root-grown roses, whereas a lighter friable soil is admirably suited to grafted stock. Old pasture land on which there is a good stiff sod which is capable of growing good crops of any kind if cultivated, is what is wanted, either in meadow or highlands if the soil or fields have been well drained.

Remove the top soil and haul to some convenient place near the houses to be filled. Be sure to rick the soil up on a kind of knoll graded so that the surplus water will not accumulate around the compost pile. We prefer to haul the sod in the fall and to pile it up separate from the manure which we place conveniently near so that it can be mixed in the spring. The only mixing required now being enough to do all the potting necessary during the winter, and, as we have often suggested, it is a good idea when compositing the soil in the spring to prepare a separate lot for potting purposes for the coming winter.

However, if one gets at the soil at once and stacks up enough for winter use by placing a layer of manure equalling in bulk to that of soil, to which add a little bone meal to each layer of soil; the proportion will be found to be about right, namely, one part manure to three of soil, fresh cow manure being preferred to any other for this work. The manure will settle but the soil will hardly do so, and when cutting down the compost in order to turn it and mix it the thick layer of manure which seemed almost equal in quantity to the amount of soil in each layer as prescribed above will in reality have assumed the appearance of about one-fourth of the entire compost, which is about right for potting or planting rose stock. Keep the potting soil protected from the rains and snows and turn frequently till used. This will rapidly rot up the sod.

Another seasonable piece of work is to prepare a quantity of thoroughly rotted manure for a light top dressing in the rose houses, to be used at once and from now on. Any well-rotted manure will do, nicely broken up fine, as it is only intended to scatter over the surface of the beds to prevent cracks in the soil which should be full of roots by this time. This light dressing will also keep the soil in excellent condition to take water and is not intended to act as a fertilizer or feeding medium. The feeding can be best accomplished by applying a little liquid manure from now on, providing the plants are growing vigorously. If this is done at the right time the plants can be kept growing rapidly for many weeks yet. On the other hand if they lack feed they will soon show a tendency to slow up, the growth will shorten and the plants will begin to harden, their growth, which will result in a check very hard to overcome. From now on keep them going; give plenty of air, avoid cropping, be liberal with the sulphur brush, keep the temperature even at night and not too hot at midday, and again we repeat, start up the liquid manure feeding as soon as a good root action will permit. Fumigate frequently and lightly in preference to heavy fumigating, waiting too long between times. Use the fumigating punk or papers for a preventive rather than a cure. Oh, yes, spray, spray, spray, with force right up under the foliage, as the red spider may "fool you once again." As the comic daily supplements state, they are the end of the limit when they arrive.

E.

Value of Experiment Station to Florists.

DUTY OF THE FLORIST TO THE STATION.

Address by Prof. J. C. Blair, Head of Department of Horticulture, University of Illinois, read before the Illinois State Florists' Association.

In order to fully appreciate the value of the experiment station to the floist it is necessary at the outset to have some conception of the nature and scope as well as the function of this great public institution known as the Experiment Station which has sprung up throughout the length and breadth of the land. These institutions are really the outgrowth of the discussions which took place at the meetings of our old time agricultural societies. Various kinds of model farms and test stations were proposed with here and there a real start made. The first station was a private institution established by L. Valentine at Houghton Farm, Orange County, New York, in 1876. An effort was made by the state of Connecticut in 1873 for the founding of an experiment station but the bill failed to pass. It was this same year that the Experiment Station at California was established and 1879 when the Cornell Experiment Station came into existence. But our experiment station system in this country was not definitely established until 1887 as a direct result of federal ap-

THE E. G. HILL CO.'S NEW YELLOW ROSE SUNBURST.

propriations for that purpose. Since the passage of this, the first Hatch act, there has been some modification in the laws governing these institutions and as the work has grown and enlarged, additional appropriations have been made. Yet from the first the intent and spirit of the law was the same, namely, "that it shall be the object and duty of said experiment stations to conduct original researches or verify experiments on the physiology of plants and animals; the diseases to which they are severally subject, with the remedies of the same; the chemical composition of useful plants at their different stages of growth; the comparative advantages of rotative cropping as pursued under the varying series of crops; the capacity of new plants or trees for acclimation; the analysis of soils and water; the chemical composition of manures, natural or artificial, with experiments designed to test their comparative effects on crops of different kinds, etc., etc."

Surely here is a law, the nature and scope of which is sufficient to take in all the problems relating in any way to the business of floriculture. But if we glance back over the 23 years that these stations have been in operation, we see at once that the old established lines of agriculture, or those which have to do with all outdoors so far as the farm is concerned, have been the ones to receive especial attention and the bulk of the money. It is not until a very recent date that the florist's business in this country was thought to be of sufficient importance to receive the especial attention of investi-

gators in these public institutions. In fact, as I have gone down over the list of publications which have appeared as a result of these federal and state appropriations, I am surprised to find that out of literally thousands of bulletins and circulars, there are but 47 which are especially designed to be of help to the florists and gardeners, yet considering the fact that the florists themselves have not until recently been making any demands upon the experiment stations for help, this list really seems a commendable one. Scanning the pages of these publications which have appeared, we find many things of real and positive help to the florists's business. Take for example the work which has been done by various pathologists on the diseases of many greenhouse plants. How can we ever fully estimate the benefit derived from this source alone? If we take these and the many other things accomplished as an indication of what may be done in the future and then stop to reflect upon the rapid rise of the different phases of the floricultural business during the past dozen years, we will be in a better frame of mind to correctly anticipate what the future holds in store for us. Think for a moment of the step in advance which will be taken when we actually arrive at that stage in our state history when Illinois will have invested in this business $100,000,000 instead of $20,000,000 as at present. Of what value will this enormous floricultural industry in this state be if we do not actually learn how to throttle the insect pests, or if we do not know the correct combination of those materials and elements which go to make up the proper plant food of each of these ever-varying and complicated types which we grow for the delight and comfort of the multitude. We have at least one firm in Chicago which cannot really secure a sufficient amount of the organic fertilizer (manure, if you please) which is now required for their establishment. This has become so serious a problem with them that, I understand, they are contemplating establishing upon their premises a large dairy herd whose chief business it will be to make fertilizer with which to grow the dainty blossoms that are to grace our tables. Now it is not too much to expect that this experiment station, through the experiments already in hand, will definitely ascertain what combination of chemicals or commercial fertilizers can be, in part at least, substituted for the now very precious stable manure. It is my firm belief that there is no industry in the state which will receive a fuller measure of benefit from the money spent in its behalf than will floriculture. The fact that this industry is confined largely to the area encompassed by 20,000,000 square feet of glass, or approximately 400 acres, makes it apparent that we are dealing with control conditions, in large measure at least, and the influence which we can exert upon our plants is greater by far than upon those crops grown in the open. Now, the particular way in which the Experiment Station will be of most value to the industry, will be in the development of new forms or types better adapted to the requirements of our advancing civilization. Yet of no less importance will be improved cultural methods which must come from long continued experiments designed to shed light on the food requirements of the different varieties grown under glass. There must be a constant effort to improve existing types. Not only that, but these must be protected from the innumerable enemies which beset them with ever increasing vigor as the industry expands. Again, the trade resulting from this industry must extend into every section of the country and this means that facilities for keeping and transporting flowers must receive careful attention and investigation.

As I allow my mind to project itself into the future, I see with a certainty, that is most encouraging, the thousands of commercial establishments that have grown up within our state furnishing their thousands of employes with a comfortable living, bringing upon the tables and into the very life of all our citizens that refinement, that grace, that sweetness of character, which comes alone from intimate association with and love for flowers. It will be not alone the commercial florists that have profited, nor those who have labored in one phase or another of the industry as helpers, but also all the people who will have learned to appreciate the value of a flower. How will all this have been made possible? I believe I can see with sure vision that it is because the investigator has worked long and faithfully on one after another of the many problems which you practical growers have called to his attention. Nay, you have not only called his attention to these things but you have insisted that our laboratories, our glass houses, and our other equipment shall have been used or applied to the problem unceasingly until its solution shall have been found. Not only that, but you have seen to it that the state has wisely appropriated the money which has been given back to the people, a hundred, yea a thousand fold, through added beauty, pleasure and profit. When all this shall have been accomplished, can we estimate the true value of the experiment station to the florist?

It is the duty of the florists individually and collectively within the state to support in every legitimate way the work of their experiment station. The chief reason for this is the fact that it is you, the florists of Illinois, who have secured the appropriations and who are really responsible for the work undertaken. Most of you know, but there are many apparently who do not know, that there is a state law which says that the experimental work in floriculture undertaken by the university shall be along lines agreed to by the director of the experiment station and a committee of five, known as the floricultural advisory committee. This com-

SMITH S NEW CHRYSANTHEMUM PINK GEM.

mittee is appointed by the State Florist's Association. It is a committee of your own selection.

It is, therefore, understood that this body of people selects five of its most progressive and representative men who shall give to the work their best thought and energy. Not only that, but these five men, being the representatives of the florists at large through their state organization, bring the mature and ripened judgment of all the best florists within the state to the meetings with the university officials. It is here at these meetings between the advisory committee and the station officials where the plans are matured after the most careful deliberation. I recall with a keen sense of satisfaction the wisdom and foresight which was brought to bear on the work by the five men with whom we have met from your association during the past two or three years, and I assure you, gentlemen of the convention, that if the work has been faulty, or if this institution has not accomplished all you have expected of it, it is not because of neglect on the part of any of these, our associates in the work. Hour by hour through many a long day, and well into the wee hours of the night have the members of this floricultural advisory committee deliberated with us, seeking ways and means looking toward the best development of the work. I repeat, therefore, that what has been done has been your work. The work has not only been planned but pushed forward for you and by you through this superb cooperation which means so much in the way of public service. In the largest and best sense the entire university is your university, but the floricultural work in the college and in the experiment station is in a peculiar sense your own. You, through your representatives on this committee, have made the plans; we here are your servants striving in every way within our power to carry them out. It is, therefore, your duty as florists to make your wishes known and to cooperate with us through your splendid organization. If you have problems on which you want help remember that this floricultural plant which we have built belongs to you. It does not belong to me or my associates, and we exhort you to make the equipment and the possibilities which lie within it serve your purposes in the best possible way. If the work does not come up to your expectations or if all the things that you wish for are not being done, I beg you to make your wants clearly known. Remember, too, that when the work is undertaken and in progress that we expect you to stand by it and by the people who are putting their very life into it. If we all, in the association and in the university, have but done our part, I am sure there will be no cause for complaint. One other thing, please remember that it costs money to build houses of glass the same as it costs money to build houses of stone or brick. It costs money to develop here an experimental plant which will enable us to serve the floricultural people of Illinois just the same as it costs money to develop a commercial establishment. It is your further duty, therefore, as florists to make your wants known not only to us but to your senators and representatives to the end that when these people meet at Springfield to decide on the very best way to dispose of the $20,000,000 of state appropriation, that the florists, who are heavy tax payers, will not be forgotten. So, let me again remind you that you have a serious duty, a constant and ever present duty toward this your newly developed child at the state university. This youngster will need not only to be fed and clothed but it needs some brothers and sisters. We have an excellent range of houses, but these must be devoted for a long term of years to the special problems for which they are now being used. If we are to do your work in the largest and best way we must have rose houses, chrysanthemum houses, violet houses and orchid and palm houses. What we have done thus far is but a beginning. We must go forward until there is here on the campus of your university an equipment for floriculture which will mean as much to this industry as does some of our other equipment to the other industries of the state. If, when this is all done, it should chance to be that we have not succeeded in adding one jot or tittle to the sum total of floricultural knowledge, the effort will have been worth while and the money will have been wisely spent because by it and through it there will have been developed in the hearts and minds of these three or four thousand students a love for and appreciation of flowers, the importance of which can only be appreciated by you men who spend your lives in this, the noblest profession or calling of man kind. Will we do our full duty; can we be made to see the glorious opportunity?

SMITH'S NEW CHRYSANTHEMUM ÆSTHETIC.

THE CARNATION.

Guarding Against Stem Rot.

The plants of the earliest plantings are now beginning to give us some good blooms with a reasonable length to the stem and the principal work just at this time is to encourage a steady, healthy growth by following up closely every little detail. Bright days followed by cool nights are conditions favorable for a rapid building up of the plant growth, and the more of the healthy, sturdy growth that the plants take on at this time greater will be the returns during the midwinter months. All shading should be removed from the glass so that the plants get the benefit of the full sun, also if there is any repairing of the houses, such as putting in glass or fixing sash bars, still to be done, it should be attended to right away. There is not anything more detrimental to the well being of the plants than that of having the soil of the beds saturated in places by the rain coming through broken lights in the roof.

Stem rot is the main thing that keeps the carnation grower anxious at the present time, it being more prevalent in some soils than others. To

guard against it still keep the surface of the soil open by frequent scratchings, also pay strict attention to the watering. Allow the beds to dry out well before giving them water and then water thoroughly. There is not anything more favorable for the spread of stem rot than to have the soil in the beds dry in the interior and wet on the surface, so that there is a wet collar around the stem of the plant. The plants planted into the houses in July will have assimilated to a great extent the substance of the soil and are now well established with roots throughout the beds. This makes it necessary that these plants receive more moisture at the roots than what should be the case with the later planted stock which is not yet so well established. A supply of plants from the field should be potted up to fill in any vacant spaces in the beds caused by stem rot. Pot up the plants now and put them inside, then if required, they can be used at any time. Before filling in the spaces, remove the soil from which the diseased plant has been taken and fill in with some fresh soil.

As soon as the shoots begin to lengthen out aud bud up, disbudding should be attended to, but at this early date it is particular that the removing of the side shoots be governed with a little judgment, and rather than distress the plant be content with a medium length of stem to the flower for a few weeks yet. It is a little early in the season for the weather conditions to allow for favorable opportunities for fumigating to keep down the insects, so the spraying of the plants should still be followed up regularly. If all the plants needed have been taken from the outside planting ground, do not leave any plants there to decay, but clean them off and burn them if not needed for use or for sale.

C. W. JOHNSON.

National Association of Gardeners.

The annual meeting of the National Association of Gardeners was held at Morristown, N. J., October 27, with about 100 gardeners and florists, representing all parts of the country, in attendance. Addresses were made by J. K. M. L. Farquhar of Boston, Mass., on "Gardeners' Opportunities"; J. Otto Thilow of Philadelphia, Pa., who spoke on raising the standard of gardeners and placing them on a higher plane in life. W. J. Stewart of Boston, Mass., spoke on horticultural lines, and Charles H. Totty dwelt upon the national show of 1913. The election of officers resulted as follows:

T. W. Logan, president.

M. L. Tilliston, New York, first vice-president.

W. H. Rennie, Pasadena, Calif., second vice-president.

M. C. Evel, Madison, N. J., secretary.

F. Calvary, Mass., treasurer.

The report of the financial condition of the association was read and many new members were admitted.

MANCHESTER, MASS.—The annual fall show of the North Shore Horticultural Society was held in the town hall October 25-26.

HARTFORD, CONN.—J. K. M. L. Farquhar of Boston addressed the Connecticut Horticultural Society October 23 on "Japanese Gardens and Horticulture."

THE EXHIBITIONS.

Chrysanthemum Society of America.

REPORTS OF COMMITTEES.

Philadelphia, October 21.—Mrs. Bartlett E. Hayward, pink incurved, scored 85 points, exhibited by G. A. Lotze, Glen Burnie, Md.

Chicago, October 28.—Arthur Orr, lemon yellow incurved, scored 81 points, exhibited by Peter Schilt, Evanston, Ill. Aesthetic, lemon yellow, scored 87 points; Rose Gem, pink incurved, scored 90 points, both exhibited by Elmer D. Smith & Co., Adrian, Mich.

Cincinnati, October 28.—Pink Gem, pink incurved, scored 87 points, exhibited by Elmer D. Smith & Co., Adrian, Mich. No. 10-1909, white incurved, scored 80 points, exhibited by H. W. Rieman, Indianapolis, Ind.

New York, October 28.—Sport of Brighthurst, bronze, scored 85 points, exhibited by Alfred J. Loveless, Lenox, Mass.

SPECIAL PREMIUMS.

The following special premiums are offered for the annual exhibition of the Chrysanthemum Society of America to be held in conjunction with the St. Louis Horticultural Society at St. Louis, Mo., November 7-11, 1911.

Chrysanthemum Society of America prize—Best 10 chrysanthemum blooms of any variety. Silver cup.

Jerome Jones prizes—Best 10 blooms Chrysanthemum Mrs. Jerome Jones; first, $15.00; second, $10.00. Offered by Jerome Jones, Boston, Mass.

Elmer D. Smith prizes—Best 12 blooms chrysanthemums in 12 varieties, introductions of 1910 and 1911, shown in separate vases, not less than 12-inch stem; first, $15.00; second, $10.00. Offered by Elmer D. Smith & Co., Adrian, Mich.

William Wells prizes—Best three blooms Chrysanthemum Mrs. G. C. Kelly; first, Gold medal; second, Silver medal; third, Bronze medal. Best six sprays single Chrysanthemum Miss Hilda Wells; first, Gold medal; second, Silver medal; third, Bronze medal. Offered by William Wells & Co., Merstham, Surrey, England.

Charles H. Totty prizes—Best six blooms Chrysanthemum F. E. Nash; first, $15.00; second, $10.00. Offered by Charles H. Totty, Madison, N. J.

Henry A. Dreer prize—Best six blooms yellow seedling chrysanthemums of American origin, $10.00. Offered by Henry A. Dreer, Inc., Philadelphia, Pa.

Philip J. Foley prize—Best six blooms white seedling chrysanthemums of American origin, $10.00. Offered by the Foley Mfg. Co., Chicago.

J. C. Vaughan prize—Best 10 blooms pink chrysanthemums of American origin. Silver cup. Offered by Vaughan's Seed Store, Chicago and New York.

Peter Henderson prize—Best six blooms crimson or bronze seedling chrysanthemums of American origin, $10.00. Offered by Peter Henderson & Co., New York.

Lord & Burnham prize—Best 10 blooms any color chrysanthemums never before exhibited in this country, open to all American or imported varieties. Gold medal or $20.00. Offered by Lord & Burnham Co., Irvington-on-Hudson, N. Y.

E. G. Hill prizes—Best 10 blooms Chrysanthemum Emberta, $10.00. Best 10 blooms Chrysanthemum Wells Late Pink, $10.00. Best 10 blooms Chrysanthemum Golden Gem, $10.00. Offered by the E. G. Hill Co., Richmond, Ind.

Hitchings prize—Best 30 blooms chrysanthemums, six varieties, five blooms each, not less than 18-inch stem. Silver cup. Offered by Hitchings & Co., New York.

Entries for these special premiums are to be staged by noon, November 8.

All entries for the special prizes to be made to Otto G. Koenig, Secretary St. Louis Horticultural Society, 6471 Florissant avenue, St. Louis, Mo., or to

CHARLES W. JOHNSON, Sec'y.
Morgan Park, Ill.

Morris Co. Gardeners' and Florists' Society.

The Morris County Gardeners' and Florists' Society held its annual show Thursday and Friday, October 26-27. This society is always noted for the high quality of its exhibits and this year seemed to have exceeded itself. This is particularly true of chrysanthemums and roses.

In the rose exhibits it is interesting to note the fact that Bridesmaids are practically lost and both My Maryland and Killarney have to bow to the newer Radiance, samples of which were shown in magnificent condition, four foot stems, fully equal in all respects to the average American Beauty.

In the chrysanthemum classes for 36 flowers in six varieties Wm. Duckham, superintendent for Mrs. D. Willis James, scored first. His exhibit contained magnificent specimens of W. Woodmason, Lady Hopetown and Beatrice May. Chas. Barbanes, gardener for Dudley Olcott, Morristown, second. For 18 flowers in six varieties, J. Lindabury, gardener for Robert D. Foote, Morristown, was first. His Pockett's Crimson in this class were wonderfully fine and other very fine flowers were C. H. Totty and Rose Pockett, John Downing, gardener for Dr. D. H. McAlphin, second. James Fraser, superintendent for Otto H. Kahn, Morristown, third. For 12 flowers in 12 varieties, one vase, Alex. Robertson, gardener for E. H. Wells, Montclair, was first. This exhibit contained magnificent specimens of Alice M. Flagler, F. E. Nash, Mary Mason and Lady Hopetown. John Downing, second.

For 10 white, one variety, Wm. Turner, gardener for M. C. D. Borden, Oceanic, was first with Beatrice May, Wm. Duckham second with Mrs. David Syme. This condition was reversed in six white, where magnificent flowers of Mrs. David Syme were exhibited by Peter Duff, gardener for Mrs. J. Crosby Brown, Orange, who was awarded first against Alex. Robertson, second. For 10 pink Wm. Duckham was first with Lady Hopetown.

One of the most striking exhibits in the show was the class for 24 blooms in 24 distinct varieties, single stem, shown in single bottles. This class was won by Wm. Duckham, who had a remarkable collection of varieties. They included, as the very finest, Harry E. Converse, W. Woodmason, Mrs. G. C. Kelly, Mrs. H. Stevens, Chrysanthemiste Montigny, Alice Lemon and Onunda. Wm. Turner was second with a wonderfully even lot of blooms. Ernest E. Wild, gardener for C. W. Harkness, Madison, was first with what the judges thought the 12 best flowers in the exhibit. They were as follows: W. Woodmason, Rose Pockett, Mary Farnsworth, Naceur Bey, Alice Lemon, Mrs. David Syme, Beatrice May, Pockett's Crimson, F. E. Nash, Lady Hopetown, Frank Payne and George Lock. His nearest competitor was J. Lindabury, and third prize was won by James Fraser.

The special Stumpp & Walter prize was won by Alex. Robertson for six flowers in six varieties which were all of superb quality. F. E. Nash, Lady Hopetown, Hon. Mrs. Lopes, Gladys Blackburn, F. S. Wallis and Alice M. Flagler, Peter Duff taking second. In the class for six flowers, one variety, James Fraser scored first in six pink, with fine Wm. Duckham; in six bronze with Rose Pockett; six crimson, Pockett's Crimson, and J. Lindabury first for six yellow with F. S. Vallis. The vase of chrysanthemums arranged for effect. John Downing was first and James Fraser second. The class for pompon chrysanthemums was won by Henry Gaut, gardener for J. T. Pratt, Glen Cove, L. I. John Downing scored first for 12 vases of singles. In the commercial classes Chas. H. Totty ran first clean down the list, showing Mrs. David Syme for 10 white; R. F. Felton for 10 yellow; Reginald Vallis for 10 pink and Mrs. O. H. Kahn for 10 of any other color.

The chief noticeable fact about the chrysanthemum exhibits was the predominance of the Australian varieties. Outside of Merza, F. S. Vallis and Chrysanthemiste Montigny, the entire show may be said to consist of Australian varieties. The peer of them all was Mrs. David Syme. It was too early for the growers in this vicinity for any other varieties which will possibly be seen in New York next week in better condition.

In the rose classes L. A. Noe was first for 18 American Beauties. L. M. Noe Estate first for 12 of the same variety. Wm. Kleinheinz, gardener for P. A. Widener, Elkins, Pa., second. L. M. Noe was first for 25 Bridesmaids and 25 Brides, but was beaten by L. B. Coddington for 25 Richmonds. Mr. Coddington scored first for 25 Killarneys, L. A. Noe second. This condition was reversed in 25 White Killarneys where L. A. Noe scored first and L. B. Coddington second. For 25 any yellow roses Chas. H. Totty scored first with 25 Lady Hillingdons. L. B. Coddington second with the same variety.

First for 12 Bridesmaids went to Robert M. Schultz; 12 Richmonds, C. H. Totty; 12 Killarneys, Wm. Kleinheinz, who also won in 12 White Killarneys. Edward Behre, Madison, N. J., got first for any other pink with 12 Radiances; 12 any other color was won by Andrew Morrison, gardener for John F. Dryden, Bernardsville, with 12 Melodys. For the "best vase of roses, any variety except American Beauty," Chas. H. Totty was first with splendid samples of Sunburst. This rose excited the admiration of everyone in the hall and was featured in another large exhibit by the same exhibitor, not for competition. Chas. H. Totty also won first for 25 pink roses, any other pink with Radiance.

In the classes for groups John Downing was first in the class for chrysanthemum flowers arranged with foliage or flowering plants, for effect, and H. B. Vyse, gardener for A. R. Witney Estate, Morristown, second. One specimen plant in flower: First prize was awarded to Peter Duff with a fine plant of Mrs. R. Hooper Pearson. One specimen white, same exhibitor, first with Lady Lydia. John Downing got first for 12 chrysanthemum plants in flower, single stems, six-inch pots, and Peter Duff, six plants in flower, was second.

The orchid tables were a beautiful feature of the show. First prize was given Wm. Duckham. The predominating feature of his exhibit was Dendrobium phalænopsis Schroderianum.

The prizes for carnations were twenty-five any pink variety, W. H. Duckham first with Mrs. C. W. Ward, Wm. Kleinheinz, second, G. F. Seipp, Chatham, third. Twenty-five blooms white, Wm. Kleinheinz, first. Twenty-five blooms red, G. F. Neipp. Wm. Duckham was first for 25 blooms any other color. Ernest Wild first for 12 blooms pink, with splendid flowers of Princess Charming. Wm. Duckham, first for 12 flowers Wodenethe. John Watson, gardener for J. W. Cromwell, Summit, first for 12 red.

Badgley, Reidel & Meyer's special prize for vase of carnations was won by G. F. Neipp, with fine gloriosa. For 100 double violets, Richard Langley of White Plains, N. Y., was first and Peter Duff, Orange, first for 100 single. For 12 vases single chrysanthemums J. W. Everitt, Glen Cove, L. I., first.

In the vegetable classes for Boddington's special prize, for a collection of vegetables, 12 varieties, Harold B. Vyse first with a very high-class exhibit, Jas. Fraser coming second. Peter Henderson & Co.'s special prize, Jas. Fraser first and H. B. Vyse second. Apples which are not usually a very strong feature of this show, were shown in splendid condition, the principal prize winners being John Downing and Wm. Reid, gardener for Sydney and Austin Colgate, Orange.

The special prizes awarded were as follows: Cultural certificates to Spring Brook Farm, Morristown; J. Lindabury, gardener, for carrots and beets; Thos. Jones, Slush Hills, collection of orchids. Certificates of merit to C. A. Work, Madison, for specimen Boston fern and two Ponderosa lemons. Lager & Hurrell, Summit, exhibit of orchids, Henry A. Dreer, Inc., Philadelphia, Pa., for collection of dahlias and ferns, and W. A. Manda, South Orange, collection of dahlias and ferns. Chas. H. Totty, Madison, was awarded a special prize for outdoor chrysanthemums.

Lenox Horticultural Society's Fall Show.

The Lenox Horticultural Society held its eleventh annual exhibition at the Town Hall, October 25-26, and fully maintained its prestige. Plants, fruit, vegetables and cut flowers were all at high watermark. Cups and special prizes were more numerous than usual, and in most cases competition keen.

W. D. Sloane of Elm Court (F. Heeremans, gardener), won the H. A. Dreer cup outright for group of plants, also J. Breck & Son's cup for 24 cut blooms of chrysanthemums. Mrs. R. W. Winthrop (S. Carlquist, gardener), won the President's cup for 12 varieties of vegetables, and also W. C. Gloeckner's cup for 50 mixed blooms of carnations. Mrs. J. E. Parsons (R. Spiers, gardener), won the Elmer D. Smith prize for chrysanthemum Lenox. G. Foster (E. Jenkins, gardener), won outright the E. Jaques cup for 18 varieties of vegetables, also the A. N. Pierson cup for roses. S. P. Shotter (A. Jenkins, gardener), won the Chrysanthemum Society of America cup for 10 blooms of chrysanthemums. W. M. Salisbury, For Court (J. W. Pybus, gardener), won Julius Roehr's special prize for specimen orchids. Other firms that subscribed handsomely towards the show were Hitchings & Co., Elizabeth, N. J.; Lager & Hurrell, Summit, N. J.; Peirson U-Bar Company, New York; Bon Arbor Company; Lord & Burnam Co., New York; A. T. Boddington, New York; Scott Brothers, Elmsford Nurseries, New York; Frank Howard, Pittsfield, Mass., and Peter Henderson & Co., New York. Julius Roehrs staged a small collection of very interesting orchids, some of which were very choice, and C. H. Totty had a stand of mostly new varieties of Japanese, single and pompon chrysanthemums.

The committee on arrangements was Walter Jack, Robert MacConnacchie and A. Bund, but the former should have a special medal for the way he kept his temper at all times. He is a topnotcher at the show business. Also, we must congratulate our secretary, George Instone, upon the success of the show; financially it beat last year's record, and everybody is happy.

JOSEPH W. PYBUS.

OBITUARY.

Mrs. Elsie Martini.

Mrs. Elsie Martini, wife of A. Martini, head gardener at "Koramoor," Lake Geneva, Wis., died October 22 of tetanus, resulting from a broken limb received in a runaway accident. Mr. Martini, formerly with the Ernst Wienhoeber Co., Chicago, came with his family to Lake Geneva a year ago and made a great many friends in this community, who sympathize with the bereaved husband and children in their deep sorrow. Mrs. Martini was 39 years of age and was a woman of sterling character, beloved by all who knew her. The funeral was attended by the members of the Gardeners' and Foremen's Association and a large number of sorrowing friends. The floral tributes from members of the association and friends were beautiful and expressed in a measure the esteem in which Mrs. Martini was held by her associates.

L. Gibson.

L. Gibson, proprietor of a florist establishment at Twentieth and Adams streets, Louisville, Ky., died at his home October 24 in his sixty-ninth year. Mr. Gibson was born at Bloomfield, Ky., December 24, 1842, and at the outbreak of the civil war enlisted, serving on the U. S. gunboat Petrel. By an accidental discharge of a musket during gun drill he lost an arm, and after recovery was employed as orderly at the government paymaster's headquarters. He later accepted a position in a greenhouse and after obtaining experience started in the business, and notwithstanding the loss of his arm made floral designs, potted plants and performed the other duties connected with the establishment. He had a most genial personality and polite manner, which built up a thriving business.

George M. Woodward.

George M. Woodward, a well-known gardener of Chicago, died October 24, aged 63 years. Mr. Woodward was born in Malvern, England, May 21, 1848. After obtaining horticultural training he came to America, arriving in this country in 1876. He here obtained employment in his chosen calling and for 14 years was with the John Lester estate. Severing his connection here he took charge of the J. J. Mitchell grounds and greenhouses. He was a member of the Chicago Florists' Club and the Modern Woodmen of America. He is survived by a widow, three sons and two daughters. The funeral was held Friday, October 27, and was largely attended by florists and gardeners of the city and vicinity.

Charles Zimmerman.

Charles Zimmerman, head of the firm of Chas. Zimmerman & Sons, 7150 Cottage Grove avenue, Chicago, died at his home, October 23, aged 64 years.

Mr. Zimmerman was born in Switzerland and came to America in 1871. He first obtained employment in horticultural lines, his chosen profession in the eastern states, and then came west, accepting the position of gardener on the J. J. Mitchell estate at Chicago. Fourteen years ago, in company with his son, he established a general florist business in Chicago, which has been successfully continued. He is survived by two children, a son and daughter. The funeral was held October 25 and the interment was at Mt. Olive cemetery.

AN early and severe winter is predicted by the weather bureau for the middle west.

IT is reported in our city newsletters this week that George G. Solomon, of Boston, has filed a voluntary petition in bankruptcy with liabilities of $12,000, and that a receiver has been appointed in the business of H. L. Blind & Bro., Pittsburg, which carries liabilities of $143,000.

Personal.

President-Elect Vincent of the Society of American Florists will visit Chicago November 19 and 20, and has fixed stereopticon lecture dates as follows: St. Louis, Mo., November 8; Cincinnati, O., November 14, and Louisville, Ky., November 15.

Florists' Club Anniversaries.

In an item which appeared in the AMERICAN FLORIST, issue of Oct. 7, page 566, the date of the organization of the St. Louis Florists' Club was given as June 28, 1887. We are in receipt of the following:

ED. AMERICAN FLORIST:

On June 28, 1886, the St. Louis Florists' Exchange was organized and the following year the name was changed to the St. Louis Florists' Club, which according to name would only be twenty-five years old next June, but we must consider our organization dated June 28, 1886, which made it twenty-five years old June 28, 1911, and which we celebrated.

J. J. BENECKE, Sec'y.

[From all data obtainable the date of the organization of the St. Louis Florists' Club was given as June 28, 1887. We are only too glad to give the same publicity to the statement of the secretary of the club. Ed.]

American Rose Society.

EXHIBITION IN JANUARY, 1812.

The arrangements have been made for the joint exhibition of the American Rose Society, the American Carnation Society and the National Sweet Pea Society of America at Detroit, Mich., in January, 1912, to be held in Wayne pavilion adjoining the Michigan Central union station, where trains from New York, Boston, Philadelphia, Pittsburg, Washington, Cincinnati, Chicago, etc., come in. The hall is spacious and so arranged that ventilation is readily adjusted.

The effort will be to make this a great popular show. The trolley lines come to this city from all the surrounding country. An effort is also being made to issue a prize list of value. The American Rose Society asks the support of all its friends for the list of premiums.

The Annual Bulletin for 1912 will be mailed by Christmas and contains much matter of interest.

We would be glad to hear from any and all intending exhibitors at an early date, and we are fully assured that the Detroit people will do all that is possible to aid the exhibition.

BENJAMIN HAMMOND, Sec'y.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Elmer D. Smith announces the committees to examine new chrysanthemums for the ensuing year which are as follows:

Boston—Wm. Nicholson (chairman), James Wheeler, Alex. Montgomery. Ship flowers to Boston Flower Exchange, C. Park street, care of chairman.

New York — Eugene Dailledouze (chairman), Wm. H. Duckham, A. Herrington. Ship flowers to New York Cut Flower Co., 55 Twenty-second street, care of chairman.

Philadelphia—A. B. Cartledge (chairman), John Westcott, S. S. Pennock. Ship flowers to A. B. Cartledge, 1514 Chestnut street.

Cincinnati—R. Witterstaetter (chairman), James Allen, Henry Schwarz. Ship flowers to chairman, Jabez Elliott, Flower Market, care janitor.

Chicago—J. B. Deamud (chairman), T. E. Waters. Ship flowers to J. B. Deamud, 160 N. Wabash avenue, Chicago.

Shipments should be made to arrive by 2 p. m. on examination days to receive attention from the committee. Must be prepaid to destination and an entry fee of $2.00 should be forwarded to the secretary not later than Tuesday of the week they are to be examined, or it may accompany the blooms.

Seedlings and sports are both eligible to be shown before these committees, provided the raiser has given them two years' trial to determine their true character. Special attention is called to the rule that sports to receive a certificate must pass at least three of the five committees.

The committees will be in session to examine such exhibits as may be submitted on each Saturday during October and November, the dates of which will be October 7, 14, 21, 28, and November 4, 11, 18, 25.

PEOPLE WE KNOW.

James McHutchison.

In 1893 the boom which Australia had enjoyed for the five previous years burst and James McHutchison left his native land without funds, but with indomitable pluck and courage and commenced his travels over a greater portion of the world, finally settling in New York, where after a few years experience in this country, he established the well known house of McHutchison & Co., importers of plants and nursery stock.

Mr. McHutchison was born in Ballarat, Victoria, January 19, 1873, his father and mother being among the early settlers of Australia. When he was 16 years of age he obtained a position with Paton & Son, then vice-regal and leading florists and nurserymen of Melbourne. During the five years he was employed with this firm he obtained a general knowledge of horticulture, in store, warehouse, under glass, and in the nursery, which formed the foundation on which his success in after life was built. In 1893 when the land boom burst, every bank in Melbourne toppled, one after the other. Business was dead, with everyone trying merely to hold on to what they had.

Then the "wanderlust" struck him He had no money as all he earned had been given to his folks. He left home with $1.75 in his pocket and got a position as a gardener on a station away up in the bush. After eight months of this rough life, he had saved enough money to take him somewhere, so returned to Melbourne and bought a ticket for New Zealand via Tasmania. In New Zealand he stayed two and one-half years, traveling over the country extensively, and had many interesting experiences, worked in horticultural pursuits in Christchurch, Wellington, Palmerston, N. Wanganui and Auckland, and left there for Sydney, intending to travel around the world for two years and return at the end of that time to Auckland, N. Z.

After a three weeks visit to his home in Melbourne, he bought a ticket for Bremen, Germany (that was the furthest he could get on any line), and traveled through Germany a little. Saw Berlin and Hamburg and finally escaped from there like a criminal, having no passports, on a small fishing steamer to England, from there to France, Holland and Belgium and returned to England. With little trouble a position was obtained at Thomas Rochfords, Broxbourne, then (as probably now) the largest greenhouse establishment in the world. Here he remained for 10 months, the manager kindly transferring him to the departments in which he was most interested.

Arriving in New York in 1896 he obtained employment in the greenhouses at the Wm. Rockefeller estate, on the Hudson, under Wm. Turner, where he stayed for 13 months, fully recovering his health and learning the ways of the country. Looking for a broader field he returned to New York and accepted an offer to travel for Siebrecht & Son, on commission only. This lasted only for a few months, but it was experience well paid for, and brought him an offer from Aug. Rhotert, an import agent in New York, to travel for him. Five years of traveling gave him a wide acquaintance, not only with the largest American florist, seed and nursery firms, but with the European sources of supply as well.

In June, 1902, he established the present firm of McHutchison & Co., in a small office at 218 Fulton street, and sailed for Europe on the next steamer to make connections. This work was so well done that today they still represent practically the same firms, though they have, of course, all increased their equipment as the increase in American exports warranted. Three years later a partnership was formed with Mr. Hoffmire and Mr. Knickman, who still continue as his associates at 17 Murray street, New York, where they had to move for larger accommodations in 1906, and now occupy the entire second floor of

James McHutchison.

the building. The business in the past nine years has grown to enormous proportions. It is not only the largest of its kind, but is unique in many respects. The trade is exclusively in import horticultural lines, rendering original foreign invoices—having their own custom house department—selling only to importers and jobbers and usually making up carload lots for the Pacific Coast and all distant points. The business is built up on the principle that only that trade is worth while, that is profitable to all concerned in it.

Nature's Seed Distribution.

Each season presents its own peculiar beauties. November, often regarded as cold and chill, the death time of the year, has a special charm for those who love the woods. While most of the leaves have fallen, and either lie in sweet smelling heaps by the pathway, or are driven in wild mazurkas by the wind, a few wine-colored, tawny, bronze or amber tinted still remain untouched. Oaks, for instance, are never more picturesque than now as the light shines through their persistent foliage. Again, the walker is very much impressed by the yellow, or ochre or sienna colors of many grasses. Those along the salt marshes are particularly lovely while on sandy upland banks one notes the feathery plumes of andropogon.

This leads us to speak of the varied means of distribution which nature employs to scatter fruit and seed, writes Dr. W. W. Bailey in the American Botanist. The object of such dispersion is to remove the young scholars, if we can so call a seed, from the too direct and overshadowing home influence. A little observation during the season, only, goes to show that wide distribution is not so much aimed at, as new chances and improved environment. Thus if one watches the aeronautic ventures of thistles or dandelion or milkweed he will be surprised to find that many times the balloon or parachute is empty. The passenger has stopped in his own country or, in other words, seed or fruit have become detached near home. Of course, there are times in tempest or gale when winged or plumose fruits and seeds are whirled to remote distances, but it is not the rule.

Another mode of dispersal is duly impressed at this season upon the pedestrian, who finds his clothes lined with burs or prickly pods. Nature is very fond of this grapnel method of seed distribution. She may employ simple spines as in cockle bur, or hooks as in burdock, or spines with retrorse teeth as in beggar ticks. The object is the same in all cases; viz: to make animals and man the agents in scattering the offspring. It is too late, now, in most cases to observe the mechanical means of propulsion employed by wild geranium, wood sorrel, violet, etc. It may be, however, that a branch of witch hazel (Oct. 30) in flower, if taken home may some night surprise the collector by an unwarrantable artillery discharge. The shining seeds are forcibly expelled from the woody capsules. We have often tried to analyze—it is too subtle a sentiment to catch—the peculiar feeling induced by the spider-like yellow flowers of this witch hazel or hamamelis. Why should it bloom so late, even after its own foliage can no longer give it countenance?

Sometimes one sees, brought from the West Indies, the so-called "sand box." This is a woody capsule, in which the tension is so great, that when relaxed the seeds are sent in a noisy bombardment to a long distance. Who could fill that box—repack it again? "Where is that Promethean heat which could its light relume?"

We cannot, in so brief an article by any means exhaust the list of ways in which seeds are dispersed. Many fruits by their colors are attractive to animals. Their pulp may be eaten and the seeds rejected. Then, as every one knows, birds make a tremendous scattering when they alight on a thistle top or a sumac. Nature's political economy is not always to be seen of men. Water is an agent in transferring many seeds and fruits which by special levity or by contrivances adapted to the purpose, float on stream, river or ocean. There is no more fascinating study than is afforded by this branch of ecology.

MELROSE PARK, ILL.—The Elmhurst Floral Co. has been granted articles of incorporation. The capital stock is $10,000, and the incorporators are Herman Weiss, Paul L. Haertel and William H. Reich.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Milwaukee.

A PROSPEROUS WEEK.

The past week things have moved lively with carnations and roses scarce, which helped the sale of chrysanthemums. Carnations have stiffened up considerably and the prices have advanced on them and the same can be said of the roses, the dark and cold weather having shortened up the supply so much that it is impossible to fill all orders for them. Lily of the valley was also a scarce article in the market, as all the growers seemed to be out of crop at the same time. There is plenty of green to fill all requests. The week was rather a prosperous one, as the city had the honor of being able to entertain President Taft, which caused a large demand for American Beauties and other fancy flowers, and there was a large quantity of flowers used for the funeral of August Uihlein, the popular brewer and horse man.

NOTES.

W. C. Zimmerman is sporting his new Ford delivery car which he says has a horse and wagon beat at all times for prompt service. But he had a close shave on Tuesday when out in his touring car delivering a floral design which he had placed in the rear seat. While looking around to see if it was still in its place, his machine collided with a wagon load of iron pipes and the entire front was torn off. It was almost a miracle he did not get seriously hurt, and he was fortunate to get away with only a few slight bruises. The machine is badly damaged.

H. V. Hunkel is very busy making the final arrangements for the big flower show that will open in the Auditorium on November 13. Every one of the local florists should do all in their power to advertise the show and help the management and the various committees to make this fall show a record-breaker. It can be done very easily and all that is needed is to pull together and a little boosting by each member of the trade.

Holton & Hunkel Co. is cutting a lot of fancy chrysanthemums and American Beauties; the latter are exceptionally fine, with large buds on long stems well clothed with luxuriant foliage. They are also filling a large number of orders for kentias and araucarias of unusually fine quality.

C. C. Pollworth Co. report business good. This firm is cutting some fine fancy chrysanthemums and carnations. The conservatory in the rear of the store is now completed and will be stocked with palms, ferns, and blooming plants to supply the trade.

The Baumgarten Floral Co. has had a large amount of funeral work. Among their orders was a casket cover which was made entirely of orchids and lily of the valley, which was very artistically arranged.

Gust Rusch & Co. are well satisfied with the way business has been going on. There is something doing all the time and they are receiving a nice large lot of stock with which to take care of their trade.

Manke Bros. are having their average cut of carnations, which are fancy stock and selling readily. They are also commencing to cut some fine Major Bonnaffon chrysanthemums, which sell well.

Ed. Stewart has been serving on the jury for the last month but expects to be excused for he does not want to serve and prefers to take care of his business. He reports business as good.

Gust Mueller, of Mueller & Schroeder Co., says his carnations are fine but are off crop at present. He expects to have a fine crop in a few weeks.

Nic. Zweifel is adding a new house 200 feet long, which he is going to use for young stock. He is cutting his usual amount of carnations.

Only nine days more and the fall flower show will open at the Auditorium.

The bowling scores this week are as follows:

Currie	156	132	99	Nohos	159	122	135
Manos	127	113	95	Halliday	147	136	129
Lietz	82	71	86	Eggebr'ht	141	121	149
Hunkel	137	101	93	Zweifel	156	147	
Holton	182	134					

Beginning in November the ladies' bowling club will bowl at Steinke's alleys and this will help to make things more pleasant for both clubs.

G. R.

Dayton, O.

Business is good, there being no one in the flower trade complaining. The first frosts in this section were recorded October 23, killing the outdoor flowers, thus making trade better for the real florists. Carnations are plentiful, as are also chrysanthemums.

NOTES.

Miss Ruby Bartholomew, the talented daughter of Geo. Bartholomew, manager of the Miami Floral Co., has announced her marriage as an early fall event, and the happy couple are going to Bermuda on their honeymoon.

The Dayton Floral Co. cleared through custom house, Dayton, port of entry, six cases of azaleas and six cases of araucarias and palms this week.

Matthews the Florist is cutting his first Paper White narcissus and they are of good quality.

R. B. Kilberry has done a great business in field-grown vincas this season.

BUY DIRECT OF US, as we are growers and guarantee our stock strictly fresh.

BASSETT & WASHBURN

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois

Chicago.

THE CHYSANTHEMUM SEASON.

The chrysanthemum season is now approaching its height and this flower simply dominates the market. They are to be had in quantities of all color and of all grades from the smallest pompons to the immense exhibition blooms. But with all the large receipts they are finding a good market and the blooms of quality are bringing good prices, $5.00 a dozen being quoted for the extra quality stock. It would be difficult to name the varieties that are now to be had, but among the prominent ones now seen are Col. D. Appleton, Timothy Eaton, Crocus, Clementine Touset, and Major Bonnaffon, which are to be obtained in fine shape. The roses are now being received in large quantities but still they all find a good sale. The market is being very well cleaned up from day to day. The trade for All Saints' day was exceptionally fine, the wholesale houses all having large orders for chrysanthemums and other flowers, many reporting that the shipping trade for that day exceeded other years. Hallowe'en also called for many decorations, making altogether a very busy week. The roses are fine, splendid American Beauty, Killarney, My Maryland, Mrs. Marshall Field, Mrs. Jardine and Perle des Jardins being received every day. The newer varieties are to be seen but not in quantities enough to cause mention, with the exception of Mrs. Aaron Ward which is growing in popularity. Carnations are of fine quality and are finding a good market, the prices holding up well. The receipts of orchids are a little heavier, some beautiful Cattleya labiata and Denbrobium formosum and Oncidium varicosum are to be had. Lilies are not in such large supply, but there are enough to fill all orders. Lily of the valley is just about equal to the request. The outside stock is now at an end, the frosts of last week finishing it up. Some few bunches of cosmos are to be had where it has been protected, but the great quantities of dahlias are a thing of the past. Greens are in good supply and of excellent quality, and the berried branches as samples are being shown. The blooming plants are beginning to make their appearance in the store windows, Begonia Gloire de Lorraine being seen quite well in bloom.

NOTES.

Fred Lautenschlager informs us that his firm, Kroeschell Bros. Co., is building a large greenhouse boiler and planning the heating sytem for the Falmouth Mushroom Cellars that are under construction at Boston, Mass. The cellars will be modern in every particular and when completed will look more like an up-to-date public service building than it will a structure devoted to commercial purposes. Wheelwright, Haven & Wright, the well-known architects of Boston, have the contract for the building and Kroeschell Bros. Co. of this city the contract for installing the heating system.

Frank J. Farney, the traveling representative for M. Rice & Co. of Philadelphia was showing the local florists his firm's latest novelties which he had on exhibition at the Sherman house this week. His line was very complete and consisted of such articles as are absolutely necessary in conducting an up-to-date retail establishment.

E. O. Orpet, Lake Forest, returned from the east October 30 and reports a very informing and enjoyable trip, an account of which he has promised to give our readers at an early date.

H. C. Rowe has a very attractive window this week, Hallowe'en giving an opportunity to introduce some taking features. H. E. Klunder has accepted a position at his store and his artistic touch can be seen in the arrangements.

John Poehlmann and his force of assistants put in a busy week at the Poehlmann Bros. Co.'s store. The stock is arriving in the best of condition and in quantity large enough to meet all demands.

Wietor Bros.' stock is meeting with very ready sale and large quantities of roses, carnations and chrysanthemums are sold at an early hour. The Killarney roses are of fine quality.

John Starrett had a busy week at the Hotel LaSalle arranging the floral decoration for the various banquets that were given in honor of President Taft.

Wm. J. Smyth delivered several large and elaborate funeral designs to the Walsh residence on October 26, when the funeral of the banker was held.

Walter W. Adams says his firm, the Adams-Robertson Co., filled several large orders for the John R. Walsh funeral which occurred last week.

The S. Wilks Mfg. Co. is prepared for large orders. They have several hot water greenhouse boilers under construction.

George Perdikas has enlarged his store on Jackson boulevard and is now better prepared for the busy season.

A coffee tree in bloom is an object of interest at the John Paulus store on North Clark street this week.

Percy Jones is again headquarters for New York violets and as a result a large quantity are sold daily.

R. G. Simmen of LaSalle visited Poehlmann Bros. Co.'s large plant at Morton Grove October 27.

Fred Krauss has given up farming and has resumed his position with the E. F. Winterson Co.

John Then is recovering from a severe cold.

ROSES, our selection, $3.00 per 100

WIETOR BROS.

162 N. Wabash Ave., CHICAGO.

Joseph Kohout and J. G. Schumann bought the Chicago Rose Co.'s range of greenhouses, consisting of 50,000 square feet of glass, located in Libertyville, and took possession on Saturday, October 28. Both are experienced growers and well known to the trade, having been in the employ of Bassett & Washburn at Hinsdale for the past 10 and 13 years, Mr. Schumann in charge of the roses and Mr. Kohout of the carnations. The firm name will be Schumann & Kohout and the stock will be consigned to Chicago Rose Co.'s store on North Wabash avenue. The proprietors have the best wishes of the trade in their new undertaking and it is hoped that the venture will prove profitable.

Philip L. McKee of the John C. Moninger Co., made a flying trip to St. Joseph, Mo., on October 28, returning the following Monday. Mr. McKee evidently did some hustling for the few hours he was in that city, for he booked D. H. McInonch's order for two iron frame houses 28x100 feet, and had a ride behind the grower's trotter through the principal streets of that city, besides calling on a few other growers, all between train time.

Otto W. Frese says that the Chicago Flower Growers' Association had a very good All Saints' day trade and that about 3,000 chrysanthemums were shipped out on October 29 and 30. This firm is now receiving fine Major Bonnaffon chrysanthemums from Frank Felke and a large quantity of Killarney and White Killarney roses from the Wellworth Farm greenhouses.

Bassett & Washburn are cutting some large Timothy Eaton and Yellow Eaton chrysanthemums that are selling at wholesale at $5.00 per dozen. The down town retailers are buying them as fast as they arrive at the store and are featuring them in their window displays.

H. E. Kidder, mayor of Ionia, Mich., and manufacturer of the famous Ionia pots, was in the city this week on business. Mr. Kidder denies the fact that his mission was to introduce President Taft to the various local political organizations.

Geo. Keller & Son, manufacturers of red pots, have eight carloads of eastern clay on the track, with eight more to follow to wind up this season's supply. Business has been very good with the demand nearly equal to the output.

There is lots of snap to the business as conducted at the J. B. Deamud Co.'s store, and in the large supply of seasonable stock displayed the home-grown violets are particularly noticeable.

Mrs. Marie Hartung of Kensington, who has been under the physician's care for nearly a year, was removed to the Pullman hospital, where an operation was performed.

Zech & Mann had their share of the All Saints' Day business and were kept on the jump all day Saturday and Sunday filling orders that they had received.

The Briggs Floral Co. had several large Hallowe'en party decorations the past week that kept Fred Strail on the jump arranging them.

The L. Hrudka Pottery Co. has just received a carload of red pots from Harry Balsley of the Detroit Flower Pot Manufacturing Co.

Tim Matchen says Peter Reinberg's Mrs. Aaron Ward and Melody roses are selling about as fast as they arrive at the store.

Hoerber Bros. are finding that their Bride roses are selling as good if not better than their fancy Killarney and White Killarney.

E. E. Pieser says that Kennicott Bros. Co's. business for October was most satisfactory and a little better than last year.

John Risch says there is nothing like Melody for a yellow rose and Killarney for a pink, both in a class by themselves.

J. T. Helbok has had several offers for his store on Wrightwood avenue but has not yet found a suitable buyer.

Theresa Scrivani, well known to the trade as the flower girl, died on October 29 after a lingering illness.

The A. Dietsch Co. is building two houses 25x100 feet for C. A. McNabb of Oklahoma City, Okla.

Rober & Radke of Maywood are building a new bulb house 12x75 feet of Moninger material.

Ralph Keefe, formerly with Vaughan & Sperry, is now with the Batavia Greenhouse Co.

Phil. Foley returned October 31 from the east, where he made a prolonged business trip.

Henry Seitz is making a number of improvements to his store on Evanston avenue.

Vaughan & Sperry are showing some White Garza chrysanthemums this week.

Jack Henick is now in the employ of the Chicago Flower Growers' Association.

Visitors: Chas. Frueh, Saginaw, Mich.; Mrs. J. C. Rennison, Sioux City, Ia.; W. F. League, Hannibal, Mo.; F. C. Weber, St. Louis, Mo.

GROTON, MASS.—H. Huebner has completed the erection of a large greenhouse and a cold storage building.

JOHNSTOWN, PA.—Traugott Malbranc has opened a new store in a conservatory at the Capital hotel. New refrigerators and fittings, and a greenhouse 90 feet long on Main street, filled with plants and flowers made an inviting store at the opening in October, that was well attended and appreciated by the public.

LARGE SUPPLY OF
Beauties, Roses,
Carnations, 'Mums,

And all other Choice Seasonable Stock.

Horticultural Society of Chicago.

The preliminary premium list for the first spring exhibition of the Horticultural Society of Chicago to be held in the Art Institute, March 12-17, 1912, is issued. Prizes are offered for flowering and bulbous plants; pot roses, palms, ferns and foliage plants; roses, carnations, sweet peas and other cut flowers. A copy of the prize list may be had upon application to J. H. Burdett, secretary, 1620 W. 104th place.

New Orleans, La.

WEATHER COOL AND PLEASANT.

For the last ten days the weather has been quite favorable to the growers of chrysanthemums, to develop their flowers, but too late to bring them to the perfection they should be, as it is we will have only half or three-quarter blooms at the most, and the florists are booking orders heavy with Chicago for All Saints' day. Since the cool spell came in some 15 days ago business has picked up and is quite brisk, and the gardeners are now busy making their winter lawns.

NOTES.

The New Orleans Horticultural Society held its monthly meeting last week and it was largely attended. It was proposed that the society give one grand show in the fall of 1912, inviting the truck farmers and agriculturists to participate in conjunction with the horticulturists in giving a grand exhibit of the products of the state of Louisiana, which it is hoped will attract the people to attend, as a flower show in itself has always proved a dismal failure.

H. Papworth, president of the Metarie Ridge Nursery Co., has sent out invitations to the public and the Horticultural Society to call at the nursery Sunday evening, October 29, to inspect their chrysanthemums grown in the greenhouses. Refreshments will be served.

P. A. Chopin has a fine collection of plants in his houses, and is prepared for a good fall and winter trade.

Mrs. F. Gruaz of Washington avenue is doing a land office business in the cut flower line, also in plants.

Mrs. C. Reames has entirely renovated her greenhouses, which are well stocked with plants.

H. Dorscher's crop of white chrysanthemums have failed for the All Saints' day sale.

A. Alost has a fine lot of flowers for November 1 trade. D.

Chicago Bowling.

Some very interesting games were played at Bensinger's alleys Wednesday, October 25, when the Orchids won two games and lost one to the Violets, and the Roses won two and lost one game to the Carnations. John Zech, the Orchid's old reliable war horse, was again high man of the evening, bowling 205 in the first, 183 in the second and 190 in the last game played. Chas. Balliff also bowled over the 200 mark and was followed closely by Allie Zech, who bowled 199, and Wm. Graff and John Huebner had 193 and 191 points to their credit in the last game played. With a little more practice the boys will again be bowling in their regular form and some close and exciting games may be looked for before the season closes. If you are not a bowler and would like to look on, come up. Everybody is cordially invited.

The following table shows the number of games won and lost by each team to date:

	Won	Lost		Won	Lost
Orchids	11	1	Roses	4	8
Violets	7	5	Carnations	2	10

Individual and team scores for games played October 25:

AN IMMENSE CUT OF CHRYSANTHEMUMS.

There is no complaint about business. All the retailers seem to be reasonably busy, as indeed they have to be to handle the immense stock of chrysanthemums that is now pouring in. As a matter of course, all other stocks are now overshadowed by them, but roses, carnations and violets are by no means out of the running. There seems to be much funeral work and we have recently noted large flat pieces made up with large pink chryanthemums and autumn foliage that were very fine. We speak of pink chrysanthemums, but would not lavenders be a better adjective for most of them? Growers seem to be cutting chrysanthemums close and it is a good move. A chrysanthemum that is wide open when cut is almost a back number.

NOTES.

George H. Cooke, who was a grower before he went into the retail business and is well informed, said recently in speaking of the dahlias that conditions for their successful growth have been ideal this season. He added that the dahlias seen this season had been a revelation to many customers because they never expected to see such good ones. He talked further on a feature that should interest growers. Said he: "Every previous year that I have lived in Washington the dahlias were killed by frost just when they were at their best. This year there has been no frost (October 28), but the dahlias have practically flowered themselves out. It is the same with the cannas you see in the parks, though frost has not touched them, you may say that they have ripened." All of which goes to prove that leaves and flowers have their time to fall and that in more instances than many people are aware of, the blooming qualities have been weakening long before the frost puts on the finishing touches.

The venerable W. R. Smith of the U. S. Botanical Gardens is a patient in Providence Hospital, this city. Notwithstanding his more than fourscore years, he has been quite rugged and active during the past summer. He attended the Baltimore convention, as will be recalled by the readers of the AMERICAN FLORIST. About October 24 he was seized with serious illness and has since been in the hospital. When we visited him, October 29, he was resting easily and it was believed at the hospital that his condition was much improved. That the interest and sympathy of a host of friends follow him is evidenced by constant inquiries at the hospital concerning his condition.

Miss Marie Gude, oldest daughter of Adolphus and Mrs. Gude, will be married to Charles DeShields at the New York Avenue Presbyterian church, this city, on November 15. Miss Gude is a young lady of fine education and excellent qualities of mind and heart, one of the girls destined by Providence as the maker of a happy home. Mr. DeShields is a young and rising business man of this city, with exceptionally fine traits of character.

Otto Bauer, manager of the Washington Florists Co., has a unique Hallowe'en window decoration—the moon, a witch and a broomstick. We are not well posted on the physical conformation of witches, but are willing to take Mr. Bauer's word for it that his witch is up to date and modish. We think he has been reading Tam O'Shanter.

C. P. Grose, who a year or two ago started growing flowers in a small way near the Congressional Cemetery, has been so prosperous that he is about to start a store at 1424 P street, N. W., beside the Riggo Market. He will continue growing and has erected another greenhouse during the past summer.

George Shaffer says that business is very good, a great improvement over October, 1910, and better than any October since he went into business.

Mayberry & Hoover, who have a good family trade, are now offering a fine stock of palms and ferns and their store shows evidence of prosperity.

E. J. Reynolds of Newark, N. J., who has been spending some time in the west, has entered the employ of the Washington Florists Co.

W. W. Kimmel is showing very attractive features at his store at Thomas Circle. His conservatory is well stocked with plants.

J. H. Small & Sons are now handling a fine cut of chrysanthemums, grown at their own greenhouses. A. F. F.

Cincinnati.

A DECREASED SUPPLY.

The supply is shortening up considerably. The Estelle chrysanthemum glut is about over, and dahlias and cosmos are about out of the market. The choice varieties of chrysanthemums are finding little trouble in obtaining buyers. On some days most all are completely ordered up before they arrive. These varieties include Clementine Touset, Col. D. Appleton, Pacific Supreme, Robert Halliday and Ivory. The supply of carnations is also on the decrease and naturally are moving in an inverse ratio and going up in price to where they ought to be. At the close of last week and the beginning of this the offerings scarcely equalled the call for them. The supply of white is still slightly heavier than that of others. What was said of carnations is equally true of American Beauties. Their quality is good and they move quickly. In other roses there was in white for several days preceding the beginning of this week either a decided glut or an almost entire lack of a request for them. All were good, that is, the buds large, stems good and petals and foliage clean; still, they did not sell as they should. Pink roses, on the contrary, are sold up to the last one and are now enjoying a good advance call. Easter lilies are strong in supply, in fact, entirely too strong; cheaper white chrysanthemums seem to have crowded them into a second place for funeral work. As a result they move but slowly at any price. Violets, both New York doubles and local singles, are selling up almost daily. Lily of the valley are not moving quite as quickly as at last writing. The call for orchids has also seemed to have slackened somewhat. A strong request is apparent in all lines of decorative green, including ferns, asparagus plumosus and Sprengeri, smilax, leucothoe and southern smilax.

NOTES.

The entertainment committee, consisting of Chas. H. Hoffmeister, C. E. Critchell and P. J. Ollinger, promise all of us a right royal time at the smoker on the evening of November 16 at the Bismarck during the week of the flower show.

The next meeting of the Florists' Society will be held at the Cincinnati Cut Flower Exchange, 24 East Third avenue, through the kind invitation of Alex. Ostendarp and A. C. Heckman of the latter firm.

C. E. Critchell has been offering some splendid cattleyas.

Visitors: Martin Reukauf of H. Bayersdorfer & Co., Philadelphia, Pa., and Bernhard Schwartz of Salmeier & Schwartz, New York.

Following are the bowling scores at the last roll off:

Al. Horning	171	144	200
R. C. Witterstaetter	133	116	148
Ed. Schumann	147	167	138
J. Allen	124	160	138
C. H. Hoffmeister	145	146	143
O. H. Hoffmeister	133	113	103
Wm. Sunderbruch, Jr.	95	177	142
Wm. Schumann	217	148	150

There will be no bowling Monday, November 6. Next meeting November 20. H.

BIDDEFORD, ME.—T. W. A. Smith, in addition to his floral work, is doing a large amount of landscape work this fall.

Extra Fancy 'Mums

WHITE. YELLOW. PINK.

LARGE SUPPLY OF BEAUTIES

Roses, Carnations, Valley.

In fact, we are well fixed on everything mentioned in the price list below:

CURRENT PRICE LIST

AMERICAN BEAUTIES	Per doz.
36 to 48-inch	$3 00 to $4 00

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

Philadelphia.

TRADE NOT BRISK.

The dahlias and chrysanthemums making the garden gay together, was the rather unusual sight in many of the flower borders in this city and neighborhood the past week. The dahlias were generally killed off somewhere between the tenth and fifteenth of the month, but this season the twenty-eighth has passed with nothing more severe than a few chilly nights. The dahlia has outlived its usefulness, however, as the cosmos is so plentiful and the great quantities of chrysanthemums coming in have caught the eyes of the flower buyers, so that the dahlia appears to be crowded out. Roses have also been very plentiful and cheap, and the last few days have improved in quality so much that they are now quite salable. American Beauties have shortened up a bit and advanced from twenty to thirty per cent in price. Carnations, while good, have been hard to move. Chrysanthemums are in full supply in all the standard seasonable varieties. Pacific Supreme was a leader with many growers and sold fairly well for a pink. Robert Halliday is a good yellow, but rather flimsy, seeming to lack substance. That sterling white Ivory is in; it is still the best mid-season white. The coming week will see the large flowered sorts and the season can be then said to be on in earnest. Some very nice pink and white sweet peas are seen and are a welcome addition to the assortment. Snapdragon is coming fine from some growers; this has established itself as a standard flower and will be a good seller the coming season. Violets are in good demand and fast getting into form. Growers should aim to get their stock to market the day it is picked. Their lovely odor is irresistible and fully fifty per cent of this is lost by the second day. Two shipments a day are better than one and such co-operation from the growers will materially help the sale of this lovely flower. Gardenias are scarce; all coming in now are sold before they arrive. Cattleyas are plentiful and move off fairly well at rather low prices. The condition of trade can hardly be said to be brisk. There are too many dull days, when after the early morning stir has quieted down there is little snap to the rest of the day. The shipping trade is reported fair by the commission men, but they say it could be a whole lot better.

NOTES.

The annual fall show and chrysanthemum exhibition of the Pennsylvania Horticultuarl Society, to be held November 7-11, promises to eclipse all former efforts and be the best held in years. The society and the Florists' Club of Philadelphia have both appointed committees, which are acting jointly in inaugurating attractive features. Financial aid has been received and novel features and judicious advertising promise to bring results. Any one having novelties or specialties which they desire to show should forward them care of David Rust, secretary, Horticultural Hall, Broad street, Philadelphia, so as to arrive by Tuesday morning, November 7.

The new Leo Niessen Co.'s store is spoken of by all who see it as a great advance on anything of its kind in the country. At Twelfth and Race streets it is still farther removed from the city's center than their Arch street establishment, but Mr. Niessen says they see no difference, as so much of the business is done over the phone. Their new auto delivery service will be inaugurated in a few days, which will be a great help in reaching the trade quickly.

K.

Headquarters for **ORCHIDS** and Fancy Stock

CHAS. W. McKELLAR,

162 N. Wabash Avenue, CHICAGO.

Brampton, Ont.

NOTES.

The stock at the Dale Estate is in fine condition, the violets are of good quality, roses are particularly healthy, heavy cuts being made. One bunch of Killarney 680 feet long carried over four successive seasons yielded 11,300 blooms from 1,302 plants up to the middle of October. Orchids are having a heavy call and chrysanthemums sell well. Two new 150 h. p. boilers have been installed.

Chas. Le Cocq, for six years night shipper at the Dale estate, and latterly with the Connor Floral Co. of Hamilton, has opened an up-to-date store in Fort William.

The annual flower show at the St. Lawrence Arena, Toronto, takes place on November 14.

Walter Calvert has just completed additions to his greenhouses.

William Fendley has increased his plant during the summer.

Mark Henderson has a ready sale for his chrysanthemums.

W. G. P.

The Chicago Flower Growers' Association

OTTO W. FRESE Gen. Manager.

Phone Randolph 5449.
176 N. Michigan Ave., Chicago

Los Angeles, Calif.

The principal feature of the market just now is the glut of chrysanthemums, these arriving in such quantities that it is impossible to move them at anything like a fair price. Great flowers of Col. D. Appleton and other yellows sell for just what the retailers like to offer, and though good whites have been a little firmer there is still a glut, even of these, and already people are beginning to tire of the autumn queen and wishing she would abdicate in favor of something else. A fair supply of indoor roses are in, though some growers have pinched their plants, partly to rest them a little during chrysanthemum time and partly to help the crop later. There are still good Richmonds and Killarneys coming in, while the outdoor flowers are particularly good. The pretty little Cecil Brunner is flowering freely and sells fairly well Carnations from inside are good, but at the price they bring there is nothing in it for the grower, the outdoor flowers flooding the market. Trade has been fairly good, especially in funeral work. President Taft's visit hardly caused as much business as was expected, though there was quite a little demand. Orders ahead are, however, quite good, showing that the retailers who are in a position to know look forward to a busy season. The orchids arriving from the north are of a better quality than usual and, in addition to cattleyas, quite a number of spikes of oncidium varicosum are shown. There has been, so far, little demand for any orchids outside of cattleyas, but possibly there would be if more frequently shown. Plant trade is only fair, but in many cases the retailers are to blame. They show nothing but cheap stock and carry the same varieties from one year's end to the other. If the people of the city were shown good plants at a reasonable price they would surely buy them, but this cannot be done if the retailer expects to pay his grower a fair price and then make 400 per cent on top of it. A little more modern, less antique, method than this would doubtless help some. At least, it would be worthy of trial.

NOTES.

At the October meeting of the Horticultural Society the attendance was not particularly good, the fact that the fall flower show was dropped for this year probably accounting for the temporary loss of interest. In the absence of the secretary John Morley performed the duties of that office. The principal business was the selection of a committee to arrange a winter programme, E. Kruckerberg, Chas. Winsel and John Morley being chosen. An interesting discussion on "Bulbs" took place, Mr. Winsel and others giving their experience. The secretary was instructed to write a letter of condolence to the widow of our late member E. W. Davis and an anchor sent to the funeral was ordered paid for out of the funds of the club.

F. R. Hills has his new greenhouse complete and planted to adiantum. The house is 33x130 feet and, in addition to the beds, Mr. Hill has had watertight shelves made and planted, thus making use of all the room possible. He is very successful in growing this popular fern, and is at present cutting excellent fronds, for which he has a good demand.

Wm. Haerle has a fine show of cold storage Lilium rubrum and L. album which will continue from now on to Christmas or after. A few hundred fine pompon chrysanthemums in 6-inch pots have met with a ready sale, being extremely bright and pretty and more or less of a novelty here. Cattleya labiata and a few early blooms of C. Trianæ are among the orchid offerings.

Charlie Lewis, of the Wrights' Flower Shop staff, is opening a store on Fourth street in the Angelus Hotel building. W. Freeman is associated with him in the venture, and the style of the firm will be the Freeman-Lewis Co. It is a fine location, the store is being fitted up in fine style, and with Mr. Lewis' experience should prove a great success.

At the Los Angeles Flower Market immense quantities of chrysanthemums are being handled. 38 large boxes of Major Bonnaffons being opened up on the morning of our visit. The business here is just about double what it was a year ago. C. Morton has just returned from a business trip to San Francisco, Santa Cruz and adjacent towns.

Hubert Morton, brother of Chas. Morton, of the Los Angeles Flower Market, has purchased a half interest in the Signal Hill place of the late E. R. Meserve, Mrs. Meserve having left Long Beach and removed to this city.

S. Wichinas, who had a small store at Seventh and Spring streets, was run down and instantly killed by the Long Beach flyer last week. He was on his way to his grower to secure his violets when the sad accident happened.

Dietrich & Turner are sending in large quantities of roses from their Montebello plant, the fine red Prima Donna being a great favorite. Two new houses are to be added for Boston ferns and other plants.

One of the prettiest windows seen in town for some time was that of the Angelus Flower Shop and was treated with pot pompon chrysanthemums in front, flanked with larger cut blooms.

The career of the "Floral Shop" at 10 South Hill street was short, "To Let" signs being in the window.

St. Louis.

WEATHER STILL UNPROPITIOUS.

Cloudy and rainy weather has prevailed and the trade has suffered in consequence, but the Horse Show opens this week which will probably create some demand for American Beauty roses and violets. Out-door stock is about done but a small amount of this stock is still to be seen. Carnations have advanced in price. There are some extra fine Killarney, White Killarney and Richmond roses coming in. Greens are having a good demand.

NOTES.

The fifth annual flower show of the St. Louis Horticultural Society will be held in conjunction with the annual exhibition and convention of the Chrysanthemum Society of America at the Coliseum, St. Louis, November 7-11. On Wednesday, November 8, Richard Vincent, Jr., of White Marsh, Md., president-elect of the Society of American Florists, will deliver an illustrated lecture and everyone is invited to attend. This day and evening have been designated "Ladies' Day." The premium list is issued and includes many valuable special prizes. Intending exhibitors can receive a copy by addressing Otto G. Koenig, secretary, St. Louis, Mo.

Frank Weber is cutting some fine chrysanthemums and his Killarney and White Killarney roses are of good quality. His carnations will come into good crop right after the chrysanthemums are through. He says that he thinks carnations will be scarce and high this winter.

The W. C. Smith Wholesale Floral Co. is receiving some very fine Clementine Touset and Polly Rose chrysanthemums from George Madson of the Alton Floral Co.

The sympathy of the trade is extended to George Wagner, designer at Grimm & Gorly's, in the loss of his brother who was accidentally killed.

George Wickmann, a well-known character around the wholesale houses, has fallen heir to $5,000. It pays to be a booster for the wholesale houses.

CHRYSANTHEMUMS A DRUG.

The market has not shown any signs of improvement, chrysanthemums having been a drug the past week, bringing other flowers in the wake. Ivory was in the market two weeks ago and we expect to see that variety two weeks hence. There are some fine blooms to be had; we noticed some show varieties at Welch Bros'. store, such as we see at the exhibitions. There is quality and quantity of everything and bunches of both. Candytuft from outside is being sent in, which seems to be somewhat out of place just now with the market as it is.

NOTES.

At a meeting of the Co-operative Flower Market a dividend of 10 per cent was declared. This market has been growing slowly but always on the upward trend. Although only a few years old they have cleared up all their indebtedness and have a nice balance in the treasury, which goes to show that the men behind the movement have had good business sagacity and diligence in the face of some uphill work at the start. There has been a good call for the few allotted shares of stock on hand and we understand that only one share to each person can be had; their idea is to give each stallholder a chance to become a shareholder in the market, which seems good business sense, so that speculators can be kept out and only men with business connections shall be preferred to hold stock. The officers are Donald Carmichael, treasurer; W. W. Tailby, clerk; Board of directors, Norris Comley, John McFarland, E. Wood, Elijah Cartwright, W. W. Tailby, D. Carmichael, R. Montgomery, W. H. Elliott and James Wheeler.

The annual meeting of the Massachusetts Horticultural Society for the election of officers for the ensuing year will be held at Horticultural Hall Saturday, Nov. 18, at noon. The list of nominations made by the nominating committee are: For president, Charles W. Parker; for vice-president for two years, Walter Hunnewell; for trustee for one year, R. M. Saltonstall; for trustee for three years, four to be elected, Thomas Allen, F. L. Ames, William H. Bowker, Peter Fisher, Harry F. Hall, Henry M. Howard, Thomas Roland, C. S. Sargent; for delegate to State Board of Agriculture, Wilfrid Wheeler; for nominating committee, Robert Cameron, Kenneth Finlayson, W. G. Kendall, C. Minot Weld, Frank Wheeler.

Wm. Nicholson, Alex Montgomery and his son Robert, of Hadley, start on a trip early in November for New York and Philadelphia to visit the various markets and keep in touch with their old friends.

At T. F. Galvin's and Welch Bros' we noticed something good in orchids. Oncidium varicosum Rogersii was es-

pecially good at the latter place; some extra fine lily of the valley was also shown.

George G. Solomon has filed a voluntary petition in bankruptcy, declaring liabilities of $12,106.90 and assets of $1,062. There is one secured claim of $1,000 and debts amounting to $11,090.59 are unsecured.

We are sorry to report the death of Dorothy, two years and eight months old, daughter of E. Allan Peirce.

Pittsburg.

BETTER CONDITIONS.

Conditions are somewhat better than at the last report, and all flowers moving along briskly. Chrysanthemums, while very plentiful, clean up nicely, and while prices are not high neither are any being sacrificed. Lilies still refuse to move at any figure. American Beauties, lily of the valley, and violets clean up nicely. Roses and carnations are selling better.

All the local stores had Hallowe'en window displays that were both original and interesting. The Zieger Co. had a full-sized tree made up with lanterns, hollow pumpkins, etc., among its branches. While oncidiums and pumpkins are not a very good combination, Randolph & McClements made them so by their arrangement. A. W. Smith Co. had a full Hallowe'en table set with grapes, nuts and oncidiums, with cored out apples as candle holders. Mrs. E. A. Williams had a color scheme of crotons, yellow and white daisies, and oncidiums that was very clever. Karl Klinke had a Hallowe'en barnyard scene with pompon chrysanthemums here and there for the flower effect.

Ernest C. Daum was on October 30 appointed receiver for H. L. Blind & Bro., furnishing a bond of $100,000. The liabilities are reported $143,000 and the assets include eight acres of ground in Ross township, on which are erected their greenhouses.

John Harris has been laid up a week with a poisoned arm. J.

A MARKED IMPROVEMENT.

There is a marked improvement in the condition of the cut flower market. Prices have not advanced, but the supply is cleared up to much better advantage than during the previous week. All roses have improved in quality. American Beauties are in very fair demand. Top grade Killarneys, Richmond, Abel Chatenay and My Maryland find a ready market. Carnations are much more plentiful and of better quality, the prices for the very best blooms are much lower. Violets are very plentiful. Gardenias only in fair supply with good demand. Orchids are not moving satisfactorily and prices on all varieties have been cut considerably. Lily of the valley and lilies are moving better. Chrysanthemums are still flooding the market, but the average prices obtained seems a little better than prevailing prices at the same time last season. The supply of dahlias, cosmos and tritomas has not abated, but this week should see their finish.

NOTES.

Kessler Bros., 113 West Twenty-eighth street, have made elaborate preparations for the coming season. This firm is to be congratulated on the magnificent business they have built up. As plantsmen the field is practically their own. Their greenhouses are at Forest Hill, N. J.

H. E. Froment is receiving a splendid line of roses of most excellent quality from L. B. Coddington, Murray Hill, N. J.

A. L. Thorne's place at Bay Side, L. I., has been sold. For years Mr. Thorne consigned his flowers to P. J. Smith.

Badgley, Reidel & Meyer are now selling the chrysanthemums grown by J. D. Cockcroft, Northport, L. I.

President-elect Richard Vincent Jr. of the S. A. F. is to be with us this week.

Chas. H. Totty is sending to Henshaw & Fenrich some of the finest blooms of chrysanthemums ever seen.

Visitors: R. Henry Cathcart Jr., Newburgh; Phil Foley, Chicago; J. K. M. L. Farquhar, Boston; J. Otto Thilow and George C. Watson, Philadelphia, Pa.

BOWLING.

There was a large attendance October 27. The experiment of meeting at 6:30 p. m. did not meet with the approval of the members, so the hour of meeting has been changed to 7:30 p. m.

Massachusetts Horticultural Society.

The committee on gardens of the Massachusetts Horticultural Society represents one of the departments of the society's work the object of which is to encourage the development and ornamentation of private grounds of large and small estates. Premiums and medals are offered in recognition of tasteful planting and arrangement and for successful results in garden making.

The committee has completed its visits of inspection for the current year and announces its awards as follows:

The H. H. Hunnewell triennial premium—For an estate of not less than three acres planted in the most tasteful and effective manner, with the most desirable ornamental trees and shrubs, and kept in the best order for three consecutive years: Col. Harry E. Converse, Marion, first; Andrew Gray Weeks, second.

For a garden of spring-flowering plants: George E. Barnard, Ipswich, first.

For a garden of summer or fall-flowering plants: George E. Barnard, Ipswich, first.

For a garden or collection of peonies: Wilton Lockwood, South Orleans, first.

For a garden or collection of hardy roses: Col. H. E. Converse, Marion, first; Wilton Lockwood, South Orleans, second.

For a garden or collection of irises: Dr. Harris Kennedy, Milton, first.

For a rock garden: Charles W. Parker, Marblehead, first; George E. Barnard, Ipswich, second.

For a water garden: Col. H. E. Converse, Marion, first; George E. Barnard, Ipswich, second.

For a garden of large or small fruits: Dr. W. G. Kendall, Atlantic, first; George E. Barnard, Ipswich, second.

For a vegetable garden: Oliver Ames, North Easton, first; George E. Barnard, Ipswich, second.

Special Awards:—C. S. Eaton, Marblehead, honorable mention for vegetable garden; Mrs. H. R. Foote, Marblehead, first class cultural certificate for rose garden; F. A. Smith, Ipswich, first class culture certificate for apple culture; David F. Roy, silver medal for superintendence of Converse estate, Marion; James Marlborough, silver medal for superintendence of Proctor estate, Topsfield.

W. P. RICH, Sec'y.

Boston Flower Exchange.

The annual meeting of the Boston Flower Exchange was held in Young's Hotel, Saturday night, October 28, President W. C. Stickel in the chair. The business of the evening consisted of the election of a board of directors. A dinner preceded the election, at which about 100 were seated to a sumptuous feast. President Stickel made an address of welcome and hoped that every one would enjoy himself, and he thanked the trade press for the many courtesies received. A letter was received from E. Allan Peirce regretting his inability to be present on account of death in his family. The sympathy of all those present went out to Mr. Pierce in his bereavement.

After the dinner men prominent in the trade were called upon for remarks. President Stickel made an ideal toastmaster, brimful of wit and repartee, and we have seldom enjoyed listening to such rare conversational powers as those with which Mr. Stickel is gifted. The first speaker was W. H. Elliott, who spoke on prosperity. He thought it rather odd that within the past year while other trades were dull, yet the florist trade seemed to broaden out and the fact that the corporation had declared a dividend of 20 per cent showed that the financial standing of the corporation and the prosperity of the florist trade in general. W. N. Craig made a stirring address. He advocated consolidation of the various flower markets, which would help to increase and facilitate trade conditions. The retailer was handled somewhat roughly, as Mr. Craig said their profits were altogether too large, that the flower trade would be increased if flowers could be obtained by the public at a lower rate. The poor private gardener question he outlined and said that the two scribes, he and Mr. Cameron, some day might save enough money to start commercially and enjoy life. Robert Cameron spoke briefly for the trade press. He said that courtesy had always been shown him wherever he went in search of news, and he hoped each one would come forward with whatever news they had, for he thought every grower and others liked to see their names mentioned in the trade papers. A. S. Parker spoke briefly on things in general, but mostly about Peglar. The genial Thos. Peglar gave an account of his European trip. Covent Garden market was the best, Cork sold flowers and cabbage, mostly the latter; Dublin and Belfast markets were spoken of, and the Botanic Garden in Dublin was particularly good. Peter Fisher said he had same promising candidates in seedling carnations. James Miller of Lynn spoke briefly about the business in that section. W. J. Thurston, manager of the market, stated it was a pleasure to find such prompt payments for stall rents, but he declined to say whether or not he was in love. John Walsh, formerly manager of the market, was glad to see such prosperity in the corporation. M. A. Patten spoke of the business 42 years ago and the difficulties of sometimes getting flowers for floral work, and he thought the florist of today was better looking. J. T. Butterworth stated that he had faith in Boston and thought that they would reach out 200 miles for trade. W. R. Nicholson spoke of the need of having a better and a larger building for the sale of flowers. S. J. Goddard proposed that a vote of sympathy be sent to E. A. Peirce in his bereavement of the loss of his daughter Dorothy.

The meeting adjourned at 10:30 after a most enjoyable evening. The old board of directors were re-elected, which is composed as follows: W. C. Stickel, Wm. Nicholson, Alex Montgomery, George Cartwright, L. W. Mann, A. Christensen, E. Allan Peirce, Thos. Peglar, Samuel J. Goddard.

MAC.

The Galvins of Boston.

A gentleman from Boston who was abroad this summer is telling a good story. While in Ireland he passed a large greenhouse and thought he would go in and observe the plants and see if there was anything new. On entering, he met a man who informed him he was the proprietor, when he stated his mission. During the inspection the nurseryman asked him where he was from, and his reply was, Boston. "Boston," repeated the florist, "Boston, my name is Galvin; did you ever hear of the Galvins of Boston?" The gentleman replied he knew them well, and asked if he was a friend of the florist, or he had ever been to Boston. "No," was the answer. "I do not know them or have never been to America, but the names of both Tom and Mitch Galvin of Boston are well known over here."—Boston Record.

Louisville.

NOTES.

Anders Rasmussen has planned and will soon erect an automobile garage and have in it arrangements for the convenience and pleasure of his employes consisting of toilets, bathrooms, billiard rooms, etc.

The cool weather has livened up business and chrysanthemums and other flowers have been disposed of readily.

William R. Beutel, of the firm of Beutel & Frederick, was married October 12 to Miss Mathilda Zehnder.

F. C. Haupt has completed improvements at his store and everything looks attractive and up-to-date.

F. Walker & Co. have completed the re-building of two greenhouses.

TRADE SATISFACTORY.

The cold rains and winds of the past week have finished some of the dahlias and other outdoor stock, with but few exceptions. Chrysanthemums are still in the supremacy from immense Col. D. Appletons to the small pompons, and with the medium stock they fill the counters of wholesaler and retailer. Roses and carnations remain about the same. The stock is excellent and the demand good. Easter lilies are in big supply, with only a limited call, and callas are beginning to arrive. Cosmos is plentiful. Lily of the valley and orchids are having a fair demand. Pumpkins, squash and corn stalks are being used for many window decorations for Hallowe'en. Taking everything altogether the week's business was entirely satisfactory.

NOTES.

A jug of excellent sweet cider was on tap at the Florists' Club rooms last Monday evening, which was made by Frank Friedly and was pronounced "A No. 1" by all who sampled it. Come along, boys, the season for cider has just begun.

Knoble Bros. are making some extensive alterations in their store on West Twenty-fifth street. The entire front part is being remodeled, and the greenhouses which stand in the rear have been greatly enlarged, at considerable cost.

The J. M. Gasser Co. held an opening at their retail store in the new Swetland building, the past week. The store was very artistically decorated and many floral designs from brother florists were seen on every side.

A large quantity of flowers and decorative greens were used for the opening of the New Euclid Arcade on October 28, a number of the merchants giving flowers as souvenirs.

Miss O'Connor, formerly with the Smith & Fetters Co., has opened a retail store at 2650 Superior avenue, where she will conduct an up-to-date florists' establishment.

C. F. B.

Tacoma, Wash.

There seems to be a great difference in the condition of the floral business at present from that of a year ago, yet everything seems to be more favorable this fall than last. A year ago all tradesmen reported poor business, yet the florists all were having a good demand. But the dullness has crept into the florists' business this year. Some fairly good chrysanthemums are now coming in, enough to supply all demand. Carnations are scarce and still short stemmed. Out-door flowers have been injured by rains and frost, but dahlias and cosmos of very good quality are yet to be had.

NOTES.

The decorations for the banquet given President Taft were effectively arranged. In the center of the hall was a representation of Mt. Tacoma and the foothills surrounded by a miniature forest, the room being heavily decorated with autumn leaves and branches.

The new rose society is doing an excellent work in beautifying the city and the regular meetings are well attended. Many amateurs are very much interested. They do a lot of practical good to aid the florists.

A receiver has been appointed to take charge of the Northwestern Floral Co. and straighten out the affairs of the company. C. Halkier, the manager, has moved to Vaucouver, B. C.

Probably the best chrysanthemums and carnations that have so far appeared in this market are the product of Van Syke & Seamons.

Louis Tschunko has a fine prospect and everything in good condition.

S. L. H.

Kansas City Mo.

The stock of Begonia Gloire de Lorraine at Samuel Murray's are better than usual this year and this means something, for Mr. Murray has acquired a great reputation for the fine culture of these plants. The store now presents a beautiful appearance. A large and elaborate wedding decoration was arranged by this firm at Kinsley, Kans., which was a great success and duly appreciated.

The Aggressiveness of Plants.

Any theory of evolution must of necessity include the idea of a struggle for existence; otherwise there would be no incentive for plants to develop the thousand and one adaptations that look toward the preservation and perfection of those best fitted to survive, writes Willard N. Clute in the American Botanist, but we must not too hastily conclude that this struggle for existence is always between plant and plant or even between the plant and its insect and fungus foes. There are numerous areas where little if any struggle of species with species seems to go on. In certain swamps, for instance, the irises, cattails, sedges and the marsh and sensitive ferns form communities which are apparently dominated by a live and let-live policy, Their habits of life are such as not to interfere with one another, while the nature of the habitat is such that other species cannot come in and start trouble.

The protection afforded many species of plants by their habitat is a subject that usually does not receive the amount of attention from plant students that its importance warrants. In some instances, as in sand-barrens, there is room for many more plants than occur. The plants that are found in such regions are thrifty enough and the only reason that sand-barrens are not more thickly populated seems to be the difficulty experienced by similar plants in getting started. The same is in a measure true of water plants which have nothing to fear from an invasion of the plants on the shore.

We may never know exactly how important the varying soil characteristics are in determining the habitats of plants, but that they are often the chief factors in the spread of certain species cannot be doubted. We are frequently at a loss to account for the aggressiveness or the lack of this quality in plants, unless we attribute it to the soil. There is probably not a single species of plant that, in a locality exactly suited to it, would not run out any other species. It is not mere aggressiveness in plants that, in a wild garden, determines which species shall survive and which shall perish. Change but the soil conditions and many of the dominant species would soon disappear. In planting a border of wild things we set but a single sprig of some things and soon have it plenty, while other species, growing luxuriantly enough in the locality from which we brought them, must constantly be attended if we would have them live. Since aggressiveness in plants is thus seen to be so largely a matter of soil and location, the intelligent gardener will exercise more than the usual amount of thought in the selection of a proper place for planting a new specimen. On a south bank it may persist and spread; on a northern slope it may dwindle and die. Its aggressiveness is not a matter entirely of constitution and heredity but rather of soil and situation and plant neighbors.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H Duryea, New York First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice President; C. E. Kendel, Cleveland, O., Secretary and Treasurer,

Next annual convention, June, 1912.

SEED corn is being cured under great difficulties and seedsmen will do well to cover their needs early.

VISITED CHICAGO: J. B. Agnew, Agnew, Calif.; Edw. Dungan, of Wm. Henry Maule, Philadelphia, Pa.

STURGEON BAY, WIS.—The Leonard Seed Co. won their suit against the Crary Canning Co., the same involving some $6,000.

CHICAGO.—Prices on the Board of Trade, November 1, for grass seed were noted as follows: Timothy, $13.50 to $15.50 per 100 pounds.

THE situation with regard to the rains which have beaten down the Michigan grown crop of garden beans is serious because of their prolonged continuance.

GUSTAV SCHOTT, Aschaffenburg, Bavaria, grower and exporter of natural grass seeds, is now represented by McHutchison & Co., 17 Murray street, New York.

EDW. DUNGAN is at a large Chicago printing house superintending the work on Wm. Henry Maule's new catalogue and other seedsmen are busy on their 1912 books.

CHAS. LOECHNER & Co., 11 Warren street, New York, have now added Danish seeds, cabbage, cauliflower, etc., to their list of specialties, representing Hjalmar Hartmann & Co., of Copenhagen, Denmark.

THE Western Seed & Irrigation Co. writes that some of the cucumber crops being grown in the Arkansas Valley, in the Rocky Ford section, are in danger from early snows and freezing, fully one-third, they report, being still in the fields October 25.

PORTLAND, ME.—A new seed store has been opened at 49 Exchange street and 64 Market street by S. Colman Allen, Lewis C. Sterling and Harry W. Lothrop under the firm name of Allen, Sterling and Lothrop. Mr. Allen was formerly with Kendall & Whitney.

HOLLY buyers and sellers are still somewhat apart in their views, the former claiming that because of this year's good crop of berries they should get the stock at materially lower prices, and the sellers holding out for the same high prices they received for last year's short crop.

Sturgeon Bay, Wis.

The pea dealers here are now taking in their stocks and will soon have approximately the following number of hands at work:

J. H. Allan Seed Co.	80 people
John B. Davis Seed Co.	25 people
Thos. H. Bunt	25 people
Door County Seed Co.	20 people
Northern Wisconsin Seed Co.	40 people

Bouquet Green.

Bouquet green in the west is coming in slowly. The swamps are full of water and rains frequent. Prices asked at first hand range from $5.50 to $7 per hundred pounds in the woods.

Pennsylvania stock of club moss is bringing $4.50 to $6 in the picking districts, but this green will not make as many yards of wreathing as the lycopodium gathered in Wisconsin, the latter being more fluffy and better for florists' work.

Noxious Seed Laws.

We note from time to time in your valuable paper the announcement of some new seed law being placed on the statute books in the various states. Taking them as they are, we find they are all more or less drawn along the same lines, with the exception that some of them are more stringent than others, as they prohibit the sale of seeds containing certain weed seeds which in that particular state are considered noxious. For instance, in North Dakota quack grass and Canada thistle are termed noxious seeds; in West Virginia dodder is termed a noxious seed; in North Carolina cheat (or chess) is also termed a noxious seed, and there are no doubt other states where similar laws have been enacted.

The intent of any such legislation—if it were possible—is all right, but who can control Dame Nature, that produces both pure and noxious seeds? We do not think there is today a pure seed law on the statute books that would be upheld before any supreme court, and further, do not think it possible to have any seed legislation unless it be along the lines of adulteration or misbranding of seeds.

HENRY NUNGESSER & Co.

New York, Oct. 30.

A New Lawn Grass.

For some time past experiments have been made in New South Wales with a grass, locally known as blue couch, for bowling greens, croquet lawns, etc. The reports collected by Mr. Maiden, and published in the Agricultural Gazette of New South Wales, are very favorable to its use under certain conditions, though ordinary couch, Triticum repens, is preferred for fine lawns in Sydney. Questions have arisen as to the correct name and origin of this grass, and Dr. Stapf (Kew Bulletin, 1911, pp. 256-261) gives full particulars on these points. Digitaria didactyla is the name this grass should bear, if digitaria be separated generically from panicum; and Panicum didactylum, P. gracile and P. subtile are given as synonyms. The affinity of the grass, Dr. Stapf states, lies evidently with D. sanguinalis, from which it differs in its perennial duration and peculiar mode of growth, the fine blades, the small number of racemes and their slender build. Digitaria didactyla is a native of the Mascarenes, of Madagascar, and also of the littoral of New South Wales.—London Gardeners' Chronicle.

Parcels Post Progress.

The Postmaster General in his estimates for the next fiscal year includes an item of $150,000 for experimental parcels post in cities and country districts, for an investigation for the establishment of a general parcels post on all railway and steamboat transportation routes.

Another item is $50,000 for experiments in the transportation of mail by aeroplane. This idea was probably suggested by W. Atlee Burpee's aeroplane shipment, the first one on record, made June 28 last, as described in our issue of July 8, page 1256.

GODFREY'S SUPERB

"Canterbury Bells"

(Campanula Medium Calycanthema.)

Without doubt the finest strain of this useful and ever-popular plant yet offered.

ON EVERY POINT SUPERIOR TO ALL OTHERS

The plants are models in growth, of pyramidal form, from 3 to 4 feet in height, and, as pot plants for cool greenhouses, they are extremely valuable.

The flowers are much larger than those of other strains; of perfect form, i.e., sound both in cup and saucer. The colors are very varied, in about ten shades of White, Blush, Rose Pink, Deep Pink, Mauve, Blue, Lavender, Lilac and Violet.

SEED At present can be sold in mixture only. **PRICE: One Shilling and Six Pence per packet. Trade Price, Twelve Shillings per doz.; Ninety Shillings per 100.**

Radishes.

Scarlet Globe radishes are increasing in popularity in our section to such an extent that they rank second to lettuce as a forcing subject. The market demands only one kind, the Scarlet Globe. We have been able to buy French seed from any of our good seedsmen of such quality as to leave nothing to be desired. We have often in these notes given our opinion on what to do—this time we will write on what not to do, and that is in regard to radishes—do not crowd them if they are small. For as surely as they are crowded failure is the result, and we are pretty sure from observations that fully nine-tenths of radish failures are the result of crowding. We find it impossible to sow perfectly, hence we do not try but sow liberally and thin as soon as well up.

Two years ago we noted some of the worst type of forced radishes we ever saw coming into our market. Our best commission man handled them but he could get no more than 15 to 17 cents per dozen bunches, while we could not get enough at 40 cents. These radishes had such long tops that part had to be trimmed off; the roots were all necky, denoting age, and the whole appearance was unattractive. They came in sugar barrels and upon investigation we found the producer to be a noted horticultural writer and one who recommends to sow radishes thickly and keep on thinning them by selling the largest ones. We believe he quit the radish business since.

MARKETMAN.

Potato Flour in Europe.

During the last 60 years potato farming has assumed large proportions in Germany and the Netherlands, due in a great measure to the development of the potato-flour industry, the area planted in the latter country in 1908 being 395,039 acres, yielding nearly 97,000,000 bushels, of which 26 per cent was used for manufacturing purposes, states the Consular and Trade Reports. While the great bulk of so-called potato flour is simply finely ground and sifted potato starch, there is, however, a flour obtained by grinding and bolting dried potatoes that is a comparatively new product.

The potatoes are strained and crushed by machinery, dried in revolving drums and then broken up into flakes. These are used for feeding stock, for distilled alcohol, making starch, and the production of flour by being ground and bolted. The flour is a yellowish-white product, rich in carbohydrates, and is used principally by bakers for adding to rye and wheat flour in making bread. It is claimed that the addition of the potato flour gives the bread a good flavor, makes it more digestible and keeps it fresh for a longer period of time. The price varies from two to three cents per pound in kilos of 220 pounds, according to the crop.

The scientific fertilization of the soil has become a very important feature of the potato industry, sometimes $32 to $50 worth of fertilizer is used on one hectare (2.471 acres) of ground. The season for manufacturing potato flour is usually about 10 weeks in duration—from the middle of September to the last of November. In connection with the potato flour industry, dextrine and glucose are manufactured. The flour is exported to Great Britain, Spain, Belgium, Italy, Denmark, United States and Canada. The United States imported $38,000 worth of dextrine and potato flour in 1910, England and Belgium being the best customers.

Yonkers Horticultural Society.

A most successful fall exhibition was held by the Yonkers Horticultural Society in Hollywood Inn on Tuesday and Wednesday, October 24-25. The public showed keen interest and the society hopes to foster local appreciation of the gardener's art.

Competition was keen in the vegetable and carnation classes. Mrs. J. B. Trevor (H. Nichols, gardener) carried off the sweepstakes, a silver cup, presented by Mayor James T. Lennox of Yonkers. The winner of this prize put up most creditable exhibits, being placed first for specimen adiantums, six vases of roses, collection of vegetables and for lettuce.

Saml. Untermyer (H. Turner, superintendent) received a silver cup for a group of foliage and flowering plants, Celosia Pride of Castle Gould being remarkably well grown and effective. The same gentleman's exhibit of chrysanthemums was characterized by large, well colored and finished blooms, and his first prize for American Beauties was merited. T. Ewing (R. Cochrane, superintendent) was most successful in the carnation classes with four firsts. A. Lewisohn (J. Canning, superintendent) was placed first in four chrysanthemum classes and in one carnations. Roses and vegetables were well shown by J. Eastman (R. Angus, gardener), who was credited with four firsts. J. B. Thompson (L. Cushman, superintendent) showed the largest chrysanthemum bloom, and put up a most artistic floral group. L. Milliot, florist, had a nice display, and Julius Roehrs Co., Rutherford, N. J., exhibited a nice table of cut orchids. H. M. B.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice. President; John Hall, Rochester, N.Y., Sec'y

Thirty-seventh annual convention to be held at Boston, Mass., 1912.

SAN FRANCISCO, CALIF.—Dr. Albert J. Cook, head of the department of biology at Pomona College, has been tendered the appointment of state horticultural commissioner.

BERLIN, MD.—Frank Hammond, one of the superintendents of the J. G. Harrison & Sons' nurseries, was severely injured by being struck on the head with a grubbing axe by an Italian workman.

FITCHBURG, MASS. — City Forester William W. Colton has recommended the establishment of a tree nursery by the city, either in one of the parks or by the purchase of a suitable piece of property. The park commissioners think very favorably of the plan and will petition the city council for a special appropriation.

A Rare Shrub at Kew.

There are two plants of Elliottia racemosa, an extremely rare shrub, at Kew which we believe to be the only ones in Europe, and of them W. J. Bean contributes the following interesting note in the Kew Bulletin. The larger plant of the two, now about seven feet high, has this summer borne a crop of 21 racemes, the first flowers opening on July 24. It proves to be a shrub of great beauty as well as interest and rarity. The racemes are terminal, quite erect, six to nine inches high, two to two and one-half inches in diameter, the flowers mostly solitary, occasionally in pairs or in threes on the peduncle, which is white and five-eighths to three-fourths of an inch long. Flowers pure white, fragrant, three-fourths to one inch across; corolla lobes four, narrowly oblong, obtuse, ultimately much reflexed, free to the base; calyx minute, saucer-shaped; stamens eight, less than half as long as the corolla lobes; style as long as the corolla lobes, in the hooded apex of the lowest one of which the stigma is at first enclosed. The flower-bud is at first erect on the peduncle; as the flowering time approaches it becomes inverted and nodding; but just before the expansion of the petals it rises again and stands out horizontally; and in that position the flower remains. A raceme six inches long bears about 40 flowers. Elliottia is a monotypic genus and belongs to the ericaceæ. Flowering as it does towards the end of July, it would make a delightful addition to flowering shrubs could it ever become common in gardens. But it is almost or quite extinct in its native localities in Georgia, and no successful method of propagating it has yet been devised. Cuttings of the branchlets have several times been tried at Kew without success. The only plants raised have been two from root cuttings, neither of which ever looked like living, although they formed a few roots; both ultimately died. The fruit of Elliottia is not known, and it is unfortunate that although artificial fertilization has been resorted to no fruit has been obtained. Bees have also visited the flowers in great numbers.

Rhus Typhina.

The Staghorn Sumach (Rhus typhina) is a well-known shrub, not only in large private gardens, but also in public parks, and one cannot walk far in the suburbs of a large town without noticing that it frequently finds a place in quite small villa gardens, for it is a first-rate town shrub. Its cut-leaved variety is not so well known, and it is only of late years that one has been able to obtain it in quantity, states a writer in Gardening Illustrated, though its near relative, R. glabra laciniata, has been more easily obtained. R. t. laciniata has leaves quite as large as those of the type, but they are more elegant, on account of the fine segments into which the leaflets are divided. It forms a bush in the same manner as the type, but it may also be grown with single stems, or with two or three stems from one root-stock, and cut back each year. By this means immense leaves are formed, which produce a tropical effect, and are useful for a sub-tropical garden. When grown for this purpose, rich soil and generous top-dressings of manure are required, for the method is an exhaustive one, and if a plentiful food supply is not forthcoming, the growth and leaves rapidly deteriorate. The leaves, like those of the type, color well in autumn.

Fall Flowers in Arnold Arboretum.

Flowers are scarce in the Arboretum the middle of October. A few belated flowers may still be found on the clumps of heather, calluna vulgaris, in the shrub collection and among the rhododendrons at the base of Hemlock Hill. This evergreen plant, a native of northern Europe, is too little known in American gardens, says the Bulletin issued by the Arnold Arboretum, although it is perfectly hardy in New England. It has become completely naturalized at Townsend, Massachusetts, near the New Hampshire line, where grown from seed scattered some forty years ago, it has spread over an area of nearly forty acres, and it is well established, too, in larger masses, near Halifax, Nova Scotia. The heather should be planted in well-drained soil and in stations fully exposed to the sun where it will soon spread into large masses and remain in flower for two or three months. There are a number of varieties of this plant, the best known being that with white flowers. The white-flowered form grows wild in Europe, and it is supposed to bring good luck to the person fortunate enough to find it.

The native witch hazel, however, Hamamelis Virginiana, is the only plant which really flowers in the Arboretum in the late autumn. Its small clusters of flowers with their long pale yellow strap-shaped petals are now partly hidden by the large leaves which are bright yellow and very conspicuous. As the leaves fall the flowers are seen to cover the branches and form one of the most interesting features of the autumn flora of the northern United States. Unlike our northern species, the witch hazels of Japan and the species lately discovered in southern Missouri produce their flowers in winter or very early spring before the appearance of the leaves.

ITHACA, N. Y.—A. C. Beal is now assistant professor of horticulture at Cornell University.

Chrysanthemums Our Specialty.

Elmer D. Smith & Co., Adrian, Mich.

Baraboo, Wis.

William Toole & Sons, seedsmen and florists, of this city, have bought the stock and leased the greenhouses of the late William Peck of Baraboo. R. H. Williams, who has been manager of the Peck Greenhouses, now becomes a partner in the firm of William Toole & Sons and will continue to look after the local trade. E. H. Toole will act as general business manager. William Toole will continue his work of improving the pansy while W. A. Toole will have charge of the greenhouses and nursery at Pansy Heights, where plants for the catalogue trade are grown. Mrs. Leona Jaeger serves customers with flowers and plants at the firm's new store.

Battle Creek, Mich.

The show of flowers and floral accessories at the opening of the H. A. Fisher Floral Co.'s store attracted crowds to their beautiful new quarters. With the splendid location which they have selected, the beautiful fittings of the store, and the high grade flowers which they always carry, a splendid trade with accommodations to serve their customers is promised. The store is in the Burdick house block and opens on the Arcade. The fixtures are all of marble and the pure white of these, together with the handsome mirrored refrigerator and the beautifully tiled floor form a splendid setting for the fine display of flowers.

Zanesville, O.

The regular monthly meeting of the Zanesville Florists' Club was held on October 19 at the home of F. E. Humphrey on North Seventh street. The principal business attended to was the election of officers. All the old officers were re-elected except the secretary. Edgar Caton very emphatically declined the honor of a second term and C. L. Humphrey was elected in his place. The meeting was adjourned after a two-course lunch was served. The November meeting will be held at the home of Geo. Johnson on Henry street. C. L. HUMPHREY, Sec'y.

CHAS. BLACK, Hightstown, N. J.

Send Advts. for Autumn Number Early.

ANNOUNCEMENT.

New Rose Sunburst

Color, orange and gold, very intense. **Bud** incredibly long---pointed and plump---opening into a **Big Rose. Stems** always stiff and long. A great **keeper.** In a **class** by itself. Raised by M. Pernet-Ducher from whom we bought the American rights. In order that Eastern growers might see the variety under culture, we made arrangements with Mr. Charles H. Totty, of Madison, N. J., to grow part of our stock.

It will be **disseminated** in America on March 1, by C. H. Totty and The E. G. Hill Co., and on the same date in Europe by M. Pernet-Ducher.

PRICE—$30.00 per 100; $250.00 per 1000, for own root.
$5.00 per 100 additional for grafts.

The rose has already made a splendid record both in this country and abroad. On our own place, in addition to all its other good points, it has made fine quality, blooming plants in less time than any variety that we have ever planted in the bench.

The E. G. HILL CO., Richmond, Ind.

Quick Action

To move this seasonable stock quickly, we are offering it until sold at prices that will either sell it or show us that no one is in need of this stock.

The Early Advertisement Gets There

HOLIDAY BOOKS.

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send pices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. $1.50.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

MANUAL OF THE TREES OF NORTH AMERICA (Sargent).—The most complete and authentic work on the subject. The pages number 826, with over 600 illustrations. $6.00.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. $4.00.

CHRYSANTHEMUM MANUAL (Smith). —By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

GREENHOUSE CONSTRUCTION (Taft).— It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; postpaid, $1.21.

HEDGES, WINDBREAKS, ETC. (Powell). —A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. $6.00.

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

The Vital Difference in Our Eave Plate Roof Bar Clasp

1. In the first place, it actually **is a clasp,** as it securely holds the bar from any upward, downward or side-to-side motion. It is not a mere shelf or bracket.

2. It is firmly secured to the plate by two strong stove bolts. It's there to stay—no chance for twisting—no chance for slipping, and you get absolutely accurate spacing every time for every bar. (Compare these points with so called clasps having only one screw to hold it to the plate or not any at all. Compare them with those depending only on a tight fit to hold them in place.)

3. Then there's the dry end of the bar—it's dry because there is a space of one-fourth of an inch between it and the plate through which the air can always circulate. Look at the illustration and you can see that only a small part of the bar (**above the drip groove**) rests against the bar stop.

4. The drip opening is big enough to be called an opening and not a small hole that will soon clog up.

So, you see, that as small a thing as a clasp at first thought seems to be, still it is a mighty big vital part of your house when made our way.

It's because of our being such cranks on the so-called little things that we do the big things so surpassingly well.

And, by the way, that's a good thing to remember.

Nashville, Tenn.

The floral trade is picking up right along now that the cool-weather has set in. The past week was one of activity and the coming weeks promise even better returns. There are in sight a larger number than usual of brilliant weddings and social functions, and orders are plentiful. At this time of the year there has never been a finer supply of flowers. The season seems to have been very favorable and all the growers say they never had better flowers. The chrysanthemums are splendid and are coming on rapidly in every variety known. There are not so many of the mammoth specimen flowers, but all are fine and of medium size, suitable for any purpose. The florists' windows are radiant with these fine flowers and there is sale for everything that is cut. Not only are the chrysanthemums fine but there is an abundant cut of fine roses.

NOTES.

L. Haury & Sons are in their beautiful new store in the Tulane Hotel and open for business, though they have not had their formal opening yet. They have put in a very commodious refrigerator and they are experienced growers and their flowers have always been good. They have given up the stall in the market house where they have built up a good trade which they will draw to them now. The store is very attractive, with a tiled floor in cream color, the walls finished in a delicate blue and all of the cases are enameled in white. They have a very attractive sign "Haury & Sons" in gold lettering on the front windows. The supply of floral baskets and appurtenances is up-to-date and of the best. About the middle of November when the chrysanthemums are in full flower they will have a regular opening.

Geny Bros. report business as most excellent and their flowers in the finest condition. They have grown a lot of chrysanthemums, enough to cover every demand. Their roses are fine, too, Richmond, Killarney, Kaiserin, Golden Gate and fine American Beauty. They are the first to report the appearance of violets which are just beginning to come in. To accommodate their increased supply of cut flowers they have put in another large McCray refrigerator 10x10x6, the same size as their first one. This gives them a cold storage space of 360 square feet, and it is constantly filled with beautiful flowers.

The Joy Floral Co. has a full supply of President Carnot, My Maryland, Killarney, Richmond and most excellent American Beauty. They also have orchids and a good sale on them. The supply of lilies is good, both the Japanese and the Harrisii.

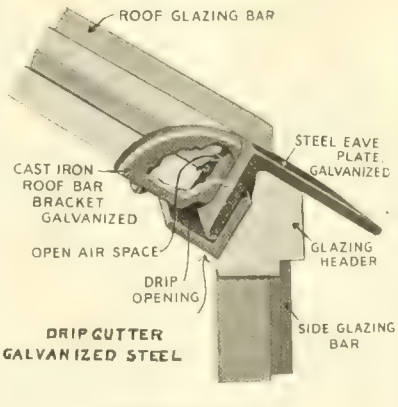
Hallowe'en Pranks

and that Z-Bar Eave Plate

Being One Neighbor's Talk About Another.

Tuesday night when I came home from smoking a couple of pipes with the boys over in my neighbor's workroom, I found our gates gone, the horse block carried down in front of the church, and my neighbor's delivery wagon on my front stoop At first, I was all-fired mad—then it occured to me that it was Hallowe'en night—the night of pranks.

So I cooled off and went into the house, and got talking with my son about that Hitchings Z-Bar Eave Plate that neighbor of mine has just put in his greenhouse. Seems to me it beats them all. Beats them because its a combination Eave Plate and Drip Gutter **all in one.**



Hitchings Z-Bar Plate.

I could never for the life of me see why, if an iron center gutter could have a drip gutter cast right fast to it, why an eave plate should either have none, or be made a separate affair hung up below it.

Now, I believe that Z-Bar Plate of Hitchings' is the best yet, because to my notion, it not only carries off every drop of drip, but it's mighty easy to put up, and must strenghten the eave a lot.

Come to think about it, Hitchings advertised this Z-Bar Plate several years ago, and we florists have just woke up to its goodness.

And speaking of goodness, it also occurs to me that it's good business to do business with a firm with a long standing business reputation for good business. Hitchings have been building houses twenty-seven years to my certain knowledge.

Guess I'll write staight to Elizabeth, N. J. tonight, and ask them to send along one of their supply Books. Handiest kind of a book to have about your work room, or in the top draw of your desk.

Better send for one yourself.

Cattle Manure in Bags
Shredded or Pulverized

Pure—dry—uniform and reliable. The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.
Pulverized Sheep Manure
Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for liquid top-dressing. Unequalled for all field use. Write for circulars and prices.

Guaranteed under insecticide act. 1910 Serial No. 91 of U. S. Agricultural Dept.

San Francisco.

THE FALL SHOW.

The fall show of the Pacific Coast Horticultural Society held October 19-21 in Norman hall in the Fairmount hotel was one of the finest flower exhibitions ever held in San Francisco. The committee of arrangements should be given great credit for the beautiful display and Angelo J. Rossi, the manager, assisted by D. McLaren, were the recipients of much well-earned praise for the complete arrangement of the exhibits and hall. Chrysanthemums were of course a large part of the exhibition and some beautiful specimens of the Queen of Autumn were displayed. Dahlias also were shown in all the different forms and colors. The collection of orchids and decorative plants by the MacRorie-McLaren Co. was one of the finest displays ever exhibited on the coast. The competition in the floral work was very keen and all the different classes were well filled with creditable entries, the prize winners including the well known firms of Pelicano Rossi & Co., Art Floral Co., Albert O. Stein, Emporium Floral Department and H. M. Sanborn. The judges were prominent society ladies who performed their duties to the satisfaction of all. The committee of arrangements consisted of H. Plath, F. F. Taylor, V. Mataria, D. MacRorie, Charles F. Shellgrain, V. Podesta, E. James, W. Kittlewell, D. McLaren, W. Munro, J. W. Keegan, Albert O. Stein, Frank D. Pelicano, J. W. Baggs, E. W. McLellan, P. Ferrari, L. G. German, W. Hill and Angelo J. Rossi.

Albany, N. Y.

NOTES.

William C. Gloeckner was one of the judges at the chrysanthemum show held at Lenox, Mass., the last week of October and he contributed one of the cups offered as prizes. He has just added an electric flash sign to his store at 97 State street that attracts much attention.

Features of the club meeting this week were refreshments, a social programme, and an exhibit of a number of new roses.

F. A. Danker, president of the Albany Florists' Club, was at the flower show at Madison, N. J., last week.

F. R. Billson of Danker's attended the Lenox show and came back well pleased. R. D.

PROVIDENCE, R. I.—At the monthly meeting of the Rhode Island Horticultural Society, held October 19, W. N. Craig of North Easton, Mass., delivered an address on flowering plants.

BALTIMORE, MD.—The week exposition of the Maryland State Horticultural Society will be held December 4-9. President Taft and the governors of southern and western states have been invited to attend.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

OFFICERS—GEO. ASMUS, Chicago, President; RICHARD VINCENT, JR., Baltimore, Md., Vice-Pres.; H. B. DORNER, Urbana, Ill., Sec'y; WM. F. KASTING, Buffalo, N. Y., Treas.

OFFICERS-ELECT — RICHARD VINCENT, JR., Baltimore, Md., Pres.; AUGUST POEHLMANN, Chicago, Vice-Pres.; JOHN YOUNG, New York, Sec'y; W. F. KASTING, Buffalo, N. Y., Treas. Next meeting at Chicago, August, 1912.

CHRYSANTHEMUM SOCIETY OF AMERICA

Annual convention and exhibition in conjunction with the St Louis Horticultural Society, St. Louis, Mo., November 7-11, 1911. ELMER D. SMITH, Adrian, Mich., President; C. W. JOHNSON, Morgan Park, Ill., Secretary.

AMERICAN ROSE SOCIETY.

Next annual meeting and exhibition at Detroit, Mich., January 10-12, 1912. A. FARENWALD Roslyn, Pa., President; PHILIP BRIETMEYER, Detroit, Mich., Vice-President; BENJAMIN HAMMOND, Fishkill-on-Hudson, N. Y., Secretary.

THE AMERICAN CARNATION SOCIETY,

Next annual convention and exhibition a Detroit, Mich., January 10-12, 1912. J. A. VALENTINE, Denver, Colo., President; A. F. J. BAUR, Thirty-eighth St. and Rockwood Ave., Indianapolis, Ind., Secretary.

November.

Around rekindled hearths again we meet,
The warmth of flames and friendliness to share,
Earth's dearest treasure an accustomed chair
Where comfort reigns above an ingle-seat.
Tales half forgotten lips of age repeat
While feeble fingers fondle golden hair—
Without, the harvest of the fields complete,
Within a harvest of the years as fair.
Tears in our smiles, and smiles through all our tears,
We look upon a time of garnered things—
The sickled grain, the gathered days and years,
The straightening of life's entangled strings,
A blazing log that chill November cheers,
While over all the final dawn appears.

SUGGESTIONS FOR PLANT GROWERS.

Heaths.

All the ericas will require a cool temperature to get the best results. Erica melanthera can be had in flower for Christmas and early winter but under no circumstances will it pay to try to force it into bloom by giving it artificial heat, for it will immediately spring into a soft growth. They will give the best results in a house where the night temperature is kept at from 40° to 45° with plenty of ventilation throughout the day. When coming into bloom the plants should never suffer for want of water, in fact, these plants should be kept well watered throughout their growth. The propagation of the young stock for the succeeding year should now commence, the soft tender shoots that protrude beyong the flowering wood being the best for this purpose. A cool propagating bed is to be preferred for they do not need bottom heat, but the soft cuttings will need to be well shaded and kept well watered, and if enclosed in glass the cuttings will strike more readily. As soon as rooted they should be potted and the selection of soil is important. A light peaty soil mixed with a good proportion of sand is what they desire. Give the plants all the air possible throughout their growth, in a cool temperature and in a bright sunny location.

Genistas.

If the genistas are grown in warm greenhouses they invariably come into bloom before Easter, unless that day is at its earliest in March, so the plants that are to be at their best for that day should be retarded by being grown cool until late winter. These plants are much better under cool treatment at all times, but by bringing into gentle heat they can be had in succession from February to April. Plants that are being grown into special forms will have to be kept pinched back to conform to the shape until the flower buds set. The cuttings for next year's growing should be propagated during November and early December. The top shoots which are pinched off to keep the plants shapely make fine stock for propagation and they root readily in a bench with a little bottom heat. They should be shaded for a few days when first placed in the sand. Pot in small pots as soon as rooted and shift into larger sizes as required. When growth commences pinch back to keep the plants shapely.

Acalyphas.

One of the plants that is not ordinarily grown as well as it ought to be and which makes a beautiful showy plant is the acalypha, especially A. Godseffiana and A. Sanderi, which bears long spikes of red flowers, sometimes called the chenille plant, from the flowers which resemble large pieces of red chenille. The plants should be well hardened off in the fall and cuttings of the new growth can be taken during the winter, in November and December, if fine specimens are wanted. The cuttings are taken preferably with a heel and root easily in a warm propagating bench. When rooted they should be potted in a good rich soil and placed in a warm greenhouse until they have made roots and commenced to grow, when they can be removed to slightly cooler quarters. The great mistake made by many growers is to place them in a cool house immediately after they have been taken from the propagating bed and they stand half dormant, and if too cool frequently lose much of their foliage, and get stunted. To have fine plants they should be kept moving all winter and potted into larger-sized pots as soon as necessary, and a few of these showy plants well grown will attract attention and redound to the credit of the grower. Aphis and mealy bug are the two insect enemies of these plants, and should be kept in check continually or the plants will be ruined. The bedding acalyphas should be handled in a similar manner but the first of the year is early enough to start the cuttings of these unless there are signs of a shortage of stock, in which case early propagation is to be recommended, and it is seldom one has too many of these plants if they are well grown.

Begonia Rex.

With the advent of steady firing and a warm propagating bench the cuttings of Begonia rex should be started at once if good plants are desired for spring and summer growing. These plants are very ornamental when well grown and the leaves can be used in much floral work. These plants are raised from either shoot or leaf cuttings but where many are propagated the latter method is generally employed. Well matured leaves that are healthy and vigorous are selected and two methods can be adopted. The leaf can be cut several times through the midrib and its branches and then placed on the propagating bed and the cuts pegged down to the sand. A wire in the shape of a hair pin will do this. Or the leaf may be cut into triangular pieces, with the rib as the apex, and these cuttings inserted in the sand as other cuttings are with the point down. Another method sometimes adopted is to cut the leaf in two parts lengthwise and the two halves are stood erect in the sand. The cutting bench should be shaded and if covered with glass and kept close the propagation will be more rapid and successful. The small leaves will shortly protrude from the sand and when the roots have attained a length of half an inch or more they can be potted in soil consisting of two parts loam, one part leaf-mold, one part well-rotted manure, and one part sand. They will require a warm temperature, and when watering be careful not to wet the foliage, especially where the sun shines upon them, or holes in the leaves will be the result. They should be shifted into larger pots as required and as the plants grow coarser soil may be used in the potting. They make much handsomer plants when grown in shady locations rather than in the full sunlight.

Stevia.

The early stevia will now be coming into flower, but if the plants are in pots, and there is a good large number, they should not be brought into flower all at once. By keeping some of the plants in a cool location they can be retarded so that plants may be had in bloom up to February. A house or deep frame where the night temperature can be kept just above the freezing point will hold them in check and they can be brought in as desired. The dwarf variety is very easily handled in this manner, but the tall plants are not so easily moved around. Keep the plants well tied up for the joints are very brittle and break down easily, and the long variety should be very carefully handled even after the sprays are cut for they break down with their own weight when in flower.

Nierembergia Frutescens.

It is not easy to make a good choice of satisfactory plants for vases. Those that are hardy and do not want much care are not always what is desired, remarks a writer in Gardening Illustrated, and half hardy plants are not always pretty in vases, but Nierembergia frutescens was used with very satisfactory results, the plants being full of flowers throughout the season.

WILKESBARRE, PA.—Ira G. Marvin has opened a new branch store known as the Cash Flower Shop, on South Main street.

GREENHOUSER'S OBSERVATIONS

When are Flowers Fresh?

Exact definitions are not often easy, and to say just when a flower loses its freshness and becomes unsaleable is a task that would not appeal to many of us. A rose, carnation or other flower may be cut from the plant say at 6 a. m. but still not be saleable at nine. If shipped any distance without first being placed in water in a cool room or refrigerator the flowers so treated would be useless on arrival, yet they would be "fresher" in point of time than others cut and cooled off in the ice box or cool room as they should be. The retailer who is wise enough to keep stock on hand should always insist on freshly cut flowers that have been so treated. He has then the satisfaction of making a nice show for a couple of days at least and still be able to sell his stock while the flowers will be good for funeral or made up work for from one to three days more according to the weather and the variety.

But unfortunately there are many retailers in all towns who will not keep stock on hand just as there are growers and wholesalers who insist on sending flowers so open that they are only fit for immediate use. We cannot have everything our own way and it is a little hard on the grower when his customers one day insist on having only fresh stock and perhaps the next day ring up for open roses for funeral work. It means that he—the grower—has to take all the risks of the business, the retailer none, for after opening up the roses they will not keep and the grower stands to lose out entirely. A retailer who has the privilege to call up a grower every night for stock to be delivered next morning is fortunate and should be willing to pay the right price for such service, for he takes little risk in comparison with the grower who has all to lose in the event of trade being dull.

But there is quite another side to this story, more particularly around holidays and other times when flowers are in great demand. The grower, knowing that in all probability stock will be scarce, holds back his cut for several days or a week before the great day and then unloads old and unsaleable stock on the retailer. This practice of "pickling" is bad on all counts. It is not only unfair to the retailer but it is killing to business all around, for scores of people who buy flowers at such times would become regular patrons of the florist were it not for the fact that they are taxed

GENISTA RACEMOSA.

heavily for a worthless bunch of flowers and therefore shun the florist's store and look on the proprietor as a hold-up man. Business men in other lines have long since discovered that it pays to treat the public to a square deal, but there are far too many retail florists doing business under the silly and almost obsolete system of getting every cent possible out of a customer without regard to whether he is satisfied or not.

Sunlight After Fumigation.

The ill effects of sunlight following fumigating is a disputed point. Some growers say that sunlight has no ill effect upon foliage "the morning after;" that if mischief has been done it will show anyway, whether the sun is allowed to shine upon the foliage next morning or not. While our ideas personally run somewhat along this line we would not care to go quite this far. Everyone must have noticed how the foliage of greenhouse plants wilts in the sun after a few days of dull weather. The effects of fumigation appear to be somewhat similar. The presence of the fumes in the atmosphere robs it of some vital element, some strengthening power that is only present in a sunlit house. This buoyancy of the air—if we may so term it—is lost when fumigating and the plants miss it. To allow full sun and air to reach the plants directly, either after fumigating or after the dull periods mentioned is like feeding a convalescent person heavily with rich food. This may only be conjecture on our part. We cannot advance any scientific reason for it, but after many years' experience we have certainly found it advisable to allow a kind of nursing treatment the first day after fumigating and not to allow a sudden inrush of dry air and bright sunlight after dull periods. The cases may not be analogous but we give our observations in perfectly good faith and are open to conviction if we are wrong.

Experiments Versus Culture.

There is a growing disposition on the part of those in charge of commercial places to leave men alone who show some interest in their work and, within certain limits, to let them go ahead and show what they can do. It has a tendency in the right direction, for the man who is worth his salt will do better work when he knows he is trusted than when a foreman or superintendent is continually telling him to do things which he knows have to be done before he is told. Again, a man who is looking after a section of roses or carnations, an orchid house or plant house will surely stumble on some time or labor-saving details that will not occur to the foreman or employer who does not live quite so close to his plants.

But of all the thorns in the path of the busy foreman, the worst is the man who is forever experimenting with his plants. Usually he is not sure of his ground and has to try out various ideas of his own or those he has read about under conditions that may or may not be suitable for forming useful conclusions. Properly conducted experiments where every condition is taken into account and results carefully noted are, of course, useful and many doubtful or contested points may thereby be cleared up. But there is a place for everything and the place for these is not in commercial houses on the small scale that the individual "man behind the hose" can carry them out. The only thing to do with such a man is to give him instructions exactly how his work is to be carried out and to look for another to take his place, for usually the habit is quite incurable.

BEGONIA MARQUISE DE PERLATO.

But there is quite a difference in useful observations and time-wasting experiments. Any thoughtful man who has been among plants for a few years attains a kind of second sight or sixth sense which almost invariably leads him in the right direction. Reams of paper have been covered and miles of dates, figures and temperatures given as to the proper state a house of lilies or other crop should be in to mature at a certain time. But the grower who has this instinctive power knows whether he can get his crop on time or not and knows almost by instinct what temperature to give. He is not worried over the outcome, for in almost every case there is some leeway and he will usually have the "rose in hand," or if he has not he will know it and will strive to get it by extra firing or by whatever means are needed to bring his plants on time. And the man who can do this, although essentially practical, is not the one who sneers at his scientific confrere of the laboratory or the experiment station. Indeed he may with truth be deemed a true scientist himself for there is a science in practice as well as in theory.

A Happy Accident.

One of the prettiest and most satisfying large vases we have ever seen was made quite accidentally from a California garden recently. The only flowers used were white callas with a little of their own foliage and that of the umbrella palm (Cyperus alternifolius). These were gathered in a hurry just because they happened to be the nearest, placed in the vase loosely and informally and the result was as perfect as the most elaborately conceived arrangement could be. The creamy white and yellow of the callas, their deep green foliage and the excellent lines and curves were perfect. Yet this was the result of a happy accident rather than any inspiration on the part of the decorator. Besides the beauty of this combination it was very long lasting, being almost as fresh two weeks afterwards as the day it was arranged. It is well worth making a note of and copying when the occasion arises.

GREENHOUSER.

HARTFORD, CONN.—John Brodrib has opened a floral department on the main floor of Wise, Smith & Co's. store, with a full line of plants, flowers and bulbs.

Eradication of Quack Grass.

A grass that has been a great nuisance in many sections of the country, especially the north-central and north-eastern states, is the quack-grass or witch-grass, and the Department of Agriculture has issued a bulletin upon its eradication. The underground stems or root-stalks are the seat of the remarkable vitality of this grass for where broken and left in the soil new plants are the result. It roots the deepest in cultivated fields, but persistent cultivation, even in its worst form, will kill this grass out in one season and a crop produced simultaneously. Midsummer has been found the best season to begin eradication for rootstock grasses seem at that time to be at their lowest state of vitality. On sod or pasture land the root stalks are nearer the surface and to kill them out the first step is to plow the sod, cutting just under the turf, about three inches deep. The next step is to go in a week or ten days later with a disk harrow and thoroughly disk the sod. Repeat this treatment every ten days or two weeks until fall when the quack-grass will be completely killed out.

The bulletin refers only to the means of eradication, but it seems as if these rootstocks might be made a source of revenue, in other words, be a by-product of the field. There are tons of the rhizomes of this grass imported into America every year and used for drug purposes. One of the large manufacturers of drugs informs us that these rhizomes are used in large quantities and that they themselves import some 15 tons annually from Europe, and other concerns also make large importations. As far as known no attempt has been made to cultivate the grass or dispose of the rootstocks for commercial purposes. If this product can be imported from Europe and transportation charges paid, it certainly seems that this noxious weed, which it certainly is in cultivated fields, might be made to at least recompense for its removal.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Breitmeyer's New Store, Detroit, Mich.

The grand new store of John Breitmeyer's Sons was opened to the public Saturday, September 30, and on the previous evening the florists of the city and their ladies were tendered a reception in "The House of Flowers" by the proprietor, ex-Mayor Breitmeyer, who received the congratulations of the visitors, and their initial inspection of the premises was made most enjoyable by the strains of the orchestra and the lavish lunch prepared for them. This new floral emporium is styled "The House of Flowers" and represents the owners' highest conception of a fittingly beautiful, practical and thoroughly equipped retail florist establishment and was designed and constructed from the foundation to the roof with that point alone in view.

INTERIOR VIEW OF JOHN BREITMEYER'S SONS' NEW STORE, DETROIT, MICH.

The store and conservatory in the rear occupy a space 44x110 feet on Broadway adjoining the Breitmeyer building, the store proper being 44 feet wide and 72 feet deep, the conservatory extending 38 feet to the alley. The entrance from the street is located in the center which allows a mammoth display window on either side. The floor throughout is made of terra cotta blocks nine inches square, the same material forming the window platforms, where smaller squares 6x6 are used. The ceiling is arched, rising from the sides nine feet high to the apex where it measures 12 feet from the floor. In the construction of the display refrigerator and interior furnishings, wood is entirely eschewed, marble, copper and iron being employed. The color scheme is carried out in ivory and verd-antique except the ceiling which is cream color. The refrigerator is located on the right side of the entrance, extending from Mr. Breitmeyer's private office, which is located partly under the stairway leading to the second floor, and is 20 feet long, four feet deep and eight feet high, lined on the interior with white tile and arranged with brackets and plate glass shelving. The cooling of this and the stock cooling room in the basement is done by a refrigerating plant. On the left of the store is the office, with Pavoniza marble wainscoting and counter, and is unobstructed, being without the usual office grill work enclosure. Here the telephones are alike accessible to the patrons and attendants. There are no sales counters as are usually found in stores, but instead marble tables, some round and others oblong, arranged without formal design throughout the floor. On the side walls, too, are attached marble shelves for the display of cut flowers. A balustrade of marble with large metal gates nine feet high separates the main store from the conservatory. This marble fence or balustrade effect is provided with a wide marble slab for the advantageous display of blooming and other ornamental plants. The conservatory is equipped with a foun-

CONSERVATORY IN JOHN BREITMEYER'S SONS' NEW STORE. DETROIT, MICH

EXTERIOR VIEW OF JOHN BREITMEYER'S SONS' NEW STORE, DETROIT, MICH.

tain of beautiful design in the center and round slate tables for the display of plants. To the side-walls are attached six semi-circular shaped tables high enough to permit the placing of plants beneath. The circular shaped roof which is 18 feet high is provided with means to suspend ferns and other plants of drooping character.

The spacious basement is replete with arrangements for its complete utilization, and here is seen an extension in detail of Mr. Breitmeyer's practical understanding of the requirements of the complete floral establishments acquired by years of experience and close observation. The department is conveniently reached by a stairway at the side of the center of the store and another at the rear, besides an elevator connected with the alley entrance through which all heavy packages are received. Along one wall is located shelving for all the different sized boxes used. In another place all the basket vases are kept. A large space across the end of the basement is reserved for the stock of baskets. In another enclosure the expensive silver and cut glass vases and plant receptacles are stored. Another division is devoted to plant stands of all kinds. Attached to the ceiling under the conservatory is hung the supply of wire designs. Here, too, by the good light provided by luxfer prisms in the floor above and directly under the center of the glass roof, the unpacking of all incoming shipments is done. Close by is located a table exclusively for mossing designs. Other compartments contain the accessories for wedding and other decorations. A cool room at the rear 7x24 feet will hold the galax and leucothoe leaves, cut ferns and other stock of like nature. Another cool room 6x14 feet contains the stock of cut roses and carnations from which most orders are directly filled, it being contemplated that the display refrigerator in the store above will contain stock to represent the different varieties offered.

In the arrangement of the windows there are low platforms four and a half inches above the floor. This feature is a part of a general scheme to permit an unobstructed view through the store from the outside, over the window decorations into the conservatory, where it terminates in a mass of beautiful foliage. The lighting of the windows is by means of powerful incandescent lamps concealed from outside view, but illuminating the contents of the windows profusely. The store proper is lighted by three chandeliers each containing 12 Tungsten lamps with frosted shades suspended from the ceiling, and small wall lamps of special design. The front of the building, which is but two stories high, is of concrete stucco and stone. Along the entire front on the roof are large vases filled with box wood trees and ivys. Under the second story windows a similar effect is carried out, and underneath this verdure, and extending across the full width of the store, is the name John Breitmeyer's Sons.

J. F. S.

New York's Flower Bill.

While the majority of the people look upon the florist's business as a small factor in the activities of the New York commercial life, and though habitual dinner-givers, mothers of debutante daughters and hotel men have suspected for some time that the florist business is profitable, yet the dealers, according to a writer in the New York Sun, are much averse to making any estimate of the business done in cut flowers, which in the aggregate probably amounts to hundreds of thousands of dollars. In speaking of the growth of the business one florist that was interviewed stated "that shortly after he started in the trade in New York, twenty-one years ago, he was asked how many retail florists there were in the city and after thinking a moment named them all, and today every block in the thickly settled sections supports its flower store.

"The demand for choice flowers has grown rapidly, ten years ago orchids

were bought singly or in twos or threes, but last winter the decorations at a good many dinners and lunches were of orchids alone and debutantes and brides carried huge bouquets of orchids. This boom for cut flowers was helped a great deal by the hotel men. When the Waldorf was opened, Mr. Boldt surprised everybody by decorating every table with cut flowers. I believe he was the first hotel man in New York to make a practice of it. But every new hotel that came along and they were put up pretty fast, had flowers on their dining tables until now it takes hundreds of dollars a year out of the high class hotel money drawers. These hotels buy only the best flowers and have them fresh every day, one hotel man saying that most of the patrons would detect stale flowers and talk about it.

"Debutantes' receptions also help to fill the retail florist's coffers, one dealer last season sent thirty bouquets and boxes of flowers to a popular debutante and on that particular day he had ten other debutantes on his books. Women's clubs are a factor which has developed in the last few years. These organizations include more than 10,000 women who meet socially in hotel banquet rooms, each decorated for the occasion. The foot ball games also create a demand, for every girl that attends must wear blue violets, red carnations or roses, or yellow chrysanthemums for Yale, Harvard or Princeton, as the case may be.

"Wedding decorations do not return the biggest profits, for the trousseau and other expenses have strained the family purse and a close bargain is often made, but we should dislike awfully to have weddings go out of fashion, for the private orders from the bride's admirers, antedating the wedding, fill us with joy. Nothing is too good for these purchasers and they do not worry about the cost."

The total amount of the business can only be conjectured, for the florists are very reticient in regard to the volume of trade. "It only hurts the business, said one retailer, "and brings down on the heads of our wealthy customers all sorts of criticisms about extravagance, folly and that sort of thing."

Iowa Seed Co., Des Moines, Ia.

The Floral Hill greenhouses of the Iowa Seed Co. held an opening November 1 and 2 and the public enjoyed an inspection of the 32 large greenhouses filled with plants and flowers, which are located on Thirty-first street, extending for five blocks from Kingman boulevard to Centre street, the buildings covering three acres. The large show house, one of the highest in the west, is filled with palms and decorative stock, and a balcony has been erected in the center that the visitors can view the scene from above. Near the south end is a large tank of aquatic plants and with fancy fish; towards the north is a rockery and fountain surrounded with many curious and beautiful plants. Adjoining this on the east are three other new greenhouses containing thousands of carnations, small flowered chrysanthemums, sweet peas and other plants for flower production.

Four houses are devoted to the culture of roses for cut flowers, which are in splendid shape, containing all the popular varieties, including American Beauty, and in one house are 100 varieties of outdoor bedding roses for propagating purposes, and in two adjoining houses are 50,000 small rose plants grown for mail trade. Four houses of carnations and one of violets are in fine condition and four houses in which 11,000 chrysanthemums are in full bloom, loaded with immense flowers from six to ten inches in diameter. The plant houses are filled with superb stock, one house with poinsettias and four houses with ferns.

The range comprises 32 greenhouses besides ample quarters for storing bulbs and dormant plants, and a large potting shed and packing room where the large mail order trade is filled and shipped. During the busy season 500 to 1,400 plant orders are sent out every day, not only to every state in the union, but to almost every civilized country in Europe, Asia, Africa, Australia and South America.

Peonies Not Blooming.

ED. AMERICAN FLORIST:

Some of our peonies do not bloom, but grow well. Can you inform us if there is any reason for this and what is the remedy? W. M. M.

Peonies that have been growing in one location for a number of years often throw good growth and do not bloom, for the soil is exhausted and the plant has grown thick and is bound. If this is the case the plant should be lifted and divided in the fall and the ground where the plants are to be set out well manured. The peony is a great feeder and to get a large number of good flowers should be well manured, giving them a good top dressing in November, which should be spaded in in the spring, and should have a liberal supply of water, especially just before and while in bloom. Liquid manure applied in the spring gives good results both in the growth of the plant and in the size of the bloom. W.

DANSVILLE, N. Y.—M. J. Schaaf has awarded the contract for building a large modern greenhouse to the King Construction Co. of North Tonawanda.

Fuel Economy.

The largest expense in the management of a greenhouse establishment is the labor, but the next largest outlay is for fuel. As regards the labor employed in the culture of the crops the proprietor knows full well whether he is receiving full value for wages and salaries paid, but in few cases does he know whether he is getting his money's worth out of the fuel that he burns. In many cases the cheapest labor obtainable is employed to care for the fires, it being the general idea that all that is necessary is to have a man that can shovel coal on the fire when necessary, keep the ashes cleaned out and maintain the houses at the proper temperature. In many large manufacturing plants it has been found good economy to employ a thoroughly posted engineer who will use his brains in looking out for the running of the boilers and engines, and the right man can save all his wages in the matter of fuel consumed.

This was most forcibly brought to our attention some few years ago, and while it was an eye-opener to us, yet it was a good lesson of which we took advantage and put to good use in the years following. Having taken charge of an establishment comprising some 75,000 square feet of glass it was not long before we found that economy had got to be the watchword to make the place pay. The night fireman not proving satisfactory, was discharged. This man had been burning 17 tons of coal a week in October, but the cause of his discharge was that he would not keep the houses at the proper temperatures. Among the applicants for the position was an engineer who through labor troubles had been thrown out of employment and was willing to accept any position to tide him over the winter. He immediately put his knowledge to use and studied the boiler with the result that he heated the plant in zero weather during December and January with 10 to 12 tons of coal a week. Now this was clearly a case where a man was saving his wages every day and it would have been good economy to have paid him engineer's wages rather than

POMPON CHRYSANTHEMUMS AT IOWA SEED CO., DES MOINES, IA.

to have employed the cheap fireman who knew nothing about the business.

It is the duty of every proprietor to make a study of his boilers and find out what kind of a fire gives the best results. No two steam boilers work alike. One will keep up steam and burn less fuel with a thin fire, using but a small amount of coal with each firing, while from another the best results are obtained from a thick fire, and in either case the opposite will result in a large loss of fuel. Railroad engineers say that every engine runs differently and a study of the best method of firing is a necessity, and railroad companies have a system of bookkeeping whereby it is known how much coal each engine is burning and whether each fireman is getting proper results.

Every one posted on taking care of a fire knows that to disturb the top surface causes a loss of the gases that immediately go up the chimney unconsumed, yet it is the practice of many firemen to continually poke the top of the fire and cause this great loss, and the result of this poking is more clinkers, for it is a well-known fact that bituminous coals should be allowed to rest quietly. The slice-bar should be run under the fire to clear the grates and the body of the coal, if lying too compact, gently lifted to allow an air current through the fire. This is necessary in order to get good combustion, but to rake the fire through from the top is sure to result in material loss. Another thing that the unskilled fireman continually does is to leave the door open much longer than necessary, which causes a cold draught across the fire and through the tubes of the boiler, lowering the steam and also forces the heat down on to the grate bars causing them to burn out. The door should be opened no more than necessary and closed as quickly as possible.

It was to obviate these two great faults of firing that the automatic stoker and rocking or shaking grate bars were invented and installed, and where operated and cared for as was intended by the manufacturers, are economical fixtures to steam firing. But again comes the factor of the ability of the fireman, especially with the rocking grate. It is well known that the ashes should be constantly removed from under the grates but the lazy or unthinking fireman will not do this until there is quite an accumulation in the pit. This results in a hot mass under the grates slowly approaching them and will often heat and twist the grate bars, causing them to lock, and then a worse condition than ever confronts the fireman, for he cannot run the slice-bar across the rough rocking grate, and the only alternative is to push through the fire from the top, causing loss of the heating gases. While the rocking grates, if the fire is properly cared for, are economical both in labor and fuel, yet in the hand of cheap and careless labor may prove just the reverse.

The care of the boilers and the management of the fires are matters that demand the constant attention and study of the proprietor, and we know, if carefully watched, the necessary knowledge acquired and the fireman properly taught and followed up to see that he does as told, enough of the fuel now wasted in greenhouse boilers could be saved to make a showing on the right side of the ledger that would pay for all the time and attention it would require. EXPERIENCE.

ROCKERY IN SHOW HOUSE OF IOWA SEED CO., DES MOINES, IA.

WITH THE GROWERS

Elmer D. Smith & Co., Adrian, Mich.

When the Society of American Florists held their third annual convention at Chicago in 1887 one of the essays read at that meeting was by the late John Thorpe, entitled, "Hybridizing and Cross Fertilization." Seated in the audience was a young man from Adrian, Mich., and listening to that address became inspired with the words, and upon his return to his home planned for the production of new varieties of chrysanthemums. That young man was Elmer D. Smith, then in company with his father, the late Nathan Smith, in the florist business, and the success that crowned his systematic effort is now a matter of history. For not only in America, but wherever the chrysanthemum is grown, the name of Smith and American chrysanthemum culture are closely associated, and Adrian, Mich., has become known to many as the home of the chrysanthemum, and growers and devotees of the Queen of Autumn turn annually to this inland city to hear of the novelties and learn what are the desirable varieties to grow.

Here are nineteen houses entirely devoted to chrysanthemum culture, for all other flowers gradually have given way to the Queen of Autumn and here at least she reigns supreme, for none of the other floral beauties are given an opportunity to rival her. More than 300 varieties are grown, not counting the large number of seedlings that are being given a trial, and the work of selecting and discarding each year is thoroughly systematized and the wheat and chaff carefully separated. The growing of exhibition varieties is one of the principal features of this place and the success which has been attained is well known and attested by the large number of cups, medals and prize cards which may be seen on every hand. The exhibition blooms are all grown in pots seven and eight-inch sizes from early struck cuttings, and the plants attain a height of from five to eight feet, with blooms measuring eight and more inches in diameter, with a depth equal and often more than the width. It certainly is well worth the time and trouble to visit these houses and see the perfection which can be attained in their culture. There are also thousands of plants grown in benches to test them for their commercial worth, and the grower can see at a glance what vari-

eties come up to the standard set by the critical commercial buyers and growers of the day.

The seedlings are of course extremely interesting, for the work in this line is thoroughly planned and those that are deemed worthy of even a second year's trial have to pass a most thorough test. The first year does not of course show the full worth of each variety, but careful notes are taken of the best features, and for the second year five plants are tried. These are grown to different buds, either crown, second crown or terminal, and the dates at which the buds set carefully noted. Again the weeding process is gone through and it takes a variety with some special advance to pass the critical eye of the proprietor, for though these are his babies, yet years of experience have taught him that unless a seedling shows marked improvement on existing varieties it is a waste of both time and money to continue its culture, and unless an advance is pronounced the variety must be condemned.

GREENHOUSES OF ELMER D. SMITH & CO., ADRIAN, MICH.

The next year ten plants are grown, and what has proved to be the best bud in the previous year's trial is given the preference and when these blooms are perfected the worth of the variety is known. It is long, patient labor, but with one filled with the enthusiasm of Mr. Smith it is also a work of love. The cross-fertilization of the different varieties is a great study and it is always the aim to try and perpetuate in the new variety the best traits of the selected parents. While this is the object, yet it must be plain that the result is not so easily obtainable, but still great advancement along selected lines can be plainly observed. There is a marked advance in one particular, the obtaining of varieties with good foliage having leaves that come up to the flower and many of the later seedlings can be seen with the flowers resting upon fully developed leaves, which gives the flower a most beautiful setting.

A number of the seedlings which were noted are sure to be seen and heard of in the next few years. Pink Gem has already been awarded a certificate by the Chrysanthemum Society of America and is a beautifully formed flower with fine foliage of a deep pink shade. A variety named this year is Aesthetic, and it is well named, for according to the dictionary the meaning of the word is "that which embodies beauty in nature and art." It is certainly a most exquisite flower of the softest yellow in color. The flower is not one of the immense blooms, but of good size, but the particular charm is the shape and the manner in which the petals twist into the center, overlapping each other in a most pleasing way. The growers of fifteen years ago will remember Kioto, one of the finest formed flowers in chrysanthemums, and this bloom has that same beautiful build. A large white, a much improved Timothy Eaton, being purer in color, more pleasing in form, and of better foliage, has been named Christy Mathewson. No. 106-1-10 is one of the loveliest pure whites we ever saw and can be best described as an improved Naomah. No. 457-1-08 is a beautiful daybreak pink, self-colored, with long twisting petals, a deep Japanese incurved of pleasing form. No. 275-1-08 is a bright golden yellow of Col. D. Appleton style, but far better in form, and the foliage is large and extends clear up to the flower.

An inspection of the novelties of this season showed many good qualities in them all, and Mr. Smith's comments on them are as follows:

Mrs. G. C. Kelly, an old rose color, purely an exhibition variety, good grower, good size, but with rather a long neck.

F. T. Quittenton, a deep crimson, very tightly reflexed, not a commercial flower and hardly large enough for exhibition.

Harry E. Converse, a very large chestnut crimson, fine for exhibition collection, one of the best of the year.

Lady Carmichael, a large white with narrow petals but showing a large yellow center and foliage not of the best.

William Turner, an immense white and firm in foliage but a hard doer.

Alice M. Flagler, a large white closely incurved with fine foliage but deficient in stem.

F. E. Nash, a very promising large pink, but to get the best color the right bud must be selected.

Golden Gem, of brightest yellow but was not fully out and had not attained full size, but promises well.

Lenox, a large bright yellow incurved Japanese. The foliage is not large and the plants lack vigor. An exhibition variety.

Poughkeepsie, a creamy white, large but with the best flowers on rather long stems, also exhibition.

Morristown, a very large light pink with narrow twisting petals falling loosely around the base of the flower, another exhibition variety.

Glen Cove, a large reflexed light pink of pleasing shade, one of the best of the year for both exhibition and commercial growing.

Of the older and better known varieties some very handsome blooms were all ready for the exhibition table. Naomah was in grand shape and will certainly be a winner. Col. D. Appleton was finely grown and some extra quality blooms will be staged. Crocus was fine, and the blooms of this beautiful yellow were of good size and form. In fact, all of the old favorites are grown to the height of perfection. A large number of single and pompon varieties are also included in the collection.

The casual observer might ask what is to be grown in these houses after the chrysanthemums are cut, and the proprietor would immediately answer, "chrysanthemums," for the propagation is already started and as soon as

SEEDLING CHRYSANTHEMUMS AT ELMER D. SMITH & CO.'S, ADRIAN, MICH.

the stock can be selected and benched the cuttings will be placed in the space they occupy. For as we stated early this is the home of the chrysanthemum and hundreds of thousands of these young plants are shipped east, north, south and west all over this country and across the water. This is a chrysanthemum headquarters and this flower is the specialty and all the energies of the proprietor and his able assistants are exerted to improve and disseminate the best that the Queen of Autumn can produce.

CHRYSANTHEMUMS AT HOERBER BROS., DES PLAINES, ILL.

Hoerber Bros., Des Plaines, Ill.

Whisper the word "novelty" in the ear of the up-to-date florist or especially one connected with horticultural journalism and he immediately is wide-awake and as keen as a foxhound on the scent of Reynard to see the wonder and form his opinion, even if he is not willing to express it, and knowing that there was growing at the houses of Hoerber Bros. at Des Plaines, Ill., a new rose, it was with great interest that a visit was made to these greenhouses to see the rose Wilhelmina, as well as to inspect the growing crops. The range of glass is an example of present day business principles adapted to greenhouse culture. It was but a few years ago that every greenhouse contained a full line of everything necessary to the floral trade known at that time, and in such ranges would be found almost all known plants from an orchid to sweet alyssum. Then came houses devoted to one kind of plants. But here is a range of 21 houses, 300 feet long and 28 feet wide, covering four acres of ground, in which are grown but three different flowers, roses, carnations and chrysanthemums, and of these only those varieties that have acquired an established reputation as the best in the commercial floral world. One can but think this is a new order of things, and is business from the word "go."

Only one house is devoted to chrysanthemums, and here we notice the careful selection of varieties to well-known commercial kinds. Only nine different varieties are grown, as follows: Early Snow, Clementine Touset, Robert Halliday, Mrs. H. W. Buckbee, Dr. Enguehard, W. H. Chadwick, Major Bonnaffon, Golden Chadwick and Nagoya. These were just coming into flower and a high grade commercial bloom was the aim and it is being attained. Robert Halliday was just in bloom and a handsome bench of these beautiful yellow flowers was now almost in condition for market. W. H. Chadwick and Golden Chadwick were especially well grown, the plants being very even and an exceptionally fine grade of these late blooms will be harvested. This house, as soon as the chrysanthemums are cut, is used for propagation and the growing of the large amount of stock used in planting the houses.

The carnations are given five houses which are partitioned off from the rose section, and here again are found but few varieties, only six different kinds being grown in the 40,000 plants. The Enchantress family is given first place and Enchantress, White Enchantress and Rose Pink Enchantress occupy more than half the bench room. These are all in splendid condition, the plants of good size and the blooms now being cut are of fine quality. White Perfection, Victory and Beacon are the other varieties grown and they all look as if they had had the finest of culture and promise a good cut of high-grade flowers for the year.

Fifteen of the houses are devoted to the cultivation of roses and the varieties grown, with the quantity of each, are as follows:

Killarney	30,000
Bride	30,000
Richmond	18,000
White Killarney	15,000
My Maryland	6,000
Wilhelmina	6,000
Mrs. Jardine	1,000

The first to attract our attention was the Wilhelmina which was one of the great objects of our visit. This rose has been registered with the Society of American Florists as a rose of unknown parentage that appears to be a cross of Killarney and Golden Gate, of bright pink color, darker than Killarney. The growth as seen at the houses is very strong and the plant very floriferous, for at this time the beds are bearing more flowers than those of the other varieties beside it. The foliage is bright and clear and of heavy texture which well clothes the long strong stems. The flower is very large, the bud being long and well shaped. In color it reminded us of the Duchess of Albany, the dark sport of La France, and as the flower opens the petals gradually take on the La France shade, having that peculiar texture and sheen that this favorite of the old rosarians possessed. It is said that the flowers when open are very large and that the petals hold as well as those of Killarney and when well opened makes a most beautiful vase of pink roses. There are but yet only 6,000 plants of this rose and the firm intends this year to propagate it very largely and get up a good stock and give it a thorough trial before atempting to disseminate it. The illustration which accompanies this description fully shows the growth of this variety.

Of the other roses, Killarney was in

ROSE WILHELMINA AT HOERBER BROS., DES PLAINES, ILL.

splendid condition and the houses started at different times to give a succession throughout the season, the growths now coming into bud showed the best of culture and promised flowers of high quality. White Killarney was fully equal to its parent and the flowers now being cut are of excellent quality. Richmond is timed for later in the season, a few benches just coming into bloom, but the larger part of the crop grown to be in bloom at Christmas. My Maryland and Mrs. Jardine are both in fine shape, some

CARNATION WHITE ENCHANTRESS AT HOERBER BROS., DES PLAINES, ILL.

superb flowers of the former now being sent to market. Bride, the old "bread and butter" rose which has probably built and paid for more greenhouses than any other variety ever grown, is not a "has been" by any means, for it is growing luxuriantly and promises a fine crop throughout the season.

The cut from these houses is all sent to the market in Chicago, where Hoerber Bros. have one of the best arranged wholesale stores at 162 North Wabash avenue. Here Fred C. Hoerber, assisted by his storeman, Harry Manheim, attends to the wants of their customers in the ablest manner. The greenhouses are in charge of W. F. Hoerber and everywhere one sees demonstrated the business ability of this progressive firm.

The Schizanthuses.

There are few, if any, more useful flowering plants during the spring months than schizanthuses. Their elegant habit of growth, the diversity of their colors, and the ease with which they can be grown, render them indispensable for decorative purposes in the conservatory and the dwelling house. There are several distinct forms possessing numerous charming shades of color. The grandiflora hybrids are especially attractive, and are of compact habit, producing flowers that range from white to crimson and purple. Wisetonensis is a lovely dwarf type, and forms elegant specimens in quite small pots. S. Grahami possesses bright red and orange flowers, while S. retusus is erect in growth and bears brilliant scarlet and orange flowers, and, on account of its erect and sturdy growth, is one of the best for supplying cut flowers. S. retusus Rosy Gem is a very desirable addition. S. grandiflorus oculatus is a large-flowered variety with purple and mauve blossoms. S. pinnatus affords numerous shades of color, and is capable of being grown into quite large specimens, plants six or eight feet in height being by no means uncommon in some gardens.

To have specimens of good size for early spring flowering seeds should be sown at the present time in an unheated frame, writes a correspondent in the Gardeners' Magazine, taking care to shade the seed pans lightly until after germination takes place. When the seedlings are large enough prick them out in small pots filled with a light, porous compost, and grow them on in a cool house. When they become well established give air freely on all favorable occasions, and lightly spray them during bright weather. When nicely rooted shift them on, using 48 or 32 size pots, in which they may be allowed to flower. If extra sized specimens are required, shift into pots one size larger. A suitable compost is one consisting of two parts good fibrous loam and one part leaf-soil, to which should be added some coarse road sand, and a 6-inch pot full of some approved fertilizer to each bushel of the compost. Do not pot too firmly, and take care not to allow the soil to become very wet, it being advisable to keep it rather on the dry side until root action becomes active in the spring.

The plants can be stopped by pinching out the points when about four inches high, and again later, to form extra sized specimens, or to regulate the flowering period. During the winter a perfectly cool house suits them best, a temperature of 45° being quite sufficient, and a position near the glass is essential to insure a short-jointed, vigorous growth. During the spring it is an advantage to syringe between the pots on bright days, and occasional doses of liquid manure and soot-water are helpful. Stake the specimens with neat bamboo canes, and tie carefully with green ratha, taking care not to draw the strands too tightly. It is not advisable to shade the schizanthuses until they are in full flower, as such treatment results in weak growth.

Origin of the Chrysanthemum.

The Japanese have an interesting legend in connection with the origin of the chrysanthemum. In a garden, bathed in the soft moonlight, a young girl plucked a flower and commenced to strip the petals to see if her fiance loved her truly. Of a sudden a little god appeared before her and assured her that her fiance loved her passionately. Your husband will live, he added, as many years as the flower, which I will let you choose, has petals. With these words he disappeared. The young girl hastened to search the garden for a flower which should have an abundance of petals, but each one appeared to promise but a brief future for her beloved.

At length she picked a Persian carnation, and, with the aid of a gold pin, taken from her hair, she separated each one of the petals of the flower, so as to increase the number of folioles and of the number of years accorded by the god to her fiance. Soon, under her deft fingers, one, two, three hundred petals, thin, pliant and beautifully curved, had been evolved, and the young girl cried for joy to think of the happy future which her ruse had assured her fiance. So, runs the legend, was the crysanthemum created one moonlight night in a Japanese garden, where silvery brooks murmured softly as they ran beneath the little bamboo bridges.—London Globe.

WHITE KILLARNEY ROSES AT HOERBER BROS., DES PLAINES, ILL.

ROSE DOUBLE WHITE KILLARNEY.

Exhibited by A. N. Pierson, Inc., Cromwell, Conn. at the Chicago Novelty Show.

THE EXHIBITIONS.

Pennsylvania Horticultural Society.

With the chrysanthemum and fall exhibition of the Pennsylvania Horticultural Society which opened Tuesday, November 7, new life has been infused that promises much for this time-honored organization. It is not merely a flower show, it is a finished and perfected exhibition, given in a setting of floral art, the work of a trained decorator. One can see at a glance the grace, the finished touch of the artist, the general excellence which makes this display much superior to any of recent years, the work of the decorators alone was worth going to see, and when the many beautiful and competitors' exhibits were in place and arranged with an eye to the artistic blending of the whole, there was placed for the inspection of the members of the society and the general public such an exhibition as has not been their pleasure to see before in this city and quite the equal if not better than anything of its size ever held in this country.

On the outside of the hall was displayed some specimen bay trees which gave the front a festive appearance inside the lobby. Large groups of single and pompon chrysanthemums entirely filled the spaces between the doors with a riot of color. Inside the grand staircase was flanked with large specimen chrysanthemums plants, with large vases of choice blooms set in grasses and foliage on the posts at the first landing. The entire balcony front of the large hall was a bower of Cibotiuns and Boston ferns and choice blooms of chrysanthemums.

Inside the main hall the effect at first sight was beautiful and called forth exclamation of surprise and pleasure from the visitors. The sides of the building were decorated with graceful branches of autumn leaves and southern smilax attached to the top of the windows. Between the windows at intervals were placed stately plants of Ficus pandurata; these were twelve feet in height and gave an Egyptian effect to the decoration. Along the sides of the hall had been built a balcony elevated about four feet above the floor, on which were placed chairs, where the visitors might rest and listen to the music of an excellent orchestra while feasting their eyes on the beautiful view before them. The groups of foliage and flowering plants arranged for effect were placed down the middle of the hall. There were four well arranged entries for this prize and all contained very beautiful plants. The central group of crotons was magnificent, some of the specimen plants being among the finest in the country. The specimen chrysanthemum plants were arranged on either side of the center and were exceptionally fine, there not being a weak plant in the whole lot. Some were six feet in diameter and filled with fine large blooms. They were one of the great features of the show. In front of the balcony on either side of the hall tables contained exhibits of choice cut blooms of chrysanthemums. Collections of orchids in flower and other entries such as ferns and other foliage plants.

On and in front of the stage which partially concealed the orchestra was arranged the exhibit of H. A. Dreer, Inc., a collection of the new and rare plants of recent introduction and well grown specimens of standard stock for house and conservatory decoration. The front or balcony end of the hall contained six handsome specimen ferns which were in a class by themselves. These were sent by G. W. C. Drexel (Thos. Long, gardener). In the center of these ferns was a large upright case filled with new and rare orchids from Lewis Burk. A large gilt frame surrounded a group of three choice specimen plants, making a handsome picture. Electric lights arranged above brought out the beauty of the flowers. Tables along the corridors to the foyer contained the choice specimen chrysanthemum blooms and vases of one flower each. These were never excelled, the separate specimens being wonderful in their size and coloring.

In the foyer were arranged the various entries of ornamental foliage plants and it would be almost impossible to do justice to their general excellence. They contained the newest and most beautiful of ornamental greenhouse and store plants and all were artistically arranged. Two round groups, one of Cocos Weddelliana and another of Pheonix Roebeleni, were wonderfully

graceful. Another fine lot of variegated pineapples was a gem being as uniform as a summer bed in the lawn. These three groups were from the H. A. Dreer, Inc. Numerous groups of single-stemmed chrysanthemum plants in six-inch pots, with their great heads of blooms, were arranged around the foot of the winding arches of the foyer. In the lower hall the Lord & Burnham Co. had erected a small curved roofed greenhouse suitable for the limited space of the city yard. Around this the Henry F. Michell Co. had arranged beds of hardy chrysanthemums in pots, which latter were concealed so as to give a garden effect. W. Atlee Burpee & Co. staged a fine collection of seedling chrysanthemums, single varieties, to show what could be done with their seed in a single season from seed sown in March of the present year. The flowers, mostly in long sprays, were very showy and useful for cutting. Henry F. Michell Co. also exhibited cut blooms of hardy pompon chrysanthemums, as did the Thos. Meehan & Sons, who made a fine display, backed by fancy evergreens in tubs. H. A. Dreer filled a prettily decorated and electrically lighted booth with floral and garden requisites. Henry F. Michell Co. had also a similar exhibit. H. Waterer's entry was garden requisites and bulbs, a very full and prettily arranged exhibit.

The rose growers were very much interested in several vases of roses staged in this room. A new-comer from the Waban Conservatories, Natick, Mass., was the star, a pink as large as an American Beauty, borne on a long, stiff stem, very fragrant, is a wonderfully beautiful rose. It is called Mrs. Charles Russell and looks like a winner. Pennock-Meehan Co. staged for J. A. Budlong & Son Co. of Auburn, R. I., their Killarney Queen and Double White Killarney, both splendid commercial sorts, and as grown by them exceptional in every way. Several exhibits are as yet to be floored in the front lower hall. Charles Kruger, with a nice display of jardinieres and plant boxes, being the only one in the place at the opening. Taking it as a whole, it is the best exhibit made by the society in a decade and gives great promise for the future. The awards are as follows:

CHRYSANTHEMUM PLANTS.

Display of four plants, Japanese, four varieties—Mrs. F. C. Penfield (John McCleary, gardener), first; C. B. Newbold (Samuel Batchelor, gardener), second.

Display of three plants, three varieties, pink—Mrs. F. C. Penfield, first; C. B. Newbold, second.

Three plants, three varieties, introduced in 1911—Mrs. F. C. Penfield, first; Mrs. Joseph F. Sinnott (David Ingram, gardener), second.

Specimen plants, in not over fourteen-inch pot—Mrs. George H. McFadden (David Aiken, gardener), first; Mrs. Joseph F. Sinnott, second.

Specimen plant, in not over fourteen-inch pot—Mrs. F. C. Penfield, first; Mrs. George H. McFadden, second.

Best six plants, of any one variety, in not over six-inch pot—Mrs. F. C. Penfield, first; John W. Pepper (William Robertson, gardener), second.

Eight plants, four each of the following colors: White, Yellow; in not over six-inch pots, one bloom to a plant—P. A. B. Widener (Wm. Kleinheinz, gardener), first; Mrs. F. C. Penfield, second.

Six plants, yellow, in not over six-inch pot—Mrs. R. B. Ellison (Axel Lindroth, gardener), first; Mrs. Chas. Wheeler (William Fowler, gardener), second.

Six plants, any color, in not over six-inch pots—Mrs. R. B. Ellison, first; Mrs. Chas. Wheeler, second.

Six plants of Old Gold, six-inch pots, single stems—Mrs. R. B. Ellison, first; Mrs. Charles Wheeler, second.

Best six plants, Mrs. Wm. Duckham—Mrs. R. B. Ellison, first; Mrs. Charles Wheeler, second.

Vase of six blooms, Mrs. Frank Thomson—P. A. B. Widener, first; J. W. Pepper, second.

Four vases, five blooms each, one vase white, one pink, one yellow, one any other color, distinct varieties—John Wanamaker (John H. Dodds, gardener), first; P. A. B. Widener, second.

Vase of twenty-five blooms—P. A. B. Widener, first; J. W. Pepper, second.

Best fifty blooms—Mrs. F. C. Penfield, first; J. W. Pepper, second.

Chrysanthemum Lynnwood Hall, best vase of twelve blooms—Countess Santa Eulalia (Thomas Gaynor, gardener), first; P. A. B. Widener, second.

Twelve blooms—J. W. Pepper, first; John Wanamaker, second.

Six vases, six distinct varieties, five blooms each—John Wanamaker, first; P. A. B. Widener, second.

Best cut flower display of hardy chrysanthemums—J. W. Pepper, first; C. B. Newbold, second.

Vase of six blooms, of variety T. D. M. Cardeza—J. W. Geary (James Bell, gardener), first; P. A. B. Widener, second.

Best vase of five blooms of Beatrice May—R. B. Ellison, first; Thomas J. Holland, second.

Best vase of five blooms of Colonel D. Appleton—Mrs. Henry G. Stetson (Joseph Pratt, gardener), first; Mrs. Joseph F. Sinnott, second.

Best vase of five blooms of O. H. Broomhead—Thomas Holland, first; Mrs. R. B. Ellison, second.

Best vase of five blooms—Mrs. R. B. Ellison, first; C. H. Clark (James Slowey, gardener), second.

Best vase of five blooms—C. H. Clark, first; Mrs. Henry G. Stetson, second.

Best vase of five blooms—Mrs. R. B. Ellison, first; Thomas J. Holland, second.

Best vase of five blooms—Mrs. Henry G. Stetson, first; Thos. J. Holland, second.

Best six blooms of variety Mrs. Jos. F. Sinnott—Mrs. George H. McFadden, first; Mrs. R. B. Ellison, second.

Chicago Novelty Show.

The exhibition of novelties at the Chicago Florists' Club meeting November 2 was large and interesting, the invitation extended by the club to the many growers of novelties being responded to by firms having meritorious varieties from far and near. While the chrysanthemums were displayed in large numbers yet the new roses were the center of attraction. The E. G. Hill Co., of Richmond, Ind., showed a very beautiful vase of Sunburst. This rose is golden yellow in color, deep enough to show the yellow tints under artificial light, a quality that has been lacking in yellow roses. The stems are long and strong and the bud is long and pointed, making a very pleasing combination. A. N. Pierson, Inc., Cromwell, Conn., displayed a vase each of Double White Killarney

NEW CHRYSANTHEMUM CHRISTY MATHEWSON.
Grown by Elmer D. Smith & Co., Adrian, Mich.

CHRYSANTHEMUM NAOMAH AT ELMER D. SMITH & CO.'S ADRIAN, MICH.

and Killarney Queen, the former a full double sport of White Killarney and the latter a dark pink sport of Killarney, both valuable additions for the rose growers. The committee awarded 90 points to Sunburst, 87 points to Double White Killarney and 88 points to Killarney Queen. H. Roth, Lafayette, Ind., showed a vase of Seedling No. 5, a very dark crimson, fully double, which the committee awarded special mention. This rose looked particularly promising.

The chrysanthemum exhibits were large and varied, from pompons to immense flowers. Elmer D. Smith & Co., Adrian, Mich., made a large display comprising some twenty varieties which were of great merit. Nontero, light pink, Chrysolora, yellow, Aesthetic, a beautiful light lemon yellow, and Pink Gem, which had already received certificates. Those that were scored by the committee were Christy Mathewson, large white, 90 points; Smith's Sensation, a daybreak pink, 87 points; White Perfection, an incurved white, 88 points; Clea, a light pink single, 85 points. A vase of unnamed seedlings, many of which were very promising, was highly recommended. The E. G. Hill Co. showed August Dassy, a beautiful orange yellow of Japanese form, scored 92 points commercial scale and 87 points exhibition scale; Hirondelle, a dark pink Japanese incurved, scored 91 points commercial scale and Petite Yvonne, a reflexed white, scored 81 points. Hartje & Elder, Indianapolis, Ind., exhibited a very beautiful pompon soft pink in color that scored 93 points. Vaughan's Seed Store exhibited a vase of new varieties in the large blooms which contained well grown specimens and two vases of seedling pompons and anemones that contained many varieties of great merit, particularly noticeable was an improved Garza, a beautiful large flower of the well known variety.

The Chicago Carnation Co. exhibited three seedling carnations all in the red class. No. 186 scored 86 points, No. 49, 87 points and No. 150, 88 points. Well grown White Wonder and Pink Delight were also shown by this firm. An exhibit which attracted much attention was a beautiful hybrid cattleya shown by Charles Bond, Naperville, a cross of C. intermedia and C. Trianæ, a most beautiful flower of large size. The plant has bloomed three times in 18 months. The committee awarded a certificate to this plant, of which E. O. Orpet, Lake Forest, is the originator.

American Institute of New York.

The annual chrysanthemum show of the American Institute of the City of New York was held at 19-21 West Forty-fourth street November 1-3. Following are the awards:

Twenty-five blooms, one variety, long stems—Howard Gould (Wm. Vert, gardener), first.

Twenty-five blooms, one variety—Mrs. John E. Parsons (Robt. Spier, gardener), first.

Thirty blooms, thirty varieties, one bloom each, 10-inch stem—Wm. Rockefeller (Geo. Middleton, gardener), first; Howard Gould, second.

Twenty blooms, 20 varieties, one bloom each, 10-inch stem—Wm. Rockefeller, first; Mrs. John E. Parsons, second.

Ten varieties, one bloom each, 10-inch stem—Wm. Rockefeller, first; Miss G. Iselin (Ewen Mackenzie, gardener), second.

Ten blooms, white—Howard Gould, first.

Ten blooms, pink—Howard Gould, first.

Ten blooms, yellow—John F. Pratt (John Everett, gardener), first; M. C. D. Borden (Wm. Turner, gardener), second.

Ten blooms, crimson—M. C. D. Borden, first; Howard Gould, second.

Ten blooms, bronze—John T. Pratt, first.

Ten blooms, artificial supports allowed—Howard Gould, first; John S. Lyle (J. G. P. Kennedy, gardener), second.

Six blooms, white—Miss C. A. Bliss (John T. Burns, gardener), first; Howard Gould, second.

Six blooms, pink—Howard Gould, first; E. D. Adams (Geo. H. Hale, gardener), second.

Six blooms, yellow—M. C. D. Borden, first; Miss C. A. Bliss, second.

Six blooms, crimson—M. C. D. Borden, first; Howard Gould, second.

Six blooms, bronze—M. C. D. Borden, first; E. H. Wells (Alec Robertson, gardener), second.

Six blooms, Japanese incurved, white—E. H. Wells, first; M. C. D. Borden, second.

Six blooms, Japanese incurved, yellow—M. C. D. Borden, first; E. D. Adams, second.

Six blooms, Japanese incurved, pink—Howard Gould, first; E. D. Adams, second.

Six blooms, Japanese incurved, crimson—John Lyle, first; E. D. Adams, second.

Six blooms, Japanese incurved, bronze—E. H. Wells, first; M. C. D. Borden, second.

Six blooms, Japanese reflexed, white—Howard Gould, first; E. D. Adams, second.

Six blooms, Japanese reflexed, yellow—E. H. Wells, first; M. C. D. Borden, second.

Six blooms, Japanese reflexed, pink—A. L. Erlanger, first; Howard Gould, second.

Six blooms, Japanese reflexed, crimson—Howard Gould, first; E. D. Adams, second.

Six blooms, Japanese reflexed, bronze—A. L. Erlanger (Adam Alexander, gardener), first.

Six blooms anemone, white—Fritz Achielis (W. Dowlan, gardener), first; E. D. Adams, second.

Six blooms anemone, yellow—Fritz Achielis, first; E. D. Adams, second.

Six blooms anemone, pink—John Lyle, first; Fritz Achielis, second.

Six blooms anemone, crimson—Fritz Achielis, first; E. D. Adams, second.

Six blooms anemone, bronze—Fritz Achielis, first; John Lyle, second.

Six blooms, new white—C. H. Totty, first.

Six blooms, new yellow—R. Mortimer (C. D. Schaeffer, gardener), first.

Six blooms, new pink—A. C. Van Gaasbeck (John Dervan, gardener), first.

Six blooms, any other color—Chas. H. Totty, first.

Vase of anemones—E. D. Adams, first; John Lyle, second.

Vase of hairy and plume varieties—Fritz Achielis, first; E. D. Adams, second.

Vase of singles—E. D. Adams, first; W. W. Heroy (A. Wynn, gardener), second.

Best collection of 20 vases, hardy varieties—C. Mallory (W. J. Sealy, gardener), first; C. H. Rice, second.

Best collection of pompon, 100 vases—W. J. Sealy, first; C. H. Rice, second.

PLANTS.

Specimen plant, white—Mrs. J. Crosby Brown (Peter Duff, gardener), first.

Specimen plant, pink—Mrs. J. Crosby Brown, first.

Specimen plant, yellow—Mrs. J. Crosby Brown, first.

Specimen standard plant, white, not less than 24-inch stem—Mrs. J. Crosby Brown, first; F. V. Burton (Wm. Cordes, gardener), second.

Specimen standard pink—F. V. Burton, first; Chas. Hathaway (Max Schneider, gardener), second.

Specimen standard yellow—Mrs. J. Crosby Brown, first; F. V. Burton, second.

Twelve plants in variety grown to single stem in 6-inch pots—F. V. Burton, first.

Six plants of one variety grown to single stem and in 6-inch pots—Samuel Untermyer, first.

Best group of flowering and foliage plants covering a space of 80 square feet, variety and effectiveness to be considered—Samuel Untermyer, first.

Collection of orchids—Lager & Hurrell, first.

Specimen palm—Mrs. J. Hood Wright (Chas. Webber, gardener), first.

Specimen fern—Mrs. J. Hood Wright, first.

Twelve American Beauty roses—L. A. Noe, first.

Twenty-five pink roses—L. A. Noe, first.

Twenty-five white roses—L. A. Noe, first.

Twenty-five yellow roses—C. H. Totty, first.

Twenty-five any other color roses—C. H. Totty, first.

CARNATIONS, CUT BLOOMS.

Three varieties, 25 blooms each—Wm. Rockefeller, first; Miss Bliss, second.

Best vase one variety, 25 blooms—J. D. Cockcroft, first; John T. Burns, second.

Best 100 double violets—Max Schneider, first; Samuel Untermyer, second.

Julius Roehrs Co. had a splendid group of orchid plants.

Chas. H. Totty had a most magnificent display of the rose Radiance, with stems nearly six feet long. This exhibit caused much favorable comment.

J. D. Cockcroft won the prize for the best 25 blooms of carnations, any variety, with his new seedling, No. 310.

The judges were John MacMichael, Eugene Dailledouze, Peter Duff and A. Herrington.

Tarrytown Horticultural Society.

The thirteenth annual fall exhibition of the Tarrytown Horticultural Society opened in Music Hall, Tarrytown, N. Y., Tuesday, October 31, and continued for three days. The exhibition was finer in every respect than those previously held. The addition of the tables of orchids and the particularly fine group of palms, foliage and flowering plants exhibited by S. P. Shotter, Lenox, Mass., contributed greatly to the beauty of the exhibits. There was good competition throughout in all the classes. Music Hall was a bower of bloom and beauty from end to end. A fine grade of blooms graced the tables with unusual perfectness.

The prizes awarded were as follows:

F. R. Pierson's prize, silver cup to the exhibitor receiving the largest number of prizes—Frederick Potter (Wm. C. Roberts, gardener).

J. D. Archbold's prize, best 12 blooms of chrysanthemums, distinct varieties—Joseph Eastman (Robt. Angus, gardener), first; Wm. Rockefeller (Geo. Middleton, gardener), second.

Ferd. Hermann's prize, best 20 blooms of chrysanthemums, distinct varieties—S. P. Shotter (Allen J. Jenkins, Supt.), first; Joseph Eastman, second; Wm. Rockefeller, third.

Pierson U-Bar Co.'s prize, best arranged table of decorative plants—Joseph Eastman, first; S. P. Shotter, second.

C. P. Johnson's prize, best collection single chrysanthemums—Henry Siegel (Thos. Aitchison, gardener), first; H. Darlington (P. W. Popp, gardener), second.

David MacFarlane's prize, best three blooms chrysanthemums, one each white, pink and yellow—S. P. Shotter, first; A. Lewisohn (John Canning, gardener), second.

Addison Johnson's prize, best arranged vase of 18 blooms chrysanthemums—Col. Robt. C. Clowry (E. Trethewey, gardener), first; Miss Blanche Potter (George Wittlinger, gardener), second.

Miss Blanche Potter's prize, best exhibit for keeping qualities—Joseph Eastman, first; Wm. Rockefeller, second; Robert C. Clowry, third.

Mrs. J. B. Trevor's prize, silver cup, best 12 blooms chrysanthemums, one variety—S. P. Shotter, first; Frederick K. Potter, second.

TABLE DECORATIONS AT TARRYTOWN FLOWER SHOW, NOVEMBER 2, 1911

F. R. Pierson Co. exhibited a fine lot of roses, palms, ferns, etc., for which they were awarded a certificate of merit. A certificate of merit was also awarded Scott Bros. for a table of pompon and large-flowering chrysanthemums; also to H. Darlington for an exhibit of dahlias.

The judges for the three days were as follows: First day—Alex. Thompson, Mt. Kisco, N. Y.; John H. Everitt, Glen Cove, and John McQueen, Glen Cove, N. Y. Second day—Henry Cliff, Locust Valley; David Graham, Chappaqua, N. Y., and J. T. Burns, New Canaan, Conn. For the table decoration, Mrs. Stuyvesant Fish, Mrs. M. F. Campbell, and Mrs. E. Barbour. Third day—John Elliott, Nathan Brewer and Francis Gibson.

Mrs. William Church Osborn's prize, best 36 blooms chrysanthemums, six varieties—Wm. Rockefeller.

Wm. Rockefeller's prize, silver cup, best 18 blooms chrysanthemums, six varieties—A. Lewisohn, first; S. P. Shotter, second.

Charles Mallory's prize, best 24 blooms chrysanthemums, four varieties—A. Lewisohn, first; S. P. Shotter, second.

Peter Henderson & Co.'s prize, best collection of six different vegetables—Richard Delafield (Wm. Brock, gardener), first; Mrs. M. E. Sand (Thos. A. Lee, gardener), second.

Burnett Bros.' prize, best collection 12 different vegetables, grown outdoors—E. L. Coster (Edward Kane, gardener), first.

W. A. Read's prize, silver cup, best arranged group of palms, flowering and foliage plants—S. P. Shotter, first; Joseph Eastman, second.

Charles Vanderbilt's prize, largest chrysanthemum bloom—S. P. Shotter, first.

H. Darlington's prize, best box of vegetables—Richard Delafield, first; Miss Blanche Potter, second.

Wm. F. McCord's prize, best three plants Begonia Gloire de Lorraine—E. Berolzheimer (Wm. Jamieson, gardener), first; A. Lewisohn, second.

Col. Robt. C. Clowry's prize, most effectively arranged display of orchids—S. P. Shotter, first; E. Berolzheimer, second.

Elmer D. Smith & Co.'s prize, six blooms Chrysanthemum Tarrytown—E. Berolzheimer, first; Wm. Rockefeller, second.

Mrs. Stuyvesant Fish's prize, silver cup, best arranged floral decoration for dinner table—James Speyer (John Heermann, gardener), first; A. Lewisohn, second; E. Berolzheimer, third.

An Honorary Member's prize, best 12 White Killarney roses—Frederick Potter, first; Richard Delafield, second.

A Friend's prize, best 12 Double Pink Killarney roses—Richard Delafield, first; Mrs. Stuyvesant Fish (Wm. MacBean, gardener), second.

A. Lewisohn's prize, silver cup, best 18 American Beauty roses—Samuel Untermyer (Harry Turner, superintendent).

Mrs. J. A. Stillman's prize, best 12 blooms Richmond roses—Richard Delafield, first; Mrs. Stuyvesant Fish, second.

Mrs. Isaac N. Seligman's prize, best basket of cut flowers—Richard Delafield, first; Henry Siegel, second.

Felix M. Warburg's prize, best centerpiece for table—Frederick G. Leroy (Chas. Deutschman, gardener), first; H. Darlington, second.

Lord & Burnham Co.'s prize, best 18 roses, three varieties—Richard Delafield, first; J. J. Riker (Thos. W. Stobo, gardener), second.

Richard Langle's prize, best 12 blooms Killarney roses—Richard Delafield, first; Frederick Potter, second.

Mrs. Henry Fairfield Osborn's prize, best 12 blooms roses, one variety—Frederick Potter, first; Richard Delafield, second.

H. Darlington's prize, best 12 blooms carnations, one variety—Wm. Rockefeller, first; J. J. Riker, second.

Kennedy & Hunter's prize, best 36 blooms carnations, six varieties—Wm. Rockefeller, first.

A. T. Boddington's prize—Mrs. M. E. Sand, first; Col. Robt. C. Clowry, second; Ferd. Hermann, third.

H. H. Cannon's prize—Mrs. M. E. Sand, first; James Speyer, second.

Vaughan's Seed Store's prize—Miss Blanche Potter, first.

PLANTS IN POTS.

Best six plants suitable for table decoration—Joseph Eastman, first; A. Lewisohn, second.

Best six ferns for table decoration—Theodore Trevillian, first; Claude Wilson, second.

Best specimen fern—A. Lewisohn, first.

Best Begonia Gloire de Lorraine plant—Emil Berolzheimer, first; Hugh Hill (Robt. Grier, gardener), second.

CUT FLOWERS.

Best six blooms white chrysanthemums—Frederick Potter, first; S. P. Shotter, second.

Best six blooms yellow chrysanthemums—S. P. Shotter, first; Frederick Potter, second.

Best six blooms pink chrysanthemums—Frederick Potter, first; Wm. Rockefeller, second.

Best six blooms red chrysanthemums—Wm. Rockefeller, first; Frederick Potter, second.

Best 50 double blue violets—F. G. LeRoy, first.

Best 50 single blue violets—Robt. C. Clowry, first; Ferd. Hermann, second.

Best 100 double blue violets—Richard Langle, first.

Best 100 single blue violets—Claude Wilson, first; Richard Langle, second.

Best vase 25 blooms carnations, one variety—Charles Barson, first; James W. Smith, second.

Best vase 25 blooms roses, one variety—F. R. Pierson Co., first.

Best 12 American Beauty roses, private gardeners only—Robt. C. Clowry, first; Wm. Rockefeller, second.

Best 12 pink roses—Frederick Potter, first; Joseph Eastman, second.

Best 12 white roses—Frederick Potter, first; James Speyer, second.

Best 12 yellow roses—Joseph Eastman, first.

Best 12 any other color—Frederick Potter, first; J. J. Riker, second.

Best 18 blooms carnations, three varieties, private gardeners only—J. J. Riker, first; A. Lewisohn, second.

Best 12 blooms white—J. J. Riker, first; Frederick Potter, second.

Best 12 blooms scarlet—Wm. Rockefeller, first; Joseph Eastman, second.

Best 12 blooms dark pink—J. J. Riker, first; Wm. Rockefeller, second.

Best 12 blooms light pink—Wm. Rockefeller, first; Frederick Potter, second.

Best 12 blooms streaked—Wm. Rockefeller, first; Frederick Potter, second.

Best 12 blooms crimson—Frederick Potter, first.

FRUITS.

Six varieties of apples—Miss Blanche Potter, first; Chas. de Rham (Arthur MacDonald, gardener), second.

Three varieties of apples—Chas. de Rham, first; Miss Blanche Potter, second.

Six of any one variety of apples—Frederick Potter, first; Esther F. Neubrand, second.

Three varieties of pears—Miss Blanche Potter, first.

Six of any one variety of pears—Mrs. W. H. Pullan, first; Brayton Ives (Wm. Brown, gardener), second.

VEGETABLES.

Best six heads of celery—James Speyer, first; F. G. LeRoy, second.

Best 12 onions, one variety—Richard Delafield, first; E. L. Coster, second.

Best six leeks—Richard Delafield, first; Joseph Eastman, second.

Best two heads of cabbage—A. Lewisohn, first; Miss Blanche Potter, second.

Best two heads cauliflower—Mrs. M. E. Sand, first; E. L. Coster, second.

Best three heads of lettuce—George Slater, first; Wm. Rockefeller, second.

AMATEURS.

Best window plant—Wm. Kastberg, first; Ralph D. Neubrand, second.

Best bouquet—Harold G. Neubrand, first; Walden H. Purdy, second.

Certificates of merit were awarded: F. R. Pierson Co. for palms, ferns, roses and chrysanthemums; H. Darlington for dahlias; William Will, seedling chrysanthemums; Scott Bros., roses and chrysanthemums; Osborn Estate, table of orchids; Mrs. I. N. Seligman, table of orchids.

F. R. PIERSON CO.'S DISPLAY OF ROSES, TARRYTOWN FLOWER SHOW.

The Stamford Show.

The seventh annual exhibition of the Westchester and Fairfield Horticultural Society was held at the Casino, Stamford, Conn., November 3-4. While the members of the society were confident of their first efforts being a success, none anticipated such a grand display as was offered to the public when Mayor Ruell of Stamford officially opened the exhibition November 3 at 2 p. m.

The committees and members were much gratified to know that the work of the past few months connected with the exhibition had realized a great success. The writer will not attempt to describe the quality of chrysanthemums, roses, carnations, vegetables, fruits, etc., staged at this exhibition. But from reports gained from parties who have visited most of the shows (eastern) it was not surpassed by any in quality.

Competition was keen in all classes, averaging over four entries to each class. The Casino floor space was overcrowded for such an extensive exhibit, and the large attendance was remarkable both days. The judges were Wm. Russell, Millbrook, N. Y.; Joseph Ballantyne, Ridgefield; John G. McNicol, Cedarhurst, L. I.

Following are the awards:

CHRYSANTHEMUM PLANTS.

Specimen plant, white—Chas. Mallory (W. J. Sealey, gardener), first; Miss C. A. Bliss (J. T. Burns, gardener), second.

Specimen plant, pink—Chas. Mallory, first; Mrs. Z. P. Child (Wm. Maginnis, gardener), second.

Specimen plant, any other color—Mrs. Z. P. Child, first; Mrs. F. A. Constable (Jas. Stuart, gardener), second.

Specimen standard—Mrs. Albert Crane (Alex. Geddes, gardener), first; Miss G. Iselin (Ewen MacKenzie, gardener), second.

Three bush plants—Chas. Mallory, first; Miss C. A. Bliss, second.

Twelve plants, distinct varieties—Henry Seigel (Thos. Aitchison, gardener), first.

Six plants, distinct varieties—Henry Seigel, first; Miss G. Iselin, second.

Eighteen blooms, distinct—Mrs. F. A. Constable, first; Henry Siegel, second.

Twelve blooms, distinct—Miss G. Iselin, first; Henry Seigel, second.

Six blooms, distinct—Robt. Mallory (Wm. Smith, gardener), first; J. J. Riker (Robt. Stobo, gardener), second; Mrs. Albert Crane, third.

Eighteen blooms, 6 varieties—Miss G. Iselin, first; Wm. Ziegler Estate (A. Biesehke, gardener), second; Henry Seigel, third.

Six blooms, white—Mrs. F. A. Constable, first; Miss C. A. Bliss, second.

Six blooms, pink—Miss C. A. Bliss, first.

Six blooms, yellow—Miss C. A. Bliss, first; Miss M. T. Cockcroft (A. Paterson, gardener), second.

Six blooms, crimson—Henry Seigel, first; Miss G. Iselin, second.

Six blooms, any other color—Mrs. F. A. Constable, first; J. D. Crimmins (M. J. Quirk, gardener), second.

Three blooms white—Mrs. Oliver Hoyt (Jas. Foster, gardener), first; Robt. Mallory, second.

Three blooms, yellow—Robert Mallory, first; Miss Helen M. Smith, second.

Three blooms, crimson—Mrs. W. Z. Cushing (Thos. Stentiford, gardener), first.

Three blooms, any other color—Robt. Mallory, first; Mrs. Albert Crane, second.

Eighteen blooms, three varieties—Miss M. T. Cockcroft, first; Miss C. A. Bliss, second.

Six blooms, American origin—Henry Seigel.

Vase 25 pompons, 25 varieties—Chas. Mallory, first; Fred Sturges (Thos. Bell, gardener), second.

Vase 12 pompons, 2 varieties—Fred Sturges, first; Chas. Mallory, second.

Vase 25 singles, 25 varieties—Mrs. F. A. Constable, first; Fred Sturges, second.

Vase 12 singles 12 varieties—Mrs. Wm. G. Nicol (John McAllister, gardener), first; Henry Seigel, second.

Twenty-five blooms arranged for effect—Miss M. T. Cockcroft, first; Miss C. A. Bliss, second.

PLANTS.

Group of foliage and flowering plants—Wm. Ziegler Estate, first; Miss C. A. Bliss, second.

Specimen palm—Wm. Ziegler Estate, first; Robt. Williamson, second.

Six table plants—Miss G. Iselin, first; E. C. Benedict (Robt. Allen, gardener), second.

Specimen adiantum—Miss M. T. Cockcroft, first; Mrs. F. A. Constable, second.

Specimen fern, other than adiantum—Wm. Ziegler Estate, first; Mrs. F. A. Constable, second.

Three Begonia Gloire de Lorraine—Mrs. W. L. Cushing, first; Mrs. F. A. Constable, second.

Specimen begonia, and variety—Mrs. W. L. Cushing, first; Miss G. Iselin, second.

Geranium, three varieties—Mrs. Albert Crane, first; Mrs. H. O. Havemeyer (Wm. Morrow, gardener), second.

Specimen orchid—Mrs. M. T. Cockcroft, first; Hobart J. Park (Geo. Macrea, gardener), second.

Best table orchids—Miss C. A. Bliss, first.

ROSES AND CARNATIONS.

Thirty-six roses, three varieties—J. J. Riker, first; Mrs. L. P. Child, second.

Twelve roses, white—Chas. S. Smith (A. Peterson, gardener), first; Mrs. F. A. Constable, second.

Twelve roses, pink—Chas. S. Smith, first; J. J. Riker, second.

Twelve roses, crimson—Mrs. Albert Crane, first; Hobart J. Park, second.

Twelve roses, any other color—Hobart J. Park, first; Mrs. L. P. Child, second.

Twelve American Beauty—Chas. S. Smith, first.

Fifty carnations, any variety—J. J. Downey (Thos. Ryan, gardener), first; Henry Seigel, second.

Thirty-six carnations, three varieties—Miss C. A. Bliss, first; J. J. Riker, second.

Twelve carnations, white—Miss C. A. Bliss, first; J. B. Cobb, second.

Twelve carnations, Winsor shade—J. J. Riker, first; Miss C. A. Bliss, second.

Twelve carnations, Enchantress shade—Miss C. A. Bliss, first; J. J. Downey, second.

Twelve carnations, Lawson shade—Henry Seigel, first; Miss C. A. Bliss, second.

Twelve carnations, crimson—Miss C. A. Bliss, first; W. W. Heroy (A. Wynne, gardener), second.

Six carnation seedings, not in commerce—W. W. Heroy, first.

Bunch of 50 single violets—A. F. Higgins, first; Fred Sturges, second.

Bunch of 50 double violets—Mrs. L. P. Child, first.

Table decoration—Mrs. A. A. Anderson (Robt. Williamson, gardener), first; Henry Seigel, second.

Largest bloom in show—Wm. Ziegler Estate.

The competition for the Edward Holbrook silver cup between Westchester and Fairfield county gardeners was won by Fairfield county, and the cup awarded to Miss C. A. Bliss, New Canaan, Conn., as being the most successful exhibitor in either county.

FRUIT.

Four varieties apples, 3 each—Mrs. Albert Crane, first; Mrs. H. O. Havemeyer, second.

Collection of 12 varieties—Mrs. H. O. Havemeyer, first; Mrs. Albert Crane, second.

Box of fancy apples—J. Cobb (A. Alins, gardener), first; Mrs. Ernest Green, second.

Four varieties of pears—A. Whitelaw, first; E. C. Benedict, second.

Collection of hardy grape—A. Whitelaw, first.

Bunch of greenhouse grape, black—Chas. S. Smith, first; Chas. Mallory, second.

Two muskmelons—Mrs. Albert Crane, first; Mrs. F. A. Constable, second.

VEGETABLES.

Best collection, 12 varieties—Mrs. Albert Crane, first; Miss M. T. Cockcroft, second.

Six heads of celery—J. D. Cummins, first; J. B. Converse, second.

Six onions—Miss M. T. Cockcroft, first; Mrs. Albert Crane, second.

Six leeks—Mrs. Ernest Green (M. J. Brophy, gardener), first; Miss M. T. Cockcroft, second.

Six tomatoes—Mrs. F. A. Constable, first; Edward Holbrook, second.

Two cauliflower—A. F. Higgins, first; Mrs. Ernest Greene, second.

Three lettuce—Chas. S. Smith, first; Wm. Ziegler Estate, second.

Two cucumbers—Wm. Ziegler Estate, first; G. C. Benedict, second.

Dish of Brussel sprouts—Mrs. Albert Crane, first; Edward Holbrook, second.

Nassau County Horticultural Society.

The seventh annual flower show of the Nassau County Horticultural Society was held in Pembroke hall, Glen Cove, November 1-2, and was one of the most successful in the history of the association. The main floor was devoted entirely to the exhibits of chrysanthemums, plants in pots, carnations, roses, violets and decorative work. The feature of the last day was the table decorations. J. T. Pratt's decoration of Lady Hillingdon roses was awarded the cup. Mrs. H. L. Pratt's table of single chrysanthemums, second. Following are the awards:

Best specimen palm—Mrs. Benjamin Stern (G. Augey, gardener), of Roslyn, first; John T. Ingram, Oyster Bay, second.

Best specimen foliage plant, not palm—J. T. Ingram, first.

Best specimen adiantum—Mrs. Benjamin Stern, first.

Best specimen fern—J. H. F. Matz, Glen Cove, first; Mrs. B. Stern, second.

Best specimen asparagus Sprengeri—Mrs. F. S. Smithers (Valentine Cleres, gardener), Glen Cove, first; Percy Chubb (A. McKenzie, gardener), second.

Best fern dish not to exceed 12 inches in diameter—Mrs. F. S. Smithers, first; J. T. Ingram, second.

Best six blooms chrysanthemums, distinct—Mrs. Herbert L. Pratt (Henry Gaut, gardener), Glen Cove, first; James H. Ottley (J. McDonald, gardener), Glen Cove, second.

Best six white chrysanthemums—Captain J. R. DeLamar (Robert Marshall, gardener), Glen Cove, first; William D. Guthrie (H. Cliffe, gardener), Locust Valley, second.

Best six pink chrysanthemums—Mrs. F. S. Smithers, first; Captain J. R. DeLamar, second.

Best six yellow chrysanthemums—Percy Chubb, first; W. D. Guthrie, second.

Best six bronze chrysanthemums—W. D. Guthrie, first; Mrs. Herbert L. Pratt, second.

Best six crimson chrysanthemums—Percy Chubb, first; J. H. Ottley, second.

Best twelve white roses—J. H. Ottley, first; Captain J. R. DeLamar, second.

Best twelve pink roses—Captain J. R. DeLamar, first; J. H. Ottley, second.

Best twelve roses any other color—Mrs. B. Stern, first; Mrs. F. S. Smithers, second.

Best twelve white carnations—W. G. Guthrie, first; Percy Chubb, second.

Best twelve pink carnations—Percy Chubb, first; J. H. Ottley, second.

Best twelve red carnations—W. D. Guthrie, first; Walter Gibb (Paul Reul, gardener), Glen Cove, second.

Best twenty-five pink carnations, commercial growers—John T. Ingram, first.

Best fifty single violets, private gardeners—Mrs. F. S. Smithers, first; E. M. Townsend (James Duthie, gardener), Oyster Bay, second.

Best bridal bouquet—J. E. Ingram, first.

SPECIAL PRIZES.

Silver cup, donated by Mrs. F. S. Smithers, for best collection of hardy chrysanthemums, grown and flowered outside, not to exceed fifty varieties—Won by Mrs. H. L. Pratt; Emmet Queen, second.

Rickard's silver sup, for six varieties chrysanthemums, three of each, twelve-inch stems—Won by W. D. Guthrie; Percy Chubb, second.

Stumpp & Walter silver cup, for best group of chrysanthemums not over fifty square feet, foliage plants allowed—Won by Mrs. H. L. Pratt.

Gold and silver medals, presented by C. H. Totty, for best six sprays single

Jack Everett chrysanthemums—Walter Gibb, first; John T. Spratt, second.

Hitchings & Co. special, for group of ornamental and flowering plants not to exceed seventy-five square feet, arranged for effect—Captain J. R. DeLamar, first; Percy Chubb, second.

A. T. Boddington special, for collection of vegetables not less than twelve varieties—A. Hodenpyl, first; John T. Pratt, second.

Burnett special, for twenty-five chrysanthemums arranged for effect—Paul Dana, Glen Cove, first.

Elmer D. Smith & Co. special, for six Glen Cove chrysanthemums—J. T. Ingram, first.

Marshall special, for eighteen varieties hardy chrysanthemums, grown and flowered outdoors—H. W. J. Bucknall, (George Barton, gardener), Glen Cove, first; Emmet Queen, second.

Titus & Bowne special, for twelve white chrysanthemums, eighteen-inch stems—Percy Chubb, first; John T. Pratt, second.

Stapleton special, for best specimen bush chrysanthemum—Captain J. R. DeLamar, first; Paul Dana, second.

Underhill special, for best collection of outdoor flowers, not to exceed twenty-five varieties—Alfred Walker, Oyster Bay, first; H. W. J. Bucknall, second; Parker D. Handy (J. O'Brien, gardener), Glen Cove, third.

Bon Arbor special, for 12 chrysanthemums, 12 varieties, 12-inch stems—Percy Chubb, first; Paul Dana, second.

Peter Henderson & Co. special, for best collection of vegetables, 12 varieties—A. Hodenpyl, first; Percy Chubb, second.

Isaac Cocks special, for 3 distinct varieties ferns—Colgate Hoyt, first.

A. G. Hodenpyl special for best collection of fruit—Mrs. H. L. Pratt, first.

R. Meserole special, for 12 American Beauty roses—Mrs. F. S. Smithers, first.

Mrs. D. Burns special, for vase of chrysanthemums, 10 varieties, 3-foot stems—Mrs. H. L. Pratt, first; Percy Chubb, second.

Howard E. Smith special, for vase ten chrysanthemums, one variety, long stems—John T. Pratt, first; W. D. Guthrie, second.

Weeber & Don special, for best six chrysanthemums in 6-inch pots—John T. Pratt, first; Paul Dana, second.

H. Shultz special, for 25 carnations arranged for effect—John T. Ingram, first; Mrs. H. L. Pratt, second.

Glen Cove Echo special, for 100 single violets—E. M. Townsend, first; John T. Pratt, second.

H. T. Shotwell special, for 12 tea roses, one variety—Mrs. B. Stern, first.

F. B. Edmunds special, for largest chrysanthemum bloom in show—Won by John T. Pratt.

Mrs. H. W. J. Bucknall special, for best vase six chrysanthemums, six varieties, long stems—Mrs. H. L. Pratt, first; J. H. Ottley, second.

W. H. Bowne special, for best 12 tea roses, two varieties, six of each—Mrs. B. Stern, first; J. H. Ottley, second.

Kohler special, for best 18 white carnations—W. D. Guthrie, first; P. Chubb, second.

J. H. F. Matz special, for best specimen plant Lorraine Begonia—Captain J. R. DeLamar, first; W. L. Harkness, Glen Cove, second.

Butler special, for best collection single chrysanthemums not to exceed 12 varieties—John T. Pratt, first; Mrs. H. L. Pratt, second; Paul Dana, third.

Julius Roehrs Co. special, for best four orchid plants in bloom—Captain J. B. DeLamar, first.

Vaughan's Seed Store special, for 12 varieties of roses, outdoor grown—Mrs. Harold I. Pratt, first; Mrs. B. Stern, second.

Exhibition—Honorable mention to Colgate Hoyt for vase of seedling hardy chrysanthemums and to A. Hodenpyl for collection of fruit.

Pasadena, Calif.

The fourth annual fall show of the Pasadena Gardeners' Association was held at the Hotel Maryland October 27-29, and although the weather was unpropitious the attendance was large. The exhibition was one of the finest that the association has held and it is hoped that the receipts will be sufficient to enable the association to start work on the horticultural hall, which has been the dream of the members for years. The display of chrysanthemums was not quite as large as last fall but the size and quality of the flowers was maintained. Miss Sadie A. Thomas, who possesses one of the largest collections on the coast, made

Out-Door Grown Chrysanthemums.

Pasadena Gardeners' Ass'n Show, Pasadena, Calif.

a beautiful display containing all the different forms embraced by the flower and many new varieties. C. H. Garvey, Lawrence Hurlburt, Mrs. Eva Fenyes and R. R. Blacker were the principal winners in the private growers' classes. One of the most attractive exhibits was the dahlias. J. J. Bromall making one of the finest displays of this flower ever seen in southern California, staging between three and four hundred different varieties, embracing every color and form known to the dahlia family.

The exhibit of the Orchid Florist Shop merits particular mention. It consisted of suspended vases of cattleyas over a ground of black velvet and the display of Prima Donna roses was very fine. Edward H. Rust of the Palm nurseries exhibited a number of specimen palms and other decorative plants and the Altadena Nursery had an extensive display of ornamental plants and trees. The Chicago Nursery showed a good variety of ferns and begonias. The Montarioso Nursery of Santa Barbara exhibited a number of new and rare plants, and the West India Gardens of Altadena showed specimens of important fruits from Mexico. The judging was done by prominent society ladies on the table decorations and arrangements and the judging of the flowers by Frank Shearer, William Hertrich, Ernest Braunton and Alec. Urquhart. The management of the show was in the hands of John Albrecht, who deserves much praise for the beautiful arrangements. An extensive musical programme was arranged to entertain the visitors, Schneider's orchestra playing every afternoon and evening and also a selection of vocal reproductions on a Victor-Victrola.

Monmouth County Horticultural Society.

The fourteenth annual exhibition of the Monmouth County Horticultural Society was held in the Second Troop of Cavalry's armory, Red Bank, November 2-3. The spacious hall on the second floor was converted into a veritable flower garden and presented a very attractive appearance. This, in a great measure, was due to the exhibition committee of the society, which is composed of John Kennedy, Nicholas Butterbach, George H. Hale, Harry A. Kettel, William W. Kennedy and William Dowler.

A feature of the exhibition is the handsome display from Henry Goldman's estate in Elberon, this city, in charge of Gardener Anthony Bauer. Among the displays were Harry A. Kettel, for Solomon Loeb, foliage plants, roses and fruits; William Turner, for M. C. D. Borden, display of chrysanthemums, foliage plants and vegetables; Frank Logan, for Mrs. William E. Strong; cut blooms, chrysanthemums, fruits and vegetables; George Hale, for Edward D. Adams, foliage plants, cut flowers, chrysanthemums, fruits and vegetables; Oliver MacIntosh, gardener for the Williston estate, a vase of Black Hawk chrysanthemums, fruits and vegetables; William Dowler, gardener for Fritz Achelis, bush plants and cut blooms of chrysanthemums, fruits and vegetables; James Kennedy, gardener for Madame Lillian Nordica Young, foliage plants, cut flowers, group of chrysanthemums and carnations; H. Collins, for the Triest estate, violets and vegetables.

Joseph Kennedy, formerly of Red Bank, gardener for John Lyle, of Tenalfy, N. J., showed fruits and vegetables, and Peter Murray a fine exhibit of choice fruits and vegetables for the Lakeside Gardens, of Elberon. Thomas Meehan & Sons, of Philadelphia, exhibited novelties in chrysanthemums, cut flowers and foliage plants.

North Shore Horticultural Society.

The fall show of the North Shore Horticultural Society was held at Town Hall, Manchester, Mass., October 25 and 26. Some fine displays, particularly of chrysanthemums, were contributed from gardens of the summer residents.

Mrs. Lathrop Brown was among those receiving the largest number of prizes, having exhibits in many classes and taking 10 first and half a dozen second prizes. Among the new exhibitors was Mrs. R. D. Evans of Beverly Cove, who showed a splendid group of foliage plants and had other exhibits. Another newcomer was Mrs. George von L. Meyer of Hamilton, who took second prize for the best collection of fruit, the first prize, the society silver medal, being awarded Mrs. R. D. Wigglesworth. She also took a first prize in the vegetable display. The chrysanthemum prizes were:

Twelve blooms—Mrs. Lathrop Brown, first; Mrs. James McMillan, second.

Six flowers—Mrs. Lathrop Brown, first; Mrs. E. S. Grew, second.

Six flowers, white—Mrs. Lathrop Brown.

Six flowers, crimson—Mrs. James McMillan, first; Mrs. Lathrop Brown, second.

Six flowers, yellow—Mrs. Lathrop Brown.

Best vase, 10 blooms—Eben D. Jordan.

Best vase, 12 flowers—Mrs. Lathrop Brown, first; Eben D. Jordan, second.

Six flowers, six varieties—Eben D. Jordan, first; Mrs. William B. Walker, second.

Pompon, six vases, six varieties—Mrs. Lathrop Brown.

Singles, six vases, six varieties—Mrs. Lathrop Brown, first and second.

Mrs. Lester Leland was awarded the society silver medal for six vases of American chrysanthemums, also first prize for group of chrysanthemums and foliage plants arranged for effect.

Several fine exhibits were made in table decorations for six covers, for which first prize went to Mrs. James McMillan, and second to Axel Magnuson. Mrs. H. S. Grew also had an exhibit.

Mrs. Lathrop Brown made a large exhibit of rare orchids, taking four of the five prizes awarded. Mrs. Lester Leland took a first for three oncidiums. For foliage plants Mrs. Lester Leland won a first for a fine specimen of Phoenix palm, Mrs. R. D. Evans first for best pair. Mrs. F. M. Whitehouse was given a certificate of merit for six baskets of apples and Mrs. Philip Dexter honorable mention for apples.

A cup offered for best collection of vegetables was won by Mrs. Lester Leland. T. Jefferson Coolidge was given five firsts and a second in this class. George R. White, Mrs. George Wigglesworth, Mrs. Boylston A. Beal and Mrs. W. B. Walker were also among the successful exhibitors.

Lenox Horticultural Society.

Supplementing the report of Lenox Horticultural Society which appeared in our issue of last week, we print the following from Wm. Scott, Elmsford, N. Y.:

The first of the "Big Guns" in the chrysanthemum exhibitions were fired last week, Lenox, Mass., and Madison, N. J., being perhaps the most important. Lenox is always a good starter. Amongst the cool of the Berkshire Hills the chrysanthemums seem always to come along at least a week earlier than they do around New York, and the quality and size of the blooms put up forms a very good augury for what to expect in other sections.

The entries in the large bloom classes in Lenox did not seem to be quite as numerous as in former years, but the quality was fully maintained. Amongst the most noticeable of the new varieties were Lenox, Morristown, Tarrytown, Chrysolora, Wm. Turner, F. E. Nash, F. T. Quittenten, Lady Carmichael, Mary Farnsworth, Mary Poulton, Francis Jolliffe and W. H. Thornton. Among the older varieties those that stood out most prominent were Mrs. Stevens, Lady Hopetoun, Mrs. J. C. Neil, Reginald Vallis, Mrs. L. Thorn, Mrs. David Syme, Gladys Blackburn, Pockett's Crimson, M. V. Venosta and Hon. Mrs. Lopes. In specimen chrysanthemum plants, Robt. Spiers, gardener to Mrs. J. N. Parsons, carried off the honors in all three classes with well grown, evenly balanced plants.

The groups of miscellaneous plants, arranged for effect, which have always been the leading feature of the Lenox exhibition, were fully up to former years; a distinctly educational feature, and well worth traveling miles to see. The arrangement this year was again different from former years, and the novelty of the change was distinctly taking and added fresh interest to the whole show. A good deal of forethought and co-operation seems to be given to these novel features and change in arrangement, by the exhibitors in Lenox. They seem to get together and plan these things in advance and work them out in perfect harmony, and each time you travel to Lenox you may be assured of something new and surprising in the way that the whole exhibition and arrangement is put together. It is a distinctly taking feature with patrons, and one worhy of emulation. So many of our exhibitions are killed with the staleness of the same arrangement year after year. The plants may be the same old plants, and the same old cork bark may be in use, but the artist mind that can give this kaleidoscope effect keeps the public interested, and if they were copied in our larger and more populous centers there would be much less grumbling at the lack of patronage and smallness of gate receipts. Formerly the groups were backed against the wall in effective arrangements and we would sometimes hear the argument, "Well, it is easy to arrange plants with a nice wall as a background," but this year they were arranged in circular groups in the middle of the hall and they were just as effective as ever, perhaps more so.

C. W. Johnson.

Secretary Chrysanthemum Society of America.

In grouping plants it should always be borne in mind that quality and not quantity counts, and no arrangement can be so effective where the beauty of the bulk of the material is spoiled by overcrowding. In Lenox they have undoubtedly got the material to work with, as well grown specimens as one would wish to see, but they are always arranged so that the fine individual qualities of each plant is used to the best advantage. There were four such groups this year and it is safe to say that as usual the poorest one would easily be the prize winner in any of the other exhibits the writer visits. The first prize was awarded to F. Heeremans, superintendent for W. D. Sloane, "Elmcourt." The leading feature of his group was his specimen crotons, particularly the variety Warrenii, the individual specimens being over four feet high and furnished to the pots. These were arranged on pedestals of cork bark and decorated with masses of Gypsophilla paniculata, Rex and Gloire de Lorraine begonias. The ground work of his group was principally Adiantum Farleyense and lily of the valley, interspersed with Lilium candidum. In the second group, put up by Allen Jenkins, superintendent to S. P. Shotter, four fine specimens of Abutilon Thomsonii were used, the white varigation of which made a pretty contrast to the more predominating red and yellow foliage. In this also a large mass of Clerodendron Fallix was used, with begonias, lily of the valley, Adiantum Farleyense, etc.

As usual a very keen competition took place in the vegetable classes. The specimens shown were all well up to the high class Lenox standard. The judges had their hands full, and when the points were counted there were only nine points between the first and second prizes, in the class for eighteen varieties, and fifteen in the class for twelve varieties.

The St. Louis Show.

The annual exhibition of the St. Louis Horticultural Society was held in conjunction with that of the Chrysanthemum Society of America in the Coliseum, November 7-11. The large building was adapted to the holding of an exhibition of this size. The floor was arranged with large beds and groups, with the walks around them so that an unobstructed view of the exhibits could be had. At the entrance were two circular groups of chrysanthemum plants, being well grown, dwarf and bushy, which were bordered by small plants of the dwarf single Mizpah. At the back of the hall the St. Louis park department arranged a large display of palms and foliage plants. The Florists' Association made a large and creditable exhibit of palms and decorative plants, the gallery above being hung with Southern smilax, the effect being very pleasing.

The classes for chrysanthemum blooms were well filled with immense flowers, the principal exhibitors being E. G. Hill Co., Richmond, Ind., who showed some very fine specimens; Poehlmann Bros. Co., Chicago., with immense blooms, in the class for twenty-five of a color; the Mount Greenwood Cemetery Association, Chicago, exhibited some very fine flowers, a vase of Mrs. William Duckham being especially well done. The exhibits of roses were very fine, Poehlman Bros. Co. showing magnificent American Beauties, Killarney, White Killarney, Dark Pink Killarney, Double Killarney. A. C. Brown, Springfield, exhibited five vases, among which a fine vase of Melody was noted.

The entries for floral work and table decorations presented many beautiful arrangements, those of Grimm & Gorly and Ostertag Bros. being especially fine. The carnations shown by the Chicago Carnation Co. were splendid flowers, attracting much attention. J. A. Peterson, Cincinnati, O., had an especially well grown lot of Begonia Glory of Cincinnati, Adiantum Farleyense and Asplenium Nidus Avis. The display of Geraniums John Doyle made by Koenig Floral Co. made a particularly bright spot, the plants being very well grown.

Among the trade visitors we noted the following: August Poehlmann, George Asmus, A. T. Pyfer, C. W. Johnson, P. J. Foley and Guy M. Reburn, Chicago; J. A. Peterson, Cincinnati, O.; H. E. Philpott, Winnipeg, Man., Can.; Elmer D. Smith, Adrian, Mich.; Morris H. Levine, New York; Harry Balsley, Detroit, Mich.; E. H. Maun, Richmond, Ind.; C. H. Totty, Madison, N. J.; Wallace R. Pierson, Cromwell, Conn.; William Duckham, Madison, N. J.; S. A. Baur, St. Joseph, Mo.; Elmer D. Smith, Adrian, Mich.

Following are the awards for the first two days:

SHAW PREMIUMS.

Display of decorative plants—William Schray & Sons, first; C. C. Sanders, second; Grimm & Gorly, third.

Group variegated foliage plants—William Schray & Sons, first; C. C. Sanders, second.

Five Kentias—William Schray & Sons, first; Grimm & Gorly, second.

Five arecas—Koenig Floral Co., first.

One specimen palm—William Schray & Sons, first; Grimm & Gorly, second.

One Ficus pandurata—Koenig Floral Co., first.

One Ficus elastica—William Schray & Sons, first.

Three Nephrolepis Bostoniensis—Grimm & Gorly, first; William Schray & Sons, second.

Five nephrolepis, one or more varieties—H. J. Jenneman, first; William Schray & Sons, second.

Eighteen berried plants—Koenig Floral Co., first; C. C. Sanders, second.

Twenty-five blooming plants, eight or more varieties, chrysanthemums excluded—William Schray & Sons, first; C. C. Sanders, second; F. J. Fillmore & Sons, third.

Twelve geraniums in bloom—Koenig Floral Co., first; C. C. Sanders, second.

One blooming plant other than chrysanthemum—Koenig Floral Co., first; William Schray & Sons, second.

One fern dish not over 10 inches in diameter—William Schray & Sons, first; C. C. Sanders, second.

Pair standard bay trees—H. Young & Sons, first; William Schray & Sons, second.

Twelve begonias, one or more varieties—C. C. Sanders, first.

Group chrysanthemum plants to occupy 100 square feet, ferns, palms or accessories may be used—Wm. Bunker, first; Koenig Floral Co., second; C. C. Sanders, third.

Eighteen pompons—John Steidle, first; Koenig Floral Co., second.

Eighteen anemones or single varieties—Koenig Floral Co., first; C. C. Sanders, second.

One plant white chrysanthemum—Grimm & Gorley, first; William Schray & Sons, second; Koenig Floral Co., third.

One plant yellow chrysanthemum—Grimm & Gorly, first; Koenig Floral Co., second.

One plant any other color chrysanthemum—Koenig Floral Co., first; Chas. F. A. Steidle, second.

PLANTS.

Group of decorative plants other than palms or ferns—C. C. Sanders, first; William Schray & Sons, second.

Twenty-five chrysanthemum plants grown to single stem—Koenig Floral Co., first; C. C. Sanders, second.

Twelve plants white chrysanthemums—Koenig Floral Co., first.

Twelve plants yellow chrysanthemums—Koenig Floral Co., first.

Twelve plants chrysanthemums any other color—Koenig Floral Co., first.

Five plants white chrysanthemums—William Schray & Sons, first; Koenig Floral Co., second.

Five plants yellow chrysanthemums—Koenig Floral Co., first; Grimm & Gorly, second.

Five plants chrysanthemums, any other color—Koenig Floral Co., first; Grimm & Gorly, second.

Three plants white chrysanthemums—William Schray & Sons, first; Koenig Floral Co., second; F. J. Fillmore, third.

Three plants yellow chrysanthemums—Koenig Floral Co., first.

Three plants chrysanthemums, any other color—Koenig Floral Co., first; F. J. Fillmore, second.

Collection of hardy evergreens, twenty or more varieties, quality and arrangement to be considered—C. C. Sanders, first.

Six blooms seedling chrysanthemums, not disseminated.

One hundred blooms, one variety—The E. G. Hill Co., Richmond, Ind., first; Poehlmann Bros. Co., Chicago, second.

Fifty blooms, five varieties, 10 blooms in each vase—The E. G. Hill Co., first; Elmer D. Smith & Co., Adrian, Mich., second; Mount Greenwood Cemetery Association, Chicago, third.

CARNATIONS.

Four vases, four varieties, 50 blooms in a vase—Chicago Carnation Co., Chicago, first; A. C. Brown, Springfield, Ill., second; Poehlmann Bros. Co., third.

Twenty-five blooms of any seedling not disseminated—Chicago Carnation Co.

Twenty-five blooms, white, introduction since 1908—Chicago Carnation Co.

Charles H. Totty.

Pres.-Elect Chrysanthemum Society of America.

Twenty-five blooms, pink, introduction since 1908—Chicago Carnation Co.

ROSES.

Fifty American Beauties—Poehlmann Bros. Co., first.

Six vases, six varieties, 25 blooms in each vase—Poehlmann Bros. Co., first; A. C. Brown, second.

Twenty-five blooms any seedling not disseminated—A. N. Pierson, Inc., Cromwell, Conn.

Twenty-five blooms, pink, introduction since 1908—Poehlmann Bros. Co.

Twenty-five blooms, any other color, introduction since 1908—Poehlmann Bros. Co.

Floral display, not less than four pieces—Grimm & Gorly, first.

WEDNESDAY'S AWARDS.

Twenty-five blooms white chrysanthemums, one variety—Elmer D. Smith & Co., first; Poehlmann Bros. Co., second; W. J. & M. S. Vesey, Fort Wayne, Ind., third.

Twenty-five blooms, yellow, one variety—Elmer D. Smith & Co., first; Mt. Greenwood Cemetery Association, second; Poehlmann Bros. Co., third.

Twenty-five blooms, any other color, one variety—The E. G. Hill Co., first; Elmer D. Smith & Co., second; Mt. Greenwood Cemetery Association, third.

Display of pompons—The E. G. Hill Co., first; C. H. Totty, Madison, N. J., second; Mt. Greenwood Cemetery Association, third.

Hamper of chrysanthemums—Grimm & Gorly, first.

Table decoration, round table, 10 covers—Koenig Floral Co., first.

Fifty chrysanthemums arranged for effect—Koenig Floral Co., first.

The Retail Florists' Association prize, handle basket of chrysanthemums—Grimm & Gorly, first.

CHRYSANTHEMUM SOCIETY PRIZES.

Chrysanthemum Society of America prize, best 10 chrysanthemum blooms of any one variety, silver cup—Elmer D. Smith & Co.

Jerome Jones' prizes, best 10 blooms Mrs. Jerome Jones—C. H. Totty, first; Koenig Floral Co., second.

Elmer D. Smith & Co.'s prizes, best 12 blooms chrysanthemums, 12 varieties, introductions of 1910 and 1911—William H. Duckham, Madison, N. J., first; Elmer D. Smith & Co., second.

W. W. Wells & Co.'s prizes, best three blooms chrysanthemums, Mrs. G. C. Kelly—William H. Duckham, first, gold medal; Elmer D. Smith & Co., second, silver medal.

W. W. Wells & Co.'s prizes, best six sprays single chrysanthemums, Miss Hilda Wells—William H. Duckham, first, gold medal; David F. Roy, second, silver medal; Elmer D. Smith & Co., third, bronze medal.

C. H. Totty's prize, best six blooms, F. E. Nash—William H. Duckham.

H. A. Dreer's prize, best six blooms yellow seedling chrysanthemums of American origin—Elmer D. Smith & Co.

The Foley Mfg. Co.'s prize, best six blooms white seedling chrysanthemums of American origin—Elmer D. Smith & Co.

Vaughan's Seed Store prize, silver cup, best 10 blooms pink chrysanthemums of American origin—C. H. Totty.

Peter Henderson & Co.'s prize, best six blooms crimson or bronze seedling chrysanthemums of American origin—C. H. Totty.

Lord & Burnham Co.'s prize, best 10 blooms any colored chrysanthemums never before exhibited in this country—C. H. Totty.

E. G. Hill Co.'s prize, best 10 blooms Emberta—F. H. Lemon & Co., Richmond, Ind.

E. G. Hill Co.'s prize, best 10 blooms Well's Late Pink—F. H. Lemon & Co., first; C. H. Totty, second.

E. G. Hill Co.'s prize, best 10 blooms Golden Gem—C. H. Totty, first; F. H. Lemon & Co., second.

Hutchings & Co.'s prize, silver cup, best 30 blooms chrysanthemums, six varieties, five blooms each—William H. Duckham.

W. F.

Chrysanthemums Society of America.

The tenth annual meeting of the Chrysanthemum Society of America was held at St. Louis, Mo., November 8. The meeting was called to order in the Coliseum by President Elmer D. Smith and throughout the deliberations much enthusiasm was shown by the members. President Smith read his address, which was freely discussed by Chas. H. Totty, William Duckham, George Asmus, A. Baur and Wallace R. Pierson. The secretary's report was read and ordered printed with the annual proceedings. The selection of the next meeting place was left to the executive committee. The question of new certificate was then referred to the president and secretary. The election of officers resulted as follows:

Charles H. Totty, Madison, N. J., president.

Wallace R. Pierson, Cromwell, Conn., vice president.

Charles W. Johnson, Chicago, secretary.

John N. May, Summit, N. J., treasurer.

PRESIDENT SMITH'S ADDRESS.

This is our tenth annual joint meeting and exhibition and as we will soon be making history in a new decade, permit me to briefly refer to what has taken place since the Chrysanthemum Society of America was organized. This society was instituted at Buffalo, N. Y., in August, 1890, and from that time until the first exhibition was held in Chicago in 1902, the annual meetings were held in the summer during the convention of the Society of American Florists and Ornamental Horticulturists.

The establishment of annual exhibitions with executive sessions seemed to give the society new life. To my mind the most worthy and beneficial act the society performed during its existence was that of appointing committees to commend such new varieties as they consider improvements and worthy of being disseminated. We owe much to these committees, who meet yearly at intervals during the flowering season at Boston, New York, Philadelphia, Cincinnati and Chicago to inspect and pass judgment upon these new candidates. The unselfish devotion they have given in time and money to this work enables the society to point out to the buying public the best kinds for their purpose. Their unbiased judgment is clearly set forth by the fact that the majority of the most popular kinds today have received their approval. You may question the truth of this statement by sighting some which have not come up to your expectations, but if you will scan the list of varieties now conceded as our best commercial sorts you will find the large majority have been certificated by this society through its committees. It is not to be expected they can determine such defects as are either constitutional or controlled by cultural methods such as diseases, lack of fullness or adversity of propagation. No mortal optics are so keen as to detect such blemishes from six blooms submitted. Every one interested in chrysanthemums should sing praise to these men who so unselfishly and possibly unconsciously have done so much to benefit all.

I doubt if many of us fully appreciate how general and far reaching are the advantages we now enjoy and that this boon is largely due to the benevolent spirit of these committeemen. Since their inauguration there has been a wonderful curtailment in the number of novelties offered. In 1893 there were disseminated 180 of American and 130 foreign, or 310 new varieties, were brought out in a single year. Under such conditions it was very difficult to select the most suitable and in those days when there was no safeguard against imposition it was not unusual for introducers to include varieties of little merit. Since the appointment of these committees in 1894 these numbers have been growing less year by year until the offerings for the present are 20 American and 55 foreign, of which 15 were certificated by this society. And so I say all do not appreciate what has been bestowed upon us. The introducers are seeking higher standards in preference to large numbers and the purchasers, whether commercial growers, private gardeners or amateurs, have greater confidence in those kinds which are sufficiently meritorious to pass their critical examination.

Although our membership is slightly on the increase rather than waning, the society has not received full value in return for this service given all lovers of the Queen of Autumn. We have received the hearty support of only a very small portion of those interested in this important branch of floriculture. We have been unable to impress upon the many the importance and our earnest desire of their hearty co-operation. As previously stated, the time was when the reports of exhibitions was our chief guidance in making selections, but now the nuts are all cracked and the meats are placed before you. This one feature alone should be of sufficient importance to secure the membership of every grower interested in the best and latest kinds. All the society demands is $2 annual membership fee and I venture most of us spend this small amount in some frivolous way without benefit to ourselves or to any worthy cause. It seems strange with the vast number infinitely interested that so small a portion can not or do not see they owe a moral obligation in supporting so worthy a cause.

We want your counsel and advice, we want you to assist in formulating new plans whereby greater benefit will exist. You can assist us, I mean all of you, if you grow but a few hundred plants it is worth more than the paltry sum we ask to receive our annual report and feel you are associated with those whose endless endeavors are the betterment of all. A brighter future with greater achievements will be wrought by putting into force the proverb, "Heaven helps them who help themselves."

Just a few words on what has been accomplished during the past decade toward improvement of varieties in this country. In 1902 our earliest white Mme. Bergman was seen on the market early in October, now we can have larger and better flowers in July if desired. The same may be said regarding the Yellows. Pinks have not advanced in the same ratio, although Unaka may be had in fine form the first week of October. We have also been given such good varieties as Dolly Dimple, Golden Eagle, Lynnwood Hall, Chrysolora and others which show marked advances in their particular color and type.

During the past few years equal gains are manifest in the exhibition section, such new comers as F. E. Nash, Lenox, Glen Cove and Morristown compare favorably in size and finish with the importations. The limit has not been reached and if we progress we must have better qualities, for when we consider the qualities requisite for the best commercial and exhibition sorts it does not take long to discern wherein most of them are deficient. In the commercials we might have better midseason whites, a good pink as early as Golden Glow, a type with foliage up to the bloom, which some of the later productions are showing a marked tendency, and many of the exhibition varieties would be greatly enhanced if foliage could be supplemented for the long bare neck, while others would add to the appearance of our exhibitions if their stems were stiffer.

While this society allows artificial supports, I predict the time is not far distant when this measure will be repealed. To my mind those which cannot sustain their blooms are of slight consequence regardless of other qualifications, and artificial supports in all classes calling for vases of twelve blooms or more should be eliminated. Why should we encourage retrogression rather than insist that our standard of excellence shall ever continue upward?

There are qualities other than size that appeal to the refined and we should not forget that color and form are the fundamental principals underlying beauty as nature presents it, nor should we degrade these two characteristics in our effort to increase size. The trade papers have been generous in devoting their space to our notices without compensation, to whom we should extend our sincere thanks. Let us hope for greater achievements and focus our force and energy to that end, so that when the hour glass of time marks the closing of the next decade, we will then realize how weak we are at the present.

As a society we have obligations to perform. Let us all join hands in an effort to increase our usefulness for the betterment of all. In union there is strength and earnest endeavor leads to success.

SECRETARY JOHNSON'S REPORT.

Your secretary reports his work for the past year as follows: The examining committee had a greater number of seedlings and novelties sent to them for examination during the season of 1910 than for several years past. There were submitted to them twenty-five seedlings of American origin, one importation, two sports and one pompon variety, making a total of 29. The reports of the committees were sent to the trade papers and published by them, and the tabulated report of the committee's work was also furnished the trade papers and published by them, and the thanks of the society should be tendered the trade press for the generous treatment accorded us by printing every notice sent to them.

Early in the year letters were sent to a number of leading firms requesting them to donate a special prize for this annual exhibition. We had a generous response as witnessed by the schedule of special premiums offered.

A certificate of admittance to the National Flower Show at Boston last March was mailed to every member in good standing according to the rules governing that exhibition.

Referring to the membership of the society, we feel that, taking into consideration the good work that the society has done in advancing the different types of chrysanthemums, that we do not receive the support of the florists and gardeners of the country that we should, and the work ought to be recognized by a larger membership. Regarding the payment of dues, every member was sent an annual statement of arrears and, though many who were delinquent in their payments have again come into good standing, there are yet a great number who are backward in their payments.

The matter of affiliation was taken up with Lenox Horticultural Society and they are affiliated with this society again this year.

We have lost by death I. L. Powell, a member of the executive committee, and one who was an ardent lover of the chrysanthemum, and was also ever ready with advice and work for the good of the society.

The secretary owes his thanks to President Elmer D. Smith for his kindness in furnishing him with a complete list of varieties disseminated in 1910 which helped to make the annual report more complete.

REPORTS OF COMMITTEES.

Chicago, November 2.—Christy Matthewson, white, Japanese, scored 90 points, exhibition scale; Smith's Sensation, pink, Japanese incurved, scored 87 points exhibition scale; White Perfection, white, Japanese incurved, scored 88 points commercial scale. All exhibited by Elmer D. Smith & Co., Adrian, Mich.—August Daisy, orange yellow, Japanese, scored 87 points exhibition scale, 92 points commercial scale; Hirondale, pink, Japanese incurved, scored 86 points exhibition scale, 91 points commercial scale; Petite Yvonne white, Japanese, scored 81 points commercial scale. All exhibited by E. G. Hill Co., Richmond, Ind.

FRAMINGHAM, MASS.—Samuel J. Goddard has added a new greenhouse to his extensive range on Pleasant street.

Retarding of Plants and Flowers.

Paper prepared by Prof. L. C. Corbett, horticulturist of the Department of Agriculture, for the committee on refrigeration for the International Congress held at Vienna, Austria.

The modern commercial nursery handles such an immense volume of stock, of such a varied nature, and possesses a patronage scattered through so wide a territory that in order to successfully handle and pack the product and deliver it for spring planting, the old practice of heeling in the stock has been abandoned to give place to the modern system of storing in retarding houses. The season for handling the stock is so short because the plants start so quickly in the spring, even when dug in the fall and heeled in according to the old practice, that it is practically impossible to operate extensive nurseries on such a basis. Small nurseries and plant gardens, designed to meet the requirements of local purchasers only, can be successfully operated without retarding buildings or the intervention of cold storage. In extensive enterprises, however, where the sales lists reach thousands of people, and where the distribution is made through a number of states possessing a variety of soil and climatic conditions, the distribution must extend over a very considerable period of time, a period of time much greater than is allowed by the normal behavior of the plant; therefore artificial means must be resorted to in order to hold the nursery stock in suitable condition for shipment, to provide for this wide distribution.

STRUCTURE FOR RETARDING PURPOSES.

The type of structure best suited for the work of storing nursery stock is determined by the amount of stock to be handled and the location of the nursery. In those sections where long, uniformly cold winters prevail, the cellar or half underground structure is very satisfactory. Further south, where conditions are less severe, and where there is greater variation in temperature within short periods of time, the aboveground type of structure, insulated by providing multiple partitions of boards and paper in the outside walls, gives better satisfaction than any other type of structure. In these southern territories cellars become too damp and are influenced by soil temperature during the late spring months to such an extent as to greatly lessen their usefulness as retarding houses. The aboveground structure, with walls packed with sawdust, is not satisfactory because the humid conditions which must be maintained within the structure, in order to successfully preserve the nursery stock, greatly lessens the life of the structure. At the same time a moist wall packing is a less efficient insulator than a dry one. Air spaces are, therefore, most satisfactory, particularly if the spaces are made horizontally, rather than perpendicular, so as to prevent rapid circulation of air. It is necessary that these buildings be frost-proof, as well as capable of holding or retaining cold temperatures for a long period. Large structures, designed for this purpose, are built on a unit scheme. There are different storage rooms provided, each room being stored with material for a given geographical area. Those containing stock to be planted first are emptied quickest, and those which contain stock to go to most northern localities are not opened after the temperature has been once reduced, more than is absolutely necessary, until time for packing out arrives. Besides being built on the unit or room plan, these buildings are provided with ventilating apparatus which can be controlled to regulate the circulation of air in the rooms as much as possible. While circulation of air is desirable, great caution is necessary in ventilating the rooms to so manipulate it as to allow the entrance of air only at times when the temperature of the room will not be raised above the desired point, or lowered beyond the safe limit for the stock in storage. Deterioration in stored stock is largely due to change in humidity within the storage house, brought about by fluctuations in temperature. Uniformity of temperature is of greater importance than low temperature. Besides the value of the retarding house as a means of facilitating the work of the nursery during the digging and packing season, the retarding house is a great safeguard to the nurseryman. Little stock is injured from storage in buildings with a uniform temperature, as compared with the loss of stock which is dug and "heeled in." Much stock was lost under the old system from severe winter conditions, but because the temperature is never allowed to reach the danger point in the retarding houses this is not possible. Storage houses are, therefore, a great safeguard to the business. In addition to the storage house or retarding house, a number of American nurserymen have provided an additional precaution for the purpose of maintaining a low temperature in the storage rooms much later in the season than would be possible under ordinary warehouse conditions by the installation of artificial refrigeration, consisting usually of a brine circulating system with ice or ammonia coils as the cooling medium. It has been demonstrated that if stock can be maintained at a temperature of 34 degrees F. in the storage room throughout the storage period, that it can be kept fully twelve months without severe injury or great loss. It is a very easy matter to hold stock six to eight months under this temperature without marked deterioration. Some extensive operators who do not possess cold storage facilities of their own have devised a system by which they utilize commercial cold storage to a large extent, to facilitate the handling of their business. The plan of procedure is to harvest the stock during the months of November and December, immediately pack the trees and shrubbery in paper-lined packing cases, providing proper packing material in the shape of sphagnum, rather than straw, and immediately place the cases so packed in cold storage, allowing them to remain until required for immediate planting. This practice is chiefly confined to nurseries operating in the extreme southern portions of the United States, who have a large patronage at the north. The early germination of the stock at the south would prohibit the delivery of the trees in satisfactory condition at the north at the proper planting season. To overcome this difficulty the above practice has been inaugurated with very excellent results. Under this system the packed stock is held in cold storage for a period of three or four months, but practices at the north require that the stock remain in the retarding house from six to seven months.

Attempts have been made to hold nursery stock over a season in cold storage. The experiment was only moderately successful; in fact, not considered sufficiently successful to warrant the plan as a commercial practice. The practicability of such a proceedure, when necessary, in moving plants from one quarter of the world to another is demonstrated, but the commercial value of such a procedure on an extensive scale is quite out of reason, from the fact that cold storage space is expensive; nursery stock is bulky and the value of the stock will seldom justify the outlay necessary for holding it through a long period in cold storage. Short storage periods, however, can be justified for the reasons above stated.

All classes of nursery stock are handled in retarding houses, but the whole practice is based on empirical rules. No carefully planned tests have been carried out to determine the conditions best suited to any particular class of stock, or for the general purpose house. Modern practices have developed to meet the requirements of the trade and have been quite as much influenced by economic conditions as by the actual requirements of the stock. The whole field of storage, as applied to the nursery business is a virgin one for the investigator. The necessity for retarding houses requires no argument. Their economic value is demonstrated, but the details of handling various kinds of stock, the benefit or injury to the stock, as well as the effect of fluctuating temperatures and humidities on the vitality of the plants held in storage, are questions which our present knowledge fails to answer.

COLD STORAGE IN FLORICULTURE.

Low temperatures have long been an important factor in various departments of floriculture. In fact, a number of the most important commercial industries connected with floriculture are based upon the use of cold storage as a factor in their development. The forcing of many plants, both woody and herbaceous, is made more certain and more remunerative through the use of cold storage. The forcing of polyantha roses, of hydrangeas, lilacs, spireas and the like for the Christmas trade are all more certain if the plants have been placed in cold storage for a short period. True it is, that the gas treatment now promises to provide another means of accomplishing like results, but the field is yet a new one and full of uncertainty. The forcing of several of the herbaceous plants, such as the lily of the valley, Lilium longiflorum and Lilium Harrisii, are expedited by cold storage, although it is not an absolutely necessity to success. The modern handling of lily of the valley is almost entirely based on the successful treatment of the pips in cold storage. In fact, many plants and seeds which require low temperatures in order that they may make satisfactory growths, can be handled in cold storage to advantage. The success of the modern cut flower trade is due largely to the fact that the standard flowers of the trade, such as roses and carnations, lend themselves to storage. While we have no accurate information, based on careful tests, except that provided by J. Vercier, professor of horticulture in the Cote-d'Or, on the "Utilization of Artificial Cold in Floriculture," which is published in the L'Industrie Frigorifique, florists all well know that the value of both carnations and roses is greatly enhanced by subjecting them as soon as cut to a chill, which is just sufficient to check the normal vegetative functions without destroying them. The check should be severe enough to cause the flowers to rest for a period, but the rest should not be a permanent one, from which they cannot be roused. Experience has demonstrated that the condition obtaining in the ice-box or refrigerator where the atmosphere is highly charged with moisture is better suited to the purpose of the florist than the same temperature maintained artificially when the air is dry. Usually the chilling is not long continued, but it is generally believed that a few hours exposure to a low temperature greatly lengthens the period of beauty and usefulness of roses and carnations. While those practices are of great economic value, even at the present time, there is no reason to doubt that through careful investigation their value might be greatly enhanced.

The wholesale flower trade of the great cities of the United States is now greatly facilitated by the use of modern cold storage appliances. While low temperatures are not desirable, a constant temperature of 40 degrees for carnations and roses is absolutely es-

sential. Fluctuations in temperature and humidity produce great injury, while a constant temperature at a moderate degree is the only means of holding delicate flowers over a long period. Such delicate blossoms as orchids cannot be held in storage at all. They are very sensitive to low temperature and cannot be successfully stored. What we at present need are carefully conducted cold storage tests with each of the important commercial cut flowers, coupled with painstaking physiological researches to determine the exact temperature and its duration, in order that the stability of the flowers may be preserved to the greatest extent and that their duration in an ordinary living room after their withdrawal from cold storage shall be greatest. Without these painstaking researches we can never arrive at satisfactory commercial practices. The empirical rules which are followed today serve a very useful and valuable purpose.

The value of the cut flower trade in any European country or in America is sufficient to justify most painstaking and careful research along this line. It is to be regretted that more positive information cannot be given upon these important phases of the cold storage business at this time, but my studies have thoroughly convinced me of the necessity for careful and extended research into those most important commercial fields for cold storage.

European Horticulture.

FROM THE BRITISH TRADE JOURNALS.

To Waterproof Calico—A cheap and easy mode of rendering calico waterproof, so as to make it applicable as a temporary substitute for glass as a covering to frames, is by the following process: Take pale linseed oil three pints, sugar of lead one ounce, and white resin four ounces; grind the sugar of lead with a little of the oil, then add the rest and the resin. Stir the whole well together in a large iron pot over a gentle fire. Tack the calico loosely on the frame, and apply the mixture while hot with a large brush.

A Profitable Rose Tree—A few years ago Mr. Levett, of the "Queen's Arms," Mortlake, planted a climbing rose of the variety known as Alberic Barbier, in his backyard, a confined space some nine feet or ten feet square, and by careful training the tree has grown so as to completely cover the back yard and convert it into an arbor. The first year it did not bloom, but the second it put forth such a wealth of bloom that Mrs. Levett conceived the happy idea of making up buttonholes and selling them to her customers on behalf of the funds of the Royal Hospital, Richmond, and the Mortlake Nursing Association. The first year £2 8s. was realized, the next £3 3s., and varying amounts since. This year the sum realized was £2 8s. 6d., bringing the total to just over sixteen guineas, ten of which have been sent to the Richmond Hospital and six to the Nursing Association.

The Earliest Flowering Tulip—The typical plant, Tulipa Kaufmanniana, which ranges through shades of white, yellow and red, seems to be commonly grown by lovers of early spring flowers, but its variety aurea, which is far more beautiful, is very rarely seen. It is larger than the type, and is of a beautiful golden hue, striped externally with scarlet, and has the advantage of flowering at least a week earlier. A single bulb I purchased from Holland in August, 1906, produced one flower on March 18, 1907, three flowers on March 22, 1908, two flowers on April 1, 1909, and three flowers each on March 2, 1910, and March 7, 1911, whereas the dates of the flowering of this type were March 26, 1907, April 1, 1908, April 10, 1909, March 11, 1910, March 19, 1911. The variety I am here commending is certainly expensive, but it is truly a glorious flower.

A Vallota Hybrid—A flowering example of the hybrid between Vallota purpurea and Crytanthus (Gastronema) sanguineus was noted in an exhibit contributed by Robert Veitch & Sons of Exeter to the meeting of the Royal Horticultural Society. Like the forms that have been previously shown, the foliage and general appearance of the plant are about midway between those of its parents, while the flower more nearly resembles a small bloom of vallota than it does the cyrtanthus, the segments of whose blossoms are considerably reflexed. As it is, speaking from my own experience, as easily grown as the vallota, or, for the matter of that, its other parent, this hybrid is worth a place among the more select of greenhouse bulbs.

Rose Rayon d'Or—This rose, to which an award of merit was given, well deserved the honor. When looking through nurseries in Aberdeen we were shown flowers borne on the plants this year. The color as there seen was much more intense than in the flowers shown, and probably was due to the sea air, which is wafted over the plants in the nurseries. One great fault, if one may term it a fault, is the enormous prickles on the stems of Rayon d'Or, and which I fear will militate against its popularity as a button-hole rose. I have seen it stated that this rose is shy-flowering, but, judging from what I saw in the nurseries, this is not the case. Over-propagation may have had something to do with this shy-flowering.

School Gardens—At the present time there are about 171 gardens in or adjoining the playgrounds of public elementary schools maintained by the London County Council. These gardens are used in connection with the teaching of botany, and the observation of nature study lessons which are included in the curriculum of the majority of elementary schools. Formerly the subject of nature study was confined almost entirely to the infants, but it is now taking such an important part in the work of the senior departments that the London Education Committee of the Council has had to consider the question generally.

Scented Roses—Though opinions may, and undoubtedly do, vary, personally I do not think that sufficient value is nowadays attached to the fragrance of the blossoms, for many of the newer varieties possess this charm only to a very limited extent. I do not know the rules which govern the judging of roses at the various exhibitions of our national flower, but if twelve points be allotted for a perfect rose, my idea is that at least three of them should be awarded for perfume. This would prevent the prize for the best flower at an exhibition being given, as sometimes happens, to a bloom with little, if any, scent.

Rose Hugh Dickson—In looking through the roses in the early part of September, this variety attracted attention on account of the rich crimson color of the flowers and the vigorous habit of the plants. It is certainly a rose that deserves notice, more especially in a dry season like the past. Another valuable trait in this rose is its perfume. The plants of this rose were growing on a wind-swept hill in a rather heavy, loamy soil. I also noted Liberty and Richmond growing close by, but of the three I certainly preferred Hugh Dickson.

Testing the Color of Soil—Testing the effect of soil colors, an experimenter at the Montpelier experimental vineyard in France covered the ground with a thin layer of cement, leaving a small opening for each stem, and then painted portions of the cement white, black and red. Under the black and red the soil temperature rose much higher than under the white, giving nearly twice as much growth to the vines. The productive soils of the Midi, it is pointed out, are mostly reddish, and those of the vineyards of the Charentes are black.

Philadelphia.

THE END OF THE DAHLIAS.

Jack Frost came along last week and blew his icy breath on the dahlias and cosmos and they are no more. Everyone welcomed Jack with open arms, even the dahlia men, for they had gotten tired cutting them and wanted to stop and count up their profits, which, according to all who know, broke the record. Chrysanthemums fairly swamp the market. There is great variety, some fifteen to twenty varieties, from the pompons to the large show sorts that were never finer. Prices rule low, as for some reason trade is not reported as brisk enough to keep down the surplus. Large quantities are sold, but the stock seems always full, in spite of the quantity sold. Major Bonnaffon holds its own as the best yellow; others come, of which much is expected, are tried for a while and go, and nothing is as yet in sight to displace it. Maud Dean is the best pink and Ivory the best white. Maud Dean was raised by Robert Craig, Ivory by W. K. Harris and Major Bonnaffon, while raised in Indiana, is named after a genial Philadelphia gentleman. That sterling late white, Mrs. Jerome Jones, is also in. Mrs. W. E. Kelley, a fair yellow, has sold well. Dr. Enguehard, with its handsome full flowers, is also seen in quantity. Florence Harris is also a really splendid flower, a sulphur yellow with heavy, stiff stems. Roses, particularly the teas, are much improved. Killarney, both white and pink, are rapidly getting into winter form; Richmond are now to be had with stiff stem, good color and body to the flower. Prince De Bulgarie or Mrs. Taft appear to be gaining in popularity. S. S. Pennock says the correct name of this rose is Antoine Revoire. American Beauties hold their popularity and are the only flower for many occasions. They are fairly plentiful. Double violets are fast getting good enough to give the cattleya a run for the corsage position. Some New York Marie Louise are arriving and will be carried in stock by most of the houses during the season. Carnations move slowly, there being too much competition as yet. Snapdragon is sure to be in demand as it is being better done than ever. Quite a few growers have the beautiful shade of pink that sold so well last season. Cattleyas are still plentiful and in fair demand.

CLUB MEETING.

The November meeting of the Florists' Club was held November 7, with President Thilow in the chair. There was a fair attendance, considering that this was also election night and as the campaign had been very exciting in voting for the election of mayor, there was much interest in the returns. In his address to the club, Mr. Thilow was very enthusiastic for the future and there is no question that with him at the helm the coming year promises to be a banner one in the history of the club. The report of the secretary showed that the club membership is now 283. Great interest was taken by the large number present. New committees were appointed and will be called together at once and every effort will be put forth to assist President

Thilow in the work he has outlined. The subject for next meeting is a history of the 25 years' life of the club.

NOTES.

D. T. Connor, who for ten years past has represented the Lord & Burnham Co., has resigned his position with them and will represent the Foley M'fg. Co. of Chicago. Mr. Connor is a practical florist as well as a good mechanic and greenhouse builder, and understands the wants and needs of the rose and carnation thoroughly. His long experience and large acquaintance will be of great assistance to him in establishing the business of this great western company in this district.

Berger Bros. are now in their new store, 140-142 N. Thirteenth street, where they have much greater facilities for carrying on their increasing business. Everything is convenient and plenty of room to move about and handle the stock.

E. Bernheimer is handling the sweet pea crop from the giant houses at North Wales. They are very good for so early in the season.

Ed. Reid is handling show blooms of the best chrysanthemums from an Eastern shipper. They arrive in splendid condition.

W. J. Baker of South Penn Square says they never had so many fine chrysanthemums, but it takes hustling to sell them. K.

Washington.

THE CHRYSANTHEMUM SEASON.

Business is as good as can be expected at this season of the year. Possibly there are people everywhere who would not be satisfied if they had more business than they could handle. We believe it was the late Edward Bellamy who once wrote a book entitled "Looking Backward." Without entering into a discussion of the book, it may be said that looking backward now and then is not unprofitable, and looking backward in the florist business brings us to a realization of the vast importance of its present standing compared with that of twenty years ago. The chrysanthemum season is now at its height, and the large and more showy kinds are coming in. Col. D. Appleton, Dr. Enguehard, Alice Byron, Mrs. Jerome Jones and other varieties are now prominent. To these may be added the sterling yellow, Major Bonnaffon and White Bonnaffon, which if not so large and showy are unsurpassed for usefulness. Pompons and pot stock are also plentiful and there is enough variety to satisfy the most exacting taste. There were killing frosts on the nights of November 2 and 3, so the outdoor stock is practically out of the way. Roses seem to be a little off crop with some of the growers, but there is more than enough to supply all demands. Sweet peas and violets are seen in very fair form for this early in the season.

NOTES.

The plant bureau of the Department of Agriculture held its annual exhibition of chrysanthemums during the week ending November 4. One of the greenhouses was well filled with exhibition and other commercial varieties, including pompons and outdoor stock. It, like all other government exhibits, was free and was well patronized by the public. Like most other exhibitions, it contained quite a few of the freakish sorts that are of no practical value to the grower who supplies the stores. For this we do not blame the officials. It was a public show and a portion of the public will look at most anything that can be seen for nothing. Nevertheless, some good commercial varieties were shown. Of these may be mentioned, Alice Lemon, light pink; Driftwood, white with yellow tinge; Alice M. Flagler, white; Mrs. Geo. Hunt, light yellow; Lady Campbell, white; Mary Donnellan, yellow; Lenox, light yellow; Mrs. Chas. H. Totty, pink; Golden Gem, yellow; W. H. Moir, white; Wm. Duckham, Mrs. Wm. Duckham, Beatrice May, and other old but good varieties were also noted.

We note in THE AMERICAN FLORIST of November 4 an answer to an inquiry regarding violet houses, signed J. V. L. He says "that the growing of good violets is not as dependent on the style or size of the house as upon the grower." Without seeking a discussion we venture the assertion that it depends more on a favorable soil and climatic conditions than on either the grower or the house. Good violets have to my certain knowledge been grown by men who did not understand the first principles of the florist business, and on the other hand some growers of fine stock along nearly every other line have not been able to grow good violets. Some of the violet growers, like some of the old florists, try to impress strangers in the belief that they hold some mystery or art of divination by which they supply good violets. There is nothing in it. They simply have the right soil and climate.

Z. D. Blackistone's store is now as near to a crystal palace as a store on a busy corner can be made. On the Fourteenth street side it is practically all plate glass, about 30 feet frontage. The H street front entrance has two large plate glass show windows, and while the interior fittings and fixtures are not all finished they will conform to the general plan for an elegant store. It is no exaggeration to state that there is not a finer store in this country.

Geo. H. Cooke furnished a fine decoration last week for the Addison-Lamson wedding. A. F. F.

Albany, N. Y.

Social features marked the November meeting of the Albany Florists' Club, and these, in addition to a small exhibition of new varieties of commercial merit, increased the attendance well beyond the average. In the regular order of business Louis H. Schaefer, chairman of the clambake committee, made his final report and, based upon it, the treasurer was instructed to pay all bills outstanding and the matter was declared settled. Two new names for membership were proposed —William Lucas, gardener for Mrs. Spencer Trask, Yaddo, Saratoga Springs, and William Christie, gardener for William Sage, Menands, Albany county. Both were referred to the committee on membership for action at the next meeting. Patrick Hyde moved that Dennis McCarthy, who has long been a friend of the organization and an inimitable entertainer, be made an honorary member, and the motion was affirmed unanimously. President Danker called attention to the exhibit at hand of the new rose Sunburst and to the new white carnation Wodenethe, both introduced lately by Charles H. Totty, Madison, N. J. On Sunburst an interesting discussion developed. Frederick Goldring, a former president, said the color, light salmon, is one much needed in a winter rose, but expressed doubt that any hybrid tea would bloom freely at this season. President Danker named one or two like varieties in new colors which he said were good midwinter bloomers. It was finally agreed that a trial of the variety would prove its seasonable blooming qualities. James H. Snyder, secretary of the Violet Growers' Association at Rhinebeck, was present with a choice exhibit and had some interesting remarks ready for utterance. He said violets are of good quality, but not plentiful and that the demand is normal. The plants do not bloom so freely early in November as they did eight or ten years ago for reasons the speaker could not explain. Quality in violets depends in a good measure, he said, on methods of growing. First-class growers no longer permit runners on the plants and by their careful elimination larger crowns are produced and the plant is much more vigorous. This method gives violets large blooms and strong stems. The holiday season, he believed, will find the supply all that could be desired. After the business meeting refreshments were served and Mr. McCarthy entertained with songs and parodies in his usual good form. At the meeting on the evening of December 7 nominations of officers for 1912 will be in order.

Albanians again have the opportunity to visit the lake house, Washington Park, to see the chrysanthemums which are on exhibition for the annual show. The house was thrown open on Sunday morning and the plants will remain on view for two weeks. The exhibit comprises 725 plants in nearly 500 varieties. Of the number, 43 varieties are new. R. D.

New York Notes.

Next club meeting Monday, November 13. "Ladies night" in addition to the illustrated lecture by J. Otto Thilow. Al Rickards, generalissimo of the house committee, has provided an elaborate musical program. Rowan has been engaged as caterer for the occasion. The nominating committee will make their report and a very large attendance is expected. There will also be exhibits of novelties in chrysanthemums.

Visitors: Thomas Proctor, George Page and Robert Spier of Lenox, Mass.; George Hampton, Ramapo; George Hughes, Westbrook; George Hatcher, Amsterdam; W. Atlee Burpee, Philadelphia, Pa.; Robert Hillock, Cold Spring Harbor; Thomas Griffin, Westbury; Wm. Eccles and Jas. Duffy of Oyster Bay; Eber Holmes, Boston, Mass.; A. Farenwald, Hillside, Pa.; Benj. Hammond, Fishkill.

BOWLING.

Owing to the flower show there was a very small attendance at the alleys November 3. The following scores were made:

Chadwick	171	195	184	193	222	194	203	187
Young	144	191	115	117	162	164	165	124
Nugent	111	132	155	106	120	110		
Holt	89	137	148					
Shaw	110	133						

Indiana State Florists' Association.

A large gathering of the members of the Indiana State Florists' Association assembled at the E. G. Hill Co.'s establishment at Richmond, Ind., at the November meeting, there being about fifty present. At the business session short speeches were made by W. W. Coles, Kokomo; J. S. Stuart, Anderson; M. Heller, Newcastle; H. L. Wiegand, Indianapolis; N. H. Gano, Martinsville; Theodore Dorner, Lafayette; Roger Murphy, Urbana; B. F. Hensley, Knightstown; and W. H. Elverson, New Brighton, Pa. E. G. Hill and Joseph H. Hill escorted the visitors through the greenhouses and gave short talks on the work which was being performed. A luncheon was served, after which an automobile trip was taken to the greenhouses of G. R. Gause & Co., E. T. Graves, Knopf Floral Co., and F. H. Lemon & Co., and also to the Advance Co.'s machinery plant. The next meeting will be held at Indianapolis, December 4, and the annual meeting at the same place, January 17, 1912.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico, $1.00 a year, Canada $2.00; Europe and Countries in Postal Union, $2.50 Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From the first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

We do not assume any responsibility for the opinions of our correspondents.

THIS issue is of date 11-11-'11.

THE chrysanthemum cover of this week's issue is from a photograph by Elmer D. Smith, of Adrian, Mich.

THIS is the time for the progressive florist to have a flower show of his own. Clean the houses, arrange the stock, and invite the public to call and inspect it. It will be appreciated and induce trade.

THE bouquet green situation in the West remains about the same. Some picking is still being done, hindered partly by rain, light snows and freezing nights. There has been no warm, sunny weather.

American Rose Society.

The supporters of the American Rose Society are responding nobly to the request for a guarantee fund to enable the society to offer a first-class prize list for the coming exhibition. Several amateurs have come forward, notably, Samuel Thorne of Millbrook and Mrs. E. M. Sharpe of Wilkesbarre. Ex-President W. H. Elliott writes: "Put me down for $100," but we only asked for $25 each. August Poehlmann says: "Put me down for $25 and for $50 if needed." "A Friend" writes: "I think these shows when properly conducted do much good. I am not flush just now, but if you are short at the last, call on me for $25."

The Detroit show will be made a popular public exhibition, the Wayne pavilion is virtually a Crystal Palace, so situated that thousands of people can visit it. The dates are January 10-12, 1912; admission 25 cents straight; no cuts.

The roses and carnations will occupy the floor and the sides will be well decorated. Chicago will be well represented and Canada will do her best. Detroit is so central and with railroad facilities unsurpassed that there will be no trouble in getting there.

At Boston last spring it was noticeable that no matter what other attractions there were the crowd surged toward the roses every day that the show was open. President Farenwald has called a meeting to prepare a prize list and as soon as completed it will be sent out without delay.

One word about the registration of new roses. The American Rose Society is making an effort to secure a list of accurate registrations and there arises from time to time conflicting claims as to the priority of names. Silver medals have been sent to Robert Scott & Son, Sharon Hill, Pa., and to S. J. Reuter & Son, Westerly, R. I. The gold medal of the American Rose Society was voted to M. H. Walsh of Woods Hole, Mass., in recognition of the work done by him in the development of climbing roses, a line of floriculture that is being recognized by the American public for summer home decoration in a manner that is visible the country over, literally exemplifying the motto, "A Rose for Every Home, a Bush for Every Garden."

BENJAMIN HAMMOND, Sec'y.

National Sweet Pea Society of America.

At the executive meeting of the National Sweet Pea Society of America, held at the Parker House, Boston, Mass., November 3, President Sim presiding, it was decided that the fourth summer and annual exhibition and convention of the society should be held in Boston, Mass., July 13-14, 1912, in conjunction with the Massachusetts Horticultural Society's exhibition. Four hundred dollars was set aside to be offered for prizes as follows: $100 for wholesale growers, $100 for private gardeners, $100 for amateurs, $100 for retail florists. The above will be in addition to the general list of special prizes donated, also apart from the prizes offered by the Massachusetts Horticultural Society.

There will be a meeting of the schedule committee in Boston about the middle of the month. Suggestions and prizes for this schedule are invited. We shall hope to have this published not later than the first of December.

HARRY A. BUNYARD, Sec'y.

RECENT BOOKS.

Chrysanthemums and How to Grow Them.*

A splendid guide book to both amateur and gardener is the volume entitled "Chrysanthemums and How to Grow Them," by I. L. Powell, and published by Doubleday, Page & Co. The author is thoroughly acquainted with his subject and complete directions for the successful culture either on a large or small scale, of the Queen of Autumn are contained in the volume. It covers all the possibilities of the plant, including outdoor and greenhouse culture, exhibition and commercial blooms, bush and standard plants. The propagation, preparation of the soil, feeding, insects, diseases and their remedies, and the production of new varieties are clearly explained in an easily understood manner, concluding with an up-to-date list of varieties for the several purposes. The book contains 200 pages beautifully printed and cloth bound with 31 illustrations of fine specimen plants and blooms, as well as explanatory of their culture. Price, $1.10, postage 10 cents.

Vines and How to Grow Them.*

The proper planting and care of vines makes a beautiful feature not only on large estates, but on the smallest cottage and the book entitled "Vines and How to Grow Them," by William C. McCullum, published by Doubleday, Page & Co., covers the entire subject in a clear and concise manner. It fully explains the planting and culture of annuals and perennial vines and the pruning and tying out of the latter, including that of the climbing roses. The culture of greenhouse vines is thoroughly covered, as well as the grape both indoors and outside. A list of vines applicable for different locations and a table describing the different varieties with the time of planting and pruning concludes the book which is nicely printed and cloth bound, and contains 300 pages and 31 illustrations. Price $1.10, postage 10 cents.

The Evolution of Plants.

How and from where the wonderful plants of the universe ever came is a deep and interesting study and the evolution of the same from the earliest times is covered in a book written by Dr. J. H. Scott, president of the Linnean Society of London and published by Henry Holt & Company, New York. It tells the story of the development of flowering plants from the earliest geological times unlocked from technical language. It is a book of 256 pages containing many figures and well printed and bound in cloth. Price 75 cents.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Milwaukee.

MARKET VARIES.

The last week has been rather a bad one for the chrysanthemums as the price dropped considerably, and this no doubt had a lot to do with the rest of the stock in the market which accumulated for a few days in the fore part of the week, but at the latter part the majority of the surplus stock was cleaned up, which made things easier for the wholesaler. Carnations are of a fine grade and are selling well and there are plenty of greens to fill all orders.

NOTES.

Two silver cups have been donated as special premiums at the Flower Show, one by the A. Dietsch Co., Chicago, and one by Harry Balsley, Detroit. The entries are coming in well this year, but the committee would like a few more entries in chrysanthemum plants. There seems to be more interest than ever. The judges will be Emil Buettner, Park Ridge, Ill.; J. E. Matthewson, Sheboygan; and Otto Speidel, Oconomowoc. An elegant poster has been issued which attracts a great deal of attention.

H. V. Hunkel and his committees are putting on the finishing touches to the final arrangements of the big show that will open on November 15 and close on the following Sunday evening. We have all got to do a lot of boosting and do it quick, for only a few more days remain before the much talked of event is scheduled to take place. It is going to be something fine and a credit to the management and enterprising florists of this city.

C. C. Pollworth Co. is busy in the plant line, especially in Boston ferns, which are fine and selling well. They are cutting a fine lot of chrysanthemums that are coming in very heavily at present and in fact a little earlier than they expected.

G. Rusch & Co. are receiving a fine lot of roses and carnations, which are selling well, and also some fine chrysanthemums. They are hard at it taking care of their new business, which is getting better every day.

Holton & Hunkel Co. is cutting some fine roses, which are selling well. This concern is also cutting a large amount of fine pompons which are finding ready sale.

Currie Bros. Co. were very busy last week with many masonic funeral orders and they report business as good.

J. M. Fox & Son are in their new quarters and are kept busy with large orders for weddings.

A. Currie & Co. report satisfactory business, having had several large orders for decorations.

Fred Kaiser expects to go deer hunting shortly. Here is hoping that he will have good luck.

Mueller & Schroeder have some fine snapdragon coming that will be ready for the flower show.

Pittsburg.

A SATISFACTORY WEEK.

A number of big jobs helped the larger stores along, and transient trade was good among the smaller stores, so the past week has been satisfactory. Chrysanthemums are moving freely, although prices on quality stock do not go as high as in other years. The abundance of chrysanthemums hurts the sale of American Beauties somewhat. Violets are still selling well. Lily of the valley, roses and carnations are not as active as might be expected. Pompon chrysanthemums seem to move better than in previous seasons. While it is a little early yet, boxwood was a live subject, the wholesalers booking quite a number of orders and promising fine quality.

Ross Adgate, of the McCallum Co., was suddenly taken sick and was removed to the Homeopathic Hospital and later taken to his home in Niles, O., where his father is a prominent florist. He is improving rapidly and is expected back at his post soon.

The Phipps Conservatories' chrysanthemum show is now on, and while it seems hard to improve their previous displays, yet a visit convinces one that this is so. Superintendent Burke and Foreman Jones have much to be proud of.

Mike Steiner has purchased the McRae & Jenkinson Co. store on Frankstown avenue. He has been manager for this firm here for the last two years, so will feel at home in his new position.

Randolph & McClements had the Chamber of Commerce banquet at the Schenley for President Taft.

Wm. Turner welcomed the opening of the hunting season by shouldering his gun for a week or two.

Earl Tipton, of A. W. Smith, is back from the farm and trying to get used to the street cars again.

Louis Biel has resigned his position with E. C. Ludwig and has taken up insurance work.

The McKeesport Floral Co. is cutting a nice lot of Col. D. Appleton chrysanthemums.

The McCallum Co. are receiving double Killarney roses with 30-inch stems.

Miss Nellie King is back at her old place, as manager of Wm. Turner's store.

W. A. Clark and T. P. Langhans spent Sunday in Cumberland.

Visitor: Robt. Groves, Adams, Mass.

BASSETT & WASHBURN

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois

Chicago.

STOCK AND DEMAND ABOUT EQUAL.

With the weather which the growers of this vicinity have had to contend with for the last two months, it certainly is a great credit to produce the quality of stock that is offered to the buyers day after day. Stormy and cloudy with a very small percentage of sun has been the constant weather conditions, but the stock as a rule maintains its high quality. Some of the roses are of light color, but the majority of those seen are of first-class grade. And the last week the nights have almost been of winter temperature. On two mornings the thermometer was almost down to 20°. But in comparison to last year, when the days were uniformly bright and warm, the cut is materially reduced, and the prices generally have held a little higher than last year. And notwithstanding the large amount of stock received, there has been but little waste and all of the better grades have found an early market. Chrysanthemums are arriving in larger quantities of any size and color to suit the purchaser, from the largest exhibition blooms to the smallest pompon, and the demand for all grades is good. Major Bonnaffon is to be seen in great numbers. It is really wonderful what a hold this popular variety has on the trade, not only with the growers and dealers, but with the buying public, who will often select a medium size Major Bonnaffon in preference to a much larger Col. D. Appleton or other variety, when it is not a question of price but of choice in the blooms. One grower, in speaking of this, remarked that in his opinion "it was the finish which Major Bonnaffon took on even when fairly well grown." Roses are coming in a little more plentiful than they were, but they are well sold up nearly all the time. American Beauties are of excellent quality and are having a good demand. Killarney and White Killarney are very good, there being some light colored stock of the former, but most of the receipts are of fine color, with good stems and foliage. Mrs. Jardine, My Maryland, Mrs. Marshall Field, are of fine quality and Richmond is beginning to show its winter form and is in much larger supply. Orchids and carnations are sold up about as fast as they come in, and the prices are holding well. The quality is all that could be asked, notwithstanding the dark weather. Violets have improved greatly with the advent of cooler weather and are having a fair demand, but these flowers always feel the chrysanthemums more than any others, being used largely for corsages, and chrysanthemums are worn while they are on the market in their stead. Lily of the valley is in good supply and the quality is of the finest. Lilies and callas are to be had, but the demand is not heavy for either. A little cosmos is to be seen, but there is no longer any call for it. Bouvardia in splendid quality is to be had and some nice bunches are displayed in the retailers' windows. Sweet peas of very good quality have made their appearance. Greens are plentiful with good demand, the only shortage being bronze galax, of which the supply is nearly exhausted.

NOTES.

F. M. Smith of Smith & Fetters, Cleveland, O., arrived from Los Angeles, Calif., on November 6 and left the following day to assist his firm to arrange two large church decorations that they have booked for this month. The Hoyt-Mader wedding on November 22 promises to be quite an event and will be one of the most elaborate decorations that this firm were ever called upon to arrange. The parties interested were so anxious to have Mr. Smith take charge of the decorations that they agreed to pay his expenses from California and return if he would only consent to do so. Mr. Smith says he will return to his home in Los Angeles in December.

Wietor Bros. are doing a fine business and judging from the many boxes that are shipped out one would say the shipping trade is very brisk. Large quantities of roses, carnations, chrysanthemums and pompons are seen at the store this week.

Bassett & Washburn's leaders this week are fine American Beauty roses, chrysanthemums and pompons. E. B. Washburn is showing his friends the firm's new rose, which is very pretty and supposed to be a yellow Killarney.

A silver cup donated by the A. Dietsch Co. will be one of the prizes that will be awarded at the flower show that will be held in Milwaukee next week.

Emil Buettner of Park Ridge has been selected to act as one of the judges at the Milwaukee flower show which will be held November 15-19, inclusive.

George Bayer of Toledo, O., is shipping a very good grade of Major Bonnaffon chrysanthemums to Kennicott Bros. Co.'s store.

Michael F. Dziadul is now proprietor of the store formerly owned by Czarnik & Co., 1514 West Chicago avenue.

The Chicago Rose Co. informs us that there is no truth to the rumor that they will retire from business.

The Fleischman Floral Co. had a three-column advertisement in the Tribune on November 4.

Geo. Walther says everything in his neighborhood is looking lovely and that business is very good.

Winterson's Seed Store is winding up a very successful bulb season.

Smilax
Adiantum
Ferns

The Chicago Carnation Co. is making large exhibits of their choice stock at the various fall shows this month. Manager Pyfer says his exhibits will include Washington, Pink Delight, White Wonder, Gloriosa, May Day, Dorothy Gordon and many other varieties.

W. S. Garland, who recently purchased an auto, has received such good returns from his chrysanthemums this year that he is contemplating purchasing another car, one of the latest models.

Eddie Schultz of the E. C. Amling Co. force won a $22.00 bowling ball and case at a drawing at Bensinger's Bowling Alleys last Wednesday, November 1. Now, watch the pins go down.

A. L. Vaughan of Vaughan & Sperry says that the demand for boxwood and green goods is very lively and that the cut flowers are also meeting with very ready sale.

Poehlmann Bros. Co. is cutting fancy White Bonnaffon, Major Bonnaffon, Yellow Eaton, Timothy Eaton, W. H. Chadwick and Golden Chadwick chrysanthemums.

Mrs. J. A. Mendel was operated upon at the Henrotin Memorial Hospital on November 3 and at last reports was improving and an early recovery was looked for.

John Kurchten says that although his shipments of gardenias are much larger they are sold as soon as they reach the store.

E. F. Winterson, George Asmus, August Poehlmann and P. J. Foley are taking in the flower show at St. Louis this week.

E. Leslie has closed his store on West Randolph street and is now in the employ of Kyle & Foerster.

Ivan Krohn of the Morris Floral Co. is still seriously ill in the Presbyterian Hospital.

SELLERS OF HIGH GRADE STOCK

Several customers who have recently given us trial orders have expressed themselves as more than satisfied with the stock and treatment that they have received. The orders that they have sent to us since proves that they are still satisfied.

WE WOULD LIKE TO HAVE YOUR BUSINESS

but realize that we stand no chance of getting it unless you give us the opportunity to demonstrate to you, through a trial order, that we can do a little better for you than the other fellow. Supposing you send us a trial order now for your next supply of

Beauties, Roses, Carnations, Chrysanthemums, Pompons, Lilies, Violets, Orchids, Boxwood, Wild Smilax and Greens.

J. B. DEAMUD CO.

160 N. Wabash Ave., CHICAGO

The George Wittbold Co. is cutting the last of their chrysanthemums this week and several of the benches used for the growing of this stock are already filled with lilies, of which 15,000 will be grown for the market this year. The out-of-town demand for decorative stock is very good and the packers are kept on the jump trying to keep up with the orders that are received.

Miss K. N. Cooper is again attending to her duties as manager at the Auburndale Goldfish Co.'s store after having been confined for a few days with a severe cold. She says the demand for fish by florists has been very good and looks for it to continue so. Her firm is the largest wholesaler of goldfish in this country and sell several million annually.

Paul M. Bryant says his firm, E. H. Hunt, has just received a large importation of magnolia leaves and Italian wheat, besides heavy shipments of baskets and other supplies for the fall trade. R. H. Starbuck, the former western representative, has changed jobs with Clifford Pruner and is now in charge of this department.

Tim Matchen is supplying Peter Reinberg's customers with fine Richmond, Perle, American Beauty and Mrs. Aaron Ward roses. The latter are meeting with ready sale and are used by the leading florists in their high class decorative work.

The John C. Moninger Co. evidently believes in paint as well as printer's ink for advertising purposes, for their large block of buildings is being covered with signs this week. The largest sign faces Hawthorne avenue and is 200 feet long.

N. Klimmer's Greenhouses at Forest Park have been granted articles of incorporation with a capital stock of $5,000. The incorporators are Augusta Klimmer, Frank Klimmer, Minnie Klimmer and Lillie Zender.

J. A. Budlong's shipments include a fine grade of My Maryland roses, bouvardia and lily of the valley. The American Beauties that this firm is cutting are of the first quality with large heads.

The Chicago Flower Growers' Association is showing a fine grade of Timothy Eaton, Yellow Eaton and Major Bonnaffon chrysanthemums, besides large quantities of Killarney roses and other seasonable stock.

Wendland & Keimel, Elmhurst, have their new Foley flat-rafter range of 11 houses, ten 34x200 feet and one 27x200 feet, well started. The channel iron gutters are in position and make a fine appearance.

The Geo. Wittbold Co.'s employes had a most enjoyable time at the Hallowe'en party that was given by Fred Wittbold at his residence on Buckingham place.

Several of the down-town florists were very busy the fore part of the week arranging designs for the Mandel funeral, which was held on Tuesday, November 7.

A large number of the local florists are planning on attending the flower show in Milwaukee which opens on November 15 and closes the following Sunday.

The Ernest Wienhoeber Co., 22 Elm street, had an exhibition of plants, flowers and decorations at its store this week, November 8-10, for which invitations were issued to its customers.

John Mangel will vacate his present quarters on Monroe street and Wabash avenue in the near future on account of building operations and there is talk of a lease deal with another nearby florist.

H. Jepsen, formerly with the A. F. Amling Co., is going into the retail business and will open a store in Morris at 206 East Washington street.

Samuel Seligman, better known as "Sprinkleproof Sam," representing Werthemier Bros. of New York, called on the trade here this week.

H. E. Philpott and A. T. Pyfer are attending the flower show at St. Louis this week.

Chas. Zapfe will resign his position with J. A. Budlong to go into the retail business on the south side.

Curtis Kindler of the Raedlein Basket Co. will leave this month to visit his firm's factories at Weidhausen and Ebersdorf, Germany.

The shipping trade was so brisk at Zech & Mann's on November 4 that the force had to work overtime.

Robert Groves of Adams, Mass., was in the city taking orders for ferns this week.

Canger & Gormley are featuring the new rose, Prince de Bulgarie, in their window displays.

H. Van Gelder, of Percy Jones, is the recipient of large quantities of fancy carnations and chrysanthemums.

The J. B. Deamud Co. is disposing of large quantities of white, pink and yellow chrysanthemums of good quality.

Visitors: Samuel Seligman, New York; A. Forder, Cincinnati, O.; E. G. Hill, Richmond, Ind.; Wallace R. Pierson, Cromwell, Conn.; H. Roth, Lafayette, Ind.

High Grade Stock for Thanksgiving

The large supply of **Beauties, Roses, Carnations, Valley, Violets, Chrysanthemums, Pompons** and **Lilies** that we are receiving are of very good quality. The roses in general are of the best grade with good heads, stem, color and foliage. Our chrysanthemums were never better and the quantity was never larger, so you can rest assured that your order will be filled in full if you place it with us.

Our Goods Are Right

So are our prices. But this is not all. We take the same care with the smallest order as well as the largest and are prepared to fill either or both. We are filling both—and filling them right—that is why we have such a good shipping trade, and it makes no difference where our stock goes we have no complaints. Its fine quality, the care taken in packing and shipping just at the right time, insures its safe arrival and in the best possible condition. Repeat orders prove this, and while we are anxious to secure new customers, the approval of our old ones is even more appreciated. We give personal attention to all orders. Let us get better acquainted. Begin at once

Chicago Florists' Club.

The regular meeting of the Florists' Club was held at the Union Restaurant November 2 with a very large attendance, many being attracted by the exhibition of novelties, full account of which will be found elsewhere in this issue. President Philpott occupied the chair and three new members were elected—Richard Schmidt, 4911 Quincy street; John Huebner, 11 West Randolph street, and E. O. Orpet, Lake Forest. The following were nominated for membership: Chas. W. Erne, 30 East Randolph street; Edw. G. Gale, 108 East Delaware avenue; Wm. F. Kasting, Buffalo, N. Y.; A. Van der Pohl, 3811 Harrison street; Chas. J. Bond, Naperville; James B. Foley, Twenty-sixth street and Western avenue; Isaac Cassidy, Twenty-sixth street and Western avenue; Louis Lickenger, Andrew Benson, Edw. Toeple, Guy French, Anthony Gable and Dick Solm, all of Morton Grove. The visitors included E. G. Hill, Richmond, Ind.; Wallace R. Pierson, Cromwell, Conn.; H. Roth, Lafayette, Ind.; Samuel Seligman, representing Wertheimer Bros., New York. Routine business having been disposed of, the visitors were called upon for a few remarks.

E. G. Hill berated the retail florists roundly for their failure to exploit new roses, suggesting that they are now awakening to the demand in this direction. Referring to chrysanthemums, he spoke of the great popularity of the newer singles and pompons. Recent carnations, he claimed, show the domination of Enchantress, but predicted that there were new colors to come and from the now awakened European growers probably new types.

Wallace R. Pierson was the next speaker and said that eastern growers are on the alert and continually sorting out the good things to offer the trade both east and west and on behalf of the officers he invited all present to attend the combination meeting of the American Rose Society and the American Carnation Society at Detroit, Mich., January 10-12.

H. Roth said he was a beginner, having been in the business only 10 years, and had always derived much pleasure and benefit from intercourse with those in the trade.

C. W. Johnson called attention to the annual meeting and exhibition of the Chrysanthemum Society of America at St. Louis and invited all present to attend.

Chicago Bowling.

The Orchids and Roses played their opponents to a standstill on Wednesday, November 1, when they won three straight games from the Carnations and Violets. The high men of the evening were Al. Fischer and Wm. Wolff, who bowled 199, and John Zech, who bowled 192 in the last game played.

Individual and team scores for games played November 1:

	Won	Lost
Orchids	14	1
Violets	7	8

	Won	Lost
Roses	7	8
Carnations	2	13

The following table shows the number of games won and lost by each team to date:

Orchids			
Huebner	147	160	182
Graff	124	170	158
Degnan	132	148	139

Cincinnati.

ALL STOCK SELLING WELL.

Everything good in the market with the exception of some white roses, is selling quickly and the prices realized as a whole are good. Many choice blooms are being used at the various affairs given in honor of the president during his brief sojourn here this week. The local business has been brisk and the shipping demand gets stronger week by week. Chrysanthemums, especially the medium grades, sell well. The offering include varieties such as Alice Byron, Dr. Enguhard, Col. D. Appleton, Golden Age, Major Bonnaffon and White Bonnaffon, Mrs. Perrin, Pink and White Shaw, Diana and pompons. The small Estelle that have been such a glut on the market are completely out. American Beauties, Richmond, Rhea Reid and the pink roses clean up quickly. The white are not selling as well, not because of any lack of demand, which is fair, but because the supply is so large that they cannot be absorbed quickly. This condition will change before long. The supply of carnations is on the increase, but the demand for them is so strong that more would undoubtedly be welcome. Lilies are selling very well and bringing fair prices. More of both double and single violets could have been used at the opening of this week. Lily of the valley and orchids are selling well. The call for all lines of greens is excellent.

FLOWER SHOW.

The magnificent silver cups for the show next week have been on exhibition in the MacDonald & Kiley Co. windows, 420 Walnut street, for several days. Posters have been distributed throughout the city and surrounding towns. Wm. Murphy, the superintendent of the show, is prepared to take care of all entries and up to this writing they are large. The mayor

of the city will grace the occasion by his presence on the opening day, November 13. Visitors in the trade should not forget that they are wanted as guests of the local society at the smoker at the Bismarck Rathskeller on Thursday evening, November 16. The affair will be informal and the men who attend are promised a right royal time. Richard Vincent, Jr., President-Elect of the Society of American Florists, will deliver an illustrated lecture on bulb growing in Holland, Tuesday, November 14.

NOTES.

The next meeting of the Florists' Society will be held at the Cincinnati Cut Flower Exchange, 24 E. Third avenue, Saturday, November 11. Important. Refreshments.

Albert McCullough, of J. M. McCullough's Sons Co., has gone south for a five weeks' stay in Florida on a hunting and fishing trip.

Gus Adrian, Max Rudolph and Henry Schwarz attended the meeting of the Indiana State Florists' Society at Richmond, Ind.

Ed. A. Foster, of A. Sunderbruch Son's Co., had most of the decorations for the affairs given in honor of the president.

P. J. Ollinger and wife spent a few days the past week at New Castle.

Tom Windram has gone to Florida.

Visitors: Robert Groves, Adams, Mass.; J. Broxey, Dayton, and Wm. Gardner, New Castle, Ind. 'H

AN OVERSUPPLY OF CHRYSANTHEMUMS.

It is simply raining chrysanthemums. Not in many years have we seen so many in the markets and wholesale houses. Some years ago when everyone grew them it was something the same, but for a number of years a great many growers dropped them on account of their not being a paying crop. Everyone seems to have got at it again, with the result the market is crippled. There are sales reported of big lots sold for nine cents per dozen. How the grower is going to reap a harvest at that figure after paying expenses at the other end is a conundrum. The average quality of the flowers of all varieties is good, in fact, better than has been in other years. Roses of all varieties are good, especially the Killarneys, of which we have never seen better. Lily of the valley is good, but a drug. Carnations have dropped in price from fancy to poor—they are all in the same boat, with few takers, and those who take must get them at practically their own price. Violets are plentiful, lilies are not wanted. Chrysanthemums hold the center of attraction. Their size and lasting qualities make it a hard road for other flowers, but let's cheer up, the worst is about over. In a few weeks some of the august buyers will come down from their exalted seats and talk business in a serious tone. It will then be the salesman's turn to feel that he has something to live for.

NOTES.

There is a fair promise of seedling roses among the Boston growers which we expect will attract attention later and probably cause some to sit up and take notice. Some years ago C. W. Ward of Queens, N. Y., maintained that the rose growers were asleep. Probably they were, and perhaps Mr. Ward's words were the means of waking them up. In a short time new varieties in roses will be so many that we will not know where we are at.

The Board of Trade is quietly sleeping. It has received some jolts, but the sleep is so heavy that the awakening is hard to accomplish. It is funny that anything for the good of all is put away without a fair trial. Some day it may become a necessity instead of an uncertainty. Wake up. Get together, gentlemen. Instil some business sense in the laggards and make Boston hum for business.

Chas. E. Holbrow, Brighton, has installed a Morehead steam trap. He is especially well pleased with the way it handles the condensation, and wonders why he did not put it in before.

Penn has been making a big sale of Mrs. Aaron Ward roses, but has now turned on to chrysanthemums.

STOCK SELLING WELL.

The condition of the wholesale cut flower market is about the same as last week, probably a little better. Chrysanthemums, while now plentiful, clean out remarkably well. Carnations have improved in quality very much, but it is difficult to get the price up except on the extra fine blooms. Violets are coming into their own and have improved both as to quality and as to prices. There is quite a sufficient supply of lily of the valley and lilies for the demand. Gardenias only in fair supply. American Beauties are doing as well as can be expected at this season of the year. Top grades of My Maryland, Richmond, Prince de Bulgarie and Radiance are meeting with ready sale. In fact, there is not enough of the best of these varieties to satisfy the demand. Orchids are not quite so plentiful, as there have been some very large orders for orchids, especially cattleyas, from out of town. Still there is enough to satisfy all wants.

NOTES.

Walter F. Sheridan, as usual, has a fine line of all seasonable cut flowers. The carnations of W. F. Jagger, West Hampton, L. I., consigned here, are of the same excellent quality, and the same can be said of the roses of Young of Clifton, N. J., and Dean & Co. of Little Silver, N. J., that are consigned here. Mr. Dean, in spite of the opinion of other growers, still clings to Bride and Bridesmaid, growing these exclusively, but as they do so well with him he is probably satisfied to let other growers experiment with the newer varieties.

The house of Traendly & Schenck is certainly a busy one. In addition to their other large interests, their orchid department has grown to tremendous proportions. Their supply of orchid blooms seems to be unlimited and they have constant orders from out of town for these flowers. They have been and are very busy shipping exhibition blooms of chrysanthemums. The magnificent roses, Mrs. Aaron Ward, Prince de Bulgarie, Mme. Chatenay, My Maryland and Radiance grown by Robert Simpson are handled by this firm.

It is a treat to visit Henshaw & Fenrich's any afternoon now upon the arrival of the violets. This firm handles the output of some fifty-five violet growers, and the violets are now coming in fine shape. It would be hardly possible to get or see better blooms than their specials which arrive tied one hundred in a bunch. Just at this season of the year Mr. Fenrich, who is an authority on violets, gets very enthusiastic on the subject and can immediately give any information desired on the violet business.

President-elect Richard Vincent Jr. of the S. A. F., accompanied by his niece, Mrs. Wheeler, a charming little lady, has been with us during the week. Mr. Vincent is making a tour of several large cities giving illustrated lectures. It is really very interesting to hear him talk of the Society of American Florists and his determination to make the coming year a banner one in the history of that society.

Wm. C. Rickards, who is treasurer of the New York Florists' Club, was the manager of the American Institute chrysanthemum show, and deserves great credit for the splendid manner in which the exhibits were staged, and thanks are due Alex. Eagleson, chairman of the board of managers, and to William Eagleson, secretary, for the many courtesies extended to the visitors and the press.

The "old reliable," J. K. Allen, is always on the job. Mr. Allen, who started the innovation of opening up at 6 a. m., personally appears at this hour with the "smile that won't come off," well satisfied with this venture, hustling himself and keeping everyone else hustling. The shipping business is made a special feature here and is improving daily.

Moore, Hentz & Nash are as busy as usual. In addition to their regular fine line of cut flowers they handle the entire cut from Brant-Hentz Flower Co. of Madison, N. J., and Frank L. Moore, Chatham, N. J. This firm occupies a very advantageous position on the same floor with the New York Cut Flower Co. in the Coogan building.

Pennock-Meehan Co. are more than pleased with the success of their New York establishment. Mr. Pennock, who is a frequent visitor, is looking forward anxiously to the time when they will get into their new building, as it is getting to be a serious problem to handle their constantly increasing business in their present quarters.

A. L. Young & Co. are receiving especially fine lily of the valley and carnations. Wm. Brennecke of Hempstead, L. I., is sending in fine chrysanthemums and Theodore Hengstenberg of the same place is sending carnations to this firm.

Theo. Lang and "Jack" Steinburg have opened a cut flower establishment in room 100 of the Coogan building. Mr. Lang will do a retail line, while Mr. Steinburgh will "speculate" and sell flowers at wholesale and on commission.

Frank R. Pierson, Robert Simpson, Benjamin Hammond, A. Farenwald, Eber Holmes and H. O. May of the American Rose Society held a meeting on November 3 at the office of Traendly & Schenck.

C. W. Scott, John Meisem and John Donaldson sailed today on the steamer Jamestown of the Old Dominion steamship line to visit H. D. Brown, Richmond, Va., and enjoy a week's sport duck shooting.

Last week the New Jersey and New York Plant Growers made a tour of inspection of 18 greenhouse establishments. The previous week they inspected sixteen places on Long Island.

Fire visited the store of Peter McKenney, Fifth avenue and Forty-second street, November 3, but the damage was done principally to the basement. Loss, $1,200.

James Bell, formerly of Garrisons, N. Y., is in the Presbyterian Hospital and on November 1 had an operation performed for stomach trouble.

Max Richter, foreman of the orchid department of Julius Roehrs Co., is in the Passaic General Hospital suffering with typhoid pneumonia.

Wm. Duckham and Chas. H. Totty leave on Monday for St. Louis where they intend making a large exhibit of chrysanthemums.

Chas. H. Totty and Harry Bunyard attended the meeting of National Sweet Pea Society in Boston November 4.

Cleveland.

STOCK IS PLENTIFUL.

Even though outdoor stock has disappeared, there are plenty of flowers for all occasions, but principally chrysanthemums. These are in all colors and sizes, and cover a wide range of prices. White, pink and yellow pompons, and singles are also plentiful. Carnations have shortened up considerably in quantity, with a corresponding increase in the demand. A small quantity of cosmos, even after the frost, were seen, and a few sweet peas are coming in. Swainsona is in good demand and violets are having a good call. Lily of the valley and orchids of good quality are moving nicely. Some excellent Kaiserin roses are on the market, but American Beauties are the prime favorites, vieing with chrysanthemums for first place. Richmond roses, the favorite red, are improving in size and stiffness of stems, and promise to be leaders this winter. The dark weather has caused the Killarney to be a trifle off color, but a few days of sunshine will bring them back better than ever. The demand for greens is good. Southern wild smilax is being used quite freely for decorations. Boxwood is selling well, and the quality was never finer than this year.

C. F. B.

St. Louis.

ROSES AND CARNATIONS PLENTIFUL.

The weather has been cool and cloudy all the week. The season has now fairly opened and there is a more business-like appearance in both the wholesale and retail establishments. Carnations have been fairly plentiful, as have also roses, and the prices are greatly affected by the heavy shipments of chrysanthemums. Violets are daily improving. Orchids are seen now more extensively. The demand for greens is good.

NOTES.

Alex. Walbart & Sons have built up a splendid trade. They have a fine supply of decorative plants and carry the very finest quality stock in cut flowers. This firm does extensive landscape and planting-out work. George Walbart is out with his new automobile delivery Dorris.

F. X. Gorly attends to the buying and his brother Vincent to the greenhouse, and both tend store, and with 12 assistants are kept busy. They have just received from the east a fine lot of artificial floral work, Christmas and other novelties.

H. G. Berning has a splendid stock of roses, carnations and chrysanthemums. Every morning the express company unloads large supplies from the growers. Large out-of-town shipments are made by this old reliable house.

Robert J. Windler, our worthy club president, is always found busy at his store, which is well filled with decorative and blooming plants and an up-to-date supply of everything in the cut flower line.

George H. Angermueller is receiving some very fancy chrysanthemums, also a fine assortment of roses, carnations, American Beauty roses and orchids.

Andrew Meyer, Jr., who lately retired as city forester, has now entire charge of his father's store. His many friends wish him good success.

C. A. Kuehn has a fine supply of lily of the valley, roses and carnations. His stock has been pretty well cleaned up all the week.

Bentzen Floral Co. have a very fine display of blooming chrysanthemums, also a fine lot of cut blooms and carnations.

Otto Sander's window is very attractive, as he makes a specialty of flowers of the very finest quality.

Adolph Ahner is in with some fine large yellow chrysanthemums.

Visitors: —— Royburn, with A. Henderson of Chicago; Rupert E. Hall, with Reed & Keller, New York.

A. L. YOUNG & CO.

WHOLESALE FLORISTS

54 West 28th Street, NEW YORK

Worcester, Mass.

The annual meeting of the Worcester County Horticultural Society was held in Horticultural hall, Worcester, Mass., November 1, with President Edward W. Breed of Clinton in the chair.

Reports were read by Secretary L. C. Midgley, Miss Lucy M. Coulson, librarian, and Treasurer Burt W. Greenwood, also by George McWilliam, judge of flowers; H. A. Cook, judge of fruit, and C. W. Greenwood, judge of vegetables. Various committees submitted reports.

The following officers were re-elected: Edward W. Breed, president; Leonard C. Midgley, secretary; Miss Lucy M. Coulson, librarian; Burt W. Greenwood, treasurer, and A. E. Hartshorn was re-elected to the finance committee.

President Breed announced that he and Secretary Midgley had been appointed by Gov. Foss to attend the apple convention to be held in Denver late in November. He also announced that the Blake medal for orchids was awarded to George McWilliam.

The society is in a flourishing condition, having a surplus of $10,000 in the treasury. M. W. R.

Waterbury, Conn.

Business has been very good this fall and shows a marked increase for the last year. There has been a large demand for funeral work and a good call for flowers for all occasions.

The funeral of Deputy Chief Dodds of the Fire Department October 23 was the occasion of much funeral work from all the florists. A closed book arranged by Ryan, a testimonial of the members of the fire department, was an elaborate design and received much comment from the local press. R.

Evansville, Ind.

L. T. Metcalfe of Hopkinsville, Ky., well-known florist throughout the country, has established a branch in Evansville at 210 Upper Fifth street, with William Hewig as manager. Mr. Metcalfe has many acres of glass under cultivation, controlling floral stores at the following places: Hopkinsville, Ky.; Madisonville, Ky.; Clarksville, Tenn.; Jackson, Tenn., and Evansville, Ind. Dozens of beautiful roses were given away at the opening November 4.

NEW BRITAIN, CONN.—A. W. Vibberts, who purchased the Bennett estate greenhouses, is building an additional house 20x60 feet and an office 18x26 feet.

PASSAIC, N. J.—McAllister & Co. have perfected plans for the erection of a new house to accommodate their increasing business on the property adjoining the People's bank.

Greetings==
of the Wholesalers to the

Toronto.

A RECORD BREAKING BUSINESS.

Business for the month just passed was the best on record. There was a good supply of stock all through and there never was a surplus of any kind. Chrysanthemums were the favorite and we had them galore, large and small, singles and pompons, which came in fine for the many weddings and other decorations. Along with this was a good transient trade and the usual run of funeral work. The florists' windows about town are a pleasure to behold and are no doubt responsible for considerable of the increase in transient trade. Very large chrysanthemums are shown and through these are intermingled the single and pompon varieties, which give a very artistic effect. Roses have been in excellent quality and though scarce at present have generally been plentiful enough to fill orders. Added to the usual varieties grown in this section, Rhea Reid and Melody are proving strong favorites and will be grown more extensively another season. Richmond, the two Killarneys, and Mrs. Jardine have been much in demand, while American Beauties have been very scarce. Orchids have been plentiful and good and found ready sale. Violets are scarce. The coming week will see an advance in prices, roses of the ordinary varieties selling up to $10 per 100; carnations, $3 and $4; violets, $1.25; chrysanthemums, from $5 to $25; pompons and singles, $1 and $1.25 per 100.

NOTES.

W. E. Mackay of Dundas street has been cutting some fine cattleyas. The surrounding property has been pretty well covered with factories and as a good offer has been made for his premises he is contemplating moving further out, away from the smoke and soot.

W. Tattle has had a large quantity of dahlias this fall, but the frost on October 30 finished them, which makes a long season for Our Lady of the Snows. He grows varieties which he knows are good commercially and the daily cut ran into the thousands.

J. S. Simmons has purchased the business formerly owned by Thos. Plumb of Yonge street and now has a very fine branch store, the windows are kept attractive and it should prove a good investment.

Ernest Graham, formerly of Reservoir Park and Trethewey Model Farm, has started into the retail store trade on Queen street. He is in a good section where there is not much competition.

Albert Houle is the first on the market with sweet peas. He has considerable space devoted to these and has timed his plantings to give a continuous crop until next season.

Wm. Jay, well known and well liked by the local florists, died October 21. He was injured in a street car accident about four years ago and never quite recovered.

Park Commissioner Wilson died while on a visit in British Columbia and it is expected the body will be brought here for burial. H. G. D.

BUSINESS QUIET.

Business has not been as brisk the last few days as it was one or two weeks ago. Chrysanthemums are plentiful and cheap, there not being much call for the small blooms, but large Major Bonnaffons and large whites sell readily. Violets are plentiful with but little demand. The outlook for Thanksgiving is for good business with plenty of stock.

NOTES.

The Retail Florists' Association voted in August to have all the retail stores in the city and suburban towns close at noon on Sundays, which has been followed ever since the action was taken.

The fall show of the Pacific Coast Horticultural Society was a great success. There were fine displays of large chrysanthemums and choice dahlias of the best varieties. S.

MARIETTA, O.—The Marietta Floral Co. had a largely attended opening at their greenhouses November 4. They also have opened a branch store at 121 Putnam street. The officers of the company are O. Brent Gard, president; Charles Penrose, vice president; B. A. Plumer, secretary.

Leaders For 1912

CARNATION WASHINGTON.

Washington Dark pink sport of Enchantress, Like all the Enchantress family leaders in their respective colors.

White Wonder is certainly a wonder, both as a pure white and a producer, giving us twice as many exceptionally fine blooms as White Perfection.

Pink Delight Better than ever and best in its class.

Gloriosa Medium shade of pink very fine large flowers.

The above varieties ready for January delivery, **$6.00 per 100; $50.00 per 1000.**

	Per 100	Per 1000
White Enchantress	$3 00	$25 00
White Perfection	3 00	25 00
Victory	3 00	25 00
Beacon	3 00	25 00
Rose Pink Enchantress	3 00	25 00
Dorothy Gordon	3 00	25 00
Enchantress	3 00	25 00
May Day	3 00	25 00

Chicago Carnation Company,

A. T. PYFER, Manager.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H. Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

Next annual convention, June, 1912.

THIS season's trip of the European seed growers' representatives will be largely one of amelioration.

"FLOWERS" is the title of a new monthly to be issued by the Suburban Press, the first number to appear January, 1912.

HAMBURG growers of lily of the valley claim that though prices are very high, the demand is very dull. Nothing unusual about that.

NEW YORK.—James J. Comont, of James Carter, Dunnett & Beale, London, Eng., is calling on the seed trade. This is Mr. Comont's twenty-ninth trip.

INVITATIONS are out for the wedding of Dr. Roger T. Vaughan, eldest son of J. C. Vaughan, Chicago, and Miss Frances Louise Lord, daughter of Dr. and Mrs. John Prentiss Lord, of Omaha, Neb., November 9.

THE sphagnum moss situation does not improve. Most of the pulled supply in sight is undried and this has frozen. It is an even chance that this will not thaw out and if it does not, burlapped stock will hardly be obtainable.

PHILADELPHIA, PA.—W. Atlee Burpee & Co. report lively demand for sweet peas and another advance in garden carrot seed.—The Henry F. Michell Co. advises that fall bulbs are cleaning up very nicely. During the last few days of cold weather orders have been rolling in very rapidly. This firm's line of bulbs is still complete.

CHICAGO.—Prices on the Board of Trade, November 8, for grass seed were noted as follows: Timothy, $13.50 to $15.50 per 100 pounds.—Vaughan's Seed Store reports bulb trade holding up strong for this time of the year. The new stock coming in, spirea, lily of the valley and the like, adds to the interest.—Peter Hollenbach is building a new 3-story and basement warehouse at 808 West Lake street, slightly west of Halsted street, and expects to occupy it soon after the first of the year.

Wisconsin Seed Notes.

The outlook for many varieties of vegetable seeds is not encouraging, writes A. Currie & Co., Milwaukee, Wis., deliveries being far short of contracts, and many late crops have suffered severely from the excessive rainfall in October. Prices will be very high in some lines, too high, we fear, to permit market growers planting the usual acreage. This particularly applies to peas, which we believe have gone beyond the mark where it is profitable to grow them in many sections for the market. The demand for fall bulbs has been far beyond expectations, and are almost entirely cleaned up on all lines.

W. W. Johnson & Son, Ltd., Boston, Eng.

W. W. Johnson & Son, Ltd., Boston, Eng., formally opened a new 5-story and basement warehouse, 40 feet wide, 160 feet long and 52 feet high, with much ceremony October 26, and the Boston Guardian of October 28 takes advantage of the occasion to give an exhaustive account of the firm and its work, with portraits of its leading members. From this we gather that the business was established by William Wade Johnson in 1820. The present members of the firm are F. Calder Turner, J. K. Woodhead, E. J. Deal, manager, J. W. Thorne and Alfred de B. Johnson, secretary. An extensive line of garden, field and grass seeds is grown and handled by this firm, Swede and other turnips being among the leading novelties.

Papered Seeds in Canada.

The amendment to the Canadian seed control act with reference to papered seeds having the year in which they are filled printed or stamped on the outside of packet, came into effect July last and is the law in Canada. This act or law applies to any and all papered vegetable and flower seeds sent through the mails or when sold by the retail trade. Any papered goods coming into Canada are subject to the same restrictions. We have every reason to believe that those having charge of the government seed branch at Ottawa will see that the order is obeyed. While this dating of papered seeds will be an item of expense to the packet seed trade it should work for the benefit of the planter and prevent the indiscriminate sale of old and worthless seeds that may have been carried over an unknown time by the seller without any regard or care for the success of the planter.

While the Canadian seed trade have this new seed act to contend with, they also have their troubles in securing supplies for the coming season. The same conditions as prevail in the United States and Europe equally affect the trade in Canada. Even with Canadian grown supplies they are exceedingly short of an average crop. It will be a very trying season both for the dealer and the planter.

STEELE-BRIGGS SEED CO.

Duty on Pandanus Seeds.

The following decision has been made by the general appraisers overruling the protest of Maltus & Ware, New York, claiming that pandanus utilis seed should not be classified as seeds not specially provided for, but were free of duty as palm nuts.

The evidence seems to disclose that this commodity has been known for some time in the commercial world as palm seeds. It appears to be the seeds of a species of pine, sometimes called the "screw pine," and is in no sense the product of the palm tree. Just what is intended be covered by the term "palm nut" in the statute we are unable to determine, and there has been no testimony or evidence to enlighten us upon that point. The record does not disclose that the term "palm nut" is used in the commercial world. We have passed upon this same commodity in two previous cases where the records were as meager, apparently, as in this case. In both instances we have reached the conclusion reached here and declined to hold the commodity free under the provision for palm nuts. We do not think it is any true sense a nut. It consists a thick fibrous covering, containing in its inner parts a number of small orifices in which the germinating portion of the seed is found.

GODFREY'S SUPERB

"Canterbury Bells"

(Campanula Medium Calycanthema.)

Without doubt the finest strain of this useful and ever-popular plant yet offered.

ON EVERY POINT SUPERIOR TO ALL OTHERS

The plants are models in growth, of pyramidal form, from 3 to 4 feet in height, and, as pot plants for cool greenhouses, they are extremely valuable.

The flowers are much larger than those of other strains; of perfect form, i.e., sound both in cup and saucer. The colors are very varied, in about ten shades of White, Blush, Rose Pink, Deep Pink, Mauve, Blue, Lavender, Lilac and Violet.

SEED At present can be sold in mixture only. **PRICE: One Shilling and Six Pence per packet. Trade Price, Twelve Shillings per doz.; Ninety Shillings per 100.**

Boddington's "Quality" Tulips

DECORATION DAY OR MAY FLOWERING; DARWIN, ETC.

Live, up-to-date and progressive, we might say aggressive, florists are planting more and more every year, the above useful and profit-bearing Tulips—because once planted they bloom from year to year with increasing value. With their immense flowers and long stems, (sometimes nearly three feet) and variety of colors, they sell as quickly again as the early varieties and come at a season when they are always welcome.

	100	1000
Bizarres. Handsome, rich flowers, with yellow ground, feathered or striped with crimson, purple and white; finest mixed	$1.00	$9.00
Bouton d'Or. Has deep clear yellow, globular, medium-sized blossoms, with curious black-anthered stamens	1.00	8.75
Byblooms (Violets). Late Tulips with white ground, blotched, striped or feathered with lilac purple, violet, blue or black; finest mixed	1.25	10.00
Darwins. Very large flowers of good shape, on tall, strong stems; for brilliancy of color they surpass any other Tulip; they include every known shade from the lightest tint to the brightest hue; finest mixed	.85	7.50
Elegans, Dark crimson, beautifully reflexed	1.75	15.50
Gesneriana macrospila. Crimson-scarlet, black and yellow center	.85	7.50
Golden Eagle. A showy and attractive variety. Color a rich deep yellow red. It blooms about the same time as Gesneriana major	.85	7.50
Golden Crown. Is a showy and attractive variety, with a rich deep yellow color, and the petals edged and tinged with red. It blooms about the same time as Gesneriana major	.75	6.00
Maiden's Blush, or Picotee. Clear white, margined on the edge with pink. The flower is beautifully curved, but it is somewhat difficult to give a correct idea of the color. When it opens the petals are white and margined or penciled with pink to cerise. After two or three days the flowers change to a deep rose, and, unless one is acquainted with it, it would not be recognized as the same Tulip. It stands remarkably well when cut	1.00	8.75
Parisian White. Rich lemon-yellow, with deeper center	1.25	10.00
Royal White. Pure white	2.00	18.00
Vitellina. Pale primrose, passing off to pure white, a tall and exceedingly handsome variety	1.75	15.50
Boddington's "Quality" Superfine Mixture May-flowering Tulips, for acclimating, and for planting in herbaceous or shrubbery borders	.75	6.50

Choice May-Flowering, or Decoration-Day Tulips.

	100	1000
Caledonia. Bright orange very beautiful variety	$1.25	$10.00
Gesneriana Ixiodes. Beautiful yellow, with black center	$4.25	$40.00
Ellen Willmott. Undoubtedly the finest May-flowering Tulip; flowers very large, beautiful form and of a soft creamy yellow; very fragrant	4.50	42.00
Inglescombe Scarlet. Very brilliant scarlet, black base; a grand variety	1.75	16.00

Darwin Tulips

(To Name)

Darwin Tulips are among the most varied and beautiful of all the late Tulips. Planted in the border they come into flower in late May and June. Flowers are large and borne upon tall, erect stems. Like the Mayflowering Tulips they are indispensable for Decoration Day.

	100	1000
Ant. Roozen. Large flowering; rosy pink	$3.00	$27.50
Baronne de La Tonnaye. Clear rosy carmine	1.50	14.00
Dream. Soft lilac	1.75	15.50
Loveliness. Soft rosy carmine; exquisite color	1.75	15.50
Mrs. Krelage. Large flower, soft rose, margined blush; very beautiful	2.75	26.00
Painted Lady. Creamy white	1.75	15.00
Pride of Haarlem. Rose, with blue base; flowers of great size and fine form	2.00	18.00
Rev. Ewbank. Vivid heliotrope-lilac, slightly bordered	2.50	22.00
Darwins, Mixed. All colors, in splendid variety	.85	7.50

SINGLE NAMED TULIPS,

ALL FIRST SIZE FLOWERING BULBS ONLY.

	100	1000
Artus, Dark scarlet	$0.85	$7.50
Belle Alliance. Scarlet; good bedder	1.65	15.50
Cardinal's Hat. Dark red	.80	7.00
Canary Bird. Beautiful late yellow	1.00	7.50
Chrysolora. Pure yellow; handsome flower	.85	6.50
Cramoisie Brillante. Bright scarlet	1.00	8.75
Crimson King. Bright crimson; showy bedder	.85	7.50
Duc van Thol. Red and yellow	1.00	8.00
Duc van Thol, Crimson	1.00	8.50
Duc van Thol. White (maximus) (true)	.85	7.00
Duc van Thol, Scarlet	1.25	12.00
Duc van Thol. Rose	1.25	10.00
Duc van Thol. Yellow	1.75	15.00
Golden Queen. Very large yellow; fine globular form; the finest of its color	1.75	15.50
Joost van Vondel. Cherry-red, white-feathered	$1.25	$12.00
La Reine. White, slightly rose-shaded; good forcer and bedder. Florists' **Quality** stock	.85	7.50
La Reine. First size	.75	5.75
La Matelas. Deep rose, edged white; fine for January forcing	2.00	19.50
L'Immaculee. Pure white; good forcer; early	.75	6.25
Maas. Dazzling scarlet; splendid variety for bedding	2.00	18.25
Pottebakker, Scarlet. Bright scarlet	1.40	13.00
Pottebakker, Pure Yellow. Large; pure yellow	1.75	15.50
Prince of Austria. Brilliant orange-vermilion	1.25	11.75
Proserpine. Rich, silky rose; early forcer	1.75	16.75
Princess Marianne. Fine white.	.85	8.25
Royal, or Silver Standard. A good white	$1.65	$15.50
Vermilion Brilliant. Bright scarlet and vermilion; excellent for pots, and very showy bedder.	1.50	14.75
White Hawk (true). Very large pure white; early	1.35	12.50
Yellow Prince. Pure yellow; one of the finest yellows for bedding or forcing	.85	7.50

Single Tulips to Color

Red, mixed, to color	.75	7.00
White, mixed, to color	.75	7.00
Yellow, mixed, to color	.75	7.00
Pink and Rose, mixed, to color	.75	7.00

Superfine Mixed Single Tulips.

This mixture is made up of equal proportions of the best bedding Tulips, comprising a variation of color and shades that make them very effective when massed in beds. 75 cts. per 100; $7.00 per 1000.

Fine Mixed Single Tulips

A mixture of good bedding Tulips for planting or selling over the counter to your retail customers, 60 cts. per 100, $5.50 per 1000.

CROCUS, (Mammoth Bulbs.)

	100	1000

Double White Killarney

This Rose, in the opinion of the best Rose Growers in the country, is

The Most Needed Forcing Rose That Has Ever Been Offered

Pure white, or practically so, with size, substance and petalage, it is a wonderful white summer rose, and as a winter forcing rose it has no equal.

Killarney Queen A cerise pink, with the same petalage as Killarney, but in growth and character of bloom it is stronger and heavier than Killarney.

These are the roses shown at the Baltimore Convention in August. Awarded Certificate by the Chicago Florists' Club. See them at Milwaukee and Cincinnati. They will be at Detroit in January.

Each variety considered separately; prices the same.

Holiday Crops.

The greenhouse grower should make every effort to come in with good crops of fine quality for the holidays. Not only for the direct profits received, but for the standing it gives him with the trade. Full deliveries, on time, and fine quality, are appreciated and not easily forgotten, and future business comes easiest. In our locality there is an extraordinary demand for Scarlet Globe radishes for Christmas, owing, no doubt, to their fine color. If well done and neatly bunched, enormous quantities can be sold at good figures. The experience with lettuce is otherwise; during several seasons past the Christmas sales of lettuce have not been above normal with us, hence we do not figure so heavily; but what the trade demands is a smaller leaf lettuce, the kind that averages one-fourth pound per head is most desirable. If this is clean of aphis, and tender, it will suit the market. Head lettuce will be in heavy demand if well headed and the grower who has good stock is sure of sale, either the southern kind or the greenhouse grown. Tomatoes are gaining in favor and we believe the time is coming when they will be much more of a factor than now. People are gradually appreciating the quality of greenhouse tomatoes and are slowly learning to pay the price. This matter of price is the stumbling block, as too often the returns have been insufficient.

In the line of special effort much can be done. Radishes require six weeks at this season and can stand more heat than lettuce, hence if slow some forcing can be done. As a stimulant, nitrate of soda and sulphate of potash in small amounts applied direct to ground between the rows is a help to radishes, leaf lettuce, parsley, onions and cucumbers. It is ruinous to head lettuce owing to its leaf making tendency; for head lettuce we rather use the potash and fine bone meal, no nitrates. For green onions, Egyptian outdoor grown clumps can be placed into heat about three weeks before wanted, and a fine growth of succulent green produced in full light. Tomatoes can be accumulated by picking those showing color, wrapping in paper and storing in a cool place. The houses can thus run fairly warm to develop all we can. A few degrees more heat will often bring in many a pound of mushrooms, say for a week previous to Christmas. The market gardener will find choice celery his best card and no pains should be spared to put it up in attractive shape.

MARKETMAN.

NEW YORK.—E. C. Haines & Co., Bedford Hills, have become incorporated to carry on a general florist and nursery business with capital stock of $75,000. E. C. Haines, E. Krutsch, and W. R. Adams, all of Bedford Hills, are the incorporators.

Quality Versus Appearance in Celery.

Celery is bought, the same as lettuce, by two classes of buyers—one class buys to eat, the other for decoration of their tables. It will be seen that where one buyer is willing to pay a handsome price for quality, the other buyer is indifferent to that part and looks for size and showiness only. This latter class is perfectly satisfied with the kind of celery shipped from Florida in the winter, while the buyer to eat cannot find anything to attract him to this southern product. There is a great difference in varieties as regards quality; thus we have in the showy White Plume a comparatively poor eating celery. The next thing to it is Silver Self Blanching, a cross between White Plume and Golden Self Blanch. This variety retains the showiness of the White Plume and nearly approaches its other parent in quality. It is also much dwarfer in growth, which is desirable.

Golden Self Blanching, when well done, is the ideal celery for America, and will outsell anything else in the celery line. If this variety was stronger in constitution and at all resistant to blight it would be near perfection: as it is, it is hard to grow and is easily damaged.

Giant Paschal is considered the best of all celeries from an eating point of view, but it is defective in many ways. It lacks heart, has too few stalks and rusts easily while bleaching and when well done can only be handled with great care, rendering it unfit for wholesale trade where handling is unavoidable. Of the later green varieties we believe the newest comer, Winter Queen, the best. It is short and stocky, has a perfect heart, bleaches yellow, is tender enough for the average trade, yet will stand bunching and handling; is a good keeper and the safest for late sales. Our crops now are Golden Self Blanching and Winter Queen.

The man who has an exclusive retail trade may very well cater to quality, but the grower for wholesale markets, especially for shipping, must necessarily look to size and appearance first. Bleaching, of course, is a big factor. No kind of celery is fit to use without bleaching and the skill applied there, combined with proper conditions of temperature and moisture, determines the final product as much, or more so, than the variety employed.

MARKETMAN.

PITTSBURG, PA.—The annual chrysanthemum show at Schenley Park opened October 29 with twenty thousand flowers in bloom. Foreman Jones received much commendation for the beautiful display.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N. Y., Sec'y

Thirty-seventh annual convention to be held at Boston, Mass., 1912.

THE Ohio Experiment Station has issued a statement warning people against the exorbitant prices and the misrepresentations of unscrupulous parties purporting to represent nursery firms of both known and unknown reputation. Catalpa one-year-old seedlings have been sold at from $20 to $40 per thousand, and to enhance sales statements were made that the tree would grow to post size in three years and pole size in six years and that 5,000 trees were required per acre.

Hawthorns in the Arnold Arboretum.

For persons who are interested in the showy fruits of trees and shrubs which remain on the branches until late in the autumn or through the winter this is a good time to study the American species of hawthorns (Crataegus), although the leaves of many of these plants have already fallen, remarks the Bulletin of the Arnold Arboretum. A large part of the species in the collection were not known ten years ago and many of these plants are still too small to produce fruit, and now are the most interesting American hawthorns in the Arboretum.

The handsomest American species to be seen here now is Crataegus nitida, one of the best garden plants of the genus as it is represented in North America. It is a native of the bottomlands of the Mississippi River in Illinois opposite St. Louis where it grows into a tree of considerable size for a hawthorn. It is flat-topped with wide-spreading branches; the leaves are dark green and very lustrous; the small flowers are produced in innumerable clusters, and the fruit of medium size which now covers the trees is orange-red, long persistent and makes a good contrast to the bright red and yellow leaves which have hardly begun to fall.

Crataegus coccinioides and C. fecunda from the neighborhood of St. Louis, like C. nitida, have been growing in the Arboretum for thirty years and are now broad bushy trees covered with fruit, although the leaves are beginning to fall. Crataegus coccinioides has large broad leaves and very compact semiglobose clusters of large flowers which are followed by a large dull red globose fruits, which are also in compact clusters and are produced every year in great confusion. Crataegus fecunda is one of the so-called Cockspur thorns with large, thick, shining leaves, rather small flowers, and large, oblong, drooping, shining fruits which do not all fall until winter.

Crataegus pruinosa can also be seen here covered with fruit although the leaves are gone. This small tree is the type of one of the distinct and most widely distributed groups of the genus, the pruinosae, which are distinguished by their large showy flowers, thick leaves and fruit which matures late in the autumn without becoming soft, sometimes remaining green and sometimes turning bright red and usually covered with an abundant glaucous bloom. On Crataegus pruinosa the large, depressed, globose fruits turn bright scarlet and remain on the branches in good condition until late in the season; these, as well as the large blue-green leaves and the large flowers with the bright rose colored anthers of the twenty stamens, which are produced in wide and abundant clusters, make this a desirable ornamental plant.

Equally handsome but quite different in appearance is Crataegus succulenta, one of the tomentosae group. This is a late-flowering species with small flowers in broad flat-topped clusters; these are succeeded by globose fruits drooping on long stems, and until October remain small and hard but later, and when fully ripe, enlarge and become deep scarlet with soft, orange-colored, succulent flesh, and in this condition are soon eaten by birds.

There is also a plant of Crataegus Carrierei. This small tree is of doubtful origin, all the individuals having been obtained from a single seedling which appeared spontaneously several years ago in the nursery of the Jardin des Plantes in Paris. In some ways it resembles some Mexican species and it might be Mexican did not its hardiness in the Arboretum indicate that its home was in a colder country than Mexico. The fact that seedlings are identical with the parent seems to preclude the idea of hybrid origin; but whatever this may have been Crataebus Carrierei is an ornamental plant of the first class. It is now covered with its thick, pointed, lustrous leaves which are still green or only slightly tinged with yellow and which set off to advantage the large, light orange-red oblong fruits which are produced in great abundance.

Very beautiful, too, now, October 31, is the Washington thorn, Crataegus cordata, of the foothill region of the southern Appalachian Mountains and of southern Missouri, although it will be more beautiful probably a fortnight later when the leaves will have taken on their bright autumn colors of orange and scarlet; now they are just beginning to turn red and the shining surface contrasts beautifully with the small round scarlet fruits. The Washington thorn should be more generally planted for it has much to recommend it. It is a slender, narrow tree, sometimes thirty feet tall; it is one of the latest of the hawthorns to flower and the flowers, which are not large and dull-white in color, are produced abundantly. The leaves are small and nearly triangular, and the fruit, which ripens in October, remains in good condition on the trees until spring. The only objection to this tree is the brittleness of the branches which are often split or broken by severe storms.

Some of the shrubbery hawthorns, like Crataegus Buckleyi, C. foetida, C. apposita, C. nemoralis, etc., are old enough to show their habit, and the beauty of their autumn foliage and of their fruits. The plants of this group, which is called Intricatae from the first species described in it, are all small shrubs, or occasionally small trees in the south, with very large flowers and large, highly colored fruit. Species in this group are found from New England to Georgia; and to Ontario, Michigan and Missouri; they appear to be most abundant in Pennsylvania, but are rare in the west. Until a dozen years ago they had been entirely overlooked by American botanists and were unknown in gardens, with the exception of Crataegus intricata, which had been grown and described in the Botanic Garden at Copenhagen. Nearly all the species which are known are well established in the Arboretum and promise to become an important contribution to American gardens in which their dwarf habit, large flowers and handsome fruits will make them valuable.

Roses in Cuba.

We are much interested in roses in Cuba, but find that they do not come up to the descriptions which are given them by the American rose firms. We bud them all on a non-blooming stock which we have here, it is very easily rooted and a very vigorous grower, and one, that if it would stand the cold, would, we believe, be a magnificent stock for the rose grower in America. We have the following kinds which have done very well, American Beauty, Killarney, Perle des Jardins, Kaiserin Augusta Victoria, Helen Gould, Paul Neyron, Maman Cochet, and a few others the names of which have been lost, but they are not of any particular value. We would be glad to receive suggestions as to other varieties and where they can be obtained, and we would give them a trial. There is a small demand for roses from the Americans here, and the Cubans are great flower lovers, especially of roses of high colors, and all the court yards are small gardens of flowers.

HOLTON & HUNKEL CO.,

462 Milwaukee Street, MILWAUKEE, WIS.

Buffalo.

AN OVERSUPPLY OF CARNATIONS.

Trade the past week has been good. Several debutantes were presented and a number of weddings were on the calendar, consequently the florists have been busy. Flowers have been equal to all demands. With carnations in pink and white in over stock. Chrysanthemums are getting more plentiful and of better quality.

NOTES.

Funeral work has been very good. The death of one of the firm of the Tonawanda Iron & Steel Co. was the occasion of a large quantity of flowers. An elaborate blanket of pink roses and lily of the valley, arranged by Anderson, was very beautiful, while other designs of elaborate workmanship were furnished by other florists; also a fine lot of loose flowers. The arrangement of the flowers was in S. A. Anderson's care.

Politics attract florists or florists are sought for political offices. We have Chas. Schoenhaut for councilman, W. A. Adams for supervisor, and now it is Judge Boettger of Eggertsville. R. E. Boettger has been nominated for justice of peace in the town of Amherst. Success to you, Rudolph.

J. Benson Stafford has had a very attractive window, in fact, all of the Main street stores seem to vie with each other in attractive windows, from Palmer's lower store to Miss Sauer's, on Upper Main street.

There is talk of a flower show at North Park under the supervision of the Buffalo Florists' Club. The Park has a grand exhibit and we hope it will take place.

Decorations in W. J. Palmer & Son's Genesee store have been very attractive lately.

The meeting of the Buffalo Florists' Club has not taken place as yet.

Mrs. W. F. Kasting is seriously ill.

BISON.

WORCESTER, MASS.—Fred Madaus has been granted a building permit to erect a greenhouse on Heywood street.

FITCHBURG, MASS.—Clyde A. Lesure has purchased the flower business of Mrs. C. E. Mansfield and is making many improvements.

CHAS. BLACK, Hightstown, N. J.

HOLIDAY BOOKS.

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. $1.50.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

MANUAL OF THE TREES OF NORTH AMERICA (Sargent).—The most complete and authentic work on the subject. The pages number 826, with over 600 illustrations. $6.00.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. $4.00.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; postpaid, $1.21.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. $6.00.

The American Florist Co.
440 S. Dearborn St., Chicago.

Primula Obconica Grandiflora, assorted colors in bloom, medium large 4-in., 15c; 5½-in., 25c; bushy.

Poinsettias, 3-in., 15c; large 4-in., ready to shift into 5-in. 25c; 5½ to 6 in., single or branched, 35c 40c to 50c.

Cyclamen Grandiflora, 4-in., 25c; 5¼-in., 35c.

Primula Chinensis, John F. Rupp's so well known strain, assorted colors, 4-in., 10c.

Begonia Gloire de Lorraine.

This is another great specialty of ours. We have grown them very extensively for the past ten years. Our special treatment makes the flowers very bright. We have the bright red and the pink Lonsdale. Have a houseful. Now ready, in bloom for Thanksgiving Day and Christmas, 6 in. pots, 50c, 60c 75c to $1.00; 3-in. pots, 12c to $1.00.

Begonias New Improved Erfordi, Aschmann's Beauty, the finest Christmas and winter blooming Begonia in existence. Their beautiful pink and bright red large flowers are a puzzle to any-one who sees them in bloom; in flower now and all the winter through: large 4-in. pots, 20c; large 5¼-in. pots, 35c. Bear in mind this is an immense bloomer which has no equal.

Begonia Glory of Cincinnati, 5½ to 6 in. pots, 75c.

Another specialty of ours are now in. **Azalea Indica.** New stock. They are all in fine condition, full of buds. Now is the time to start for Christmas forcing. We have for Christmas the so well adapted standard varieties—Deutsche Perle double white; Simon Mardner and Mme. Petrick double pink; Vervaeneana, double rose variegated Price: 50c, 60c 75c $1.00, $1.25, $1.50 to $2.00 Easter Varieties—Schryveriana, Vervaeneana Simon Mardner, 50c, 75c, $1.00, $1.25 $1.50 to $2.00; Mme. Van der Cruyssen, Niobe, Empre4s of India, Apollo, Prof. Wolters, and others, in bud.

Just Arrived with the Azaleas.

A fine consignment of **Latania Borbonica,** in first class condition, perfect foliage, large stock, 8 good leaves, height given in consular invoice at 35 to 40 in., fit for 7 to 8 in pots, $1.00 to $1.50.

Combination Latania Borbonica (3 plants) in a 6-in. pot, which gives them a fine appearance, bushy, about 13 to 14 leaves to a pot, 6-in. pots, 75c to $1.00

Adiantum Hybridum, large 4-in., 15c; medium size 4 in., 10c.

Three Houses in Ferns

Pot, Not Bench Grown.

Neph. Scottii, Scholzeli and Whitmani, 4-in. pots, 15c to 20c; 5½ to 6-in. pots, 25c 35c, 40c and 50c; 7-in., 75c to $1.00.

Boston Ferns, 5½-in., 35c to 40c; 6-in., 50c; 7-in., 75c to $1.00; as large as a bushel basket.

Neph. Cordata Compacta, 4-in., 10c.

Ferns for Dishes, a good assortment, 2½-in. pots $5.00 per 100 large plants.

Pteris Wilsoni Ferns, 6 in. pans, 3 plants in a pan 25c to 35c per pan; very bushy.

Fern Balls, imported direct from Japan, already started, 50c.

What Mr. F. J. Michell, of the Well Known Seed House, Henry F. Michell Company, Philadelphia, Said:

"Oct. 28 1911.

"Have just visited the greenhouses of Godfrey Aschmann, and must say it was indeed a great surprise to me. I have never seen a better lot of Araucarias, Azaleas, Ferns and other plants in all sizes and prices as are at Mr Aschmann's."

25 at 100 rates. **Cash with order, please.**

All plants must travel at purchaser's risk.

GODFREY ASCHMANN

Wholesale Grower and Importer of Potted Plants, **1012 W. Ontario St., PHILADELPHIA, PA.**

Heacock's Palms and Ferns

Home Grown. Strong and Well Established.

Order at once, while you can have them **shipped by freight.** While our sales have been much heavier than ever before, we are still strong on sizes quoted:

Sash that pay for themselves

We know of instances where Sunlight Double Glass Sash have grown crops so much earlier and so much better that the extra prices they brought on the early market paid for the glass themselves.

Two layers of glass instead of one

The enclosed dry air space means that the sash are never covered—and the plants get all the light all the time—and this accounts for their rapid growth and sturdiness. Even in zero weather you need not cover Sunlight Double Glass Sash.

SUNLIGHT Double Glass Sash for Hot-beds and Cold-frames

What one man did

Herman F. Kaiser of Lawrenceburg, Ind., writes: "My Sunlight Sashes were put on hot-beds about February 1st, 1910, and planted to cabbage, lettuce and tomato plants. Seven degrees below zero did no harm and everything has done well in the field."

Send for these books

One is our free catalog; the other is a book on hot-beds and cold frames by Professor Massey. It is authoritative and of vital interest to all professional growers. 4c in stamps will bring Professor Massey's book in addition to the catalog.

The Burnham

Chas. H. Cook, of Catonsville, Md., Has Three Burnhams. That's Why He Says What He Says About Them.

"I have had two of your boilers working for four years and do honestly believe that they are the best sectional boilers on the market today. I was tempted to buy of another firm, but when I saw the Burnham at the S. A. F. Convention, and knowing what the Burnhams have done, I had to buy another Burnham; I could not resist."

Where There Is Condensation

——there is need for a **Morehead Steam Trap**
Condensation in steam lines is akin to matter out of place—means wasted energy.

If your lines are sluggish—if your houses are not of uniform temperature, write us. We guarantee to drain your lines perfectly—return the pure, hot condensation to your boiler without pump or injector or make no charge for the trial. Obey that impulse—write now.

Send for "Book on Condensation."

ERFURT, GERMANY, May 9, 1911.
AMERICAN FLORIST CO., Chicago, U. S. A.,
Dear Sirs:—If you have any copies left of the comparative color plate compiled by F. Schuyler Mathews, I shall be obliged it you will send me one, my copy having somehow got mislaid and I do not like to be without this excellent little production.
Yours truly, ERNST BENARY.

Published and For Sale by the
American Florist Co., 440 S. Dearborn Street, CHICAGO.
Price One Dollar, Postpaid.

Des Moines, Ia.

Trade on the whole in Des Moines has been unusually good this fall and chrysanthemums of all colors and kinds have been of a good quality and sold quickly. Carnations seem to be scarce at present, and Trillow's Greenhouses the only one that are cutting to any extent.

The Maplehurst Gardens at E. Eighteenth and Calumet streets was damaged by the hail storm of last month, but reports all glass replaced now and everything in good shape again.

J. L. Wilson Floral Co. are cutting lots of chrysanthemums and report trade as good. They have installed a new automobile delivery car and find it to be a big time saver.

The Iowa Seed Co. held a flower show at their new and enlarged greenhouses last week which was well attended. They report a good fall mail order trade

Lozier's on the east side has built a small conservatory on top of his store and it makes a very attractive display place for blooming and decorative plants.

READING, PA.—B. & L. Steckler have erected a salesroom in front of their large greenhouses, and have purchased an automobile for delivery purposes.

WALLINGFORD, CONN.—The Rowden & Mitchell Co. had a beautiful display of chrysanthemums the first of November and extended a cordial invitation to the public to visit the greenhouses and see the flowers.

Sound Greenhouse Building Methods

When Your Order for a Greenhouse Reaches Our Factory, We Make Accurate Detailed Drawings for the Various Parts Going into Your House.

One man is an expert on the wood parts—he does that; another does the iron, another with engineering experience knows about stress and strains and directs the size and kinds of supports and fittings, and so on.

Then the lay-out man indicates the length to which the pieces are to be cut and directs where all holes shall be drilled so that the house will go together like clockwork.

We tell you these things just to show you that we have completely outgrown that state of having so-called "all-around men" who do a little of everything in every line (and not much of anything that's really dependable).

You know that the only way a man can be an expert is to direct all his time and attention, heart and soul, to some one thing.

That's the kind of men our organization is made up of.

The kind of men whose service you get from us at no more expenditure in the end than for the "Jack-of-all-trades" kind who are full of guesses. Write us.

SUGGESTIONS FOR PLANT GROWERS.

Primulas.

As fast as the primroses grow space them out so that there is a good distance between each plant, and so that the leaves do not touch, allowing room between the plants for a free circulation of air. If the plants are placed on a bench with a front and back board, place boards across and set the plants on these or stand the pots on inverted pots so as to bring them up into the air. Take care in watering not to wet the foliage more than possible, or the leaves will be spotted. Many good primulas are ruined by being overcrowded and the foliage allowed to remain damp. If the plants are not going to be in flower for the holidays they can be placed in a temperature of 60° at night for a short time which will rapidly bring them along, but do not attempt a higher temperature than that, nor for any great length of time. These plants are cold-loving subjects and are more satisfactory in a house that never goes above 50° at night. Primula obconica is now blooming freely and can be kept in bloom until spring if grown cool. These plants are particularly useful in filling Christmas baskets. Care must be taken in the handling of these plants by persons who are at all subject to poisoning from coming in contact with this, rhus, or other poisonous plants, for they sometimes cause a very troublesome and irritating eruption on the skin.

Ardisias.

The berries of the ardisias should now be turning a bright red and the foliage taking on that beautiful glossy appearance which makes this plant so popular at the holidays. Where these plants are grown in great heat the berries do not color as brightly and the leaves lack that thick, leathery texture and glossy appearance, and the plants are not so satisfactory in the houses. They also chill very easily, and if this happens the berries drop off. It is much better to finish them from this time on in a bright, sunny house, with good ventilation; this will tend to color up the fruit and give the plants a much healthier appearance, and they will prove more satisfactory. We have seen these plants where grown cool and not forced hold their berries until the next year's crop was borne. Keep a sharp lookout for scale on ardisias, they quickly get covered with the brown scale unless carefully watched, and when these insects appear constant washing is the great remedy. Clean off the first that appear. "An ounce of prevention is worth a pound of cure."

Catch Crops.

With the close competition that the greenhouse man is up against at the present day it does not pay to have any of the bench room idle, or if a crop shows that it is not going to succeed and be remunerative it had better be thrown out and the room occupied by something that will pay. The several different plants and flowers have their seasons, and when they are done a succeeding crop should be all ready prepared to take the place. It therefore pays to have some catch crop ready in cases of this kind. There are many annuals that can be grown and carried along in small pots and if not used and eventually discarded the loss is small. These if planted out in the benches will bloom in the early spring and give a very welcome variety to the flowers at that season. There are many flowers grown today that were first grown as catch crops, such as the antirrhinum. Among others which might be grown this way are the centaureas, either bachelor's buttons or sweet sultans, nasturtiums, lupins, calendulas, eschschlotzias, salpiglossis schizanthus, stocks and others. There are also many of the early blooming perennials which can be lifted and heeled in where they can be easily obtained during the winter and transplanted to the greenhouse. Among these are Coreopsis lanceolata, Aquilegia cærulea, gaillardias, heuceras, sweet williams, and others which the grower has in stock. A dealer will always find customers who appreciate these flowers which are often not seen during the winter months, and by having the stock of a few of these odd

things can often plant out a section of a bench that otherwise would not be returning any revenue, and thereby prevent loss.

Massachusetts Horticultural Society.

THE WHITE MEDAL OF HONOR.

The Trustees of the Massachusetts Horticultural Society have awarded the George Robert White Medal of Honor for the current year to Victor Lemoine of Nancy, France.

This medal is awarded annually to the person who has done the most during the year or in recent years to advance the interest in horticulture in its broadest sense.

The award for the year 1911 is eminently appropriate as a recognition of the accomplishments of Mr. Lemoine in the production of so many varieties of flowering plants and shrubs which have become of permanent value to the horticultural interests of the United States as well as of Europe.

If he had done nothing more than to give to the world the Begonia Gloire de Lorraine it would have merited the award and in addition his numerous other introductions have made the name of Lemoine a familiar one to all horticulturists.

COMMITTEES FOR 1912.

The trustees announce the following list of committees of the society for the year 1912:

Finance—Walter Hunnewell, chairman; Arthur F. Estabrook, Stephen M. Weld.

Prizes and Exhibitions—John A. Pettigrew, chairman; Robert Cameron, William Downs, J. K. M. L. Farquhar, M. A. Patten, Wilfrid Wheeler.

Plants and Flowers—T. D. Hatfield, chairman; Arthur H. Fewkes, William Nicholson, Thomas Roland, William C. Rust, William Sim.

Fruits—Edward B. Wilder, chairman; William Downs, Wilfrid Wheeler.

Vegetables—Duncan Finlayson, chairman; W. N. Craig, Edward Parker.

Gardens—Charles W. Parker, chairman; Jackson Dawson, Arthur H. Fewkes, Thomas J. Grey, T. D. Hatfield, William Nicholson, William P. Rich, David Roy, Charles Sander, William Thatcher, Wilfrid Wheeler.

Library—Charles S. Sargent, chairman; Ernest B. Dane, George B. Dorr, Charles S. Minot.

Lectures and Publications—William J. Stewart, chairman; Robert Cameron, J. K. M. L. Farquhar, Edward B. Wilder.

Children's Gardens—H. S. Adams, chairman; Joseph Clark, H. S. Rand, William P. Rich, B. Hammond Tracy, James Wheeler. W. P. RICH, Sec'y.

Killing Red Spider.

ED. AMERICAN FLORIST:

Is there any other remedy to kill red spider besides syringing with water?

SUBSCRIBER.

Syringing is the easiest method to keep red spider down and if properly attended to will prevent these insects from obtaining a foothold. There are a number of remedies for this pest manufactured, Aphine being endorsed by many growers. Fumigation with hydrocyanic gas or sulphur fumes will destroy them. The latter method is often used by growers of grapes under glass when syringing cannot be practiced, but must be carefully attended to, for if the sulphur burns it means ruination of the crop. W.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

E. Wienhoeber Floral Co.'s Exhibition.

At its store and greenhouses on East Elm street, Chicago, the Ernst Wienhoeber Floral Co. held a beautiful exhibition of flowers and floral work November 8-10 to which invitations were extended to their patrons and the public. The display was greatly appreciated, for during the three days the office and show room were visited by a large number of their customers, comprising the select trade of the fashionable North Side who greatly admired the beautiful display. Upon entering the store the visitor was confronted with a grand showing of the finest flowers of the season and arrangements

Victor Lemoine.

Third Recipient of the White Medal Awarded by the Massachusetts Horticultural Society.

of artistic floral work. Large vases of chrysanthemums, both of superb specimen blooms and the smaller pompons, and vases of magnificent roses were advantageously placed, and artistically arranged baskets were so located that the attention of the visitor was immediately attracted to these beautiful creations. These were arranged of the finest of the seasonable flowers, orchids, lily of the valley, roses, and chrysanthemums, and the prospective giver of a debutante's reception or other social function could at once see what would be appropriate and desirable at an entertainment to be given. The baskets were beautifully arranged, of different sizes and forms, the baskets of cattleyas being especially noticeable and those of small chrysanthemums particularly attractive.

The show house had been entirely transformed, the stock of foliage plants being removed, the sides decorated with nicely grown chrysanthemum plants and the walls and roof hung with Southern smilax to give the place a proper setting for the floral arrangements. Here were arranged four dining table decorations, fitting examples of what might be appropriate for any occasion, two tables were rectangular in form and two round, all being set with glasses, candelabra of proper shade, and the necessary silver ware. The first table was oblong in shape and had a beautiful arrangement of assorted roses as a center-piece, and this was extended to other arrangements toward the ends by low arches of smilax through which smaller flowers were placed. The next table being round contained for the center a basket of Mrs. Jardine roses and four smaller arrangements of Bouvardia Humboldti. The third table, longer and narrower, was a very simple arrangement of pink bouvardia in white china ware which was particularly attractive for its simplicity and artistic handling. These three tables were all arranged low so that guests seated could easily overlook all the floral work. The fourth table was much larger and round and could be either a serving table or for seated guests. The center-piece was a tall vase of pompon chrysanthemums of different colors, and upon four sides were low vases of single yellow chrysanthemums. This table was very effective in its arrangement.

A nice assortment of blooming and decorative plants was shown in the houses leading from this show house and the whole exhibition was a great success both from an artistic standpoint and the interest which it created, and must redound to the credit of this well-known firm and its floral designers.

Prices of Floral Work.

ED. AMERICAN FLORIST:

We recently received an order for a bouquet, to be delivered in New York, to consist of two dozen roses, two dozen carnations, tied with ribbon. Wholesale prices of flowers quoted in that city at that time were: roses, $4.00 per 100; carnations, 50 cents to $1.00 per 100. We received a statement charging $2.50 per dozen for roses, $1.00 per dozen for carnations and 75 cents for ribbon, totaling $7.75 for the bouquet. How is a dealer to know what will be charged at retail by a florist in another city? Do eastern florists make a profit of from 500 to 800 per cent? J. H. F.

Colorado.

It is customary in ordering floral work to place a limit on the price to be charged. "J. F. H." should appreciate the fact that in large stores designers receive the highest pay and when floral work is arranged the wages of this man must be included in the charge. If the order had been placed at a certain price, or was for loose flowers to be delivered, in all probability the order would have been filled at a legitimate profit. But with no figures to go by the dealer filled the order to the best of his ability with the highest grade stock and charged accordingly. W.

FORT MORGAN, COLO.—F. W. Weidman has sold his florist business and gone to Texas.

WOODBINE, IA.—The Southwestern Iowa Horticultural Society will hold a meeting in this city December 5-7.

ROME, N. Y.—E. J. Byam announces that he has taken over the florist business which he formerly conducted at 408-16 Elm street.

SWAMPSCOTT, MASS.—J. T. Erickson has moved his florist business to Lynn and is now located on Mudge street in that city.

THE EXHIBITIONS.

Exhibits at the St. Louis Show.

CHRYSANTHEMUMS.

The notable feature of the cut blooms of chrysanthemums was the magnificent flowers staged by the members of the Chrysanthemum Society of America, it was the drawing card, and would bring success to any show. The exhibits standing out pre-eminently were those of Chas. H. Totty and Wm. Duckham, of Madison, N. J. While these growers were the leaders the others were close up, and such blooms as were staged by Elmer D. Smith & Co., Adrian, Mich.; E. G. Hill Co., Richmond, Ind.; Mount Greenwood Cemetery Association, Morgan Park, Ill.; Poehlmann Bros. Co., Chicago; W. J. M. S. Vesey, Fort Wayne, Ind., contributed to making this the finest display of cut chrysanthemums ever seen in the west, and we doubt if taken as a whole a more even lot of blooms were ever staged than the four collections of fifty set up by C. H. Totty, E. D. Smith & Co., E. G. Hill Co., and Mount Greenwood Cemetery Association.

The notable blooms in Chas. H. Totty's exhibits were:

Mrs. Gilbert Drabble—A white of enormous size; the petals whorled around the bloom giving it a very beautiful appearance. It was shown for the Chrysanthemum Society of America cup but there were one or two blooms that were not up to the others, giving the vase of flowers an uneven look. It is a very chaste and beautiful white.

Wm. Turner—Is another white of the incurved form that will be hard to beat, and many claim for this the leading place in exhibition whites. As shown here the size is enormous.

Seedling No. 67—Bronze, is a fine bloom of this color. It is a very striking flower for exhibition collections. It is of the largest size and of good form.

T. Converse—Another bronze, also a very striking bloom of the largest size; a variety hard to beat in its color.

F. T. Quittenton and Pockett's Crimson were in elegant shape among the enormous blooms of crimson color.

The most prominent yellows among C. H. Totty's blooms were F. S. Vallis, Cheltonii, Mary Donnellan and Gen. Hutton. They were better than these varieties have ever been shown in the west; simply magnificent, deep, wide and well finished with good petalage.

Well's Late Pink as shown here and by two or three exhibitors should have special mention; they were all fine, this exhibitor being ahead in depth and color. Other fine blooms in pink were Frank Payne, Mariam Hankey, Wm. Duckham and a pink seedling from the last named variety.

Wm. Duckham, the winner of the collection of 25 varieties, staged the finest 25 blooms in the show. Notable among them were:

D. B. Crane—An oddity in light bronze with salmon shadings. It is of the Japanese type, the petals hanging down in a single row so that it gives the flower an enormous depth, the only bloom like it in the show.

Ununda—White; was one of the largest in size, but it is strictly an exhibition flower, the color being its weakest point.

Merza was as fine as ever as a white.

Lady Carmicheal is a white of fine texture and purity of color and the size is of the largest.

Wm. Turner—White; was also in fine shape; a magnificent bloom.

S. A. Naceur Bey—Light bronze; was one of the largest blooms on exhibition. These may be said to have caused a sensation.

The yellows in William Duckham's exhibits were Hon. Mrs. Lopes, Mrs. G. Hunt, F. S. Vallis and Mary Donnellan, and the other colors were equally as large. The collection as a whole was as fine as was ever shown, each bloom being a specimen in itself, and they were all of good color and texture.

Elmer D. Smith & Co., the second prize winner in the collection classes and winner of first in many of the vase classes, staged a magnificent array of blooms. The principal feature of these exhibits being the predominence of varieties and seedlings of their own raising, it is doubtful if any other firm could display so many varieties where their own creations stood out so prominently.

Naomah—Mr. Smith's fine white must be classed as one of the very best and it was shown in grand form.

Lenox—Yellow novelty of 1911; was particularly fine.

Smith's Sensation—Light pink; is a very bold flower, fine in every way.

Manhattan—Another light pink, shown here for the first time; is a fine flower of the Enchantress color, a very striking variety.

Christy Matthewson—White; is a very bold flower and will be heard from when distributed. This exhibitor had the best Col. D. Appletons in the show and fine vases of Nontero, their new white. They also had a large lot of seedlings under number, many of them showing points of decided merit.

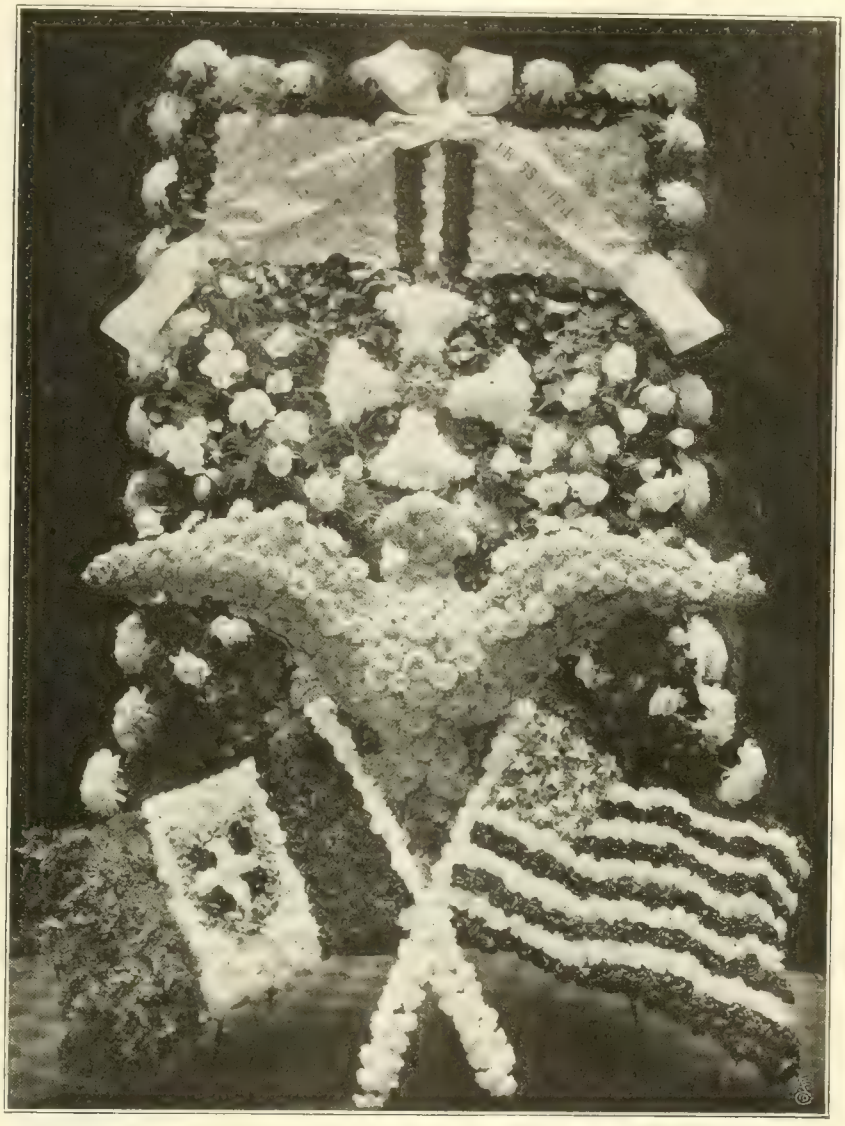
E. G. Hill Co. was the winner of the vase of 100 blooms with a magnificent lot of Chas. Razer. They also staged fine Major Bonnaffon, Golden Wedding, Well's Late Pink, Glenview, Yellow Eaton and W. H. Chadwick. In their collections the leading blooms were Gen. Hutton, Glacier, Howard Gould, Mrs. G. C. Kelley, No. 7 seedling, light bronze, Fatouma, Glenview and Mme. Carnot. This same exhibitor staged 120 varieties of pompons and singles for the best display of this type, Chas. H. Totty and Mount Greenwood Cemetery Association also having fine displays in this class.

Poehlmann Bros. Co. staged extra fine W. H. Chadwick, Timothy Eaton, Dr. Enguehard, Golden Chadwick and Major Bonnaffon.

W. J. & M. S. Vesey exhibited fine Dr. Enguehard, Golden Chadwick and Major Bonnaffon.

Mount Greenwood Cemetery Association staged fine Mrs. J. C. Neill, Randee, Golden Eagle, Mary Donnellan, O. H. Broomhead, F. S. Vallis, Glenview and a fine lot of the varieties in commerce.

The Koenig Floral Co. was the only local firm represented in the cut chrysanthemum classes.



DESIGN BY PELICANO, ROSSI & CO., SAN FRANCISCO, CALIF.

For a Member of the Italian Colony Who Died in San Francisco. See Page 942.

ROSES.

The new roses were represented by a fine vase of Sunburst from the E. G. Hill Co.—and they were particularly fine—one of its notable features here was its keeping qualities. The flowers were a little tight in bud the first day but as the week advanced they opened up and became more beautiful.

red seedling. The E. G. Hill Co. had fine White Wonder and Pink Delight, and A. C. Brown fine White Enchantress.

The chrysanthemum plants were very finely grown plants but they were not as large as is generally seen at chrysanthemum shows. The groups of plants were filled with some very cred-

THE PHILADELPHIA SHOW.

Henry F. Mitchell Co.'s Exhibit of Garden Chrysanthemum and Lord & Burnham Co.'s Greenhouse in Lower Hall. See Issue of November 11, Page 835.

A. N. Pierson, Inc., Cromwell, Conn., put up splendid vases of Killarney Queen and Double White Killarney in their usual fine form as have been shown in the west lately, and they were grand.

Poehlmann Bros. Co. were the leading exhibitors in the classes of standard varieties and the premiums won will show how fine their stock was. It was as good as they have ever shown and some of the newer varieties were staged in magnificent form, showing what they are like when grown in the Poehlmann way.

CARNATIONS.

The first day's display of carnations brought out fine exhibits of the standard varieties from the Chicago Carnation Co., who were first on four vases of fifty each with fine bunches of Dorothy Gordon, Enchantress, White Wonder and Pink Delight. A. C. Brown, Springfield, Ill., also had a fine lot, as did Poehlmann Bros. Co. and the E. G. Hill Co. The Chicago Carnation Co. also put up several vases of fine seedlings, notably among them being a red under number.

Friday's display of carnations, calling for six classes of the different colors, brought out the following exhibitors: Mount Greenwood Cemetery Association, Poehlmann Bros. Co., Chicago Carnation Co., the E. G. Hill Co. and A. C. Brown.

The Mount Greenwood Cemetery Association winning first on fifty white in competition with White Wonder, White Perfection and White Enchantress, with W. N. Rudd's new white seedling No. 14009-A. The Mrs. C. W. Ward shown by this exhibitor were particularly fine, as was a vase of crimson Mrs. A. McCrea. Poehlmann Bros. also had fine Mrs. Ward and an especially fine lot of Enchantress. The Chicago Carnation Co. had fine Pink Delight, White Wonder and their new itable stock. All of the exhibits were set up by growers from the vicinity of St. Louis. The St. Louis Park Department staged some very nice groups of palms, foliage and flowering plants which contributed greatly to the appearance of the hall. J. A. Peterson, Cincinnati, O., exhibited a very fine lot of begonias, and Adiantum Farleyense.

C. W. JOHNSON.

St. Louis Horticultural Society.

The exhibition of the St. Louis Horticultural Society continued Thursday and Friday, November 9-10, an account of the first two days of the show appearing in last week's issue of the AMERICAN FLORIST. On Thursday the vases of 50 and 25 blooms of chrysanthemums in 25 varieties, the 12 blooms of named varieties, vases of 50 roses and the bridal bouquets were staged and judged, and Friday was carnation day.

The judges for the first day were Robt F. Tesson, St. Louis; George Asmus, Chicago; Jules Bourdet, C. Bergsterman, St. Louis, and the judges the second, George Asmus and Wallace R. Pierson, Cromwell, Conn.

Additional visitors noted were A. F. J. Baur, Indianapolis, Ind.; C. E. Gullett, Lincoln, Ill.; Dr. A. S. Halstead, Belleville, Ill.; Charles Loveridge, Peoria, Ill.; H. R. Morgan, Springfield, Ill.; W. J. Vesey, Fort Wayne, Ind.; Richard Vincent, Jr., White Marsh, Md.; J. D. Carmody, Evansville, Ind.

Following are the awards for the two days:

THURSDAY'S AWARDS.

Fifty blooms, 20 or more varieties, short stem chrysanthemums—C. H. Totty, Madison, N. J., first; Elmer D. Smith & Co., Adrian, Mich., second; The E. G. Hill Co., Richmond, Ind., third.

Twenty-five blooms, 25 varieties—Wm. Duckham, Madison, N. J., first; Elmer D. Smith & Co., second; The E. G. Hill Co., third.

Twelve blooms W. H. Chadwick—Poehlmann Bros. Co., Chicago, first; The E. G. Hill Co., second.

Twelve blooms Emberta—The E. G. Hill Co., first.

Twelve blooms any other white variety—Poehlmann Bros. Co., first; Elmer D. Smith & Co., second; C. H. Totty, third.

Twelve blooms Dr. Enguehard—W. J. and M. S. Vesey, Fort Wayne, Ind., first.

Twelve blooms any other pink variety—The E. G. Hill Co., first; Elmer D. Smith & Co., second; Mount Greenwood Cemetery Association, Morgan Park, Ill., third.

THE PHILADELPHIA SHOW.

View of the Grand Stairway. See Issue of November 11, Page 822

THE PHILADELPHIA SHOW.
General View of Main Hall.—See Issue of November 11, Page 885.

Twelve blooms Golden Wedding—The E. G. Hill Co., first.

Twelve blooms Major Bonnaffon—The E. G. Hill Co., first; Poehlmann Bros. Co., second; Elmer D. Smith & Co., third.

Twelve blooms Col. D. Appleton—Elmer D. Smith & Co., first; Poehlmann Bros. Co., second.

Twelve blooms any other yellow—The E. G. Hill Co., first; W. J. and M. S. Vesey, second; Mount Greenwood Cemetery Association, third.

Twelve blooms any other color—C. H. Totty, first; The E. G. Hill Co., second; Elmer D. Smith & Co., third.

ROSES.

Fifty Richmond—Poehlmann Bros. Co., first.

Fifty Cardinal—A. C. Brown, Springfield, Ill., first.

Fifty Killarney—Poehlmann Bros. Co., first; A. & H. Warner, second.

Fifty White Killarney—Poehlmann Bros. Co., first; A. & H. Warner, second.

Fifty My Maryland—Poehlmann Bros. Co., first.

Fifty any other color—Poehlmann Bros. Co., first.

Bridal bouquet, accessories admissable—Grimm & Gorly, first; H. Young & Son, second.

Floral arrangement, engagement gift—Grimm & Gorly, first.

One hundred roses arranged for effect—Grimm & Gorly, first.

FRIDAY'S AWARDS—CARNATIONS.

Fifty blooms white—Mount Greenwood Cemetery Association, first; Poehlmann Bros. Co., second; A. C. Brown, third.

Fifty blooms dark pink—Mount Greenwood Cemetery Association, first; Poehlmann Bros. Co., second; Chicago Carnation Co., third.

Fifty blooms light pink—Poehlmann Bros. Co., first; Chicago Carnation Co., second; The E. G. Hill Co., third.

Fifty blooms red—Chicago Carnation Co., first; Mount Greenwood Cemetery Association, second; Poehlmann Bros. Co., third.

Fifty blooms any other color—Mount Greenwood Cemetery Association, first.

Fifty blooms one or more varieties—Chicago Carnation Co., first; Poehlmann Bros. Co., second; Mount Greenwood Cemetery Association, third.

Display of violets and lily of the valley—Henry F. W. Aue, first; Grimm & Gorly, second.

Dutchess County Horticultural Society.

The seventeenth annual exhibition of the Dutchess County Horticultural Society was one of the most successful ever held. While the attendance was not what it should be the society feels that they will come out all right financially. The quality and quantity of the blooms this season were fully up to the high standard usually seen at the show. Much attention was attracted to the new chrysanthemum Poughkeepsie which is a very fine cream white exhibited here for the first time this season.

The society tried out a new scheme this season, that of having the public judge the dinner tables by popular ballot.

The rose and carnation classes were very well filled. Two new seedling carnations were shown, one by F. E. Witney of Fishkill, who won the society's silver medal, and another by The Saltford Flower Shop of Poughkeepsie.

The display of single chrysanthemums was exceptionally large. The group exhibited by W. J. Osterhoudt, gardener for Wm. P. Clyde, won first prize in its class. Most of the specimens shown were Mr. Osterhoudt's own seedlings.

The following were the awards:

Chrysanthemums in pots—Best 12 plants, distinct varieties: William P. Clyde, New Hamburgh (H. J. Osterhoudt, gardener), first; Archibald Rogers, Hyde Park (James Koegan, gardener), second.

Best six plants, six varieties—W. P. Clyde, first; Archibald Rogers, second.

Foliage and flowering plants. For the best group of ornamental and flowering plants arranged for effect—Saltford Flower Shop, first; Archibald Rogers, second.

Groups of ornamental foliage—Archibald Rogers, first.

Japanese chrysanthemums—William P. Clyde, first; Archibald Rogers, second.

Single chrysanthemums in pots—William P. Clyde, first; Winthrop Sargeant, Fishkill (Frank Whitney, gardener), second.

Table decorative foliage plants, ferns excluded—F. W. Vanderbilt (H. J. Allen, gardener), first; William P. Clyde, second.

Best specimen plant, asparagus—Archibald Rogers, first.

Best specimen fern—Winthrop Sergeant, first; Archibald Rogers, second.

Cut Flowers. Best 36 blooms, 6 varieties—Frederick W. Vanderbilt, first; Ogden Mills, second.

Best 12 blooms, white—F. W. Vanderbilt, first.

Best 12 blooms, any color—Ogden Mills, Staatsburgh (James Blair, gardener), first.

Best six blooms, pink—Stuyvesant Fish, Garrisons (Wm. MacBean, gardener), first.

Best six blooms, yellow—F. W. Vanderbilt, first; Ogden Mills, second.

Best six blooms, crimson—Stuyvesant Fish, first.

Best six blooms, incurved, any color—Wm. P. Clyde, first.

Mrs. Archibald Rogers prize. Best twenty American Beauty roses—F. W. Vanderbilt, first; Archibald Rogers, second.

Elmer D. Smith Co. prize for best six blooms chrysanthemums, Poughkeepsie—F. W. Vanderbilt, first.

Irving Grinell prize. Best arranged basket of chrysanthemums, open to all—Archibald Rogers, first; Winthrop Sargent, second.

Mrs. Andrew Zabriskie prize. For Society prize for private gardeners. 50 double blue violets in one bunch—Ogden Mills, first; F. W. Vanderbilt, second.

Clarence Lown prize. Best collection of hardy chrysanthemums—Archibald Rogers, first.

R. W. Allen and James Blair prize. Best six plant chrysanthemums, six varieties—Wm. P. Clyde, first; G. L. Hoyt, Staatsburg (David Harrison, gardener), second.

Clarence J. Reynolds prize. Best six plants celosia—Wm. P. Clyde, first; A. Rogers, second.

Julius Roehrs Co. prize. For best table of orchids and ferns in pots or pans—Saltford Flower Shop, first.

Best collection of named varieties of fruit—A. Rogers, first.

Best 12 onions—John Blakeley, Hyde Park, first.

Arthur T. Boddington prize. Twenty-five named vegetables grown outside or under glass—F. W. Vanderbilt, first; G. L. Hoyt, second.

George Burgevin prize. Best vase of 25 roses arranged for effect—Saltford Flower Shop, first; Winthrop Sargeant, second.

E. T. Hulst prize. Best named varieties of apples—F. W. Vanderbilt, first; A. W. Rogers, second.

Horatio N. Bain prizes. Best plate mushrooms—F. Heeremans, first; Winthrop Sargeant, second. Best 12 head of celery—Oscar Weidmer, Wappingers Falls, first; John Blakely, second.

Peter Henderson prize. Best 12 named varieties of vegetables—F. W. Vanderbilt, first; G. L. Hoyt, second.

The judges of flowers were William C. Russell of Millbrook; George Middleton, Tarrytown, and R. H. Allen of Hudson.

E. McMULKIN'S TABLE OF FRUIT AT THE BOSTON SHOW.

Twenty-four blooms, distinct varieties—A. J. Loveless, Lenox, Mass, first; F. W. Vanderbilt, second.

Twelve blooms, distinct varieties—A. J. Loveless, first; F. W. Vanderbilt, second.

Six blooms, distinct varieties—A. J. Loveless, first; Samuel Sloane Estate, Garrisons (R. K. Miller, gardener), second.

Best six vases, single chrysanthemums—Wm. P. Clyde, first; F. W. Vanderbilt, second.

Anemone flowered chrysanthemums, three varieties—Wm. P. Clyde, first.

Best collection, three varieties—Valentin Burgevin's Sons, Kingston, first.

Twelve roses, pink—Valentin Burgevin's Sons, first; Saltford Flower Shop, second.

Twelve roses, white—Valentin Burgevin's Sons, first; Ogden Mills, second.

Twelve roses, crimson—F. W. Vanderbilt, first; Ogden Mills, second.

Twelve roses, disseminated, 1910-1911—Valentin Burgevin's Sons, first.

Light pink carnations—Benjamin Willig, Poughkeepsie, first.

Dark pink carnations—F. W. Vanderbilt, first; Samuel Sloane Estate, second.

Red carnations—Benjamin Willig, first.

Variegated carnations—Saltford Flower Shop, first.

Crimson—F. W. Vanderbilt, first; Saltford Flower Shop, second.

White—Benjamin Willig, first; Saltford Flower Shop, second.

Twenty-four blooms, three varieties. (This class open to private gardeners only.)—Fred Heeremans, Lenox, Mass, first; Ogden Mills, second.

Best seedling carnations—Winthrop Sargeant, first.

SPECIAL PRIZES.

The G. L. Hoyt prize, for best 12 pink Killarneys—Valentin Burgevin's Sons, first.

William P. Clyde prize, for 36 blooms of chrysanthemums, 12 varieties—F. W. Vanderbilt, first; William P. Clyde, second; Ogden Mills, third.

best 12 blooms of white Killarney rose—Valentin Burgevin's Sons, first; Ogden Mills, second.

Frank B. Lown prize. For best six plants Begonia Lorraine—Winthrop Sargeant, first; Saltford Flower Shop, second.

Winthrop Sargeant prize. For vase of 25 chrysanthemums arranged for effect—Winthrop Sargeant, first; Archibald Rogers, second.

Charles Mitchell prize. Best 100 double blue violets, in two bunches of 50 each—William Feierabend, Poughkeepsie, first; Benjamin Willig, second.

Massachusetts Horticultural Society.

The annual chrysanthemum show of the Massachusetts Horticultural Society was held in Horticultural Hall, Boston, Mass., November 9-12. The show was a ghost of its predecessors and had not the commercial men stood by it, it would have been a failure as regards entries. There being no exhibit last fall, the private gardener must have gone to seed, as far as his interest was shown in this show. The fall show used to be considered Bos-

Prize Winning Chrysanthemum Plant.—See Issue of November 11 Page 836.

SPECIMEN PLANTS AT THE BOSTON SHOW, NOVEMBER 9-12, 1911.

ton's best, and stood unrivaled; the competition in all classes was so close that excitement ran high and the judges often had difficulty in making their decisions. Those palmy days have gone and it devolves upon some sage to come forward with a remedy.

There was a nice exhibit of orchids. The display from Wheeler & Co., Waban, was very good. Paul De Nave, Fall River, and J. T. Butterworth, South Framingham, also had very nice exhibits well staged. The vases of chrysanthemums from James Nicol, Wm. Riggs and W. W. Edgar Co. were the striking feature of the show. Credit should be given Mr. Nichol for the way he grows Mrs. Jerome Jones, and more credit for his being an amateur who carries off the blue ribbon every year.

In roses, A. N. Pierson showed two new varieties which are being disseminated by them and which originated with J. A. Budlong & Son Co., Auburn, R. I. The Killarney Queen and Double White Killarney, they are both good acquisitions, Killarney Queen especially. S. J. Reuter & Son showed their Double White Killarney. Chas. H. Totty, Madison, N. J., showed Sunburst. This is a beautiful rose with the same soft shade of yellow as the Lady Hillingdon; the stems, foliage and flowers are all that could be desired, but the neck on Friday morning showed a decided weakness, the rose seemed too heavy for the stem above the first leaf. Whether or not it was the heat of the hall we do not know, but if the weakness is not constitutional it promises to be a good thing. Thos. Proctor's specimen plants were of the old standard and were well worth the silver medal awarded. The arrangement of the dining tables were very artistic. The display of apples, pears and quinces in the small hall was very interesting.

A. H. Bush.

President-Elect Colorado Florists' Club.

The awards were as follows:

PLANTS AND FLOWERS.

Best arranged group of foliage and flowering plants covering three hundred square feet—Edw. MacMulkin, first; W. W. Edgar Co., second.

Best table of orchids, both plants and flowers, six or more genera, accurately named—Wheeler & Co., first; Paul de Nave, second; J. T. Butterworth, third.

Four specimen chrysanthemum plants, any color or class—Thos. E. Proctor, first

Twenty-five plants, commercial specimens, in not less than six varieties, in not over eight-inch pots—Wm. H. Elliott, first.

Twelve plants, single-flowering sorts, not less than three varieties—H. E. Converse, first.

Six plants of six different varieties, grown to six stems with one bloom to each stem, in seven-inch pots—Mrs. Lester Leland, first and second.

Best chrysanthemum plant on exhibition—Thos. E. Proctor.

Two kentias, eight feet high or over—Wm. Whitman, first.

Two tubs of areca, one or more plants in a tub, eight feet or over in height—Mrs. Frederick Ayer, first.

CUT FLOWERS.

For the best vase of blooms of the chrysanthemum Mrs. Jerome Jones or yellow Mrs. Jerome Jones, Henry A. Gane special—James Nichol, first and second.

Twelve blooms, Japanese incurved chrysanthemums, named—H. E. Converse, first.

Twelve blooms, reflexed, named—H. E. Converse, first.

Twelve sprays or branches of pompon, distinct vareties—E. K. Butler, first; P. B. Robb, second.

Vase of ten blooms on long stems, pink, named—James Nichol, first; E. A. Clark, second.

Vase of 10 blooms red—E. A. Clark, first.

Vase of 10 blooms, white—E. A. Clark, first.

Vase of 10 blooms, yellow—E. A. Clark, first.

Vase of 10 blooms any other color—E. A. Clark, first.

Twelve vases singles, 12 distinct varieties, six cut sprays each, not disbudded—George Page, first; W. A. Riggs, second; H. E. Converse, third.

Best decoration of chrysanthemums for table of ten covers—Edw. MacMul-

kin, first; Sidney Hoffman, second; Mrs. E. M. Gill, third.

Best vase of 75 chrysanthemum blooms in the society's large china vases—E. A. Clark, first; W. W. Edgar Co., second; W. W. Edgar Co., third.

Gratuities—Thomas Roland, display of flowering and foliage plants; Mrs. Frederick Ayer, six decorative palms; Wm. Whitman, display of palms and chrysanthemums; W. A. Riggs, vase of chrysanthemum Major Bonnaffon; Mrs. E. M. Gill, display of cut chrysanthemums; Mrs. Frederick Ayer, six vases of cut single chrysanthemums; Strout & Co., collection of carnation blooms; A. W. Pembroke, five vases of carnations; Mrs. Francis Peabody, specimen plants of Begonia Gloire de Lorraine; W. T. Walke, artistic display of Begonia Gloire de Lorraine; W. W. Edgar Co., display of cyclamen and Begonia Gloire de Lorraine; James Wheeler, three vases of antirrhinums; Mrs. Frederick Ayer, variegated pineapple.

Silver medals—E. S. Webster, winter flowering Begonias, Elatior and Winter Cheer; Jas. Nicol, vase of chrysanthemums, Mrs. Jerome Jones, cultural silver medal.

Bronze medal—Wm. Sim, display of pansies.

Certificates of merit—George Melvin, seedling Capsicum Capsicastrum Melvinii; S. J. Reuter & Co., rose Improved Double White Killarney; A. N. Pierson, rose Killarney Queen; A. N. Pierson, rose Double White Killarney; E. S. Webster, seedling begonia (B. incarnata tuberous variety); Duncan Finlayson, Cattleya bicolor C. labiata; C. H. Totty, new rose Sunburst; Thos. E. Proctor, chrysanthemum Emmy Lou.

Honorable Mention—Strout & Co., seedling carnation Beacon X Victory; E. S. Webster, Celosia Thompsoni pyramidalis; A. W. Pembroke, seedling carnation Beverly; H. H. Barrows & Son, Nephrolepis Whitmani, var. compacta.

Pacific Coast Horticultural Society.

The Pacific Coast Horticultural Society held its annual fall flower show at the Fairmont hotel the latter part of last month, which was considered by all those who attended one of the finest ever given in this city so far as quality and general assortment of plants and flowers were concerned. The attendance was also exceptionally gratifying to the officers of the society having charge of the affair, and Angelo J. Rossi, manager of the exhibition, was heartily congratulated by all those interested for his part in the general success of the spectacle. The prizes awarded to the most successful exhibitors of this show were numerous and costly, and the interest taken in this affair by both growers and florists overshadowed the competition of all previous flower shows. A. O. Stein received several very valuable prizes, one for an elaborately decorated table and the other for the most original design. He also obtained first prize for his wedding bouquets. H. M. Sanborn of Oakland was awarded first prize for the best arranged basket of assorted flowers. Pelicano, Rossi & Co. received first prize for the finest arranged basket of flowering plants. The principal growers at this show to receive prizes were H. Plath, H. Goertzhain, K. S. Murray, MacRorie, McLaren Co., E. W. McLellan Co., E. James, and Domoto Bros. MacRorie, McLaren Co. presented one of the best exhibits ever seen on the coast. This company operates one of the largest nurseries on the Pacific Coast, and seldom, if ever, have they failed to receive the winning prizes for their displays in the various flower shows given in this section. Their exhibit on this occasion was composed mainly of a very valuable collection of orchids and tropical plants, arranged in a most artistic manner. Aside from receiving prizes on their various collections, they were awarded the honor of having the best exhibit in the show. The exhibit offered by Golden Gate Park was also very beautiful, as they displayed many exquisitely colored tropical plants. The executive committee of the show was composed of Angelo J. Rossi, chairman; D. McLaren, T. F. Taylor and H. Plath.

Horticultural Society of New York.

The annual fall exhibition was held at the American Museum of Natural History November 3-7. This proved to be the largest exhibition the society has given, both in attendance and in the number of exhibits. The exhibition was open to the public four days and nights, with a total attendance of about 45,000, nearly 26,000 of this on Sunday afternoon.

The large foyer was decorated with the large specimen bush and standard chrysanthemums and groups of palms and foliage plants. The east hall and the alcoves opening from it were devoted to cut blooms of chrysanthemums, from the dainty little pompon to the large showy forms. The feature of the chrysanthemum exhibit, and indeed of the whole show, was the group of three large bush plants exhibited by Adolph Lewisohn (John Canning, gardener). It was claimed by many that these were the largest specimens ever exhibited. Certainly they were superb specimens of the horticulturists' art, and great credit is due to Mr. Canning for this splendid achievement, which the council of the society has recognized by awarding the group a special prize of a gold medal. The plants measured about ten feet in diameter. The most perfect of the three was Lady Lydia, to which was awarded the sweepstakes prize for the best and finest bush plant exhibited. The bush plants exhibited by Samuel Untermyer, Harry Turner, superintendent, were also fine examples of horticultural work. The large and attractive group of stove and greenhouse plants exhibited by Mr. Untermyer was much admired. A fine specimen plant of anthurium exhibited by Mr. Untermeyer was awarded a special prize.

In the west hall were the roses, carnations and orchids. American Beauty, Richmond, Killarney, White Killarney, My Maryland, Mme. Abel Chatenay, Bride, and Bridesmaid were among the roses exhibited. There were three new roses: Double White Killarney and Killarney Queen, shown by A. N. Pierson, Inc., and Sunburst, exhibited by Chas. H. Totty; to each a silver medal was awarded. The new carnation, Brooklyn, to which a certificate of merit was awarded, attracted considerable attention.

The exhibition of orchids was superb, the largest in the history of the society. Four large alcoves were filled with these attractive flowers, both plants in bloom and cut flowers. Among those exhibiting were: Lager & Hurrell, Julius Roehrs Co., J. A. Manda, F. V. Burton, Clement Moore, and Mrs. Henry Graves.

Following are the awards:

CHRYSANTHEMUMS—PLANTS.

Specimen bush, yellow—Adolph Lewisohn, Ardsley, N. Y. (John Canning, gardener), first; Samuel Untermyer, Yonkers, N. Y. (Harry Turner, superintendent), second.

THE SAN FRANCISCO SHOW.

Specimen bush, white—Adolph Lewisohn, first. This plant also took the sweepstakes prize for the best bush plant exhibited.

Specimen bush, pink—Adolph Lewisohn, first; Samuel Untermyer, second.

Specimen bush, any other color—Samuel Untermyer, first.

Specimen standard, yellow—F. V. Burton, Newburgh, N. Y. (Wm. Cordes, gardener), first.

Specimen standard pink, F. B. Burton, first; Chas. Hathaway, East Orange, N. J. (Max Schneider, gardener), second.

Specimen standard, any other color—F. V. Burton, first.

Specimen anemone—Samuel Untermyer, first.

Six plants in variety, grown to a single stem—F. V. Burton, first; Adolph Lewisohn, second.

SPECIMEN CHRYSANTHEMUM PLANT LADY LYDIA AT HORTICULTURAL SOCIETY OF NEW YORK SHOW.

Exhibited by A. Lewisohn, John Canning, Gardener. Awarded First Prize and Gold Medal for Finest and Best Plant in Show.

CHRYSANTHEMUMS—CUT FLOWERS.

Twelve blooms, white—Samuel Untermyer, first.

Twelve blooms, pink—Samuel Untermeyer, first.

Twelve blooms, yellow—Samuel Untermyer, first.

Twelve blooms, any other color—Samuel Untermyer, first; J. T. Pratt, Glen Cove, N. Y. (J. W. Everits, gardener), second.

Twenty-five varieties, distinct, stems not over 12 inches long—Mrs. F. A. Constable, Mamaroneck, N. Y. (Jas. Stuart, gardener), first; Samuel Untermyer, second.

Display of hardy pompons, 25 varieties—Chas. Mallory, Port Chester, N. Y. (Wm. J. Sealey, gardener), first; Herbert L. Pratt, Glen Cove, N. Y. (Henry Gaut, gardener), second.

Collection singles and anemones, or either, 25 varieties—Mrs. F. A. Constable, first; John T. Pratt, second.

FOR NON-COMMERCIAL GROWERS.

Six blooms, white—Mrs. F. A. Constable, first; John T. Pratt, second.

Six blooms, pink—Wm. H. Fischer, New Canaan, Conn. (R. Bottomley, gardener), first.

Six blooms, yellow—John T. Pratt, first; Wm. H. Fischer, second.

Best vase one or more varieties, arranged for effect—Percy Chubb, Glen Cove, N. Y. (Alex. Mackenzie, gardener), first; Mrs. F. A. Constable, second.

Six blooms, any other color—Mrs. F. A. Constable, first.

Twelve varieties, distinct—Percy Chubb, first; Samuel Untermyer, second.

Display of hardy pompons, 12 varieties—Chas. Mallory, first; Herbert L. Pratt, second.

Collection of singles and anemones, or either, 12 varieties—Herbert L. Pratt, first; Adolph Lewisohn, second.

ROSES.

Fifty American Beauty—Louis A. Noe, Madison, N. J., first; F. R. Pierson Co., Tarrytown, N. Y., second.

Fifty Bridesmaid—Louis A. Noe, first.

Fifty Bride—Louis A. Noe, first.

Fifty Killarney—L. B. Coddington, Murray Hill, N. J., first; Louis A. Noe, second.

Fifty Richmond—L. B. Coddington, first.

Fifty My Maryland—Louis A. Noe, first; F. R. Pierson Co., second.

Fifty White Killarney—F. R. Pierson Co., first; Louis A. Noe, second.

Eighteen Bridesmaid—A. C. Van Gaasbeck, Orange, N. J. (John Dervan, gardener), first.

Eighteen Bride—A. C. Van Gaasbeck, first.

Eighteen Killarney—A. C. Van Gaasbeck, first.

Eighteen Mme. Abel Chatenay—A. C. Van Gaasbeck, first.

CARNATIONS.

Fifty Lawson shade—J. D. Cockcroft, Northport, N. Y., first.

Best new variety, not yet in commerce—J. D. Cockcroft, diploma.

Eighteen White—F. V. Burton, first.

Eighteen Winsor shade—F. V. Burton, first.

Eighteen Enchantress shade—Chas. Hathaway, first.

FOLIAGE AND DECORATIVE PLANTS.

Stove and greenhouse plants, 100 square feet—Samuel Untermyer, first.

Collection of crotons, 12 varieties, one plant each—Mrs. J. Hood Wright, New York City (Chas. Webber, gardener), first.

Specimen Begonia Gloire de Lorraine—Julius Roehrs Co., Rutherford, N. J., first; Sidney M. and Austen Colgate, Orange, N. J. (Wm. Reid, gardener), second.

Three plants Begonia Gloire de Lorraine—Julius Roehrs Co., first.

Specimen Chrysalidocarpus lutescens—Mrs. J. Hood Wright, first.

Specimen Howea Forsteriana—Mrs. J. Hood Wright, first.

Specimen Rhapis flabelliformis—Mrs. J. Hood Wright, first; F. V. Burton, second.

Specimen any other palm—Mrs. J. Hood Wright, first.

Specimen Cibotium Schiedei—Samuel Untermyer, first.

Specimen Davallia Fijionsis—Mrs. J. Hood Wright, first.

Specimen Nephrolepis exaltata Bostoniensis—Samuel Untermyer, first; F. R. Pierson Co., second.

Display of Nephrolepis exaltata and varieties—F. R. Pierson Co., first.

Stove and greenhouse plants, 50 square feet—F. V. Burton, first.

Collection crotons, six varieties—F. V. Burton, first; Mrs. J. Hood Wright, second.

ORCHIDS.

Collection of orchids, not less than 25 species and varieties—Lager & Hurrell, Summit, N. J., first.

Novelty not before exhibited before this society—Lager & Hurrell, first.

Three hybrid orchids—Clement Moore, Hackensack, N. J. (J. P. Mossman, gardener), first; Julius Roehrs Co., second.

One hybrid orchid—Julius Roehrs Co., first (this plant also took the sweepstakes for the best plant exhibited); Clement Moore, second.

Collection of orchids, cut blooms—J. A. Manda, West Orange, N. J., first; Siebrecht & Son, New Rochelle, N. Y. (S. Zalensky, gardener), second.

Collection of cypripediums, cut blooms, not less than 12 species or hybrids—J. A. Manda, first.

Cattleya plant, in bloom—Lager & Hurrell, first; F. V. Burton, second.

Oncidium plant, in bloom—J. A. Manda, first.

Vanda cærulea plant, in bloom—F. V. Burton, first; J. A. Manda, second.

Cypripedium plant, in bloom—Mrs. Henry Graves, Orange, N. J. (Edwin Thomas, gardener), first.

Dendrobium plant, in bloom—Lager & Hurrell, first.

Two orchid plants, in bloom, showing highest excellence of cultivation—F. V. Burton, first.

Spray of cattleya—Clement Moore, first.

Spray of oncidium—J. A. Manda, first.

Spray of vanda—J. A. Manda, first.

Spray of any other orchid—F. V. Burton, first.

Collection of orchids, not less than 12 species and varieties—F. V. Burton, first.

Six plants of cattleya and laelia, or either, in bloom—F. V. Burton, first.

Six orchid plants, six varieties, in bloom—F. V. Burton, first.

Six plants of cypripedium, six varieties, in bloom—F. V. Burton, first.

SPECIAL PRIZES.

A. N. Pierson, Inc., Cromwell, Conn., new rose Double White Killarney, silver medal; new rose Killarney Queen, silver medal.

Chas. Weber, Lynbrook, N. Y., new carnation "Brooklyn," certificate of merit.

Chas. H. Totty, Madison, N. J., new rose Sunburst, silver medal.

Geo. Giatras, West Hoboken, N. J., for group of Nephrolepis Giastrasii, special mention.

R. Vincent, Jr., & Sons Co., White Marsh, Md., display of hardy chrysanthemums, special mention.

CUT FLOWERS.

Fifty blooms, white—Poehlmann Bros. Co. first with Timothy Eaton; E. G. Hill Co. second with Chadwick Improved; South Park Floral Co., New Castle, third.

Fifty blooms, pink lighter than Vinand Morel—E. G. Hill first with Wells' Late Pink.

Cincinnati Flower Show.

The fall exhibition of the Cincinnati Florists' Society was held in Horticultural Hall-Music Hall, Cincinnati, O., November 13-18. Following are the awards for the first day:

CHRYSANTHEMUM PLANTS.

Best specimen—John Fries, first, with W. T. Brock; E. H. Fries, second, with Pockett's Crimson; Chas. Pfeiffer, third, with Alice Byron.

Best specimen white—Chas. Pfeiffer, first, with Mrs. R. N. Bird; E. H. Fries, second, with White Shaw; John Fries, third, with Alice Byron.

Best specimen yellow—John Fries, first, with Yellow Byron; E. H. Fries, second; Chas. Pfeiffer, third, with Yellow Byron.

Best specimen pink—E. H. Fries, first, with W. Newell; Chas. Pfeiffer, second, with A. J. Balfour; John Fries, third, with Dr. Enguehard.

Single, any color—John Fries, first; E. H. Fries, second, with Jennie Curtis.

Best anemone, any color—John Fries, first, with Garza; E. H. Fries, second, with Garza.

Single stem—John Fries, first, with Yellow Byron; Chas. Pfeiffer, second, with Klondike; E. H. Fries, third, with Pockett's Crimson.

Pompons, six plants—E. H. Fries, first; R. Witterstaetter, second; E. H. Fries, third.

Single six plants—R. Witterstaetter, first; Ed. Deller, second.

Anemone, six plants—R. Witterstaetter.

Best group—John Fries, first; E. H. Fries, second.

second with Major Bonnaffon; R. Witterstaetter third with Major Bonnaffon.

Fifty blooms, yellow darker than Major Bonnaffon—E. G. Hill Co. first with Golden Eagle; Elmer D. Smith & Co. second with Col. D. Appleton.

Fifty blooms, bronze—E. G. Hill Co. with Glenview.

Fifty blooms, any other color—Poehlmann Bros. Co., first; E. G. Hill Co., second; Elmer D. Smith & Co., third, with T. Carrington.

Fifty blooms, not less than twelve varieties—E. G. Hill Co.

Fifty blooms, any variety—E. G. Hill Co. with Major Bonnaffon.

Twelve blooms, one variety, white—E. D. Smith & Co., first, with Merza; R. Witterstaetter, second, with Thanksgiving Queen.

Twelve blooms not darker than Major Bonnaffon—E. G. Hill Co., first, with Dolly Dimples; E. D. Smith & Co., second, with Crocus; E. H. Fries, third, with Chas. Razer.

Twelve blooms, darker than Major Bonnaffon—E. G. Hill Co., first, with Golden Wedding.

Twelve blooms, pink lighter than Vinand Morel—E. G. Hill Co., first with Chas. Brock; E. D. Smith & Co., second, with Wm. Duckham.

Twelve blooms, not lighter than Vinand Morel—E. G. Hill Co. first with Jos. Linott; E. D. Smith & Co., second, with Dr. Enguehard.

Twelve blooms, crimson—E. G. Hill Co., first, with Perfect Tilliere.

Twelve blooms, bronze—R. Witterstaetter, first, with O. H. Kahn; E. G. Hill Co., second, with Marian Pockett.

Twelve blooms, any color—E. G. Hill Co., first, with C. 189; Theo. Bock, second, with Antoine Marmontel.

One bloom each, 24 varieties—E. G. Hill Co., first; E. D. Smith & Co., second.

Singles, best display—E. G. Hill Co., first; Hartje & Elder, second; R. Witterstaetter, third.

Pompons, best display—E. G. Hill Co., first; Hartje & Elder, second; R. Witterstaetter, third.

DECORATIVE AND FOLIAGE PLANTS.

Best groups—A. Sunderbruch & Sons, first; C. Brunner & Sons, second; Max Rudolph, third.

Group twelve pandanus—J. A. Peterson, first.

Group six Boston ferns—R. Witterstaetter, first.

Specimen Boston fern—R. Witterstaetter, second.

Specimen Boston fern sport—R. Witterstaetter, second.

Six Adiantum Farleyense—J. A. Peterson.

Six Begonia Gloire de Lorraine—J. A. Peterson.

Six begonias other than Lorraine type—J. A. Peterson.

Hanging basket, Boston fern or its sports—Ed. Deller, first; R. Witterstaetter, second.

Meritorious begonia, new plant—J. A. Peterson, S. A. F. medal, with Westwood.

Rose Killarney Queen—A. N. Pierson, Inc., certificate of merit.

Rose Double White Killarney—A. N. Pierson, Inc., certificate of merit.

CARNATIONS.

Five blooms, white—Poehlmann Bros. Co., first, with White Perfection; Chas. Knopf Floral Co., second, with White Enchantress.

Best 100 roses, any other variety—Poehlmann Bros. Co. with My Maryland.

Best 25 roses, any variety not in commerce, to score not less than 87 points, silver cup—E. G. Hill Co. with Sunburst, scoring 89 points.

Milwaukee Flower Show.

The annual fall flower show of the Milwaukee Florists' Club was opened Wednesday, November 15, in the Auditorium, Milwaukee, Wis., and continues until Sunday evening, November 18. For the purpose of holding a large flower exhibition few cities have a finer building than this; the hall is very large and very high, with two rows of balconies all around and a large stage. The decorations at this exhibition are always a grand feature and this year is no exception, for it eclipses all previous efforts. Under the direction of Aug. Kellner and his assistants the vast building has been turned into a great garden with the ceiling and balcony beautifully draped and decorated. Upon entering the hall one might easily imagine that he had been transported into one of the most beautiful gardens on a vast estate. At the main entrance and at the two side entrances are erected pergolas nicely decorated with Southern smilax. The ceiling is beautifully draped with festoons of arborvitæ, forming two hanging half domes

The Late Stephen Taplin.

(See Obituary Page 916)

between which are long festoons of green, and from these are hung long streamers of the same green to the balcony, more than one hundred festoons being draped. Many of these have electric lights fastened through them which are covered with yellow shades. The balconies are heavily draped with green and the effect where the many electric globes shine through the festooning is most beautiful, making a pleasing covering for the grand exhibition.

The garden itself is artistically laid out. In the center is what might be called a summer house and on this is placed the orchestra, the lower part being used for the sale of flowers. A broad walk extends through the center of the hall from this toward each end and from this walk are winding paths on each side of which are plots of grass made by laying sod. These are of different forms and sizes and in them are arranged the groups of decorative and flowering plants. At the sides also against the lower balcony are these decorative groups. At the four corners are fountains playing into large basins around which are splendid specimen ferns. On the stage and at the head of the hall are arranged the cut blooms of chrysanthemums and other flowers.

The groups of palms and decorative plants are full of fine specimens, and a very striking feature are the pyramids of Boston ferns standing fully eight feet high. The arrangement of these groups is very beautifully done and with the different shapes of the space given them much of the sameness, so noticeable at exhibitions, is obviated, and many of the groups are formed of one species, which gives an ever changing effect to the observer. Much of this successful arrangement is due to the able management of H. V. Hunkel, who superintended the staging of this great exhibition. Among the principal exhibitors the following were noted:

Holton & Hunkel Co. has a number of excellent groups. In the group of palms were seen fine specimens of Kentia Belmoreana and splendid araucarias. Their pyramids of Boston ferns contained some very large and beautiful specimens and these were all nicely arranged. A group of chrysanthemums exhibited by this firm was full of finely grown plants.

C. C. Pollworth Co. has several fine groups, or looking at them from the garden effect they might be called beds. The chrysanthemums were very well grown and were finely placed. The groups of palms contained many fine specimens and a tall pyramid of Boston ferns, that were particularly well grown, was a striking feature of the show.

Aug. Kellner arranged his groups of palms and decorative plants in a very artistic manner and a bed of Cybotium Scheidei was an exhibit which attracted a great deal of attention.

H. A. Dreer, of Philadelphia, Pa., showed groups of Phoenix Roebeleni, Cocos Weddelliana and araucaria, all finely grown specimens and nicely placed.

Currie Bros. Co. made a beautiful display of palms and decorative stock. This exhibitor also had an assortment of finely grown araucarias.

Edlefsen-Leidiger Co. showed nicely grown decorative stock and the groups contained a fine variety of well finished plants.

Another display of well grown decorative plants was that of Jacob Freytag, which contained many beautiful specimens.

The whole display was a great credit to Manager Hunkel and his assistants, as well as to the enterprising florists and growers who produced the stock that was displayed.

Fire at Lakeview Rose Gardens.

The boiler house of the Lakeview Rose Gardens, Jamestown, N. Y., a brick building 225 feet long, was destroyed by fire on the night of November 8, caused by an explosion of coal gas. The fire spread with great rapidity and by the time the fire apparatus arrived the building was all ablaze. The greenhouses are located just outside the city limits, and the apparatus had a long distance to run and, added to this, the water pressure was insufficient owing to the long lines of hose necessary to get the water to the fire. At the time the wind was blowing a gale but the fire was confined to the boiler house where the roof was burned off and everything inflammable destroyed. Fortunately none of the help who were in the boiler house were injured.

The greenhouses were, however, at the mercy of the weather for the next two days for there was no possible way to get any circulation into the houses until the damage to the boilers was repaired. The weather was fortunately not cold, and in two days the heating apparatus was adjusted so that heat enough to save the crop was obtained. It was an anxious time for the manager, Lawrence Cotter, and the officers of the concern.

MOTHER'S DAY next year falls on May 12.

THE date of Easter next year is April 7, about a week earlier than last Easter.

THE National Horticultural Congress will be held at St. Joseph, Mo., November 23-December 2.

THE cold snap of November 12 has closed practically outdoor planting for the season. Much stock was caught in transit.

FIRE needs to be well guarded against at this time of the year and in all greenhouse establishments there should be ample provision to extinguish fire quickly when it breaks out.

AFTER a conference lasting several weeks, held in Cleveland, O., between the officers of the Window Glass Manufacturers' Association and representatives of the window glass workers in Ohio, Kansas, Pennsylvania, Oklahoma, West Virginia and Texas, an agreement was made with an 18 per cent reduction in wages to hold until May 1, 1912.

Society of American Florists.

DEPARTMENT OF REGISTRATION.

Objections having been withdrawn, public notice is hereby given that the registration of the rose, Oriole, by Jackson & Perkins Company of Newark, Wayne County, N. Y., becomes complete. H. B. DORNER, Sec'y.

American Rose Society.

The schedule of prizes for the exhibition to be held by the American Rose Society at Detroit, Mich., January 10-12, 1912, has been reported, and includes for the best display of cut roses covering not less than 200 square feet and not to contain less than 200 blooms, a first prize of $150, second $100 and third $75. A retailers' prize for the most artistic display of roses, first $100, second $50, and third $25. There are also prizes for roses of 25 and 50 blooms of the several varieties in cultivation.

Chrysanthemum Society of America.

REPORTS OF COMMITTEES.

New York, November 1.—Ramopoyellow, Japanese incurved, scored 87 points commercial scale; William Turner, white, Japanese incurved, scored 93 points commercial scale, 93 points exhibition scale, both exhibited by Chas. H. Totty, Madison, N. J. Seedling No. 1, pink, Japanese, scored 85 points commercial scale, exhibited by A. C. Van Gaasbeck, Orange, N. J.

Chicago, November 4.—Seedling 59, pink, pompon, scored 93 points, exhibited by Hartje & Elder, Indianapolis, Ind. Clea, single, scored 85 points, exhibited by Elmer A. Smith & Co., Adrian, Mich.

Cincinnati, November 4.—Seedling No. 59, pink, pompon, scored 93 points, exhibited by Hartje & Elder, Indianapolis, Ind.

St. Louis, November 9.—Manhattan, light pink, Japanese, scored 86 points commercial scale, 83 points exhibition scale, exhibited by Elmer D. Smith & Co., Adrian, Mich.

C. W. JOHNSON, Sec'y.

Lord & Burnham Co.'s Philadelphia Office.

On November 10, 1911, D. T. Connors, who has been associated with Lord & Burnham Company's Philadelphia office for the past few years, resigned his position.

As was announced a month or so ago, Montague C. Wright, who for the past seven years has been associated with Lord & Burnham Company's New York office, was at that time made manager of the Philadelphia office and southern territory. Mr. Wright, as an old Philadelphia boy, was for several years in the employ of Frederick H. O'Neill, sales agent in that section for Hitchings & Co.'s greenhouses, and is a man of broad greenhouse experience, having handled some of the largest contracts of the firm in both the commercial and private fields. Having started in the business by doing the practical sides of the work, he has the advantage of a thorough understanding of the work in its every detail. In planning and designing various layouts he has been particularly successful. Associated with Mr. Wright will now be Mr. Woodward, who, in his recent position as manager of the pipe frame construction department at the company's Irvington factory, has had exceptional opportunities for acquiring experience in both the manufacturing and selling phases of the greenhouse business. With such a combination of sales ability the company's friends in the Philadelphia section and the great south will certainly be well taken care of. T.

Colorado Florists' Club.

The meeting of the Florists' Club was held November 5 and the following officers elected:

A. H. Bush, president.
E. S. Kennedy, vice-president.
E. P. Nieman, secretary.
Ben Boldt, treasurer.

The question of holding a fall show in 1912 was discussed and made a special order of business for a special meeting to be held November 13.

The club has nearly one hundred members and meets regularly the first Monday of each month.

OBITUARY.

Stephen Taplin.

Stephen Taplin, the oldest florist of Detroit, Mich., died November 8, of a complication of diseases, aged 79 years.

Mr. Taplin was born in Hampshire, England, in 1832, and at the age of 18 began his horticultural career at Apley Park, and later was on the estates of the Duke of Sutherland and the Earl of Dartmouth. After connection with Veitch's famous London house he served at Margam Park, the Marquis of Lansdowne, and then at John Standish's at Ascot. Here by obtaining a staminate plant of aucuba sent by Robert Fortune from Japan, Mr. Taplin produced the first berried plant out of its native country. In 1870 he left England and came to America, going to Detroit to take charge of the place of Hubbard & Davis. In 1876, in company with his employers, he purchased the Farrin & Osborne place on Fort street, in a few years purchasing his partner's interests. He has been a noted plantsman, making a specialty of this line, and produced fine specimens of both decorative and blooming plants.

He is survived by a widow, two sons and a daughter. The funeral was on Friday afternoon, November 10, and the interment was in Woodmere cemetery.

G. H. Pieser.

G. H. Pieser, former president of the Kennicott Bros. Co., Chicago, died Tuesday morning, November 14, after a lingering illness, due to enlargement of the heart. Mr. Pieser was born in Chicago in 1855 and was well known to the trade, having entered the employ of Amasa and Flint Kennicott some 25 years ago and for which firm he was secretary and later president until ill health caused him to resign some few months ago. He is survived by a wife and son, G. H., Jr., and his mother, two brothers and two sisters. The funeral will be held from the family residence at 4447 Indiana avenue on Thursday, November 16, at 10 a. m., with interment at the B'Nai Sholom cemetery on North Clark street.

John D. Crawford.

John D. Crawford, until a few years ago when he retired, one of the oldest florists of Brooklyn, N. Y., died at Roslyn, November 2, of apoplexy, aged 69 years. He was located for many years at 372 Court street where he had a florist's store. He is survived by a widow and three sons. Funeral services were held November 5 and the interment was in Woodlawn cemetery.

Meetings Next Week.

Boston, Mass., November 21.—Gardeners' and Florists' Club of Boston, Horticultural Hall.

Detroit, Mich., November 20, 8 p. m.—Detroit Florists' Club, 112 Farmer street.

Milwaukee.

UNFAVORABLE WEATHER.

It has been a poor week for every one in the florist's business, the weather being very unfavorable with rain with high temperature which did the stock no good. It arrived in very poor condition and in large quantities. Chrysanthemums have been a drug on the market and the prices were exceptionally low on all grades and this naturally affected the sale of roses and carnations. Violets are fine and are selling rapidly. Lily of the valley is also fine with enough to fill all orders.

NOTES.

Wm. Currie has returned from the flower show at Lake Geneva where he acted as judge. He says that he never saw a finer lot of plants and cut blooms at any show. The competition was as keen, if not more so, than at the larger shows which are held for a commercial purpose, and he never judged for a more congenial lot of exhibitors for this is no easy matter to perform and please everybody.

C. C. Pollworth Co. is starting to vacate their old quarters which were used for the supply department. This firm has made a large number of entries at the show. A nice lot of roses and carnations are being cut at the houses that find ready sale. Mr. and Mrs. Pollworth have gone to hunt deer and hope to be fortunate enough to secure one.

The Milwaukee Florist Club will entertain the visiting florists Saturday evening, November 18, at a Bohemian night at the Auditorium banquet hall, to which every local florist is invited. Tickets can be had at any of the three wholesale houses or from the members of the entertainment committee.

Holton & Hunkel Co. report business good. They are cutting some fine American Beauties and chrysanthemums. Their pompons are coming in fine and in great plenty and they find good sale.

Nic Zweifel, W. C. Zimmerman and Fred Holton spent a few days at Shullsburg looking after some mining interests. They returned and speak favorably of the undertaking.

Gust. Rusch & Co. is receiving some extra fine carnations and Major Bonnaffon and W. H. Chadwick chrysanthemums that are selling on sight.

Aug. Kellner is a busy man these days getting things arranged for the flower show and other decorations that keep coming in regularly.

A. Klokner is very busy with his landscape work and says there is plenty on hand to keep him busy for some time.

The bowling scores last week were as follows:

P. Nohos.	141	136	150	L. Manos.	129 138 103
G. Hunkel.	98	108	116	W. Halli'y.	145 139 105
A. Hare...	96	125	141	O. Eggeb't.	133 93 141
R. Lietz...	81	124	90	R. Currie.	152 116 ...
G. Pohl....	132	134	126	W. Schmitz.	165 117 128
G. Rusch.	158	210	...		

The Ladies Bowling Club are bowling such high scores that they do not care to have same printed. G. R.

Cincinnati.

MARKET SLOW.

The early part of this week almost everything began to accumulate in the wholesale houses. Monday, although slow, showed hopeful signs, but on Tuesday business was very dull with little prospects of a clean-up from local demand for the balance of the week. The shipping business has continued brisk and is good right now. Pink roses are cleaning up better than white. Short and medium American Beauties are conspicuous for their almost entire absence. Very many might easily be used. The supply of long ones is adequate. Carnations are not in a large supply and the request for them is about the same. Lilies are selling nicely at fair prices. In chrysanthemums a glut of the culls is again on and tends to affect the prices of the better ones. The pompon market is fair. Violets both single and double sell well. Many of the former, however, came in frozen the early part of the week, being caught in the change from mild to severe weather in transit. The green goods market is ample.

CLUB MEETING.

The Florists' Society assembled November 11 at the Cincinnati Cut Flower Exchange. Fred Backmeier was elected to membership. Gus Adrian, the president, appointed the committees to serve each day at the show to care for the public. The society at adjournment voted the hosts, Alex. Ostendarp and A. L. Hichman, Jr., a vote of thanks for their elegant entertainment.

NOTES.

The bowling club meets Monday, November 20, at Finke's on East Sixth avenue. H.

Loganport, Ind.

The frost was very late this year, the first that killed the plants occurring October 23.

The Pleasant Hill Greenhouse have a fine display of chrysanthemums this month, which is one of their specialties. The Major Bonnaffons are exceptionally good.

Archibald McDonald has accepted a position with J. M. Fox & Son, Milwaukee, Wis. C. M.

STAMFORD, CONN.—Permission has been granted B. Brown to build a greenhouse at the corner of Gove and Main street. The cost of construction is placed at $1,000.

TRADE RATHER QUIET.

One of the most sudden changes of temperature ever recorded in this city occurred during the last week when the thermometer dropped 60 degrees in two days. Saturday was the warmest November 12 on record when the thermometer registered 74° and was like a summer day, and Sunday was the coldest November 13, when a register of 13° was recorded. What was the effect of this sudden change? Saturday had all the signs of a glut in all the flowers, the retail houses were all quiet and the usual good Saturday business was missing and the stock was pouring into the wholesale houses in large quantities. The cold wave shortened up the cut materially and though there was a large amount of stock on hand Monday yet the market had resumed a good healthy condition. There are, however, large quantities of chrysanthemums and they are arriving in the market by the big boxload, Major Bonnaffon and Dr. Enguehard being received in large supply. These two varieties, as well as W. H. Chadwick and Golden Chadwick, which are always depended upon for the great supply demanded for Thanksgiving day, are now in their prime and fully finished, and there seems to be some doubt whether any of them can be held for that holiday, and many growers think that chrysanthemums will be scarce if not entirely gone by November 30. This is the day appointed for Thanksgiving, the latest date possible, and the chrysanthemums seem to be finishing up early. One of the large growers states that it will be impossible to accept any orders for chrysanthemums on that day. Roses have been coming in in large quantities, and with the exception of American Beauties, for which there is a demand for all received, the receipts have been larger than the request. Killarney especially is in heavy crop, with many of the growers and of superb quality, and Richmond has rapidly improved in the last few days both in quality and quantity, some elegant stock now coming in, the buds being long and of good size and the stems have increased wonderfully in length, some fully thirty inches long being seen with the finest of foliage. Carnations of the best quality are being received and plentiful enough to meet all the requirements. Orchids are in good supply and some beautiful flowers and sprays of these exotics are to be had from those who handle them. Sweet peas have made their appearance and are of good grade both in pink and white. Bouvardia is getting a good call and is being used in the table work at the debutantes' receptions. Lilies are to be had but the supply is not large but fully equal to all the demands. Lily of the valley and violets are having a good call, but there is plenty to make the requests. The flowering plants occupy a prominent place in the store windows, some finely grown chrysanthemum plants decorating the stores, and Begonia Gloire de Lorraine are also being shown. The retail trade is said to be rather light, receptions and funeral work being the only call. The cooler weather, however, is looked upon as a boon and it is the opinion that trade will quickly recover and become more active. Hardy ferns are advancing in price, and are now quoted at winter prices. The quality is good and of fair supply. Other greens are plentiful.

The Late G. H. Pieser.

(See Obituary Page 916.)

NOTES.

The Geo. Wittbold Co. has just received two large shipments of rhododendrons, azaleas and spireas at their establishment in Edgebrook where the fall season is on in earnest. This firm is cutting fine Paper White narcissus and the carnations, especially Scarlet Harlowarden, a sport of Harlowarden, are doing nicely. The employes will soon be occupying quarters in the new rooming house which is nearly completed and furnished. It is the intention of the firm to make their surroundings as pleasant and homelike as possible.

VAUGHAN & SPERRY

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

Chrysanthemums and carnations at the Mount Greenwood Cemetery greenhouses are in better condition than ever this year and promise some prize winning specimens. Foreman Johnson has some very beautiful seedlings. A large white of great merit and the seedling pompons show many fine blooms of new shades. The carnation seedlings are growing luxuriantly. No. 3508-A, scarlet, though not a large flower, is a great producer, some of the plants now showing 20 blooms that have been cut and are now set and promise a magnificent crop for Christmas. The white No. 14009-A is a beautifully formed flower of strongest perfume and a good producer. These two give promise of a good reputation and will no doubt be heard from in the future.

Wietor Bros. are cutting heavily in American Beauty, Killarney, White Killarney, Richmond and Mrs. Jardine roses, carnations and chrysanthemums. Among the large shipments of pompons that are arriving at the store we noticed a fine grade of Mrs. Beu and Quinola, which are being used quite extensively in the window displays in this city. N. J. Wietor was the recipient of a very complimentary letter this week from one of his out-of-town customers that he prizes very highly, and in which the writer thanks his firm for the fine lot of American Beauty roses that it shipped to him.

Tim Matchen visited the Peter Reinberg greenhouses last Sunday and was much pleased with the condition of the crops and the outlook for stock for the Thanksgiving trade. Mr. Matchen says he will be well fixed on Killarney, Richmond, White Killarney, American Beauty roses and carnations, for these are all just coming into crop.

The exhibit of chrysanthemums arranged at Lincoln Park by Rudolph Schiele, head gardener, contains many splendid specimens, which are greatly admired by the visitors. It was estimated that there were 10,000 people visited the conservatory on the first Sunday of the exhibition.

"The Busiest House in Chicago"

LARGE SUPPLY OF

'Mums - Violets - Roses

and CARNATIONS for Thanksgiving.

J. B. DEAMUD CO.

Phones { L. D. Central 3155 / Automatic 44389 } **160 N. Wabash Ave., CHICAGO**

The Gardeners' and Florists' Union held their monthly meeting November 8. It was decided to hold a masquerade ball at North Side Turner hall Saturday evening, January 13, and $25 was voted to be offered as prizes. At the next meeting the election of officers will be held.

Paul M. Palez of Little Rock, Ark., is in the city this week renewing old acquaintances and buying stock for the holiday trade. Mr. Palez has become interested in politics in his home city, and is a candidate for alderman of the third ward on the democratic ticket.

George Reinberg's large shipments of stock include a fine grade of Richmond, Killarney and White Killarney roses. His store man, Robert Northam, is wishing that he only had a few more American Beauty roses to supply his many customers.

Vaughan & Sperry are handling large shipments of chrysanthemums, roses, carnations and greens and expect to receive plenty of this stock to supply their customers for their Thanksgiving trade.

Paul M. Bryant, with E. H. Hunt, returned on November 13 from a successful business trip to Milwaukee. Mr. Bryant reports business improving and the collections much better.

Carl Hirsch, of Hillsdale, Mich., passed through this city on November 10 enroute to the upper peninsula on a deer hunting trip.

Oscar Metz is making a few improvements on his piping system in his greenhouses on Jefferson avenue.

The Alpha Floral Co. has a very fine display of seasonable stock at their store on South Wabash avenue.

The North side florists are talking of holding a spring show in the Arcadia hall some time in March.

Chas. W. McKellar filled several large orders for orchids for flower show purposes this week.

J. A. Sikuta says that the information regarding his Prince Bismark chrysanthemum was incorrect, as he only charged 50 cents each for them instead of $1.00, as was quoted elsewhere, and that it was really a new seedling instead of one of the common ordinary whites. He states that he had no trouble getting $1.00 each for Timothy Eaton, but the best he could get on his Prince Bismark was the price quoted above and that he did not know whether this was due to the name or to the actual value of the bloom in the eyes of the flower-buying public.

Brides and My Maryland roses are what one sees when he visits Hoerber Bros'. store on the second floor of the Atlas building when the shipments of stock from the greenhouses arrive. The Brides go pretty fast, however, for there are some florists who will have nothing but the old standby whenever they are obtainable. Harry Manheim says he found the stock in the greenhouses at Des Plaines in fine condition with the crops looking very promising.

Adam Zender, of this city, and Wm. C. Smith, of St. Louis, had a narrow escape from being killed last week when they were hit by an auto while driving through the streets of the Missouri city. The young lady who was driving the car was inexperienced and instead of slowing up as she intended, put on more speed, with the result that the carriage was wrecked and the occupants badly shaken up.

Frank W. Paszkiet, of the Wietor Bros. force, and Miss Martha Robakowski will be married next Wednesday morning, November 22, at St. Mary's Church, Thirty-second and South Morgan streets. The happy young couple have the best wishes of the trade for a safe voyage on the sea of matrimony.

Frank Ayres, Chas. W. McKellar's store man, is back from a few weeks' visit in northeastern Texas. He is telling his friends that he was down there on business, but we learn from other sources that a wealthy young widow in the "Lone Star State" had something to do with his sudden departure.

Zech & Mann received their first Paper White narcissus of the season on November 14 and are now having regular shipments of these flowers. The stock in general is of the usual good quality, with roses and carnations especially fine.

The J. B. Deamud Co. is featuring a fine grade of violets and chrysanthemums besides a large supply of other seasonable stock at the store this week. Wilder says his firm is now booking orders for "Turkey Day."

Stollery Bros. lost a small lot of poinsettias by freezing when the terrific storm of the evening of November 11 blew away one of the ventilators of their greenhouses on Southport avenue.

Fred. Lieberman had orders for several large funeral pieces on November 11 that helped out considerably during the general quietness that is prevailing in most quarters at present.

E. E. Pieser has the sympathy of the trade in the loss of his brother, G. H. Pieser, who died Tuesday morning, November 14, and whose obituary appears elsewhere in this issue.

John Kruchten is offering some fine Dr. Enguehard, Timothy Eaton, W. H. Chadwick and Golden Chadwick chrysanthemums in addition to a large supply of roses and carnations.

R. G. Guenther of Pasadena, Calif., a former resident of this city, is expected to stop off here on November 25, on his way to Green Bay, Wis., where he is to be a bridegroom.

B. J. Maynard, of the Geo. M. Garland Co., left this week for Saginaw, Mich., to superintend the erection of three new Garland iron frame houses for Chas. Frueh & Sons.

The W. E. Lynch Co's. plant at West Twentieth street and Harlem avenue is fully exposed to the wind on all sides and some 60 panes of glass were lost in the recent storm.

H. Van Gelder, of Percy Jones, has several large signs in his store that tell his customers he is dealing in plants as well as cut flowers.

Joseph Papacek has taken charge of the store which he recently bought from Raichart & Krejci at 3250 West Twenty-sixth street.

J. F. Czarnich & Co. have bought the H. W. Metz store on Ashland avenue and the doors are once again open to the public.

Kyle & Foerster are showing a very fine grade of Major Bonnaffon, W. H. Chadwick and Golden Chadwick chrysanthemums.

Mrs. A. Lieberman has moved from 2822 West Twelfth street and is now occupying a store at 3603 Armitage avenue.

E. E. Pieser, of Kennicott Bros. Co., is receiving some new White Wonder carnations from Raasch Bros. at Kankakee.

H. A. Fisher, of Kalamaoo, Mich., was in the city this week buying stock for the company which bears his name.

Chas. Grant, of New York, is renewing old acquaintances and seeking employment in this city.

Charles R. Fuhlbrugge, of Minneapolis, Minn., was a welcome visitor this week.

A. Monblatt has opened a store in the lobby of the new Sherman House.

H. E. Philpott is taking in the flower show at Cincinnati, O., this week.

A. Y. Ellison is suffering from blood poisoning of the left hand.

No Order Too Large. No Order Too Small.

HOERBER BROS.

Wholesale Growers of Cut Flowers

162 N. Wabash Ave., Long Distance Phones: Randolph 2758. Automatic 41770. Chicago.

For the first time in many years Bassett & Washburn are informing the trade that they will be entirely out of chrysanthemums for Thanksgiving and will be only able to fill orders by buying stock from the other houses. They will, however, be well fixed in roses for their Killarney, White Killarney and other varieties are just coming in crop as are also the carnations, of which some fine specimens can be seen at the store this week. C. L. Washburn and Andrew Benson will leave Thursday evening, November 16, with a supply of stock that they are going to exhibit at the Milwaukee show.

A. C. Kohlbrand received a letter this week from H. V. Hunkel, the manager of the Milwaukee flower show, reminding him that the local florists are cordially invited to attend their show and partake of the blowout which will be held on visitors' day, Saturday, November 18. A large number have already signified their willingness to attend and from the present indications it looks as if this city will be well represented. Everyone that goes can expect a good time for the Cream City boys have a reputation of doing things up "brown."

J. A. Budlong is fortunate in having a large crop of My Maryland roses for the color is far better than the Killarney at present and are taken in preference to the latter which are decidedly off color. A. J. Budlong's son Kenneth has graduated from the boiler room of the greenhouses and is now learning the wholesale business under the able instruction of Phil Schupp.

John Evert was one of the unfortunate growers who suffered a great loss during the severe storm on the evening of November 11, when the end of one of his chrysanthemum houses was blown down and his crop of Golden Chadwick and W. H. Chadwick were frozen. The loss is estimated at about $4,500.

The Chicago Carnation Co. won a large number of prizes at the various fall shows with their choice stock and the manager is well pleased with the decision of the judges. A. T. Pyfer and Peter Olsem left Monday for Cincinnati with the intention of returning in time to take in the show at Milwaukee on Thursday, November 16.

Poehlmann Bros. Co. is making large exhibits and winning many prizes with their choice stock at the fall shows this month. The roses, carnations, chrysanthemums and other seasonable stock is arriving at the store in large quantities and John Poehlmann and his force of assistants are kept busy filling the orders that are received.

The Chicago Flower Growers' Association is receiving large quantities of roses, carnations, chrysanthemums, lilies, pompons and other seasonable stock. Otto W. Frese is preparing for a brisk Thanksgiving trade and says his firm will be particularly well fixed on stock for this occasion.

Frank Johnson, of the A. L. Randall Co., served on the jury in Judge Owens' court on November 14 and is now making up for lost time by preparing for a banner fall trade.

H. N. Bruns is holding a chrysanthemum show at his greenhouses, 3040 West Madison street, and cordially invites the public to visit his greenhouses and enjoy the display.

Peter Reinberg is enjoying a three days' hunting trip in company with Mayor Harrison and Attorney Philip McKenna of the city law department.

J. F. Kidwell is building a new cistern and is going to install a new electric pump in his greenhouses at the Wellsworth farm.

Henry Wittbold and his force of assistants are very busy this week with decoration work at the land show in the Coliseum.

Weiland & Risch are having a good call for the fine Prince de Bulgarie and Melody roses that they are growing.

A. Miller, of A. Henderson & Co., will start out on another business trip after Thanksgiving.

Visitors: John Breitmeyer and Herman Klagge, Mount Clemens, Mich.; Chas. H. Totty and Wm. Duckham, Madison, N. J.; ——— Daut, Decatur; Paul M. Palez, Little Rock, Ark.; H. A. Fischer, Kalamazoo, Mich.

Chicago Bowling.

The Violets and Roses each won two and lost one game to their opponents, the Carnations and Orchids, on Wednesday evening, November 8, when Hendricksen, Foerster and Allie Zech were the high men of the evening, bowling 235, 226 and 201 respectively.

The following table shows the number of games won and lost by each team to date:

	Won	Lost		Won	Lost
Orchids	15	3	Roses	9	9
Violets	9	9	Carnations	3	15

Individual and team scores for games played November 8.

Buffalo.

ALL KINDS OF WEATHER.

We have had ideal weather the past week with the exception of Tuesday, which was election day, when it was cold with a very brisk wind. The other days have been of true Indian summer, but Sunday brought a sudden change when the wind reached the velocity of a gale causing a fall in the temperature of 46 degrees, and good winter weather is with us. Chrysanthemums are still improving and each day shows great gain. Other stock is in good supply and of fine quality.

NOTES.

There has been some talk of the Buffalo Florists' Club going out to Delaware Park in a body and viewing the grand display there but so far there has been no notices sent out. It is rather discouraging to the park growers who made special efforts this year to get specimen plants and flowers for the expected flower show and then for the club not to at least pay them a visit. The public have been visiting the display daily and are loud in their praise.

Unfortunately for the people Charles Schoenhut was not elected councilman last Tuesday. He is a democrat and the republicans were victorious. As to Judge (?) Boettger, of the Town of Amherst, the voters did not act wisely, for Rudolph would lend dignity to that office, but it went democratic. Politics is a problem that many try to solve.

Several receptions and more debutantes were on the calendar last week, also a very large wedding which was handled by W. J. Palmer & Son, chrysanthemums, American Beauties and Bon Silene roses and pompons being used in great quantities. It was about as large a decoration as will be arranged this season.

S. A. Anderson has a fine lot of Begonia Gloire de Lorraine. The rose Mrs. Aaron Ward is also in fine condition.

Charles Sandiford, gardener to J. J. Albright, was the judge at the chrysanthemum show in Toronto last week.

The Florists' Bowling Club held their first meeting November 13 and made arrangements for the winter bowling.

BISON.

Philadelphia Notes.

The Leo Niessen Co. are strong on American Beauties. They have the entire cut of several large growers and make a specialty of this rose. They have also established a separate violet service, this department being in charge of Ed. Upton. This is a good move as it enables the stores to get quick service in the delivery of this important flower.

H. A. Dreer is pushing Phoenix Roebeleni. They have a splendid stock of this fine palm in all sizes, in the larger sizes from 8-inch to 10-inch pots. When full of character leaves they are certainly one of the most graceful and decorative plants now in cultivation, and being as hardy as an aspidistra should rapidly become a standard house plant.

The new rose Mrs. Russell exhibited by Alexander Montgomery of Waban Conservatories, Natick, Mass., attracted a great deal of attention from the rose growers. Almost invariably they voted it a good thing, and more than one said that they would like to see it growing, as, if it was a good producer, there was room for it.

John McIntyre has moved a little farther out Ranstead street and is now located at number 1713, where he has much larger quarters.

Ralph Shrigley has resigned his position with Ed. Reid.

St. Louis.

A SEVERE STORM.

One of the worst storms ever recorded in this city at this season of the year started in Saturday evening, November 11, with a light rain, being followed by a terrific gale, and the thermometer dropped from 75° to 16°, which had a great influence on the market, causing quite a let up in the retail trade. Roses and carnations are plentiful, as are also violets, which are sold at a low figure.

NOTES.

The St. Louis Florists' Club held a meeting Thursday afternoon, November 9, President Windler in the chair. After the routine business the members and visitors, numbering 80, went to Lippe's cafe and enjoyed a very nice supper. J. F. Ammann of Edwardsville, Ill., was toastmaster, and introduced Elmer D. Smith, Adrian, Mich.; C. W. Johnson, Chicago; August Poehlmann, Chicago; Chas. H. Totty, Madison, N. J.; Richard Vincent, Jr., White Marsh, Md., and Geo. Asmus, Chicago, who entertained the party with well-chosen remarks.

C. Young & Sons have opened up their branch store and conservatory at 5504 Waterman avenue, which will accommodate their west end patrons. Over 1,000 persons attended the opening, each one being presented with a lace fan as a souvenir.

Grimm & Gorly purchased the blooming plants at the show and have had special sales all this week. George Wagoner and Henry Duernberg, designers for this firm, are feeling good for they secured 10 first prizes for their floral work.

The chrysanthemum show advertised to open at Shaw Garden was not held for the storm of Saturday evening blew down the tent and damaged the plants. Prof. Irish saved a few but the majority were frozen and ruined for show purposes.

Wednesday evening the Horticultural Society entertained the members of the Chrysanthemum Society of America to a supper, after which remarks were made by those present.

William Smith of the W. C. Smith Wholesale Floral Co., suffered an accident while riding in a buggy in the country which collided with an automobile. W. F.

MALDEN, MASS.—E. D. Kaulback & Son have erected a modern greenhouse in the rear of their store in the Kaulback building, 160 Pleasant street.

VERY LITTLE CHANGE.

There is very little change in the market conditions, except that on Friday carnations took a slight advance. With a cold snap there might be a turning point in the market. Violets are quite plentiful. Roses and all the other staple flowers are in quantity. There is no scarcity of anything. Chrysanthemums are still here and the best for any year which we can remember.

NOTES.

Some nice antirrhinum, something new, grown by James Wheeler of Natick, was seen in the market.

H. M. Robinson & Co. had some excellent chrysanthemums and are well stocked up with carnations.

Gardenias have begun to come in. Some very fine ones were seen at Welch Bros. MAC.

Pittsburg.

CHRYSANTHEMUMS SELLING WELL.

A little bit of nice weather helped business somewhat, so that all were fairly well satisfied at the close of the week. Saturday's business should have been much better but our usual Saturday rain caught us. As to flowers, real good chrysanthemums are scarce, while there are plenty of smaller ones. Chrysanthemums are selling better all the way round this year than for the past two seasons, especially the pompons. American Beauties are very fine and a great many of them are being used. Violets are exceptionally scarce, one having to leave an advance order in order to insure them. Lilies are more plentiful again and move slowly.

CLUB MEETING.

Probably a finer collection of chrysanthemums never greeted a meeting of the Pittsburg Florists' and Gardeners' Club than that on their regular meeting November 7. Each bloom shown was a specimen, and to mention each would be a tiresome operation, so we will mention a few of the varieties that seemed most in favor. Chas. H. Totty sent Wm. Turner, probably the finest white ever seen in this city, also the following pompons that made a decided hit: Hilda Wells (red), and E. Notteli (yellow). E. Jenkins, gardener for A. R. Peacock, showed all the standard varieties, and said he considered Beatrice May his best white. W. A. Morton, who announces on his card "amateur" and who only attends them when he gets home from his work, showed a very creditable collection and

was much complimented on his success. Incidentally, he joined the club.

Superintendent Burke and Foreman Jones of Phipps conservatories brought in a fine collection of standard and new varieties. They also had Wm. Turner (white) and this specimen was probably the finest white commercial chrysanthemum ever shown here. Mr. Jones considers it in a class by itself. They also showed Reine Du Japon, a rather large one with long straggly white petals which were narrow; the bloom measured six inches, creating much interest. Two others, Rose Pockett and W. Woodmason, were very well thought of.

P. S. Randolph showed all the commercial varieties. He disposes of all his immense stock through his own retail stores and when he states that he finds W. H. Chadwick and Golden Chadwick and Dr. Enguehard his best payers it is time to sit up and take notice. He also likes a certain amount of good bronzes and good double pompons, but says it does not pay to handle the singles, as they wilt so quickly. Goodwin & Son, who wholesale most of their cut, had all the good late commercial varieties. Mr. Phipps, gardener for H. J. Heinz, showed standard exhibition varieties. Fred Wissenbaugh, gardener for J. L. Parks, had Wm. Duckham, Black Hawk, and Garza done to perfection. He also showed Celosia Castle Gould. Pittsburg Cut Flower Co. had commercial varieties which included fine Col. D. Appleton and a very good Lady Lee, a large white pompon.

Homewood Cemetery had what Pres. Jones called a "high classed" Dr. Enguehard, as they had stems six feet long and very fine flowers. All were in pots. They also had a very fine double white with a pink blush pompon, which every one likes, Elsie Dordon. Another good white pompon was Kingston White. Walter James had a nice exhibit. Elmer Smith & Co. sent a lot, which did not arrive on time.

NOTES.

The chrysanthemums which Elmer D. Smith & Co. shipped in, but which arrived too late, were exhibited before the Botanical Society of Western Pennsylvania, by John W. Jones. Special mention might be made of the following, which were very fine: Poughkeepsie, White Perfection, Smith's Sensation, Naomah, Pink Gem, Aesthetic. J.

Boxwood

50-lb. case, $7.50. Bushy sprays, of a fine brilliant green. The best we have ever handled.

White Lilac

Per bunch, $1.25. The finest White Lilac ever grown. We have plenty of it and can supply you at any time.

Philadelphia.

A LULL IN TRADE.

Chrysanthemums are still the feature, many fine blooms being seen, many, too, that are not fine, but taken as a whole the standard is equal to that of last season. W. H. Chadwick and Golden Chadwick, Silver Wedding and Golden Wedding made their appearance. There were quite a number of other sorts as well as quite a few of which should be discarded. Only the best standard sorts are worth giving valuable greenhouse room and all that goes with their culture. There never seems to be too many of Major Bonnaffon, Maud Dean or Ivory, and clean stock of these sorts are more sure of a good market than many others. There are quite a good assortment of pompons offered, but the returns are not satisfactory, as they do not make the same show for the money as the larger flowered varieties. The weather has been rather too warm and almost all varieties are now ready for cutting. Last Saturday and Sunday was very summer-like, with the glass showing as high as 70°. Roses are plentiful, particularly white. the White Killarney is now in crop, with many growers. Pink Killarney and Maryland shortened up at the last of the week until on Saturday the supply gave out entirely, which is very unusual at this time of the year. Plenty of American Beauties at last week's prices. Violets are also way below demand, with prices higher, $1.00 being now asked for both single and double. Lily of the valley is normal, about equal in supply and demand. Cattleyas are a trifle less plentiful and in good demand. Gardenias move off readily at good prices. The stock is rather limited. Carnations will soon become a factor as they are fast getting into form. Quite a few of Mrs. C. W. Ward and Alma Ward are being grown about here and will be leaders this season. Trade the past week has not been any too brisk, there seeming to be a lull. The balance of the month should be booming as there are a number of coming out teas and other social affairs that closely follow one another.

NOTES.

The trade was generally much pleased with the chrysanthemum show just closed, and much of the credit is due to Wm. Graham whose work and decorative setting gave the whole display a very artistic and finished appearance.

SOME IMPROVEMENTS NOTICED.

Business in the wholesale cut flower market is very unsatisfactory. Chrysanthemums, which are now in the height of their season, are not cleaning up as well as they should. Some lines are improving and prices have advanced. This is especially so with orchids, violets and American Beauty roses. It is difficult to dispose of the large shipments of the lower grades of roses that are arriving, at any fair prices, but the choice blooms of Richmond, Mrs. Taft, Radiance, Mme. Chatenay and Lady Hillingdon meet with ready sale. Carnations, even the finest of blooms, are moving slowly. Sweet peas are now plentiful, of improved quality and selling better. The supply of lilies has shortened up but this has made no material difference in the price and the same may be said of lily of the valley. Paper White narcissus have made their appearance, and as is usual with the first shipments, are disposed of quickly. There are not enough good gardenias to supply the demand at good prices. All houses seem to be carrying a surplus of smilax and asparagus. Adiantum Croweanum is doing better.

NOTES.

The exhibition of the Horticultural Society of New York, held in the American Museum of Natural History, was the best ever given in that building. Joseph A. Manda, who was the manager, was congratulated by everyone on the arrangements. It was to be regretted there were not more entries in the classes of carnations and roses, but what exhibits were staged were of the best quality. J. D. Cockcroft was awarded first prize for 50 blooms, Lawson shade, with his seedling No. 310. Mr. Cockcroft also received a diploma for 25 blooms for the best new variety in any color with No. 310. The 50 Killarneys exhibited by L. B. Coddington, which won first prize, were magnificent. All of the splendid roses grown on the large establishment of Mr. Coddington are sold by H. E. Froment.

A. Moltz & Co., who were among the first to go in the business of "speculating," so called, have built up a very large business on these lines. They have a very large space, have installed up-to-date ice boxes on the first floor of the Coogan building, and carry a large stock of everything in the market at all times. They do not sell any flowers direct from the growers, preferring to buy outright in the open market.

Situated on the main floor of the Coogan building is the store of Charles Millang, the "live wire" of the wholesale business. Mr. Millang has erected a balcony in the store where his office department is now situated. This has given much more room for proper display of the fine lines of all seasonable stock he is receiving, but even with these alterations he is at times much crowded for room.

One of the greatest exhibitions ever held in the Madison Square Garden was the New York's First Land Show. The show could have probably gone on indefinitely, but the management were unable to get further time. Very attractive exhibits were made by Peter Henderson & Co., W. E. Marshall & Co., Ellwanger & Barry, and J. H. Harrison's Nurseries.

Considerable excitement was caused November 9 when fire broke out in the upper floors of the Kervan Co. This would have been a very serious matter if it had not been checked promptly, but as it was the damage was trifling. This company has the entire building at 119 West Twenty-eighth street, where they carry a tremendous supply of all decorative evergreens.

GROWERS' CUT FLOWER CO.

Mention the American Florist when writing

C. W. Scott, John Meisen and John Donaldson have returned from their visit to H. D. Brown, Richmond, Va. They tell brilliant stories of the success of their hunting trip but the consensus of opinion seems to be that the only game they discovered was on the boat going down.

Charles Habermann of 2668 Broadway has a fine store and is now well established in the growing residential section of the city and is making a magnificent display of specimen blooms of chrysanthemums in his window daily.

James Cockcroft, father of J. D. Cockcroft, the well-known carnation grower, died Sunday, November 12. He was sixty-nine years old and was the founder of the Edward Thompson Law Publishing Co. of this city.

Harry Gessner, who for so many years was associated with the late John W. Scallen, has made many alterations in his store in the Hotel Imperial, until he has now one of the most unique and attractive stores on Broadway.

P. J. Smith, who is the selling agent for many of the largest growers in this vicinity, is well pleased with the business outlook. One of Mr. Smith's specialties being the lily, he is able to fill orders for any number any day in the year.

Some time during the night on Wednesday the large plate glass window of the Growers' Cut Flower Co. was broken, but as the weather was very mild business was not interfered with.

M. C. Ford is receiving large shipments of American Beauties and carnations of excellent quality. All of the fine carnations grown by Henry Hession, Flatbush, are sold by this house.

Robert E. Berry, for many years in the park department of the city of New York is now superintendent of the estate of Mrs. Palmer, Great Neck, L. I.

Harvey Weston, Jacob Houek and C. F. Bertanzel were in town November 10, and in the evening attended the meeting of the bowling club.

Henshaw & Fenrich are receiving sweet peas of all colors, of the finest quality, from George F. Schuneman, Baldwin, L. I.

Peter T. Devoy, for years a prominent violet grower of Poughkeepsie, N. Y., died November 6, aged 43 years.

Howard E. Blauvelt is now in the flower shop of A. Wadley at Plainfield, N. J.

Visitors: F. H. Kramer, Washington; Alex Montgomery, Natick, Mass.; Wm. Nicholson, South Framingham, Mass.; Robert Montgomery, Hadley, Mass.; A. J. Loveless, Lenox, Mass.; Wm. . McCallum, Islip; Alec MacKenzie, Glen Cove.

There was an enthusiastic meeting of the Bowling Club Friday night at which the following scores were made:

Chadwick	179	191	227	247
Nugent	104	121	126	
Fenrich	170	171	126	195
Scott	126	130	128	142
Holt	81	121	159	138
Young	156	164	113	114
Rickards	158	114	123	103
Weston	67	102	75	
Zaugen	103	157	107	
Hauck	93	94	103	

Captain Chadwick was not quite in form, his average being 211 only.

Y.

New York Florists' Club.

The meeting of the New York Florists' Club, held November 13, was very largely attended, but as it was ladies' night and J. Otto Thilow, president of the Florists' Club of Philadelphia, was to give his illustrated lecture on a trip through the Canadian Rockies, the business meeting of the club was very brief.

The secretary read the resolutions prepared on the death of I. L. Powell, Millbrook, N. Y. The nominating committee made the following report: For president, John B. Nugent, Jr., Jos. A. Manda, I. S. Hendrickson; vice-president, Philip Einsman, John Rassbach; secretary, John Young, W. G. Badgley; treasurer, Wm. C. Rickards, Jr., C. W. Scott, W. H. Siebrecht, Jr.; trustees, Philip Kessler, Wm. Duckham, John Donaldson, Robt. G. Wilson, F. A. Bolles, Harry Turner.

A very important communication was read from Professors John Craig and A. C. Beal of Cornell University on the organization of New York's floricultural interests. Upon Patrick O'Mara's motion this matter was laid over until the December meeting, so that it could have proper consideration.

Roman J. Irwin, Wm. Chalmers, John Birnie, H. Langeler, H. C. Riedel and Myer Othile were nominated for membership.

The committee on awards made the following report: Vase of carnations Wodenethe by Chas. H. Totty, thanks; vase of seedling carnation No. 310, from J. D. Cockcroft, scored 84 points; vase Double Improved White Killarney by S. J. Reuter & Son, Westerly, R. I., scored 85½ points and was granted a preliminary certificate; vase of carnation Brooklyn by Chas. Weber, thanks of the club; vase of carnation seedling 46, thanks of the club; seedling petunia exhibited by Arthur T. Boddington, honorable mention; vase White Killarney by Robert Simpson, Clifton, N. J., vote of thanks. The committee on awards who visited C. H. Totty's place at Madison, N. J., to view and judge the new rose Sunburst growing, reported as follows: Condition 14, productiveness 13, size 9, color 13, stem 9, form 9, substance 9, fragrance 5, distinctiveness 9, or a total of 90 points, and a certificate of merit was awarded.

Mr. Thilow's illustrated lecture was most pleasing, and that gentleman received a hearty vote of thanks for his talk and magnificent views. The hour was very late and the musical programme had to be curtailed. However, Mrs. Maurice Glass gave several beautiful solos and J. Hayes sang some comical songs. Harry Bunyard, who has a lovely baritone voice, gave selections from the latest opera successes. Wm. E. Marshall accompanied Mr. Bunyard on the piano.

BROOKSVILLE, MASS.—Freeman Wagner has purchased the greenhouse of P. O. Burnham on Franklin street.

SPRINGFIELD, MASS.—A building permit has been granted Max F. Jahn for the erection of a greenhouse at 1300 State street.

LITTLE ROCK, ARK.—Paul M. Palez is is in Chicago this week looking up stock for Thanksgiving. He is a candidate for alderman of the third ward on the democratic ticket.

SATURDAY'S RUSH.

Stock continues plentiful with a good demand. The weather the latter part of the week turned much warmer, bringing out the buyers in large numbers, with the result that the wholesalers had to call on their greenhouses for more stock. Barely enough large chrysanthemums to fill orders were on the market for Saturday's rush, mediums were quite plentiful, but they also cleaned up. Ivory is perhaps the most popular small variety in the market. One retailer dyed a large quantity of Ivory a pretty pink shade and called them the "Pink Lady 'Mum." The "Pink Lady" is playing at one of our local playhouses this week. It is needless to say that there was a flourishing business while they lasted. Roses cleaned up nicely at the end of the week, particularly the long stemmed ones. American Beauties are always in good demand and stock is exceptionally fine. Smilax is plentiful, as is all other greens.

NOTES.

There was born to Mr. and Mrs. H. P. Knoble on November 9 a baby boy. this date is also Mr. Knoble's birthday anniversary. Congratulations. Both mother and baby are doing nicely. Mr. Knoble, Jr., was the recipient of several cute presents from admiring friends.

Frank Smith, formerly of the Smith & Fetters Co., is back from California for a few weeks' visit. C. F. B.

SCHENECTADY, N. Y.—The florist trade has made a decided gain since the colder weather set in. There is a plentiful supply of all the seasonable flowers, with a good demand, and they are selling at fair prices.

NEW SPRINGVILLE, N. Y. — Emil Schraeder, awakened by a burglar alarm November 7, rushed into the yard with a loaded revolver. The burglar knocked him down and was about to seize the pistol when Mr. Schraeder pulled the trigger killing the intruder.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

Next annual convention, June, 1912.

HENRY A. SALZER and wife, of La-Crosse, Wis., are in Florida.

J. CHAS. MCCULLOUGH, of Cincinnati, O., is making a California trip.

J. M. THORBURN & Co.'s preliminary trade list is at hand dated October 31.

THE annual meeting of the National Association of Official Seed Analysts will be held at Columbus, O., November 17-18.

NEW YORK.—Under the title of "Svalof" Loechner & Co. are mailing patrons an interesting pamphlet on their Swedish seed specialties.

VISITED CHICAGO: C. C. Massie, of Northrup, King & Co., Minneapolis, Minn.; O. L. Coulter, representing C. C. Morse & Co., Santa Clara, Calif.

MERIDAN, MISS.—The Kimborough Seed Co. is the name of a new firm which will enter the wholesale and retail seed business, and will open a store in the Ormond building on Twenty-second avenue.

CHICAGO.—Prices on the Board of Trade, November 15, for grass seed were noted as follows: Timothy, $13.50 to $15.50 per 100 pounds.—A. H. Goodwin and wife will spend the winter at the Hotel Bellaire on the west coast of Florida.

JOHN LEWIS CHILDS, Floral Park, N. Y., writes as follows November 6: "We have found the retail trade in fall bulbs much better this year than it has been for four or five years past, and from this fact have hopes that the spring season will also be at least fairly good."

HOLLY reports are meager, breakers as usual holding back details of actual conditions in order to secure best prices. There should be better holly than usual this season, judging by the fruit crop conditions generally, but fancy stock is not likely to be cheaper than usual. Good freezing weather exists in the holly districts and stock should carry safely.

Non-Warranty Again Sustained.

LEONARD VS. CRARY.

In our issue of November 4, page 802, we stated that the Leonard Seed Co. had won its suit against the Crary Canning Co., involving some $6,000. We are indebted to the former for details of the case as follows:

Leonard Seed Co., plaintiff and respondent, versus the Crary Canning Co., defendant and appellant.

On February 14, 1908, plaintiff and defendant entered into a contract whereby the plaintiff agreed to sell to the defendant certain varieties of seed peas. Among other things, the plaintiff agreed to furnish one thousand bushels of "Advancer" peas, such peas were to be grown during the season of 1908, to be delivered after harvest, but in season for the planting trade for the year 1909. A quantity of peas were delivered under this contract to the defendant, it giving its promissory notes in payment therefor according to the terms of the contract. The peas so sold were in turn sold by the defendant to various farmers for the purpose of planting, and under contracts by virtue of which the farmers agreed to sell the peas raised from such seed to the defendant. The plaintiff brought action upon the notes. The defendant, among other things, interposed a counterclaim setting forth that the peas furnished were not "Advancer" peas; that they were received by the defendant without knowledge of that fact; that there was no means of discovering that they were not Advancer peas until after they had been sowed and the seed had germinated, and that as soon as the defendant discovered that the peas were not of the variety purchased it notified plaintiff. The counterclaim further set forth that the peas were mixed with other different varieties, making it impossible to harvest them without a mixture of overripe peas of varieties other than Advancer. Facts are pleaded tending to show damage, and judgment is asked for the amount thereof. On the trial the court allowed the defendant to amend its answer by setting up a new counterclaim for the purchase price of the peas. The trial court held that the peas were sold without warranty as to quality or description, and directed a verdict for the plaintiff for the amount claimed, less $343.75. The peas were shipped from Chicago and invoiced on the basis of fifty-six pounds to the bushel. The court held that the defendant was entitled to receive sixty pounds per bushel, and hence made the foregoing reduction. From a judgment in plaintiff's favor defendant appeals.

The contract for the sale of the peas contained the following provision:

"It is also understood and agreed that the party of the first part, (plaintiff) does not give, and its agents and employees are forbidden to give, any warranty, express or implied, as to description, quality, productiveness, or any other matter, of any seeds, delivered or to be delivered by it, and that it is not, and will not be in any way responsible for the crops."

Counsel for the appellant admit "that plaintiff is freed by the terms of this contract from all liability as to the seed in question being good or bad, large or small, wrinkled or smooth, black or white, wormy, sound, vital or dead." But counsel argue that the peas furnished under the contract must be of the "Advancer" variety and that plaintiff was not relieved by its contract from liability for damage resulting from furnishing peas other than "Advancer" peas. It was practically conceded on the argument that the clause quoted was intended to exempt the plaintiff from such liability as was sought to be enforced against it under the counterclaim in this action. The concession was advisedly made. The peas to be delivered under the contract were described therein as "Advancer" peas. But the contract provided that no warranty express or implied was given that the peas furnished should be of the description named therein. If a dealer in seed peas can exempt itself from liability for selling bad, wormy or dead peas to a grower, no good reason is apparent why it cannot go further and say that it will not be responsible in the event of an intermixture of other peas with the variety agreed to be furnished. Neither of the parties here are under guardianship or incompetent to contract. There is no claim that the contract signed was not the one agreed upon or that both parties did not fully understand what they were agreeing to. Plaintiff plainly undertook to relieve itself from liability in case of intermixture, and defendant agreed that it should be relieved. It is not claimed that the contract is void because contrary to public law or to public safety, and, if not, effect should be given to it. The vendee might reject and refuse to receive the peas if they were not "Advancer" peas, or it might well be that in the event of the shipment being made in bad faith, and with the purpose and intention of committing fraud upon the vendee, an action for damages for the fraud would lie, but we have no such case before us. If it be conceded that the contract is one-sided, it must also be conceded that the parties had a right to make a one-sided contract if they saw fit.

Counsel for appellant cite the following authorities to sustain the contention that, notwithstanding the agreement of the parties, there was a warranty that the peas sold would answer the description contained in the contract, or in any event that there was a breach of a condition that the contract by the failure of the plaintiff to furnish the thing contracted for. Josling v. Kingsford, 13 C. B. (N. S.) 447; Columbian I. W. & D. D. Co., v. Douglas, 33 L. R. A. 103; Shephere v. Kain, 5 B. & Ald. 240; Allan v. Lake, 18 Q. B. 560; Weiler v. Schilizzi, 17 C. B. 619. These cases do not hold that a party selling an article under a designated name may not relieve himself from liability in his contract for sale, in the event that the article delivered does not answer the description contained in the contract. Some very general language is used in the contracts of sale involved in the cases cited, and in some of them it might well be construed as being broad enough to extend to the description of the article, but in none of the cases has it been so construed. These cases were decided upon the theory that this general language was intended to refer to the quality of the article furnished and not to the description of the article itself. In Taylor v. Bullen, 5 Excheq. Reports 779, where an article was sold and the party undertook to relieve himself from liability in his contract of sale by stating that he would not be liable for any "defect or error whatsoever," it was held that the word "error" was broad enough to include an error in description as well as an error in quality, and that there was no liability on the part of the vendor, even though the article furnished did not answer the description of the article contracted for.

If the seller expressly refuses to warrant, there can be no excuse for raising an implied warranty. Habersham v. Rodrigues, 1 Speers (S. C.) 314; Farr v. Gist, 1 Rich. Law, (S. C.) 68. Fauntleroy v. Wilcox, 80 Ill. 477; Lynch v. Curfman, 65 Minn. 170.

In case of Blizzard Brothers v. Growers' Canning Co., 132 N. W. (Ia.) 176, is directly in point. There a package was marked "Large cheese pumpkin seed" and sold as such, when in fact it contained "Connecticut pie pumpkin seed" mixed with a few squash. On the package the following warranty was printed: "While we exercise great care to have all seeds pure and reliable and true to name, our seeds are sold without any warranty, express or implied, and without any responsibility in respect to the crop." There was no evidence to show that the purchaser read this warranty, but there was evidence showing that it was a general custom among seed men to sell seeds without warranty as to quality and as to true name, and such custom was held to be binding upon the purchaser. A contract deliberately entered into between two parties exempting one of them from liability in case seeds sold are not true to name, should be as binding as a custom among dealers not to sell with a warranty that the seeds furnished are true to description.

As before stated, we do not hold that, if the plaintiff acted in bad faith and with the intention of deceiving and defrauding the defendant, or even if it failed to exercise due

We will make it for you under your own brand, for $28 00 per ton. Send today for sample 100 lb. bag, $1.50. Mr. C. E. Jensen, of Atlantic City N. J., on Oct. 27th, 1910, writes as follows. 'I want to state that your three grades of Poultry Food—Chick Starter, Developing Food and "Square Deal" Scratch or Poultry Food—stands without an equal today. They are perfect mixtures and sound in grain and a pleasure to handle.'.

J. BOLGIANO & SON, Importers and Wholesalers (Established for 92 years). Baltimore, Md.

care and caution in selecting the seed, the latter would not have a cause of action for the resulting damage. No such cause of action has been stated in the counterclaim and no claim was made on the argument that any such cause of action was relied upon or existed.

The ruling of the trial court excluding testimony tending to show that the peas furnished were not "Advancer" peas, was correct on the record presented. There was present but one of two elements that were necessary to constitute a cause of action. The element of bad faith was not presented by the pleadings, and no claim was made by counsel that such bad faith existed. We find no error in the record.

By the court. Judgment affirmed.

REALLY GOOD !

Which will give satisfaction to all who grow them are

GODFREY'S SUPERB

"Canterbury Bells"

(Campanula Medium Calycanthema.)

Without doubt the finest strain of this useful and ever-popular plant yet offered.

ON EVERY POINT SUPERIOR TO ALL OTHERS

The plants are models in growth, of pyramidal form, from 3 to 4 feet in height, and, as pot plants for cool greenhouses, they are extremely valuable.

The flowers are much larger than those of other strains; of perfect form, i.e., sound both in cup and saucer. The colors are very varied, in about ten shades of White, Blush, Rose Pink, Deep Pink, Mauve, Blue, Lavender, Lilac and Violet.

SEED At present can be sold in mixture only. **PRICE: One Shilling and Six Pence per packet. Trade Price, Twelve Shillings per doz.; Ninety Shillings per 100.**

Mention the American Florist when writing

Tacoma, Wash.

Local florists are complaining of poor business, without an exception, and the stock of cut flowers is abundant and excellent. We do not recollect of any former season when so many good chrysanthemums were to be seen. Roses and carnations are good and violets come from California in the best of condition. Smilax and asparagus are being received but generally of inferior quality. Bulbs are not moving fast and several department stores are getting experience and not much money for them.

NOTES.

J. B. Pilkington has assumed full charge of the stock and greenhouses of the Northwestern Floral Co. and has about finished rearranging everything. He has received a carload of nursery stock and ornamentals from his place in Portland, Ore., and he thinks that prospects are very good.

English holly in this immediate locality seems to be rather short of berries, but most of it comes from Victoria and British Columbia so there will be sufficient.

H. W. Manike was very much disappointed in his bulbs being greatly delayed in transit and many of them were rotted and spoiled.

The first snow of the season fell November 8 with a genuine hard freeze which will finish all the outdoor flowers.

F. C. Smith has opened a cut flower store in room 908, Tacoma theatre building. S. L. H.

H. F. Hall, Boston Mass., President: C. West, Irondequoit N. Y., Vice-President; S. W. Severance, 508 Walker Building, Louisville, Ky., Secretary; M. L. Ruetenik Cleveland, O., Treasurer.

THE November statement of the potato crop made by the United States Department of Agriculture records a reduction in the yield in all the principal states but Wisconsin and a falling off in the quality except in Maine and Wisconsin, which show improvement. The yield in Colorado was but 35 bushels per acre with an average production for 10 years of 134 bushels, the total production being but a little over 2,000,000 bushels, against 6,500,000 for 1910, the quality for a 10-year average being 93 per cent and this year but 70 per cent. Wisconsin shows an increase of nearly 6,000,000 bushels, with the percentage of quality rising from 86 to 93 per cent, and an increase from 95 to 116 bushels per acre in yield.

Christmas Tomatoes.

We have repeatedly in these columns expressed our faith in the future of greenhouse tomatoes. This product has gained a permanent hold in the spring and early summer months, but in the fall of the year greenhouse tomatoes are rather a new comer. There are two reasons for this condition—first, the difficulty of production, and second, the reluctant buyer who has been accustomed to buying his tomatoes at so much per bushel instead of per pound. The change from an oversupply to a scarcity is sudden and it will take some time before the general public will appreciate the greenhouse tomato in the early winter to such an extent as to pay the price which these goods demand. The only way for growers is to go slow and increase their output as the market develops.

From a grower's point of view the tomato, like the cucumber, is rather difficult to do well in the fall. Diseases which are unknown in the spring hamper us in the fall and with the declining sun failure is more easy than success. The man who is purely a lettuce grower is not likely to succeed at first trial as the tomato crop requires entirely different handling than lettuce, or in other words, what will do for lettuce will not do with tomatoes. Most lettuce growers are too enonomical with heat even for lettuce and the same method applied to tomatoes means failure. The man who is likely to succeed is he who can grow good cut roses in winter. It would pay a lettuce grower to hire a good rose grower and tell him to proceed exactly as with roses only omitting the syringing. The tomato dislikes wet foliage and all water should be applied to the roots only. The temperature requirements are also very much like rose temperatures, if anything, on the high side. Thus 58° to 60° is right for night, with the usual advance in sunlight.

Not long ago a grower asked for advice in regard to diseases and insects on cucumbers under glass. The reply came short and correct. If you cannot grow clean, throw them out and plant something else. This is sound advice. Both cucumbers and tomatoes can be grown clean and perfect by close attention to cultural detail. However, we have always found tomatoes to respond remarkably to Bordeaux spraying and if we had any leaf trouble, we would lose no time to apply 4-4-50 Bordeaux formula, being sure to spray lightly two or three times in close succession until the foliage is evenly covered and not blotched. This will spot any fruit under way, but the stains will wipe off readily with soft cloth, leaving fruit glossy and perfect. Never wash tomatoes, if avoidable, as they absorb water through the stem end, which will speedily ruin them. Tomatoes can be kept a long time if picked a little green and stored in a cool, dry, airy place. We would not be afraid to hold three weeks' picking for Christmas. Tomatoes for early winter should have their fruit set when dark weather comes on, and from then on the foliage must be kept alive by good cultural methods and spraying if needed.

MARKETMAN.

San Francisco.

H. Goerthain, of Redwood City, cordially invited all members of the Pacific Coast Horticultural Society to visit his nurseries Sunday, October 29. A number of members left San Francisco on the early morning train, and did not return until late that night, after having experienced, socially and beneficially, a very pleasant outing. While in this vicinity, a visit was also made Frank Roach, who also operates a nursery in Redwood City.

Pelicano, Rossi & Co. recently executed a very difficult design for a prominent member of the Italian colony who died in San Francisco a few days ago. It was a large panel with the Cross of the Legion of Honor designed thereon, and at the bottom of which were the crossed American and Italian flags, surmounting which was a large eagle. It was made of chrysanthemums, carnations and roses, and presented a most imposing piece when completed.

Schwerin Bros. recently purchased a very fine pair of horses for their delivery wagon. They are the pride and joy of Mr. Schutenhaus, the city salesman.

R. Armstrong, of Sacramento, who is a well-known grower to the trade in San Francisco, was visiting in this city for a few days. ARTUS.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N. Y., Sec'y. Thirty-seventh annual convention to be held at Boston, Mass., 1912.

YALESVILLE, CONN.—The Barnes Bros. Nursery Co. have rented sixteen acres of land upon which to grow their young peach trees.

FRANK W. POWER, secretary of the Oregon State Horticultural Society, will, in conjunction with his work, open a horticultural correspondence school, furnishing courses in fruits, their culture and diseases.

LOVELAND, COLO.—The Northern Colorado Nursery Co. have had a busy fall, car load lots of plants having been shipped to New Mexico and Arizona. A new packing house will be erected to meet the increased demands.

THE twenty-sixth annual meeting of the Oregon State Horticultural Society was held at Portland, Ore., November 15-17. Valuable papers on the cultivation of fruits and their marketing and on trees and planting were read and discussed.

VICTORIA, B. C.—The British Columbia Nurserymen's Association was formed at a gathering of nurserymen in this city and the following officers elected: Richard Layritz, Victoria, president; C. A. S. Atwood, Grand Forks, vice-president; Richard McComb, Aldergrove, secretary and treasurer; V. Crawley Ricardo, Vernon; Charles L. Trotter, Vancouver, and the officers ex-officio, executive committee.

Late Highly Colored Shrubs.

A few shrubs are still brilliant in their autumn dress and the leaves of others are only beginning to turn. The most important of these last is Viburnum Canbyi, a native of eastern Pennsylvania and of Delaware, states the Bulletin of Popular Information. This is the last of the viburnums to flower; and its bright blue fruits do not ripen until October. Plants of this handsome shrub in the Arnold Arboretum are now fully ten feet high and from ten to twelve feet in diameter. The large leaves are only just beginning to turn from dark green to the color of old leather and will be in good condition for two or three weeks longer.

The leaves of two currants are just turning scarlet. These are Ribes curvatum and the Chinese form of Ribes fasciculatum. Ribes curvatum is a little known plant found a few years ago in the neighborhood of Stone Mountain in central Georgia. It has white flowers gracefully drooping on long stems, and in cultivation has proved to be one of the most attractive in the large collection of these plants in the Arboretum. The beauty of the Chinese currant at this season is increased by the bright red fruits which are still on the branches. This handsome currant is the only one of its genus in the collection with fruit which ripens in the autumn.

A few other shrubs are still worthy of notice for their autumn coloring. The most conspicuous among these now perhaps is Cornus sanguinea, with leaves the color of old Spanish leather. This is a large shrub from Europe which has been able to adapt itself perfectly to our climate where it flowers freely and produces large quantities of dark-colored fruit which, however, has now disappeared.

Other shrubs with still highly colored foliage are the Japanese Viburnum tomentosum with leaves of dark reddish brown, and Lyonia or Andromeda ligustrina, with bright scarlet leaves.

Washington.

SUDDEN CHANGE IN WEATHER.

Although the weather bureau of the U. S. Department of Agriculture is often subject to the slings and arrows of adverse fortune, it is not more than half bad and we rise to pay it a tribute. It has made one good guess. November 12 the bureau predicted colder weather and it got cold that same day. A drop in the temperature of 45 degrees in fifteen hours is going some and that is what this city experienced between the evening of November 12 and the morning of November 13, or from 67 degrees down to 22 degrees. Just what effect this cold snap will have on the visible supply of flowers cannot now be foretold, it depending largely on its duration. The business of the past week was very fair and a number of weddings are on the programme for this week, all of which will call for good decorations. Congress will meet in a few weeks and as Washington lives on congress when it is in session and on the hope of the next congress after this one has adjourned, it is reasonable to presume that the florists will soon be very busy. The coming session will be marked by more political activity than lawmaking and it may be presumed that social entertainments will be prominent features. "Feed the brute" was the advice given a young wife by an older one, relative to managing a husband, and following that line it may be presumed that dinners and luncheons will be popular among the politicians this winter and they will all call for flowers. The great party in power is rent in twain and must do something to try and regain its lost prestige. The other party, after a long season of sackcloth and ashes, is now in sight of the loaves and fishes, and there may be slight hopes of its reaching them. All this leads to the belief that the florists stand a chance of reaping some benefit even if the country at large does not.

CLUB MEETING.

The regular monthly meeting of the club was held in Gude's hall on the night of November 7. The question of another meeting place was discussed and it was decided to remain in the present location. Several new members were admitted. After the meeting W. F. Gude invited the members to his famous table de hote, located in the basement of his store, where a good lunch was served.

NOTES.

The Gude Bros. Co. has for the past two weeks been showing a great and varied stock of chrysanthemums and thousands of people have visited their store.

Theodore Dietrich of Congress Heights has been sending in a notably fine stock of chrysanthemums. His sweet peas and violets are also good.

The new store of J. H. Small & Son at Fifteenth and H streets is rapidly nearing completion.

W. R. Smith is still in Providence hospital, but reported as improving.

Mrs. Arthur Ward is at Asheville, N. C., for the benefit of her health.

HENRY A. DREER, 714 Chestnut Street, Philadelphia, Pa.

ANNOUNCEMENT.

New Rose Sunburst

Color, orange and gold, very intense. **Bud** incredibly long---pointed and plump---opening into a **Big Rose. Stems** always stiff and long. A great **keeper.** In a **class** by itself. Raised by M. Pernet-Ducher from whom we bought the American rights. In order that Eastern growers might see the variety under culture, we made arrangements with Mr. Charles H. Totty, of Madison, N. J., to grow part of our stock.

It will be **disseminated** in America on March 1, by C. H. Totty and The E. G. Hill Co., and on the same date in Europe by M. Pernet-Ducher.

PRICE—$30.00 per 100; $250.00 per 1000, for own root.
$5.00 per 100 additional for grafts.

The rose has already made a splendid record both in this country and abroad. On our own place, in addition to all its other good points, it has made fine quality, blooming plants in less time than any variety that we have ever planted in the bench.

The E. G. HILL CO., Richmond, Ind.

Cyclamen Grandiflora, 4-in., 25c; 5¼-in., 35c.

Primula Chinensis, John F. Rupp's so well known strain, assorted colors, 4-in., 10c.

Begonia Gloire de Lorraine.

This is another great specialty of ours. We have grown them very extensively for the past ten years. Our special treatment makes the flowers very bright. We have the bright red and the pink Lonsdale. Have a houseful. Now ready, in bloom for Thanksgiving Day and Christmas, 6 in. pots, 50c, 60c, 75c to $1.00; 3-in. pots, 12c to $1.00.

Begonias New Improved Erfordi, Aschmann's Beauty, the finest Christmas and winter blooming Begonia in existence. Their beautiful pink and bright red large flowers are a puzzle to anyone who sees them in bloom; in flower now and all the winter through; large 4-in. pots, 20c; large 5¼-in. pots, 35c. Bear in mind this is an immense bloomer which has no equal.

Begonia Glory of Cincinnati, 5½ to 6 in. pots, 75c.

Another specialty of ours are now in. **Azalea Indica.** New stock. They are all in fine condition, full of buds. Now is the time to start for Christmas forcing. We have for Christmas the so well adapted standard varieties—Deutsche Perle double white: Simon Mardner and Mme. Petrick double pink; Vervæneana, double rose variegated. Price: 50c, 60c 75c $1.00 $1.25, $1.50 to $2.00. Easter Varieties—Schryveriana, Vervæneana, Simon Mardner, 50c, 75c, $1.00, $1.25 $1.50 to $2 00; Mme. Van der Cruyssen, Niobe, Empre4s of India, Apollo, Prof. Wolters, and others, in bud.

Just Arrived with the Azaleas.

A fine consignment of **Latania Borbonica,** in first class condition, perfect foliage, large stock, 8 good leaves, height given in consular invoice at 35 to 40 in., fit for 7 to 8 in pots, $1.00 to $1.50.

Combination Latania Borbonica (3 plants) in a 6-in. pot, which gives them a fine appearance, bushy, about 13 to 14 leaves to a pot, 6-in. pots, 75c to $1 00.

Ferns for Dishes, a good assortment, 2½-in. pots $5.00 per 100, large plants.

Pteris Wilsoni Ferns, 6 in. pans, 3 plants in a pan 25c to 35c per pan; very bushy.

Fern Balls, imported direct from Japan, already started, 50c.

What Mr. F. J. Michell, of the Well Known Seed House, Henry F. Michell Company, Philadelphia, Said:

"Oct. 28, 1911.

"Have just visited the greenhouses of Godfrey Aschmann, and must say it was indeed a great surprise to me. I have never seen a better lot of Araucarias, Azaleas, Ferns and other plants in all sizes and prices as are at Mr. Aschmann's."

25 at 100 rates. **Cash with order, please.**

All plants must travel at purchaser's risk.

GODFREY ASCHMANN

Wholesale Grower and Importer of Potted Plants. **1012 W. Ontario St., PHILADELPHIA, PA.**

Heacock's Palms and Ferns

Home Grown. Strong and Well Established.

Order at once, while you can have them **shipped by freight.** While our sales have been much heavier than ever before, we are still strong on sizes quoted:

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120-page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, $1.25

The Early Advertisement Gets There

Professor White of the Massachusetts Agricutural College Gives This Unqualified Endorsement of L. & B. Houses.

"Three years ago the Lord & Burnham Company constructed a range of greenhouses for the Massachusetts Agricultural College. This range consisted of a carnation, rose, tomato, cucumber, violet and general house, each 50 feet by 26 feet. These were connected by an alley house 128 feet by 12 feet. A palm house 40 feet by 28 feet was also built at the same time. The palm, general and violet houses were of the Lord & Burnham sectional iron frame construction; the other houses were of their pipe frame type. These houses are used largely for instructional purposes and have proven very satisfactory in every particular. A careful record of the yearly production of carnations and roses has been kept and the results show an excellent yield per square foot of bench area. The range is annually visited by a large number of practical growers and the universal comment has been that the range is "fine in every respect and that the college got a great deal for the amount of money spent."

E. A. White.

Wm. Schlatter & Son, Springfield Mass.

Knoxville, Tenn.

Trade has been good all through the summer and fall, the increase being about 35 per cent over last year. Chrysanthemums are now in full swing and all the florists are cutting heavily, but they are moving about as fast as they come along, at least none have gone to waste yet, and the prices have held up well. We have a population of about 82,000 and the florists will cut more than 100,000 chrysanthemum blooms, which makes a pretty good number to dispose of to that amount of people.

NOTES.

Chas. L. Baum has completed a new range of 12 houses which are planted to roses and carnations. The varieties of roses grown are American Beauty, Bride, Bridesmaid, Killarney, White Killarney, Mrs. Aaron Ward, Pres. W. R. Smith and Golden Gate. A new automobile delivery car is proving a great time saver as well as advertisement.

All the florists and friends of A. H. Dailey extend him their sympathy in the loss of his father who was injured at the exposition, by a large piece of marble which fell from the band stand, a few weeks ago, where he was listening to an address by W. J. Bryan.

Miss Lucy Hall Ryno has been cutting very fine, late, white dahlias, some with stems three feet long.

Karl P. Baum attended the Cincinnati chrysanthemum show.

Chas. W. Crouch has just completed three new houses. X. Y. Z.

PORT CHESTER, N. Y.—John Smith has purchased a piece of property on the corner of Grace Church and Sands streets and will erect three greenhouses thereon at once, and has acquired three large greenhouses in Darien which he will move on to the property. He will also erect an office but will continue his Liberty square store.

There's No Use in Talking When You Are Up Against Facts.

The facts are these: In all of our quarter of a century of greenhouse building, not one—no, not one—grower has ever gone back to a wooden house after having bought one of our Half Iron Frame Houses. Neither have they ever bought a Half Iron Frame after buying one of our Full Iron Frame.
Don't you go backward when the other fellows are going their darndest to go forward. Get in line—and keep there.

CHICAGO HOUSE WRECKING CO.
35th and Iron Sts., CHICAGO

Nashville, Tenn.

Trade conditions have been very satisfactory for the past week. The demand for flowers has been very good and the supply very fine, and the quality of all kinds is unsurpassed. Roses are fine, carnations are getting better every day, and violets are coming in more abundantly. More flowers could have been used but the supply was fairly satisfactory, and there has been no left over stock, all being used from day to day, which brings a smile to the faces of the dealers. Chrysanthemums are in fine shape, and good prices are being realized. The white and yellow are the favorites, but there are some beautiful varieties in bronze, pink and red. Many lovely plants have been grown and the florists' windows are radiant with the potted plants in full bloom.

NOTES.

Haury & Sons are having their formal opening, and their store presents a beautiful sight. Everything is fresh and new and has been gotten up with such good taste that it has made a beautiful setting for the handsome plants with which it is further adorned. Palms, potted chrysanthemums, ferns and vases of cut roses form the decoration. The tops of the white enamel show cases are fringed with potted plants of chrysanthemums in all colors and the windows and counters are banked with them. All day long throngs of people, largely the fair sex, have filled the store, admired the beautiful display and been presented with either a rose or a carnation. An Italian orchestra rendered a fine programme of music throughout the entire day. Each customer was also presented with a little booklet, "Care of Ferns and Ferneries," gotten up in very neat style with green cover artistically decorated. This little treatise is by Louis Haury, Sr., and is full of useful information. The store is under the management of John G. and Louis Haury, Jr., the two sons, both of whom have always been associated with their father in the business. The young men report a most flattering initial business which gives promise of future great success. At present they have about sixty thousand feet of glass and grow most excellent flowers. They have good American Beauty, Richmond, Golden Gate, Ivory, Killarney and other roses. Their chrysanthemums are very fine and their carnations equal to the best.

Geny Bros. have superb chrysanthemums, especially in large yellow. The flowers were never better and the roses are fine. They have Richmond, Killarney, Golden Gate, My Maryland and other varieties. The violets are coming in very freely. They have recently taken up the culture of orchids with excellent success. Of lily of the valley they have an abundant supply and large demand.

The Joy Floral Co. has excellent flowers and the decorator frequently makes a most striking window. One of the latest was a window of small yellow pompon chrysanthemums in pots through which peeped many Harrissi lilies. The effect was very pleasing. The large office force is kept busy waiting on the constant flow of trade.

Witch-Hazel.

"Mysterious plant; whose golden tresses wave
With a sad beauty in the dying year,
Blooming amid November's frost severe,
Like a pale corpse-light o'er the recent grave.
If shepherds tell us true,—thy wand hath power,
With gracious influence to avert the harm
Of ominous plants." —TOKEN.

SUGGESTIONS FOR PLANT GROWERS.

Azaleas.

Keep the azaleas well spaced out as they begin to come into flower. The buds should be swelling rapidly and beginning to show color by early December. Never allow the plants to suffer for water and where any are shipped out or carried into the residences they should be well watered before being taken out of the greenhouse. All plants that are sent away should be safely covered, and with azaleas it must be taken into consideration that they have been grown in a very warm temperature, and they chill easily. Plants that are forced as hard as these are to have them for the holidays are damaged very quickly if they get chilled, even if they do not get frost-bitten. We have known azalea plants to look all right when undone, but the blooms wilted and never came out. Six to eight thicknesses of newspaper with a heavy outside paper should always be used in doing up these plants and more if the weather is severe. If the plants are not far advanced enough to have them in for Christmas a little higher temperature will be required, for to have them in at that date is a necessity in order to get the best price. Watering or syringing with warm water will assist some, but we do not like to do this unless absolutely necessary to get them in on time. Plants that are too far advanced can be moved into a cooler house which will greatly benefit them for house culture.

Cinerarias.

As fast as these plants require it they should be repotted and shifted to larger-sized pots. They are growing rapidly and should receive no check or they will become stunted. Keep them in a cool temperature, that they may be strong and sturdy, and above all things now do not crowd them, but space them out often; when the leaves begin to touch go over the bench and space them out. These plants are beautiful in early spring if well grown but if they become crowded and get drawn they are but poor specimens. When the large plants begin to show their buds, if they are in as large pots as can be easily handled a watering of liquid manure will help them finish their flowers. They are strong growers and great feeders and where the pots are full of roots will need a little stimulant. Constant watchfulness for aphis is required in growing these plants, frequent fumigations will be necessary or standing on tobacco stems will keep the insect in check.

Lily of the Valley.

It is often remarked that it is surprising more florists do not force lily of the valley for the holidays than do. While the forcing of this flower throughout the season had much better be left to those who make a specialty of it, for the demand during the winter is not at all steady, and for the smaller grower to attempt to grow his supply would be hazardous and probably result in so much waste that he would lose in the end. But well grown pots of lily of the valley at Christmas will always be disposed of and there is more or less demand for the cut blooms at that time, and a small amount can be grown and a good profit obtained. Well selected cold-storage pips are necessary—it would not pay to attempt to grow the freshly imported stock—and a place in the greenhouse where the pipes can be enclosed and the pots kept dark with a temperature of 80° maintained. It is not necessary to build an enclosure of wood, for bagging or old carpeting may be hung under a bench and shelves provided that will enclose a space large enough to grow what pots may be required. Three weeks with cold storage pips in this kind of an enclosure will bring it in on time, but the inexperienced grower better take a little longer and if the flowers come too early as soon as the bells form the pots can be moved into a cool house and they will be much improved, in fact, they should have a few days in the light to give the foliage proper color. When the pips are received the roots should be cut so that they can be placed in the shallow bulb pans, and then planted in

clean sand, the tops of the pips being just even with sand. A dozen pips in a four-inch pan or 25 in a 6-inch pan. Water with warm water to settle the sand about the pips and if they stand above the sand when it settles fill in to the top of the pips, and then place the pans in the warm enclosure. Keep the sand wet and always water at a temperature as warm as the enclosure. When the flowers begin to show, care should be taken not to wet them when watering. As soon as the first bells begin to open place them in a partly shady location in a little cooler temperature and in a day or two they can be placed in full sunlight in a house with a temperature of 60°. They will then harden up nicely and keep longer.

Poinsettias.

The plants are now forming their showy bracts and the worries of the grower are nearly at an end, for if they have come through to this time in good condition the disposal of the plants and flowers is all that remains. Until the highly colored leaves have attained their full size, however, the same equal temperature should be maintained and then if found advisable a little drop in the temperature can be allowed, but it is far better to do this gradually and not subject the plants to too sudden a variation. The plants should now be all neatly tied to a stake and, as before remarked, the neater the stake the better the appearance of the plant. It always has seemed strange to us that a grower will spend time and money in producing a crop and then spoil the appearance or the best sale of the plant by using a cheap ill-looking auxiliary in attempting to save a penny. These plants can be disposed of at a good remunerative price if properly handled, and nice-looking, painted stakes can be afforded. The plants grown for cut blooms should be kept tied erect that they may have straight stems. In the cutting and marketing of these blooms much disappointment and failure has been experienced by many growers, the bracts wilting very soon after cutting and where this occurs they never recover. Some growers place the stems on a red hot coal immediately after they are cut and thus seal the end. Others plunge the stems in hot water, and both are said to successfully prevent wilting occurring. Another plan is to wrap the blooms in wet newspapers, similarly to the manner of handling cut adiantums, and then placing the stems in deep jars of water. It will be found necessary to adopt these or some other method to prevent the blooms from wilting or many will be lost.

Electrical Stimulation of Plants.

The first systematic attempt at electrically-stimulated horticulture is to take place in Essex, England, at the Highfield Nurseries, where a current with a voltage of 600,000 will be sent through 200 feet of greenhouses. The productiveness of the plants under these conditions is expected to be greatly increased, as previous experiments on a smaller scale have proved that electrically-stimulated plants bear from 20 to 30 per cent more fruit. The 600,000 volts required are generated by an ingenious machine consisting of six revolving plates of glass acted on by brushes. So simple is the contrivance that the running expenses are only 3s. a week.—Boston Transcript.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Z. D. Blackistone's New Store.

The formal opening of Z. D. Blackistone's new flower store at Fourteenth and H streets, Washington, D. C., occurred November 14, and was continued until November 17. The store is one of the most beautiful in the city and represents what is accepted as an ideal flower shop. The scheme of design is elegant with its colonial predominance of white and French gray, severely plain pillars, delicate lattice and huge mirrors, climaxed with a tiny balcony ostensibly intended only for decorative purposes, but in reality planned as an office. Situated in the heart of the business section, the store has spacious floor space, splendid lighting features conveniences for employes and patrons alike, and display windows comprising 300 square feet of show space. The store was filled with the most beautiful floral products during the three days, including a great variety of chrysanthemums and a beautiful display of orchids and roses.

Wedding Decoration.

A very beautiful wedding decoration was arranged November 16 at the Hotel Metropole, Chicago, by A. Lange for the wedding of Miss Katzinger. The banquet hall and adjoining rooms were heavily festooned with southern smilax and banked with palms and decorative plants. In the parlor was arranged a canopy of southern smilax through which were mingled hundreds of white roses. From the center was suspended a large bell of roses and in the bell was enclosed rose petals, the bell being so arranged that the bridal couple could be showered with them. At each side of the canopy was arranged large vases of white chrysanthemums. The banquet hall was draped with southern smilax and on the tables were beautifully arranged baskets of roses. The bride carried a shower of lily of the valley and the bridesmaids a basket of pink roses with showers suspended from the sides. The decoration, which we illustrate, was beautifully finished and reflected great credit upon Designer Stone of this well-known house.

Holiday Suggestions.

GARLANDS.

Garlands and festoons of cedar, fir or pine, on the lines of the classic garlands of the ancients, make a dignified arrangement that looks extremely well, and is not forever getting in the way like the fluffy garlands. Such festoons carried around a room just below the ceiling line in a freize of spicy green are effective. Garlands made of wheat, with red berries encircling them and red ribbons attached at the different intersections placed below the garland, allowing knotted ends to fall below, and as many as are consistent with the place to be decorated.

The cheap Christmas green garlands can be utilized by braiding them, using three strings for each braid. Every two yards or so they can be caught up with a rosette of red sash ribbon and on the ends of the ribbon, of which there should be three, a ball of red berries can be hung from the center and a bunch of holly from the other two ends, which should be somewhat shorter than the middle one. Bells on the ends are effective when made of the flat red immortelles. Small thin wreaths can be used as a substitute where berries are scarce, and dark red cranberries can be wired into the wreaths to use among the garlands, especially where tall ceilings and walls are to be covered. These thin, small wreaths should be made of berries, with no green, thereby securing the all-red effect where the green garlands are draped.

Garlands made of chrysanthemums, taking a single flower of the large varieties or clusters of the small-sized flowers, around which arrange asparagus. At intervals allow about three good-sized chrysanthemums to fall below the garland and from these can also be extended strands of asparagus, placing here and there a flower, forming a shower effect. But this is only where the garland needs a draping at different intersections. Three of these showers on a ballroom wall, where such a garland is used, are sufficient. To meet these showers tall palms can

PAN OF POINSETTIAS.

WEDDING DECORATION BY A. LANGE, CHICAGO.

be advantageously placed, or baskets of chrysanthemums arranged with large Dresden bows of gauze ribbon.

Garlands with ornamentations of church symbols are good where appropriate, and also stars made of mistletoe, but not the heavy star effect. They should be light and dainty.

A. E. KLUNDER.

Planting By Use of Dynamite.

A practical and successful test of the use of dynamite was demonstrated at Peter Henderson & Co.'s on Hudson County Boulevard, Jersey City, November 7, in a series of experiments in which 50 pounds of dynamite were exploded. These experiments were made under the supervision of E. I. Du Pont de Nemours Powder Co. to demonstrate the utility of dynamite in the treatment of soils so as to render them more productive. A series of holes 33 inches deep and 15 feet apart were opened with a crowbar and half a dynamite cartridge placed in each hole and carefully tamped, the dynamite being placed at a depth of nine inches and exploded simultaneously. The explosion shattered the soil for a distance of fifteen feet from the point of discharge. The presence of dead grubs indicated that the injurious insects were unable to withstand the deadly effects of the explosion. Another experiment was the draining of a piece of bog land where water was standing and in twenty minutes after the explosion all the water had disappeared. Several trees were planted both in holes dug by spades and others made by dynamite for the purpose of showing the effects on the trees in a year's time.

ORCHID NOTES.

GIVE Dendrobium formosum plenty of water as soon as the new tiers of roots start from the base of the new growths.

DO NOT attempt to dry off the growth of Dendrobium formosum at this time. Keep up a moderate supply of water and give the plants all the sunlight possible.

KEEP cattleya gigas at rest for a while after flowering if possible, but if it persists in growing give the plants a light warm position and repot any that need this attention.

IN cutting the flowers of phalænopsis always leave as much as possible of the spike on the plants as this will often break and form secondary spikes that are useful for cutting for corsage bouquets and similar purposes.

The Cattleyas in November.

CATTLEYA PERCIVALIANA.

After the bulk of the flowers of Cattleya labiata is over those of C. Percivaliana begin to come in. With us this season they are overlapping conerably and the rich tints of the lip of Percivaliana contrast well with the lighter hued flowers of C. labiata. There was a time when the flowers of C. Percivaliana were not popular with retailers but this was largely on account of their being cut in an undeveloped condition. Really good forms of Percival's cattleya, allowed to remain on the plant until fully developed, are amongst the most beautiful in the genus. It is also one of the most free flowering species and growers who can induce their customers to buy it freely will make good profits from its cultivation. Owing to its dwarf and tufted habit it will produce more flowers per square foot of bench space than any other member of the labiata group, and this should also be a recommendation. It is a restless subject and very apt to grow away again after flowering, but is better, especially in the north and east, if it can be kept dormant for a month or two during the dull period of the year.

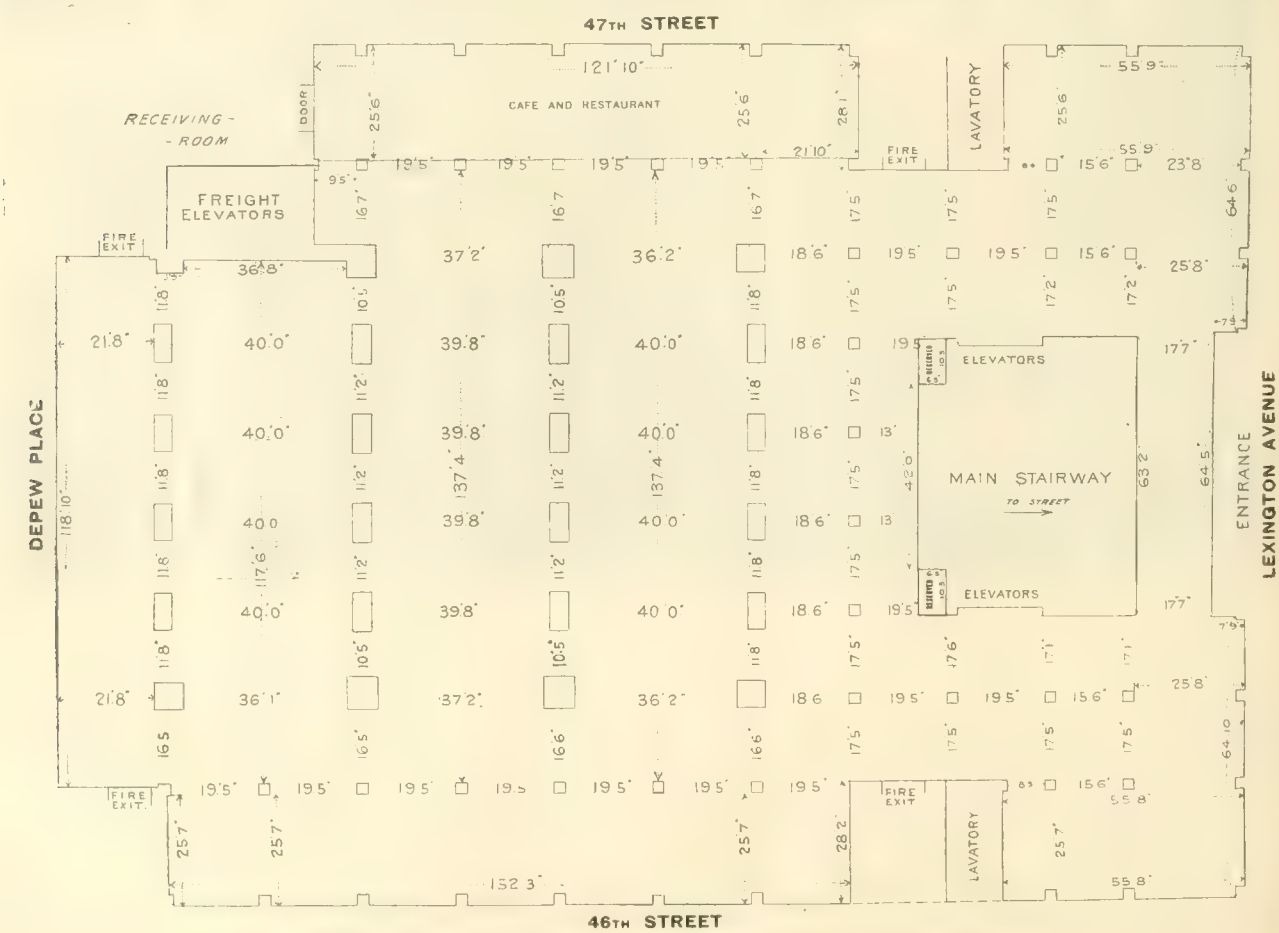
VENTILATION.

During the season in which fire heat is used most extensively and cold winds are prevalent the front sash in orchid houses cannot be opened as freely as they have been during summer and the use of the lower ventilators, those on the level of or below the heating pipes, becomes imperative. With a very small amount of air at the ridge and the lower ventilators open, a good circulation of air is kept up without chilling the plants. In many houses there are stagnant corners where the air does not move freely and here a hole or holes should be cut in the wall of the house and provided with sliding shutters to close when necessary during severe frost or cold weather. At all other times they should be kept at least partially open and a much better atmosphere in the house will result.

Houses which have a small amount of air left on at night do not rush up rapidly early in the morning when the sun strikes the roof; in dull weather the air can be taken off altogether for a short time in the morning to produce that natural and gradual rise in temperature which is so desirable. Wherever one portion of the house dries out much more rapidly than other parts it is proof that the air current is stronger there and this should be remedied by reducing the ventilation at that point or dampening more freely in its vicinity. Orchids are far more susceptible to these variations in the atmosphere than most other plants and one of the chief aims of the grower should be to prevent them as much as

Montague C. Wright.

Manager for Lord & Burnham Co.; Philadelphia.
See Issue of November 18, Page 916



FIRST FLOOR PLAN OF THE GRAND CENTRAL PALACE, NEW YORK.

THE NEW GRAND CENTRAL PALACE, LEXINGTON AVENUE, NEW YORK.
Which Has Been Suggested for the Third National Flower Show.

possible. An incorrect atmosphere will often cause the decay or non-production of flowers even after sheaths are produced while a correct atmosphere is often directly responsible for the production of flowers from immature pseudobulbs that have not produced sheaths. One instance of incorrect atmosphere may well be noted here and that is the hot steamy one produced by the spraying over the heating pipes. This is decidedly injurious and should be avoided in all cases where possible.

TREATMENT OF NEWLY POTTED STOCK.

Plants that have been recently repotted or newly imported stock potted for the first time should not be heavily watered, either in the compost or overhead. Light sprayings are far more effective, in conjunction with a moist atmosphere, in producing free root action than are heavy waterings. Newly imported plants of C. Mossiæ potted in September have made new roots and are running all through the new peat, though the latter has not been watered more than half a dozen times. C. labiata, potted last month, has not been watered at all, except in the form of light sprayings, and this also is beginning to root freely. Most of the plants of the latter are dormant and we hope to keep them so for a while, but the Mossiæ is growing freely and will be for some time yet. Established plants of the latter have finished their growth and are in fine shape for winter. C. Trianæ is practically at rest, that is the established plants, though here, in the south, some are already flowering. From newly imported plants we have been cutting a few flowers right along, though these were from the immature growths partially made in their native habitat and cannot compare in size, quality or substance with the fine blooms we are taking from established plants.

BACKBREAKS.

When handling cattleyas, either newly imported or established plants, there is nearly always a number of small growths or backbreaks as they are called. Left on the parent plants the few roots they produce are often destroyed and in consequence they move along sluggishly, being no larger at the end of the year than at the beginning. It is often good policy to cut these off and start them going on their own account in small pots. Here the roots obtain a mastery over the compost, and each season sees a larger and stronger growth than that of the preceding year. An excellent plan for starting these young specimens is to wrap a little peat fiber around them and wire this into a tight ball with a piece of copper wire twisted at the end into a hook for suspending from the roof. They can be frequently dipped and will run dry again very quickly,

greatly to the benefit of the young roots. But whichever way they are treated they are far more satisfactory when growing separately and with only a small amount of material about the roots than when searching for a home in the middle of a large pot surrounded with bigger growths that elbow them almost out of existence or hanging over the rim of a pot and seeking a precarious living from the atmosphere.

H. R. R.

Dennis T. Connor.

Dennis Thomas Connor, for the past 10 years Philadelphia representative of the Lord & Burnham Co., New York, as already stated in these columns, has severed his connection with that concern to join the forces of the Foley Mfg. Co., Chicago, representing the latter firm in Philadelphia and nearby territory. In addition to his wide experience in greenhouse construction, Mr. Connor has had many years' practical training as a grower of greenhouse products and is fully qualified to discuss all problems of greenhouse construction, including heating and ventilation, possessing the rare combination of mechanical skill of a high order with the grower's practical experience.

Mr. Connor was born near West Grove, Pa., May 27, 1861, and entered the employ of the Dingee & Conard Co. at the age of 14. After nine years in this establishment he went to Ellwanger & Barry's, Rochester, N. Y. About 18 months later he entered the employ of Peter Henderson at Jersey City, N. J., and afterward was with George Mumma, at Dayton, O. He was next with LaRoche & Stahl, Collingdale, Pa., and early in the eighties started in business on his own account at Lansdowne, Pa., selling out four years later to take a position of responsibility with Samuel J. Bunting, of Philadelphia, and taking up work for the Lord & Burnham Co., in 1900.

Mr. Connor's address for the present is 5024 Pine street, Philadelphia, Pa., where he will be pleased to hear from his numerous friends in the trade.

Officers of the Colorado Florist Club.

A meeting of those interested in the florist business was held at the Denver Wholesale Florist Co., 1439 California street, August 5, 1909, with Emil Glauber as chairman, for the purpose of organizing a florists' club. After some discussion as to whether it should be a city or state organization, it was decided to call it the Colorado Florists' Club, to include any member of the florist business; gardeners, seedsmen, nurserymen, superintendents of parks, manufacturers of wares or supplies for florists' use, and others commercially interested in horticulture and floriculture. J. A. Valentine was elected president; T. D. Long, vice-president; Arthur H. Bush, secretary; Bernard Boldt, treasurer; N. A. Benson, J. A. Valentine, and Jas. A. Sked, trustees, and there were seventy charter members enrolled. The regular meetings of the club are held at T. M. A. Hall, 1739 Champa street, the first Monday of each month.

At the December meeting the officers who were elected at the meeting held November 6 will be installed. The following short sketches of these officers will show that the affairs of the club are in the hands of men fully able to care for its interest and enthusiastic as to its success.

ARTHUR H. BUSH, PRESIDENT-ELECT.

Arthur H. Bush, president-elect, is a native of Denver, where he was born July 25, 1876. He first became identified with the business when he accepted the position of manager of the floral department of Daniels & Fisher Stores Co, November 23, 1897, he having been transferred from another department, and he has successfully managed this department up to the present time. Mr. Bush was secretary of the club when it was first organized and has always been an enthusiastic member. A portrait of President Bush appeared in the AMERICAN FLORIST, issue of November 18, page 911.

Dennis T. Connor.

Philadelphia Representative of the Foley Mfg. Co., Chicago.

E. S. KENNEDY, VICE-PRESIDENT-ELECT.

Edwin S. Kennedy, vice-president-elect, is a native of Michigan, coming to Colorado some 14 years ago. His early training in the florists' business was gained with the Park Floral Co. of Denver and it served him well. Four years ago he bought the Alpha Floral Co., located at 424 Sixteenth street, of which he is president. Mr. Kennedy is also one of the trustees of the club.

E. P. NEIMAN, SECRETARY-ELECT.

E. P. Neiman, the new secretary, was born at Pottstown, Pa., February 21, 1877. He started in the florist business in 1893 with Edwin Wickersham & Co. of his native city, who carried on a general florist establishment, growing plants, cut flowers and doing a retail business. Desiring to increase his knowledge in the retail branch of the trade, he went to Washington, D. C., in 1899, with J. Louis Loose, where he remained only one year, when he accepted a position with Robert Crawford, Jr., 233 South Eleventh street, Philadelphia. He held this position until 1905, when his health failing he removed to Denver and secured a position with the Park Floral Co. When this firm purchased the Colfax Avenue Floral Co.'s plant he was made manager of the up-town store at the greenhouses, which position he occupies at the present time.

BERNARD BOLDT, TREASURER.

Bernard Boldt, treasurer ever since the club's organization, and re-elected again this year, is a native of Konigsberg, Prussia, where he was born in 1868. He received his early training in Prussia and came to America in 1893, finding employment with J. H. Rebstock of Buffalo, N. Y. In June, 1900, he came to Denver and was employed as foreman by the Park Floral Co., with whom he remained until 1905, when he took charge of the greenhouses of the Daniels & Fisher Stores Co. These houses he later rented until he bought his present location on West Twenty-ninth street, five years ago, where he conducts a wholesale and retail plant and cut flower establishment. Mr. Boldt has had very good success at his present location.

CHARLES R. ROOT, TRUSTEE.

Charles R. Root, one of the new trustees, is a native of Cato, N. Y., being born in that town January 26, 1863. He started his career in the seed business with J. B. Root & Co. of Rockford, Ill., in 1881. He came to Denver in 1890 and enlisted with the selling force of the Barteldes Seed Co. and was later advanced to manager of the concern, and in this capacity he has served for the past 14 years. Mr. Root has taken a great interest in the club and also in the betterment of the trade in general.

EMIL GLAUBER, TRUSTEE.

Emil Glauber, trustee, was born in New York City and gained a greater part of his knowledge of the business with Frank McMahon of Sea Bright, N. J. He came to Denver in 1887 and two years later built his present place at Montclair. Mr. Glauber grows roses and carnations principally and has had very good success.

Geraniums.

The plants that were propagated during the late summer will need attention as soon as space can be given them, and as the chrysanthemums are cleaned out they can be placed on the benches. By potting them into 3-inch pots a good growth can be obtained that will give a cutting to root before the first of the year which will double up the amount of stock. The stock plants that were brought in should be made up into cuttings and propagated as rapidly as possible. It is advisable to get all the cuttings in before February, what are rooted after that time will not make large plants for the spring. The plants of geraniums for winter blooming should be given a nice, light, warm location, all the sun possible, that they may bloom freely. A well-bloomed plant of any of the large-flowered geraniums takes well during the winter and will always find sale. Do not attempt to crowd them, but space them out well that the plants may be shapely, and with a free circulation of air through and around them. If grown too close or shady they will rapidly grow long-jointed and with weak shoots and soon go out of bloom, and if this happens it is difficult to get them into bloom again until after the sun has got quite high in late winter.

WOBURN, MASS.—Edward P. Aylward, a popular young florist of this city, was married November 12 to Miss Margaret J. Lynch of Lowell.

Bernard Boldt.
Treasurer Colorado Florist's Club.

E. S. Kennedy.
Vice-President-Elect Colorado Florists' Club.

E. P. Nieman.
Secretary-Elect Colorado Florists' Club.

THE EXHIBITIONS.

Milwaukee Flower Show.

The annual flower show of the Milwaukee Florists' Club was opened November 15 in the beautifully decorated Auditorium, as was recorded in our issue of last week, and continued until Sunday evening, November 19. While the attendance was not as large as last year this was the only disappointing feature. The exhibits were all of the highest standard and the plants and flowers staged were as fine as were ever staged in this city or in the west. The decorative plants were superb specimens and nicely arranged, and the placing of the different exhibits made a most beautiful garden scene.

The principal exhibitors of decorative plants were Holton & Hunkel Co., C. C. Pollworth Co., Kellner Florist Co., Edlefsen-Leidiger Co., Currie Bros. Co., Jacob Freytag, and H. A. Dreer, Inc., of Philadelphia, Pa. The chrysanthemum plants were splendidly grown specimens, exhibited by Vaughan's Seed Store, Chicago, and C. C. Pollworth Co., the former winning the larger number of premiums. In chrysanthemum blooms C. C. Pollworth Co. was the largest winner, and the flowers shown were of immense size and well finished. The quality of this firm's product can be fully understood when it is seen that they were awarded so many first premiums over exhibitors with the reputation held by Elmer D. Smith & Co., Adrian, Mich. The E. G. Hill Co., Richmond, Ind., Poehlmann Bros. Co., of Chicago, and Mount Greenwood Cemetery Association.

The rose exhibits on Thursday called forth some of the finest displays ever staged and the contest was very close between Holton & Hunkel Co., Poehlmann Bros. Co., C. C. Pollworth Co. and Bassett & Washburn, the first named winning the coveted prize in American Beauties. The E. G. Hill Co. showed their new rose Sunburst which was greatly admired, and A. N. Pierson, Inc., exhibited Double White Killarney and Killarney Queen. The carnation display on Friday was an exhibit of superb flowers and as with the roses the competition was very close. Nic Zweifel was the fortunate winner of the most firsts but he was closely pressed by the Chicago Carnation Co., Burlington Floral Co., Manke Bros., C. C. Pollworth Co., North Western Floral Co., and others.

Charles R. Root.
Trustee-Elect Colorado Florists' Club.

The table decorations were a great feature that were admired by all the visitors. These were arranged each day throughout the entire exhibition, and the artistic work of the decorators was fully brought out by the spirited yet friendly competition. These tables were arranged by J. M. Fox & Son, M. A. McKenney & Co., Currie Bros. Co., E. Welke Co., Edlefsen-Leidiger Co., Chas. Dettman & Son, W. C. Zimmermann and Walter M. Maas & Co.

Too much praise cannot be given to the manager, H. V. Hunkel, for the beautiful display which he got together and the manner in which it was arranged, and Aug. Kellner is the recipient of many congratulations for the admirable and artistic decorations of the hall which added so much to the completeness of the show and gave the exhibition such a beautiful finish. Following are the awards:

CHRYSANTHEMUMS.

Best specimen plant, white—Vaughan's Seed Store, Chicago, first; C. C. Pollworth Co., Milwaukee, second.

Best specimen plant, pink—Vaughan's Seed Store, first; C. C. Pollworth Co. second; Otto Eggebrecht, Milwaukee, third.

Best specimen plant, yellow—C. C. Pollworth Co., first; Vaughan's Seed Store, second.

Best specimen plant, any other color—Vaughan's Seed Store, first; C. C. Pollworth Co., second.

Best specimen plant, single variety—Vaughan's Seed Store, first; C. C. Pollworth Co., second; Ernst Praefke, Milwaukee, third.

Best specimen plant, anemone—Vaughan's Seed Store, first; C. C. Pollworth Co., second.

Best specimen standard not less than 24-inch stem—C. C. Pollworth, second.

Best 25 plants grown to single stem and bloom any one color, not over 6-inch pots, not over 30 inches high above the pots—C. C. Pollworth Co., second.

Best group of chrysanthemum plants arranged for effect, to cover 150 square feet—C. C. Pollworth Co., first; Mitchell St. Floral Co., Milwaukee, second; John C. Rost, Milwaukee, third; Edlefsen-Leidiger Co., Milwaukee, fourth.

Best three specimens standards not less than 12-inch stems nor more than 24-inch stems—C. C. Pollworth Co., first; Vaughan's Seed Store, second.

CUT BLOOMS.

Best 40 blooms, one vase, and one variety, any color—Poehlmann Bros. Co., Morton Grove, Ill., first; C. C. Pollworth Co., second; The E. G. Hill Co., Richmond, Ind., third.

Best vase, 40 blooms, white, one variety—C. C. Pollworth Co., first; Poehlmann Bros. Co., second; The E. G. Hill Co., third.

Best vase, 40 blooms, pink, one variety—Elmer D. Smith & Co., Adrian Mich., first; The E. G. Hill Co., second; Mount Greenwood Cemetery Ass'n., Morgan Park, Ill., third.

Best vase, 40 blooms, yellow, one variety—Poehlmann Bros. Co., first; The E. G. Hill Co., second; C. C. Pollworth Co., third.

Best vase, 25 blooms, at least 10 varieties, silver cup—C. C. Pollworth Co.

Best 20 blooms, white, one variety—C. C. Pollworth Co., first; The E. G.

Hill Co., second; Burlington Floral Co., Burlington, Wis., third; Mount Greenwood Cemetery Ass'n., fourth.

Best 20 blooms, pink, one variety—Poehlmann Bros. Co., first; Herman Schwan, Milwaukee, second; Herman Staeps, Elm Grove, third; The E. G. Hill Co., fourth.

Best 20 blooms, yellow, one variety—C. C. Pollworth Co., first; Herman Staeps, second; The E. G. Hill Co., third; Mount Greenwood Cemetery Ass'n., fourth.

Best 20 blooms, any other color, one variety—C. C. Pollworth Co., first; The E. G. Hill Co., second; Elmer D. Smith & Co., third.

Best 12 blooms, yellow, one variety—C. C. Pollworth Co., first; Elmer D. Smith & Co., second; The E. G. Hill Co., third.

Best 12 blooms, pink, one variety—Elmer D. Smith & Co., first; Mount Greenwood Cemetery Ass'n., second; C. C. Pollworth Co., third.

Best 12 blooms, white, one variety—C. C. Pollworth Co., first; Elmer D. Smith & Co., second; Mount Greenwood Cemetery Ass'n., third.

Best 12 blooms, any other color—C. C. Pollworth Co., first; The E. G. Hill Co., second.

Best 20 chrysanthemums, 20 varieties, in 20 vases, not less than 12-inch stems—C. C. Pollworth Co., first; The E. G. Hill Co., second; Elmer D. Smith & Co., third.

Best collection anemone varieties—Fox Point Floral Co., Milwaukee, first; The E. G. Hill Co., second.

Best collection pompon varieties—The E. G. Hill Co., first; Hartje & Elder, Indianapolis, second.

Best collection single varieties—The E. G. Hill Co., first; Fred Vogel, Jr. (James Livingston, gardener), Milwaukee, second; Holton & Hunkel Co., third.

Best display of orchids—Fred Vogel, Jr., first.

MISCELLANEOUS CUT FLOWERS.

Best display of double violets, 500 blooms, in five vases—Loeffler & Benke, Watertown, first; Albert Loeffler, Watertown, second; Chas. Oehlenschlaeger, Oconomowoc, third.

Best display of lily of the valley, 250 spikes—Poehlmann Bros. Co., first; Holton & Hunkel, second; C. C. Pollworth Co., third.

Best display of 50 cut lilies, Harrissi type—Premium equally divided between Holton & Hunkel Co., C. C. Pollworth Co., Mitchell St. Floral Co., Benjamin Gregory.

Best display of snapdragon, not less than 50 spikes—Mueller & Schroeder Co., first; Gus Pohl, second.

PALMS AND FERNS.

Best Boston fern, not less than 10-inch pot—Holton & Hunkel Co., first; C. C. Pollworth Co., second.

Best sport of Boston, not less than 10-inch pot—C. C. Pollworth Co., first; Edlefsen-Leidiger Co., second; A. Dettman & Son, Milwaukee, third.

Best six Cibotium Schiedei—Currie Bros. Co., Milwaukee, first; C. C. Pollworth Co., second.

Best collection of ferns, to consist of 15 varieties, not less than 50 square feet—Aug. F. Kellner Co., Milwaukee, first; C. C. Pollworth Co., second.

Best group of Bostons, not less than 150 square feet—Holton & Hunkel Co., first; C. C. Pollworth Co., second.

Best group of Boston sports, 50 square feet—C. C. Pollworth Co., first.

Best group of palms, to cover 150 square feet—Holton & Hunkel Co., first; Edlefsen-Leidiger Co., second; Aug. F. Kellner Co., third; Currie Bros. Co., fourth.

Best group of decorative plants, arranged for effect, to cover not less than 200 square feet—Edlefsen-Leidiger Co., first; Jacob Freytag, Milwaukee, second; Currie Bros. Co., third; Aug. Kellner Co., fourth.

Best specimen kentia — Benjamin Gregory, first.

Best specimen phoenix—C. C. Pollworth Co., first.

Best group of araucarias, to cover 75 square feet—Edlefsen-Leidiger Co., first; C. C. Pollworth Co., second; Currie Bros. Co., third.

Best 10 plants, Begonia Gloire de Lorraine, or sports of same—J. A. Peterson, Cincinnati, O., first; J. M. Mathewson, Sheboygan, second; C. C. Pollworth Co., third.

Best 10 plants, Primula obconica—Otto Eggebrecht, second.

Best display of geraniums to cover not less than 25 square feet. Border plants permitted—Mitchell St. Floral Co., first; Heitman & Paerman, Milwaukee, second; Otto Eggebrecht, third.

Best arranged hanging basket without flowering plants—C. C. Pollworth Co., first; Aug. F. Kellner Co., second.

Best arranged hanging baskets to contain flowering plants as the main feature—C. C. Pollworth Co., first.

Best 10 cyclamen—Carl Meier Co., Green Bay, first; Fox Point Floral Co., second; Chas. Kitzerow, Milwaukee, third; J. A. Peterson, fourth.

ROSES.

Best 50 American Beauties—Holton & Hunkel Co., first; Bassett & Washburn, Chicago, second; Poehlmann Bros. Co., third; A. C. Amling, Maywood, Ill., fourth.

Best 100 White Killarney—Holton & Hunkel Co,, first; Poehlmann Bros. Co., second.

Best 100 Killarney—Poehlmann Bros. Co., first; Holton & Hunkel Co., second.

Best 50 Richmond—Holton & Hunkel Co., first; Poehlmann Bros. Co., second.

Best 50 Killarney—Poehlmann Bros. Co., first; Holton & Hunkel Co., second; Adam Zender, Rogers Park, Ill., third.

Best 50 yellow—Holton & Hunkel Co., first; Poehlmann Bros. Co., second.

Best 50 any other variety—Bassett & Washburn, first; Poehlmann Bros. Co., second; Holton & Hunkel, third.

Best 50 White Killarney—Holton & Hunkel Co., first; Poehlmann Bros. Co., second; Adam Zender, third.

Best 25 Richmond—Holton & Hunkel Co., first; Poehlmann Bros. Co., second; C. C. Pollworth Co., third.

Best 25 White Killarney—Poehlmann Bros. Co., first; Holton & Hunkel Co., second; C. C. Pollworth Co., third.

Best 25 Killarney—Poehlmann Bros. Co., first; Holton & Hunkel Co., second.

Best 25 yellow—Poehlmann Bros. Co., first; C. C. Pollworth Co., second.

Best 25 any other variety—Holton & Hunkel Co., first; Poehlmann Bros. Co., second.

CARNATIONS.

Best 100 blooms white—Nic Zweifel, North Milwaukee, first; C. C. Pollworth Co., second; Burlington Floral Co., third.

Best 100 blooms light pink—Nic Zweifel, first; Manke Bros., North Milwaukee, second; Mueller & Schroeder Co., third.

Best 100 blooms pink Winsor shade—Burlington Floral Co., first; Chicago Carnation Co., Joliet, Ill., second; C. C. Pollworth Co., third.

Best 100 blooms dark pink—C. C. Pollworth Co., first; Poehlman Bros. Co., second; Chicago Carnation Co., third.

Best 100 blooms red or scarlet—Nic Zweifel, first; C. C. Pollworth Co., second; Manke Bros., third.

Best 100 blooms, sweepstake, in above classes. The best 100 blooms to be selected from the winners, silver cup—Nic Zweifel.

Best 50 blooms White Perfection—Burlington Floral Co., first; Manke Bros., second; Nic. Zweifel, third.

Best 50 blooms White Enchantress—C. C. Pollworth Co., first; Manke Bros., second; Burlington Floral Co., third.

Best 50 blooms any other white—C. C. Pollworth Co., first; Mt. Greenwood Cemetery Ass'n., second; Nic. Zweifel, third.

Best 50 blooms Victory—Nic. Zweifel, first; Poehlmann Bros. Co., second; Chicago Carnation Co., third.

Best 50 blooms Beacon—Manke Bros., first; C. C. Pollworth Co., second; Nic. Zweifel, third.

Best 50 blooms any other red or scarlet—Nic. Zweifel, first; C. C. Pollworth Co., second; Mt. Greenwood Cemetery Ass'n., third.

Best 50 blooms O. P. Bassett—Mueller & Schroeder Co., first.

Best 50 blooms Pink Enchantress—Manke Bros., first; Nic. Zweifel, second; Mueller & Schroeder Co., third.

Best 50 blooms Winsor—Nic. Zweifel, first; North Western Floral Co., Gross Point, second; H. Staeps, third.

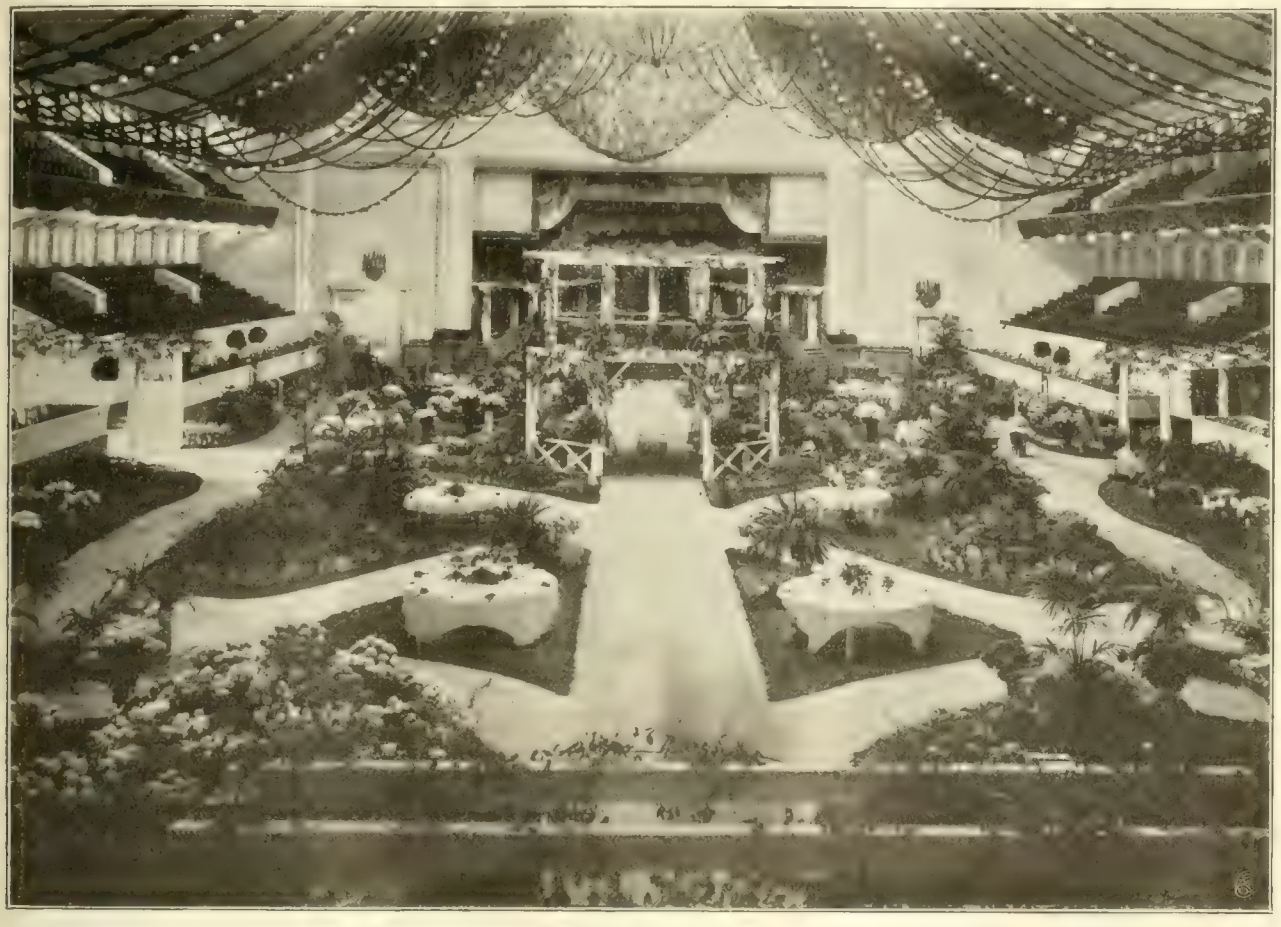
Best 50 blooms any other pink—Poehlmann Bros. Co., first; C. C. Pollworth Co., second; Burlington Floral Co., third.

Best 50 blooms crimson—Mt. Greenwood Cemetery Ass'n., first.

Best 50 blooms white, introduction 1911—Nic. Zweifel, first; Chicago Carnation Co., second.

DISPLAY OF CUT ORCHIDS AT HORTICULTURAL SOCIETY OF NEW YORK SHOW

Exhibited by J. A. Manda, West Orange, N. J., and Awarded First Prize. See Last Issue, Page 912.



GENERAL VIEW OF THE MILWAUKEE FLOWER SHOW.

Best 50 blooms pink Winsor shade, introduction 1911 — Mt. Greenwood Cemetery Ass'n., first; Chicago Carnation Co., second.

Best 50 blooms dark pink, introduction 1911—Manke Bros., first; Chicago Carnation Co., second.

Best 50 blooms red or scarlet, introduction 1911—Nic. Zweifel, first.

Honorable mention was awarded J. M. Mathewson, Sheboygan, Wis., for collection of Gloire de Lorraine, Glory of Cincinnati and La Patrie begonias; Jacob Freytag, Milwaukee, Wis., for group of bouvardias; Fox Point Floral Co., Milwaukee, Wis., for group of cyclamen; E. G. Hill Co., Richmond, Ind., for vase of Sunburst roses; Henry A. Dreer, Inc., Riverton, N. J., for group of Phoenix Roebelini and group of Cocos Wedelliana; A. N. Pierson, Inc., Cromwell, Conn., for vase of Dark Pink Killarney Roses and vase of chrysanthemums Chadwick Supreme, scored 85 points.

Certificates of merit to W. T. Synonds, Decorah, Ia., for carnations, Seedling, No. 7; A. N. Pierson, Inc., Cromwell, Conn., for vase of Double White Killarney and vase of Killarney Queen roses.

Canadian Horticultural Association.

The annual exhibition of the Canadian Horticultural Association in the St. Lawrence arena November 14-18 was the most successful in the history of the association. The flowers, fruit and honey displayed were all up to the highest point of excellence and it is doubtful if finer exhibits are put up anywhere. Thousands of boxes of fruit worked into intricate designs, beautiful groups of chrysanthemum and foliage plants, large vases of flowers and the many floral designs and eight decorated tables made an effect which is hard to describe. In chrysanthemum plants there were specimen plants shown by Sir Henry Pellatt grown in 10-inch pots with 250 blooms, and in cut blooms. R. Jennings had them 11 inches across. The Dale Estate staged some fine American Beauties and a vase of well grown Mrs. Aaron Ward.

The competition in many classes was very keen and the placing of the awards was no easy matter. Charles Sandiford and S. A. Anderson of Buffalo were the judges.

Among the visitors were H. Frank Darrow, New York; Arthur Zirkman, Philadelphia; P. S. McKenna, Montreal; R. H. Wright, Ottawa; Wilson Iler, Berlin; H. L. Jansen, Berlin; A. H. Ewing, Woodstock; Wm. Gammage, London; W. Holt, Hamilton; Sam Kirk, Georgetown; H. H. Groff, Simcoe; H. Stansbury, Oakville.

CHRYSANTHEMUM PLANTS.

Best one specimen, any variety or sized pot—D. Robertson, Reservoir Grounds, first; J. Boston, East Toronto, second; E. F. Collins, Allan Gardens, Toronto, third.

Best one standard, any variety or sized pot, stem not more than three feet—E. F. Collins, first; J. Boston, second.

Best one specimen, white, in pot not to exceed 10-inch—D. Robertson, first; J. Boston, second; E. F. Collins, third.

Best one specimen, pink—J. Boston, first; E. F. Collins, second; D. Robertson, third.

Best one specimen, yellow, pot not to exceed 10-inch—J. Boston, first; E. F. Collins, second.

Four specimens, Bush plants, one each of white, pink, yellow and dark color—Sir. H. M. Pellatt, Toronto, first; D. Robertson, second; E. F. Collins, third; special prize, J. Boston.

Best 25 single stems and flowered—E. F. Collins, first.

Best three specimens, palms, any size, pots or tubs—W. Jay, Toronto, first.

Best 12 specimens, palms, not less than four varieties, pots not to exceed 10-inch—W. Jay, first.

Best collection, Nephrolepis ferns, 6-inch pot, not less than 10 varieties—W. Jay, first; E. F. Collins, second.

Best six specimens, ferns, distinct varieties—W. Jay, first; E. F. Collins, second.

Best six cyclamen, pots not to exceed 8-inch—Sir H. M. Pellatt, first; Wilson Iler, Berlin, second; H. H. Fudger, Toronto, third.

Collection of primulas, pots not to exceed 8-inch, not less than 12 varieties—Wilson Iler, first.

Best six begonias, pots not to exceed 8-inch—Sir H. M. Pellatt, first; W. Jay, second; H. H. Fudger, third.

Best 12 decorative table plants, pots not to exceed 5-inch—W. Jay, first; H. H. Fudger, second; T. Manton, Eglinton, third.

Best specimen orchid in flower—D. Robertson, first.

Best three specimens orchids, distinct varieties—T. Manton, first.

Best six specimens orchids, distinct varieties—T. Manton, first.

Best group of chrysanthemums and foliage plants arranged for effect, space not to exceed 100 square feet—Sir H. M. Pellatt, first; E. F. Collins, second; T. Manton, third; W. Jay, fourth.

Best display of orchids, in which anthurium, nepenthes and any foliage may be used, arranged for effect, space not more than 100 square feet — T. Manton, first; E. F. Collins, second.

Group of single and pompon chrysanthemums, arranged for effect with foliage, space not exceeding 75 square feet—E. F. Collins, first; Sir H. M. Pellatt, second; T. Manton, third.

CUT BLOOM CHRYSANTHEMUMS.

Best 25 blooms, not less than 20 varieties—Dale Estate, Brampton, first.

Best 12 distinct varieties—Dale Estate, first.

Best 25 Eaton varieties—R. Jenning, Brampton, first; Dale Estate, second.

Best 25, any variety—R. Jenning, first; Dale Estate, second; A. S. Jenning, third.

Best 12, one variety—Dale Estate, first; R. Jennings, second; Wilson Iler, third.

Best six distinct varieties, never before exhibited in Ontario—A. S. Jennings, first; W. H. Foord, Deer Park, second.

Best six white—R. Jenning, first; Dale Estate, second; H. T. Jenning, Weston, third.

Best six pink—Dale Estate, first; R. Jenning, second; Wilson Iler, third; A. S. Jenning Co., fourth.

Best six yellow—R. Jenning, first; Dale Estate, second; Wilson Iler, third; H. T. Jenning, fourth.

Best six crimson—T. Jenning, first; W. H. Foord, second; H. F. Jenning, third; R. Jenning, fourth.

Best six any other color—Dale Estate, first; A. S. Jenning Co., second; R. Jenning, third; H. W. Foord, fourth.

Best vase of single chrysanthemums, arranged for effect, with any foliage—R. Jenning, first; G. D. Manton, Eglinton, second; H. T. Jenning, third.

Best vase of pompons—H. T. Jenning, first; R. Jenning, second.

Twelve blooms, not less than six distinct varieties, entries confined to exhibitors with not more than 5,000 feet of glass—A. S. Jenning, first; Geo. Mills, Toronto, second.

CARNATIONS.

Best 25 white, named—R. Jenning, first; Dale Estate, second; W. Iler, third.

Best 25 red, named—Dale Estate, first; R. Jenning, second.

Best 25 light pink—R. Jenning, first; Dale Estate, second; W. Iler, third.

Best 25 dark pink, darker than Winsor—R. Jenning, first; Dale Estate, second; W. Iler, third.

Best 25 crimson—Dale Estate, first.

Best 50 blooms, one variety—R. Jenning, first; Dale Estate, second.

Best 50 blooms, any variety, with any foliage, arranged loosely in vase, arrangement to count in judging, not necessarily grown by exhibitor—Dale Estate, first; R. Jenning, second.

Best 100 carnation bloms, any variety—R. Jenning, first; Dale Estate, second.

ROSES.

Best 12 white—Dale Estate, first; Toronto Floral Co., Davisville, second.

Best 12 pink—Dale Estate, first; Toronto Floral Co., second.

Best 12 red—Dale Estate, first.

Best 12 light pink—Dale Estate, first; Toronto Floral Co., second.

Best 12 American Beauties—Dale Estate, first; G. D. Manton, Eglinton, second.

Best 25 American Beauties—Dale Estate, first.

Best vase of 50 roses, arrangement to count in judging, not necessarily grown by exhibitor, American Beauty excluded—Dale Estate, first; S. R. Frost, Toronto, second.

Best 200 lily of the valley—Toronto Floral Co., first; Dale Estate, second.

Best bunch of 50 violets, single—Dale Estate, first; W. E. Calvert, Brampton, second; Carl Mart, Lambton, third.

Best funeral design, not more than 42 ins. over all—C. Lewis, Toronto, first; A. S. Jenning, second; S. A. Frost, third.

Best presentation basket of chrysanthemums, not to exceed 30 inches over all—C. E. Lewis, first; S. A. Frost, second; A. Moore Co., Georgetown, third; J. Boston, fourth.

Best original arrangement of flowers for bridal effect—T. Manton, first; S. A. Frost, second; Wilson Iler, third.

Best panel decoration, Mirror not to exceed 24 square feet—T. Manton, first; G. D. Manton, second; S. A. Frost, third; C. E. Lewis, fourth.

Detroit Flower Show.

The Detroit Florist Club's fall show opened auspiciously in Twentieth Century building, November 14. The exhibits included some magnificent blooms and well-grown plants. The judges were W. P. Craig, Philadelphia; Geo. O. Rackham and J. K. Stock. The displays by the retailers not in competition were specially attractive and consisted of table decorations, baskets and groups of plants, the exhibitors being G. H. Taepke, W. B. Brown, E. A. Fetters, Hufford & Mabius, L. Bemb Floral Co., John Breitmeyer's Sons, Scribner Floral Co., Harry Rackham and McHugh Floral Co. The attendance was encouraging at the opening and prospects were good for increasing numbers through the days following.

Following are the awards:

CHRYSANTHEMUMS.

Fifty blooms, one variety—Thos. Browne, first; G. H. Taepke, second.

Fifty blooms, in one vase not less than five varieties—Thos. Browne, first; Fred Pautke, second.

Twenty-five blooms, in one vase, not less than five varieties—Fred Pautke, first; Thos. Browne, second.

Ten blooms, white—Thos. Browne, first; Theo. Damrow, second.

Ten blooms, pink—Thos. Browne, first; G. H. Taepke, second.

Ten blooms, yellow—Thos. Browne, first; A. Von Boeselager, second.

Ten blooms, red—A. Von Boeselager, first; Fred Breitmeyer, second.

Ten blooms, bronze—Thos. Browne, first; Fred Pautke, second.

Twenty-five blooms, 12 or more varieties—Fred Breitmeyer, first; Thos. Browne, second.

Ten blooms, ten varieties—Fred Breitmeyer, first; Thos. Browne, second.

Twelve blooms, six varieties—Fred Breitmeyer, first; Thos. Browne, second.

Six vases pompons, six varieties—Fred Kalbe, first; Chas. Plumb, second.

Three vases pompons, three varieties—Fred Kalbe, first; Fred Breitmeyer, second.

Six vases, singles—Fred Breitmeyer, first; Fred Pautke, second.

Three vases, singles—Fred Kalbe, first; Fred Pautke, second.

Best collection chrysanthemum plants—Fred Pautke, first.

Best vase seedling pompons—Fred Breitmeyer, first; Fred Pautke, second.

Best vase seedling singles—Fred Breitmeyer, second.

One hundred blooms, carnations—Robert Klegge, first.

Fifty blooms, white—Robert Klegge, first; A. J. Stahelin, second.

Fifty blooms, pale pink—A. J. Stahelin, first; A. Von Boeselager, second.

Fifty blooms, rose pink—Robert Klegge, first; A. J. Stahelin, second.

Fifty blooms, Lawson pink—A. Von Boeselager, first; Thos. Browne, second.

Fifty blooms, scarlet—A. J. Stahelin, first; Fred Miesel, second.

Fifty blooms, any other color—Robert Klegge, second.

Fifty American Beauty roses—Fred Breitmeyer, first.

Twenty-five American Beauties—Fred Breitmeyer, first.

Twenty-five red roses—Robt. Klegge, first; Fred Breitmeyer, second.

Twenty-five pink—Chas. Plumb, first; Fred Breitmeyer, second.

Twenty-five white—Chas. Plumb, first; Fred Breitmeyer, second.

Twenty-five yellow—Fred Breitmeyer, first.

PLANTS.

Six Begonia de Lorraine—M. Bloy, first; Chas. Plumb, second.

Six cyclamen—Fred Miesel, first; B. Schroeter, second.

Six primroses—G. H. Taepke, first; Beard Bros., second.

Six foliage plants—M. Bloy, first; Chas. Plumb, second.

Specimen fern—M. Bloy, first; Fred Miesel, second.

Display of orchids—B. Schroeter, first.

Vase of white pompons not yet disseminated—Fred Breitmeyer.

Display of Helen Newberry pompons—Fred Pautke, first.

One hundred single violets—Fred Breitmeyer, first; Robert Klegge, second.

One hundred lilies of the valley—Robert Klegge, first.

One hundred cosmos—Robert Klegge, first.

PRIVATE GARDENERS.

Twenty-four blooms, chrysanthemums, 12 varieties—John Davidson, first.

Ten blooms, ten varieties—John Davidson, first.

Twelve blooms, six varieties—John Davidson, first.

Largest bloom—John Davidson, first.

Lake Geneva Chrysanthemum Show.

The seventh annual chrysanthemum exhibition of the Lake Geneva Gardeners' and Foreman's Association was held at St. Francis hall Nov. 7-8. This exhibition was one of the best this association has ever put up. The plants and cut flowers showed great improvement and the competition was so keen in many of the classes that the judge, Wm. Currie of Milwaukee, was puzzled at times to decide, but when he was through everybody was satisfied, and Mr. Currie's decisions were a great credit to him. The new horticultural hall now under construction will soon be ready for occupancy, which will give much needed room for the exhibitions of all kinds are getting larger every year, which shows the progressiveness of the gardeners at Lake Geneva and the interest which their employers take in horticulture.

Following are the awards:

CHRYSANTHEMUMS.

Six white blooms—Edw. Sandgren (gardener to N. K. Fairbank), first; Frank R. Kuehne (gardener to F. D. Countiss), second; A. Johnson (gardener to R. T. Crane), third.

Six yellow blooms—J. J. Krupa (gardener to N. W. Harris), first; Frank R. Kuehne, second; Rob. Blackwood gardener to S. W. Allerton), third.

Six pink blooms—Rob. Blackwood, first; J. J. Krupa, second; Frank R. Kuehne, third.

Six any other color—Rob. Blackwood, first; A. Johnson, second.

Twelve mixed—A. J. Smith (gardener to J. J. Mitchell), first; Frank R. Kuehne, second; A. Johnson, third.

Twelve white—A. J. Smith, first; Frank R. Kuehne, second.

Twelve yellow—A. J. Smith, first; A. Johnson, second; Rob. Blackwood, third.

Eighteen mixed, six varieties—Frank R. Kuehne, first.

Six Major Bonnaffon—J. J. Krupa, first; A. Johnson, second; Frank R. Kuehne, third.

Six Dr. Enguehard—Rob. Blackwood, first; J. J. Krupa, second; Frank R. Kuehne, third.

MILWAUKEE FLORISTS' CLUB AND GUESTS AT BOHEMIAN SUPPER, NOVEMBER 18, 1912.

Six Timothy Eaton — Frank R. Kuehne, first; Rob. Blackwood, second.

Six Col. D. Appleton—Rob. Blackwood, first; Edw. Sandgren, second; A. Johnson, third.

Four vases pompons, four varieties—Rob. Blackwood, first; A. Johnson, second.

Four vases anemone, four varieties —Rob. Blackwood, first; A. Johnson, second.

Collection anemones—Wm. P. Longland (gardener to C. W. Hutchinson), first.

Four vases single, four varieties—A. Johnson, first; Wm. P. Longland, second.

ROSES.

Twelve American Beauties—A. Johnson, first.

Twelve pink—A. J. Smith, first; Rob. Blackwood, second.

Twelve yellow—Rob. Blackwood, first; A. Johnson, second.

Twelve red—Rob. Blackwood, first.

CARNATIONS.

Twelve white—A. J. Smith, first; A. Johnson, second.

Twelve light pink—Rob. Blackwood, first; A. J. Smith, second; A. Johnson, third.

Twelve dark pink—A. J. Smith, first; Rob. Blackwood, second.

Twelve crimson—A. J. Smith, first.

Twenty-five mixed, one vase—A. J. Smith, first; A. Johnson, second.

Twenty-five lily of the valley—A. Johnson, first; J. J. Krupa, second.

Fifty single violets — Frank R. Kuehne, first; A. Johnson, second.

Display of cut flowers not chrysanthemums—A. Johnson (orchids), first.

CHRYSANTHEMUM PLANTS.

Specimen large flowering — Rob. Blackwood, first; Frank R. Kuehne, second.

Specimen pompon—A. J. Smith, first; Rob. Blackwood, second.

Specimen anemone — Frank R. Kuehne, first; M. Barrett (gardener to M. A. Ryerson), second.

Specimen single—Rob. Blackwood, first; Frank R. Kuehne, second.

Specimen showing clear stem, white —A. J. Smith, first; Rob. Blackwood, second; Frank R. Kuehne, third.

Specimen yellow—Frank R. Kuehne, first; A. J. Smith, second.

Specimen pompon—Rob. Blackwood, first; A. J. Smith, second.

Specimen anemone — A. Johnson, first; Frank R. Kuehne, second.

Specimen single—Rob. Blackwood, first; Frank R. Kuehne, second; A. J. Smith, third.

Standards—A. J. Smith, first; Frank R. Kuehne, second and third.

Five plants single, five varieties in 6-inch pots—Rob. Blackwood, first; A. Johnson, second.

Five plants anemones, five varieties in 6-inch pots—Rob. Blackwood, first; A. Johnson, second.

Five plants single, five varieties in 8-inch pots—Rob. Blackwood, first; A. Johnson, second.

Best seedling, 1911—Wm. P. Longland, first; Frank R. Kuehne, second.

Five plants single, five varieties in 12-inch pots—A. J. Smith, first; Rob. Blackwood, second.

Group of chrysanthemums, 100 square feet—A. J. Smith, first; J. J. Krupa, second; A. Johnson, third.

Group of pompons, 50 square feet—Wm. P. Longland, first.

Group of anemones, 50 square feet —Wm. P. Longland, first.

Twelve single stems, not over 36 inches, in 6-inch pots—J. J. Krupa, first; Rob. Blackwood, second.

Three foliage plants—A. J. Smith, first; J. J. Krupa, second.

Specimen foliage plant showing best skill of gardener—A. J. Smith, first; J. J. Krupa, second.

Specimen flowering plant showing best skill—Frank R. Kuehne, first; J. J. Krupa, second.

Mr. Krupa also exhibited several splendid ferns and Begonia Gloire de Lorraine which deserve special mention. The exhibits in vegetables were fully up to if not ahead of the high standard of former years. In display of 15 species J. J. Krupa won first; H. Larson (gardener to C. H. Wacker), second. In display of twenty varieties —J. J. Krupa, first; Rob. J. Sampson (gardener to E. F. Swift), second.

AXEL JOHNSON.

DULUTH, MINN.—The annual meeting of the Duluth Horticultural Society was held November 7. J. H. Kimball was elected president and S. George Stevens, secretary. A proposition to hold a rose festival another year was discussed.

Elberon Horticultural Society.

The third annual chrysanthemum exhibition of the Elberon Horticultural Society was held at the Casino, Asbury Park, N. J., November 7-8. The Casino being large there was plenty of room to show all exhibits to good advantage, and the foliage and flowering plants, also fruit and vegetables, were well displayed.

This exhibition was the first of its kind ever held in this fashionable resort and was one of the best shows of the season. Competition was very keen in all classes. The Asbury Park special prizes, which called for 50 blooms of chrysanthemums, 10 in a vase, long stemmed, not less than five varieties, brought exhibitors from a great distance. The prizes in this class were $100.00, $50.00 and $25.00. Ross Fenton of Asbury Park had a much admired exhibit, laid out to represent a garden with house attached and surrounded with ferns, palms and chrysanthemums. M. H. Kruschka, of Asbury Park, had a large collection of ferns and general florist stock. Wm. Tricker, of Arlington, N. J., displayed his new Vinca minor aurea for which he received a certificate of merit. There was great rivalry among the amateurs, their exhibits being very creditable, one table being used for plants and flowers.

L. A. Corlin, landscape gardener, of Elberon, made a very fine display on the stage of foliage plants and ferns, which increased the beautiful appearance of the Casino. It made a charming effect—not for competition. There were fruits exhibited from several estates worthy of special mention. Mr. McLean, of Monmouth Co., N. J., also had a large exhibit of fruit much admired in color and size.

The Asbury Park Casino proved an excellent place for the exhibition which was well patronized by Asbury Park and surrounding towns. The judges were Alexander McKenzie, Glen Cove, L. I.; Peter Duff, West Orange, N. J., and George Middleton, Tarrytown, N. Y. The awards are as follows:

Group of chrysanthemums — Jas. Kennedy (gardener to Mme. Lilian N. Young), first; A. Bauer (gardener to Henry Goldman), second.

Specimen bush plant—Peter Murray (gardener to S. R. Guggenheim), first; A. Bauer, second.

Specimen bush, single—P. Murray, first; A. Bauer, second.

Specimen anemone — Wm. Dowlen, Rumson, N. Y., first; A. Bauer, second.

Specimen standard—A. Bauer, first; P. Murray, second.

Specimen bush plant—A. Bauer, first; P. Murray, second.

Group foliage plants—P. Murray, first; Chas. O. Duncan (gardener to Mrs. Washington Wilson), second.

Three specimen palms—Wm. Turner (gardener to M. C. D. Borden), first; Chas. O. Duncan, second.

One specimen palm—P. Murray, first; Chas. O. Duncan, second.

One specimen foliage plant—P. Murray, first; C. O. Duncan, second.

Three ferns—P. Murray, first; C. O. Duncan, second.

Six rex begonias—C. O. Duncan, first.

Thirty-six chrysanthemums in six varieties—Geo. Hale (gardener to E. D. Adams), first; Wm. Turner, second.

Eighteen blooms in six varieties—P. Murray, first; Jas. Kennedy, second.

Twenty blooms, distinct, 12-inch stem—Jas. Kennedy, first; A. Bauer, second.

Twelve blooms, distinct varieties—Wm. Dowlen, first; Jos. Mills (gardener to Mrs. Jack Rothschild), second.

Six white—Jas. Kennedy, first; A. Bauer, second.

Six yellow—Jas. Kennedy, first; P. Murray, second.

Six pink—Jas. Kennedy, first; A. Bauer, second.

Six crimson—D. C. Kelly (gardener to B. J. Greenhut), first; Jas. Kennedy, second.

Six bronze—Jas. Kennedy, first; D. C. Kelly, second.

Six any other color—A. Bauer, first; Jas. Kennedy, second.

Eighteen blooms arranged for effect—Jas. Kennedy, first; A. Bauer, second.

Six vases singles, six sprays to vase—P. Murray, first; Geo. Masson (gardener to T. T. Kinney), second.

Twelve blooms double (members without glass)—Ed. O'Rourke, first.

Display hardy chrysanthemums—Ed. O'Rourke, first.

ROSES.

Twelve American Beauty roses—A. A. McDonald (gardener to J. B. Duke), first; A. Bauer, second.

Twelve white—A. A. McDonald, first; A. Bauer, second.

Twelve pink—A. Bauer, first; Robt. Scott (gardener to George Gould), second.

Twelve any other color—Geo. H. Gregory, first; W. R. Seymour (gardener to T. M. Goldsmith), second.

CARNATIONS.

Twelve white—Geo. Hale, first; H. A. Kettel, second.

Twelve dark pink—Geo. Masson, first; H. A. Kettel, second.

Twelve light pink—H. A. Kettel, first; Geo. Masson, second.

Twelve red—Geo. Hale, first; H. A. Kettel, second.

Twelve any other color—H. A. Kettel, first; Geo. Hale, second.

Vase 25 blooms—H. A. Kettel, first; Geo. Masson, second.

One hundred violets, single—Geo. Hale, first; D. C. Kelly, second.

SPECIALS.

Peter Henderson & Co. for six chrysanthemums—A. Bauer, first; H. A. Kettel, second.

Asbury Park Special, 50 blooms—W. Wert (gardener to Howard Gould), first; Wm. Turner, second; A. A. McDonald, third.

Table of orchids, four feet in diameter—Wm. Turner, first; A. Bauer, second.

W. R. SEYMOUR.

RUMSON, N. J.—William Mears is making extensive repairs to his greenhouses.

Connecticut Horticultural Society.

The annual exhibition of the Connecticut Horticultural Society was held in Putnam Phalanx hall, Hartford, Conn., November 8. The flowers were of much higher standard than have been shown in past years. One of the largest exhibitors was J. F. Huss, gardener for James J. Goodwin. A. N. Pierson, Cromwell, made a large display. The judges were Gustave X. Amrhyn and John N. Champion of New Haven, who made the following awards:

Best three specimen plants, distinct varieties—John F. Huss (superintendent for James J. Goodwin, Hartford), first; J. A. Weber (gardener for Walter L. Goodwin, Hartford), second.

Best two specimen standards, distinct varieties—John F. Huss, first.

Best specimen bush plant—John F. Huss, first; J. A. Weber, second.

Best twelve single stem, distinct varieties—J. A. Weber, first; N. Nelson, second.

Best six single stem, six distinct varieties—N. Nelson, first.

Best twelve pompons—John F. Huss, first.

Best three specimen pompons—John F. Huss, first.

Best specimen pompon—J. A. Weber, first.

Best twenty-five cut blooms, distinct varieties—J. A. Weber, first; N. Nelson, second.

Best twelve cut blooms, distinct varieties—J. A. Weber, first; Mrs. W. L. Cushing (Thomas Stentiford, gardener), Simsbury, second.

Best six cut blooms, distinct varieties—Walter Angus, Chapinville, first; Mrs. W. L. Cushing, second.

Best six yellow blooms—Walter Angus, first; Alfred Cebelius (gardener for Professor M. W. Jacobus, Hartford), second.

Best six red—Mrs. W. L. Cushing, first; Walter Angus, second.

Best six white—Walter Angus, first; John F. Huss, second.

Best six pink—Mrs. W. L. Cushing, first; John F. Huss, second.

Best six bronze—Mrs. W. L. Cushing, first; Alfred Cebelius, second.

Best six blooms, any other color—Mrs. W. L. Cushing, first.

Best three yellow—Mrs. W. L. Cushing, first; N. Nelson, second.

Best three red blooms—Mrs. W. L. Cushing, first.

Best three white blooms—Walter Angus, first; N. Nelson, second.

Best three pink blooms—Walter Angus, first; Alfred Cebelius, second.

Best three bronze blooms—Mrs. W. Cushing, first; Warren S. Mason (gardener for A. A. Pope, Farmington), second.

Best three blooms, any other color—Mrs. W. L. Cushing, first; N. Nelson, second.

One best incurved, any color—Mrs. W. L. Cushing, first; Walter Angus, second.

One best reflexed, any color—Walter Angus, first; Mrs. W. L. Cushing, second.

Best standard, any variety—John F. Huss, first.

Best specimen plant, anemone—J. A. Weber, first; John F. Huss, second.

Best specimen plant, single—John F. Huss, first; Alfred Cebelius, second.

Best specimen plant, pompon—J. A. Weber, first.

Best twelve sprays anemone; best collection of sprays, single; best collection of cut pompons—Warren S. Mason.

Group of chrysanthemums, ferns, and foliage plants—John F. Huss, first.

Best bunch of violets—Whiting Greenhouse, Hartford (Carl Peterson, manager), first.

Best two specimen plants of begonia Gloire de Lorraine—John F. Huss, first.

Best two specimen plants of begonia, white—John F. Huss, first; J. A. Weber, second.

Best vase of cosmos, Lady Lenox—John F. Huss, first.

Worcester County Horticultural Society.

The Worcester County Horticultural Society held one of the finest exhibitions of plants, roses and chrysanthemums ever seen in Worcester, Mass., at its annual chrysanthemum show, November 9, which was visited by fully 4,000 persons. The hall was beautifully decorated, representing an old-fashioned garden. The central avenue was formed by bay trees and alternating stands of chrysanthemums. At the end of the hall the stage was banked with roses, exhibited by H. F. A. Lange and the Worcester Conservatories.

The four largest stands in the hall were occupied by H. F. A. Lange, C. D. Mackie and the Worcester Conservatories, florists, and Edw. W. Breed, a landscape gardener of note. The begonias exhibited by H. F. A. Lange also attracted considerable attention.

G. W. Knowlton and Mrs. J. C. Whitin carried off many prizes for exhibits of single blooms. An excellent display of fruit was also shown.

The awards were:

CUT BLOOMS, CHRYSANTHEMUMS.

Twelve blooms—George W. Knowlton, first; Mrs. John C. Whitin, second.

Six blooms—George W. Knowlton, first; Mrs. John C. Whitin, second; John Gunn, third.

Best bloom—George W. Knowlton, first; Mrs. John C. Whitin, second.

Ten blooms, white — George W. Knowlton, first; Mrs. J. C. Whitin, second.

Ten blooms, pink—George W. Knowlton, first; Mrs. J. C. Whitin, second; John Gunn, third.

Ten blooms, yellow—G. W. Knowlton, first; John Gunn, second; Mrs. J. C. Whitin, third.

Ten blooms, red—G. W. Knowlton, first; John Gunn, second; Mrs. J. C. Whitin, third.

Twenty-five blooms—G. W. Knowlton, first; Mrs. J. C. Whitin, second; Worcester Conservatories, third.

Pompon—George Wells, first; Mrs. J. F. Whitin, second; Mrs. Percy C. Forbes, third.

Single varieties—H. F. A. Lange, first; G. W. Knowlton, second; Mrs. Percy C. Forbes, third.

Plants and flowers in groups—H. F. A. Lange, first; Edward W. Breed, second; Worcester Conservatories, third.

For unrestricted display, open to outsiders, the following were awarded prizes: Charles D. Mackie, plant display; H. F. A. Lange, roses, bay trees, begonias, chrysanthemums; Worcester Conservatories, roses; E. W. Breed, chrysanthemums, pansy display; John Gunn, chrysanthemums; Charles Potter, chrysanthemums; George W. Knowlton, chrysanthemums; James C. Draper, chrysanthemums; Mrs. W. E. Sargent, Mrs. J. W. Watson, Mrs. H. R. Hildreth, Miss Lucy M. Coulson and Mrs. A. E. Ackley, for ferneries and fern globes.

M. W. R.

Rhode Island Horticultural Society.

The Rhode Island Horticulture Society held its annual fall show in Elysium Hall, Providence, R. I., November 4-5, and the exhibit excelled any that has been held by the society in a number of years. The co-operation shown by the members of the Florists' and Gardeners' Club of Rhode Island in the preliminary arrangements, together with the display of flowers, while not as large in quantity as in past years, but way ahead in quality, were two of the principal features that contributed to place the show ahead of the average in recent years.

The cut flower section, occupying the left wing of the hall, was also an at-

tractive feature with choice specimens of chrysanthemums, both single and double, roses and carnations arranged in many large vases on tables. The manner in which the growers and commercial men came forward in support of the efforts of the show committee after the apathy shown for some years was very gratifying to the management of the show, who felt that all concerned had received good recompense for their efforts. The show was held in connection with the Rhode Island Boys' Corn exhibit conducted by the State Board of Agriculture and the fall fruit show of the society. The judges were Cornelius Hofstra and Eugene McCarron.

The awards were as follows:

Killarney roses—Burke & Burns, Cranston, first.

One hundred carnations—John A. Macrae, first; Alexander Macrae, second.

Violets—J. Kopelman & Co., first.

Mantel decorations—William A. Appleton, first.

Palms and foliage plants—C. H. Hunt, first; William Appleton, second.

Garden Japanese evergreens—William Appleton, special mention and gratuity.

One white chrysanthemum—Alexander Macrae, first.

Twelve yellow—F. S. Peck, Barrington, first; Alexander Macrae, second.

Twelve any other color—F. S. Peck, first.

Gratuities—Vase of large mixed varieties, F. S. Peck, Barrington; collection of single mixed, Alfred M. Powell, Providence. F. K. G.

Cincinnati Flower Show.

The flower show closed on November 8. Some of the exhibits experienced considerable difficulty on account of the sudden cold snap. C. H. Totty's shipment while in the express warehouse was completely frozen. These chrysanthemums were all of them elegant specimens. R. Witterstaetter lost his show plants in chrsyanthemums when a sash was blown from a cold frame on Saturday night and the thermometer took a sudden drop. He however took quite a number of prizes with others that he called seconds which he had in the greenhouse at the time. The competition in all classes was very keen. A vase of 50 Major Bonnaffon and one of Golden Eagle received a very large amount of the public's attention.

Tuesday brought out the finest display of carnations ever gotten together at this time of the year. The quality seemed more like that at a carnation show than a fall show. R. Witterstaetter won the silver cup for best seedling carnation with Valentine. H. W. Rieman won the silver cup for best seedling chrysanthemum.

The prizes awarded Thursday and Friday were as follows:

Best table decorations — Tromey's Flower Shop, second; Edith F. Kyrk, third.

Bride's and bridesmaid's bouquets—Hardesty & Co., first; Edith F. Kyrk, third.

Handle basket—Hardesty & Co., first; Edith F. Kyrk, second; Tromey's Flower Shop, third.

Cincinnati.

NO RUSH FOR STOCK.

Last week the buyers did not rush to get stock. Everything really classy was taken up, but considerable, especially the bunch, smaller and medium size chrysanthemums, moved slowly. Even Dianas, while they cleaned up from day to day, did not move with their accustomed vigor of other seasons. Shipping business in all lines has, however, continued strong. The leading chrysanthemums in the market are Major Bonnaffon, White Bonnaffon, Dr. Enguehard, W. H. Chadwick and Timothy Eaton. The pompons are selling well, especially the yellow and bronze. The situation in roses is the same as has stared us in the face all the fall, namely, pink selling quickly and white almost glutted. The supply of red roses is running short owing to most of the growers going off crop at one time. With American Beauties the supply and demand for long are about even. More medium and short stemmed ones could easily be used. Carnations are almost around to Christmas and late winter form. The Enchantress, White and Rose Pink, White Perfection, Delhi and Beacon are all good. The supply is increasing and prices on the best have moved a point in the same direction. All kinds started to sell nicely at the beginning of this week. Lilies are good property but bring only fair prices. Lily of the valley are disposed of nicely but not as quickly as during the past fortnight. New York double and single violets are in demand. Other stock includes orchids, pansies and stevia. There is a good call for all lines of green goods.

NOTES.

The smoker arranged by the committee, C. E. Critchell, P. J. Olinger and Chas. H. Hoffmeister, on Thursday evening was a huge success. Everyone present had one good time. Gus Adrian, president of the Cincinnati society, welcomed the guests and presented Chas. H. Hoffmeister as the toastmaster for the evening. The latter then introduced R. Vincent, Jr., president-elect of the S. A. F.; H. E. Philpott, president of the Chicago Florists' club; Irwin Bertermann, Indianapolis; Otto Koenig, St. Louis; A. C. Kohlbrand, vice-president Chicago Florists' club; W. W. Coles, Kokomo, Ind.; I. Rosnosky, Philadelphia, Pa.; George R. Gause, Richmond, Ind.; Ernst Riemann, Indianapolis; J. W. Page, Hampton, England; Adolph H. Poehlmann, Chicago; Henry Schwartz and R. Witterstaetter, Cincinnati. H

Milwaukee Florists' Club.

The Milwaukee Florists' Club entertained a large number of the visitors to the show last week at a bohemian supper in the St. Charles hotel Saturday evening, November 18. There was an abundance of Milwaukee's choicest products served by the daintiest of maidens and accompanied by vocal and instrumental music, in which the hosts and their guests heartily joined at times. C. C. Pollworth was toastmaster and when the tables had been cleared he called upon President Asmus of the Society of American Florists, who spoke for the society and its work. President-elect Vincent, of the same organization, was the next speaker, urging the attendance of all present at the great Chicago convention next August, adding that indications in all sections point to the largest gathering in the history of the trade. Wallace R. Pierson, of Cromwell, Conn., was introduced as a "grafter" and spoke of "the tie that binds," referring to the trade paper devoid of politics which reaches all sections of the country, holding the varied interests close together for the general welfare. P. J. Foley followed, telling of the sleepless nights the visit meant for him caring for visitors and others tired out with the cares of show days. President Philpott, of the Chicago Florists' Club, then presented President Hunkel, on behalf of the Chicago club, with a handsome ivory gavel as a memento of the occasion, the latter responding in suitable terms. Harry Balsley invited those in attendance to the rose and carnation meeting to be held at Detroit January 10-12. The other speakers included M. Barker, A. C. Kohlbrand, Nick Zweifel and John Degnan.

Among the visitors we noted the following:

Clark E. Adams, Racine, Wis.
Edw. Amerpohl, Janesville, Wis.
Albert L. Amling and wife, Maywood, Ill.
Otto H. Amling, Maywood, Ill.
Paul Amling, Maywood, Ill.
W. H. Amling and wife, Maywood, Ill.
Lulu Artmann, Sheboygan, Wis.
Geo. Asmus, Chicago.
Harry Balsley, Detroit, Mich.
M. Barker, Chicago.
Albert Benke, Watertown, Wis.
Andrew Benson, Hinsdale, Ill.
A. C. Benson, Chicago.
Fred W. Bliese, Waukesha, Wis.
E. Boulter, Winnetka, Ill.
Emil Buettner, Park Ridge, Ill.
H. L. Clapp, Ripon, Wis.
W. P. Craig, Philadelphia, Pa.
John Degnan, Chicago.
W. S. Desmond, Minneapolis, Minn.
Alfred Dietsch, Chicago.
Geo. J. Dinkel, Springfield, Ill.
Albert Erickson, Western Springs, Ill.
John E. Evans, Richmond, Ind.
E. Everett, Madison, Wis.
Michael Fink, Chicago.
P. J. Foley, Chicago.
Guy M. French, Morton Grove, Ill.
Carl F. Fugleberg, Oshkosh, Wis.
Mrs. A. Fulsinger, Racine, Wis.
Edw. Goldenstein, Chicago.
Nick Greivelding, Merrill, Wis.
W. Hartshorne, Joliet, Ill.
Louis Hartung, Two Rivers, Wis.
F. W. Helemans, Chicago.
Theo. Helker, Merrill, Wis.
F. Henks, Hubbard Woods, Ill.
E. G. Hill, Richmond, Ind.
Mrs. J. T. Hinchliffe, Racine, Wis.
H. B. Howard and wife, Chicago.
Herman Jeksa, Lake Geneva, Wis.
J. E. Jones, Richmond, Ind.
J. W. Jung, Randolph, Wis.
L. C. Jung, Randolph, Wis.
J. J. Karins, Philadelphia, Pa.
W. J. Keimel, Elmhurst, Ill.
F. C. Kesting, West Bend, Wis.
Frank Klavacek, Gross Point, Ill.
Henry Klehm, Arlington Heights, Ill.
A. C. Kohlbrand, Chicago.
W. L. Kroeschell, Chicago.
F. R. Kuehne, Lake Geneva, Wis.
E. F. Kurowski, Chicago.
Fred Lautenschlager, Chicago.
James Livingstone, Lake Geneva, Wis.
Albert Loeffler, Watertown, Wis.
Fred Loeffler, Watertown, Wis.
L. P. Lord, Minneapolis, Minn.
P. L. McKee, Chicago.
E. H. Mann, Richmond, Ind.
M. Mann, Chicago.
J. E. Matthewson, Sheboygan, Wis.
Arthur Mensche, Janesville, Wis.
J. J. Michelsen, Chicago.
A. Miller, Chicago.
G. V. Nelson, Chicago.
H. Nicholson, Joliet, Ill.
Vlasta B. Nyes, Racine, Wis.
Peter Obertin and wife, Kenosha, Wis.
E. A. Ollinger, Chicago.
Peter Olsem, Joliet, Ill.
E. O. Orpet, Lake Forest, Ill.
H. E. Philpott, Winnipeg, Man., Can.
W. R. Pierson, Cromwell, Conn.
Adolph Poehlmann and wife, Chicago.
August Poehlmann and wife, Chicago.
L. C. Porter, Racine, Wis.
L. Prader, Baraboo, Wis.
James Psenicka, Gross Point, Ill.
Martin Reukauf, Philadelphia, Pa.
F. Rhodes, Hartford, Wis.
John Rindfleisch, Beloit, Wis.
E. T. Ross, Baraboo, Wis.
A. C. Rott, Joliet, Ill.
D. D. Roy, Chicago.
N. J. Rupp, Chicago.
M. Schileff, Wausau, Wis.
O. A. Schroeder, Green Bay, Wis.
E. L. Schultz, Oak Park, Ill.
W. W. Selmania, Chicago.
A. J. Smith, Lake Geneva, Wis.
Elmer D. Smith, Adrian, Mich.
Otto Spiedel, Oconomowoc, Wis.
Viola Stack, Sheboygan, Wis.
C. Stratton, Lancaster, Wis.
C. C. Taylor, Louisville, Ky.
W. A. Toole, Baraboo, Wis.
G. W. Vatter, Marinette, Wis.
J. C. Vaughan, Chicago.
R. Vincent, Jr., and wife, White Marsh, Md.
P. Vollker, Manitowoc, Wis.
C. L. Washburn, Chicago.
T. E. Waters, Chicago.
Henry Wehrmann, Maywood, Ill.
Paul Weiss, Maywood, Ill.
H. C. Wendland, Elmhurst, Ill.
Hugo Will, Minneapolis, Minn.
S. F. Willard, Jr., Chicago.
Miss Winterson, Chicago.
E. Winterson, Jr., Chicago.
L. H. Winterson, Chicago.
Louis Wittbold, Chicago.
Mabelle Wood, Oshkosh, Wis.
R. S. Woodyard, Chicago.
S. F. Willard, Western Springs, Ill.
Herman Yates, Lake Geneva, Wis.
John Zech, Chicago.
Adam Zender, Chicago.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico, $1.00 a year, Canada $2.00; Europe and Countries in Postal Union, $2.50 Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From the first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlie if possible), as we go to press Wednesday.

OUR Boston correspondent elsewhere in this issue calls attention to the possibility of a coal strike.

THE seventh annual convention of the American Civic Association will be held at the New Willard hotel, Washington, D. C., December 13-15.

HAVE the Christmas stock of plants and accessories all ready at least a week before the holiday, and let the public know that you are prepared. Invite them to come and inspect the stock and make a good showing of what you have.

THERE are but few things more disappointing to a customer than to receive a box of frozen flowers. It is useless to blame the express company. All plants and flowers should be so warmly wrapped, from November 1 to May 1, as to be guaranteed against all sudden changes of weather.

National Sweet Pea Society.

The following letter has been issued by President Sim to the members and friends of the National Sweet Pea Society of America:

Plans have been made to hold our annual meeting and exhibition jointly with the Massachusetts Horticultural Society July 13 and 14, 1912. As president of this society it is my desire that this should be the finest show of its kind ever held. Features are already assured which have never before been attempted. If you have a piece of land available where you could grow some sweet peas for this show you would be helping a good cause at slight expense. A committee is now at work on a preliminary schedule which should be ready for distribution about December 1, so that there will be ample time to study out the features for which you wish to compete. There will be special prizes for seedsmen, gardeners, commercial growers, retailers, amateurs, school children and school gardens. In behalf of the Sweet Pea Society I would like you to stir enthusiasm in your vicinity. If you could get the cottagers, the schools and your local paper interested it would mean increased business for you in time to come. We have received the support and co-operation of the Massachusetts Horticultural Society, the Gardeners' and Florists' Club of Boston, the gardeners of Lenox, the North Shore, Bar Harbor, and other places. There is no doubt as to the outcome of this event, but every little done now means a much greater success. WILLIAM SIM, Pres.

Gude-De Shields Wedding.

In the historic New York Avenue Presbyterian Church, where such men as Abraham Lincoln and John H. Harlan have been pew holders, Marie Henrietta Gude, daughter of Adolphus and Mrs. Gude, and Charles Burton De Shields were married on the evening of November 15. Rev. Wallace Radcliffe, pastor of the church officiated. The ceremony, including decorations and other details, was the most beautiful and appropriate we ever witnessed. The decorations were executed by the Gude Bros. Co. under the supervision of Wm. F. Gude and O. A. C. Oehmler. The platform in the rear of the pulpit or pastor's desk was an immense bank of palms. Large palms were also placed at appropriate places along the balconies or galleries of the church and large bay trees graced the entrance. The floral decorations were of pink and white chrysanthemums. Around the altar and for pew markings, white chrysanthemums on autumn foliage were used. The front of the balconies was covered with southern smilax, with great bunches of pink chrysanthemums on autumn foliage appropriately spaced. In continuation of the scheme, hanging baskets of chrysanthemums were suspended from the balconies, the whole transforming the somber interior of the old church into a veritable autumn garden. The bride carried a bouquet of white orchids and lilies of the valley. The maid of honor, Miss Blanche Rogers of Hatfield, Pa., carried mauve orchids. Miss Esther Gude, sister of the bride, and Miss Mae V. De Shields, sister of the bridegroom, carried white chrysanthemums. The flower girl was Miss Louise Whitfield Carnegie Gude, daughter of Wm. F. Gude and cousin of the bride. She carried a basket of pink roses with which she strewed the aisle in the path of the bridal party. She is a little girl but has inherited a good share of her papa's nerve and equanimity.

The bride wore a white gown of crepe charmeuse trimmed with embroidered chiffon and pearls, her white veil was held with sprays of lily of the valley. The maid of honor wore orchid crepe meteor, with pearl trimmings. The bridesmaids wore pink satin veiled with marquisette and gray cap effects of pale pink with pink ostrich aigrettes. The flower girl wore white lace over pink silk. Mrs. Gude, mother of the bride, and a charming matron, wore lavender silk and lace. The ceremony throughout was notable for good taste and the entire absence of any attempt at ostentatious display. In this young couple we feel more than a passing interest and trust that they will have a safe, happy and prosperous voyage o'er life's great ocean.

The best man was Harold Elwood, the ushers were Adolphus Gude, Jr., brother of the bride; Albert Pike, Albert Fessenden and Everard Smith.

After the wedding there was a reception at "Gudemont" (Anacostia), the home of the bride's parents, for the bridal party and the near relatives of the contracting parties, the Gude home being also handsomely decorated.

A. F. F.

The Late John Jules Fonta.

John Jules Fonta, a noted horticulturist of New Orleans, La., and late superintendent of Audubon park of that city, died at his residence, 6030 Hurst street, November 10, aged 76 years.

Mr. Fonta was a native of Varilhes, France, where in his youth he studied botany and learned to love flowers among which he worked throughout his life. He attended the Government Horticultural College of France and a few months after his graduation came to America, first locating in New York where he remained a short time. In 1869, he removed to New Orleans and with his superior knowledge of botany soon obtained a position. He later started in business with M. Ory and the firm was very successful.

During the New Orleans Centennial Exposition he furnished the large palms for Horticultural Hall for which he received first prize. At the close of the exposition he was appointed superintendent of Audubon park, which position he held for many years. He was well-known to horticulturists of the country and had a wide acquaintance. Interested in all that pertained to floriculture he attended the convention of the Society of American Florists and was interested in the meeting and making the acquaintance of the florists of the country.

He is survived by a widow with whom he was wedded for forty-three years, one brother and two sisters living in France. The funeral took place at his late residence, Saturday afternoon, November 11.

NEW CANAAN, CONN.—Stephen Hoyt's Sons Co. held their third annual fall show at the greenhouses on South Main street, continuing through the first week of November.

FLORENCE, S. C.—The Palmetto Nurseries, DeWitt House, proprietor, has completed a greenhouse 65x150 feet which will be devoted to carnation culture. An up-town store has been opened in the Central Hotel building.

Meetings Next Week.

Baltimore, Md., November 27, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Cleveland, O., November 27, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2010 Detroit avenue.

Lake Forest, Ill., November 29, 8 p. m.—Horticultural Society of Lake Forest, Council Chamber, City Hall.

Lake Geneva, Wis., December 2, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Milwaukee.

AMERICAN BEAUTIES IN SHORT SUPPLY.

There is plenty of stock of all grades in all lines with the exception of American Beauty roses which are scarce throughout the entire country. Splendid white, pink and yellow chrysanthemums and pompons are arriving in large quantities as are also roses and carnations. Sweet peas, lily of the valley, violets and Mrs. Aaron Ward roses are in good demand and clean up fairly well.

NOTES.

Holton & Hunkel Co. is proud of the fine showing it made and the prizes they won in roses at the flower show in this city last week. The American Beauties grown by this firm and which won first prize were of the finest possible quality and a credit to the enterprising house and its grower. The stock in general is of good quality at the store and it looks as if no one will have to be turned away on Thanksgiving day.

H. V. Hunkel and A. Kellner are deserving of much credit for the splendid manner in which the stock was arranged and the hall decorated at the flower show last week. The visitors were greatly impressed with the show and say that it outclassed everything, as far as the exhibits were concerned, that they had seen this season.

C. C. Pollworth returned from his deer hunting trip in time to take in the show and cop nearly all the honors in the chrysanthemum classes. This and the other stock that was exhibited was of fine quality, as can readily be imagined when the list of awards shows that his firm won 47 prizes out of 54 entries.

Gust Rusch & Co. are receiving a fine grade of stock in all lines, with chrysanthemums and carnations showing up exceptionally well. This firm reports that the outlook for a brisk Thanksgiving trade is very bright.

Nic Zweifel should have been more considerate of the out-of-town exhibitors and not staged carnations that would win all the premiums. He probably could not help it for the stock was taken from his regular daily cut and was of such good quality that it would probably win prizes wherever and whenever it was exhibited.

Mrs. A. Fulsinger, who attended the show last week, says her firm, the North Side Greenhouses, Racine, are enjoying a very good season.

E. F. Ross of Baraboo took in the show last week and bought goods for the holiday trade.

The bowling scores last week were as follows:

A. Hare	99	134	136	R. Lietz	98	93	
G. Pohl	131	139	132	F. Holton	169	193	122
P. Nohos	116	162	120	N. Zweifel	136	113	149
G. Hunkel	112	170	132	W. Sch'itz	150	126	162
W. Hall'y	114	105	132	L. Manos	106	141	150
G. Rusch	152	182		O. Egge't	111	117	133

Buffalo.

THE FLORISTS ARE BUSY.

Clear and cold weather the past week has seemed good for the flower business and for chrysanthemums. The weddings, dinners, teas and the debutantes kept the florists busy. Chrysanthemums are at their best. Roses and carnations are in excellent supply and of good quality, but the demand for them is somewhat slow on account of the chrysanthemums.

NOTES.

S. A. Anderson had his annual chrysanthemum show at his store on November 15-18. The display was elaborate and the arrangement most artistic from the dinner table in the window to the general effect in the whole store. Golden Wedding, W. H. Chadwick, Chadwick Supreme, Golden Chadwick, Maud Dean, Timothy Eaton and Major Bonnaffon seemed each to have their own place and vie with the others for supremacy in effect. Pompons also were in tasteful arrangement. Baskets of lily of the valley, roses, pompons and gardenias for the debutante and for the table were arranged to please the most fastidious and from press comments and the large number that visited the store it was well worth the labor of the show.

The business of R. M. Rebstock has been purchased by Mrs. C. J. Chretien, Clifford Chretien and Miss Hazel J. Adams, who for the past six years has been Miss Rebstock's able assistant. It is safe to assume that under the new firm business will be carried on as before with the personal attention of Miss Adams, who has been so faithful to the wishes of the customers in the past that she will be assured of a continuance of their trade. The best wishes are with the new firm and a long life to Miss Rebstock or Mrs. Johnson, as she now is.

F. P. Baum, a florist on Washington Market and 52 Kingsley street, while on a business trip to Salamanca, was found dead either on the train or in a hotel. Meagre reports have reached the city but no positive information as to his death has been learned. Mr. Baum had been in business for a great many years. The last few years his son has been associated with him. They had a good business and his sudden death was a shock to his many friends.

The attendance at South Park at the chrysanthemum exhibit has been very large and well worth the trip.

Chicago.

THE CHRYSANTHEMUM SEASON PASSING.

The last week has been show week for the large growers and considerable fine stock that would have been seen at the market has been winning premiums at the shows in the several cities and success has crowned the exhibitors that showed their products in Cincinnati and Milwaukee. The roses that are now coming in are of most excellent quality and the quantity is increasing so there is sure to be a good supply of fine stock for Thanksgiving day. American Beauty is in splendid shape with many of the growers, but the quantity is none too large for the requests and the growers firmly believe that orders for this favorite should be placed early to be sure of having them filled. Killarney and My Maryland are both in excellent condition, some superb blooms of the former being seen with one of the growers having fine strong stems 48 inches long, with the most luxuriant foliage. Complaints are being made from some sections of the country that the dark weather has affected the color of Killarney but most of the stock now coming in is of splendid color. Richmond has assumed mid-winter form both as to size of flower and length of stem and is of superb quality. White Killarney is especially fine and elegant stock can be secured. Chrysanthemums have passed the zenith and some of the blooms show that the end of the season is approaching, the blooms being fully developed. There is a good supply of all colors, but there is a great question whether there will be enough to fill the large demand for Thanksgiving. The large exhibition blooms are not so plentiful as they have been, the shows taking the most select, and there will be no oversupply of this grade from now on. Carnations are of excellent quality and the supply is adequate, yet the prices hold up well for first grade stock. Violets are now being received in excellent shape, the flowers being large and of long stem, some elegant bunches now being marketed. Lily of the valley is not over-plentiful but the quality is all that could be asked, and there is enough to meet requests. Lilies and callas are to be had but there is no great call for them, the large white chrysanthemums taking their place. The many debutante receptions have caused a good demand for orchids, and the supply is hardly equal to the demand and there will be no excess for the next week. The variety of orchids offered is quite large, there being cattleyas, dendrobriums, oncidiums, phalaenopsis and cypripediums. Sweet peas are getting more plentiful and some very fine stock of this popular flower is to be had. Paper White narcissus is now offered by many growers, but as is usual with this flower when it first appears the stock is quickly sold. There is a good stock of pompon chrysanthemums and they are being used extensively by the retail houses. The windows of the stores are radiant with some well-grown chrysanthemum plants.

NOTES.

Manager Pyfer of the Chicago Carnation Co. is receiving some nice orders for rooted cuttings of Washington from large growers in England, who say they read his advertisement in THE AMERICAN FLORIST. Another order through the same paper from a grower in Australia was refused because it was thought that the distance was too great to attempt the shipment.

Wietor Bros. are cutting large quantities of white, yellow and pink chrysanthemums of fine quality and is one of the fortunate houses to have a large crop for Thanksgiving. N. J. Wietor says his firm will have plenty of roses and carnations for their customers with the possible exception of American Beauties.

Poehlmann Bros. Co. is showing a fine grade of Killarney, My Maryland and Richmond roses that are attracting a great deal of attention at their store where the stock is arriving in large quantities. This firm is substituting these flowers for American Beauties which are very scarce at present.

The Chicago Flower Growers' Association is well fixed on chrysanthemums, roses, violets and green goods for Thanksgiving and the advance orders promise a busy week. Otto W. Frese is doing his own corresponding, in long hand, during the illness of Miss Wallace who is confined with pleurisy.

Kyle & Foerster have added another grower to their list and are now receiving a good supply of American Beauty roses. The carnations that the Northwestern Floral Co. is shipping to this house are of fine quality and are sold quickly.

Hans Jepsen was in this week buying a stock of supplies for his new retail establishment, the Model Flower Store, that he will open in Morris on November 25.

Chas. Balliff, formerly with Bassett & Washburn, is now doing retail work for George C. Weiland in Evanston.

Joseph Trinz, of Lubliner & Trinz, is serving on the millionaire's jury this week.

C. E. Newton is the latest addition to the force at Bassett & Washburn's store.

Miss M. E. McAdams, who has been under the weather lately is improving.

Jack Byers of the Chicago Carnation Co. is on the sick list this week.

Poehlmann Bros. Co.

Peter Reinberg
30 E. Randolph St., CHICAGO

Bassett & Washburn's supply of roses and carnations for Thanksgiving is large, and some good sized orders have already been booked. This firm enjoys a splendid shipping trade which is probably due to the fact that they aim to please their customers and supply them with the best stock obtainable.

The Geo. Wittbold Co. at Edgebrook has two benches of excellent Paper White narcissus and Roman hyacinths that are in fine condition and in crop for Thanksgiving. The plant trade is very brisk, especially the out-of-town demand, which calls for large quantities and keeps the packers busy.

Mrs. Marshall Field and Sunrise roses of fine quality are features at the Peter Reinberg store this week. The shipments of Killarney, White Killarney and Richmonds are large and the stock is particularly fine for the shipping trade.

Those who attended the Milwaukee Flower Show were well repaid for their visit and speak in glowing terms of the fine exhibits and the royal treatment that they received at the hands of the Cream City florists.

The J. B. Deamud Co. is finding very ready sale for the choice violets that the Des Plaines Violet Co. is shipping to them and receive nothing but compliments for the fine stock that they are handling.

Joe Welsh, of the Peter Reinberg force, is playing left half-back on the crack Eastern A. C. team, which is leading the city league and is so much talked about in the local football circles.

Hoerber Bros. are enjoying a fine business and are disposing of large quantities of roses and carnations. The stock is in splendid condition and a banner Thanksgiving trade is looked for.

Vaughan & Sperry are well pleased with the outlook for Thanksgiving and are prepared with a large quantity of choice stock to take care of all the orders that may come in.

Ed. Winterson was missing from the store a couple of days this week and upon investigation we found that he was again laid up with his injured foot.

Chas. Erne is back in the wholesale business and is waiting on customers at the Chicago Flower Growers' Association's store on North Michigan avenue.

Louis Hartung, of Two Rivers, Wis., paid the city a business visit on November 18, leaving the same evening to attend the flower show in Milwaukee.

J. J. Grullemans, Jr., representing J. J. Grullemans & Sons, Lisse, Holland, en route to the Pacific Coast, called on his customers here this week.

C. M. Thomas is back from the east and is again on deck at the A. L. Randall Co.'s store.

VAUGHAN & SPERRY

Long Distance Phone Central 2751.

161 N. Wabash Ave., CHICAGO.

Quite a number of florists attended the Paszkiet-Robakowski wedding and reception on Wednesday, November 22. The groom is well-known to the local trade and is one of Wietor Bros.' valued store employes.

F. A. Longren and Clifford Pruner, E. H. Hunt's hustling traveling representatives, have returned from successful trips and will remain in the city until the Thanksgiving turkey is disposed of.

Fred Strail of the Briggs Floral Co. arranged the table decorations at the Kuntz-Remmler restaurant on November 17 when a venison supper was given in honor of Mayor Carter H. Harrison.

Wm. K. Kotschonis has bought out his partner, Theo. Callos, and is now sole proprietor of the store, 142 South Wabash avenue, doing business under the firm name of White House Florists.

John Sinner is forgetting that there is such a thing as fishing this week and is telling his customers that he will have plenty of Killarney roses for Thanksgiving.

D. E. Freres is handling roses grown by Adam Zender and is showing a fine grade of Killarney. Miss Tonner is receiving shipments of single violets that sell quickly.

A. C. Rott of Joliet accompanied the local delegation to Milwaukee to visit the sights at the show and attend one of Phil. Foley's birthday parties.

Chas. McKellar says that the Cattleya labiata crop is shortening up and that the receipts of Oncidium varicosum Rogersii are much larger.

John Kruchten is prepared for the Thanksgiving trade with a fine line of seasonable stock, especially chrysanthemums and roses.

Zech & Mann are filling orders for a fine grade of boxwood and are showing a very good assortment of seasonable cut flowers.

J. A. Budlong is filling a large number of orders for a choice grade of My Maryland roses and lily of the valley.

Weiland & Risch's stock is of fine quality and arriving in quantities so large that they are enabled to fill all orders.

A. Y. Ellison, formerly of St. Louis, is now in the employ of John Mangel, the Wabash avenue florist.

Geo. Reinberg's leaders this week are splendid Killarney and White Killarney roses.

Geo. Vatter, of Marinette, Wis., was in the city this week on business.

Frank Schramm is suffering considerably with an injured hip and is unable to be about.

Henry E. Klunder, formerly with John Mangel, is in Philadelphia.

Mrs. Ed. Misciwicz is suffering from blood poisoning.

Ed. Hauswirth is now with Harry C. Rowe.

Visitors: Geo. Vatter, Marinette, Wis.; W. S. Desmond and Hugo Will, Minneapolis; W. R. Pierson, Cromwell, Conn.; R. Vincent, Jr., White Marsh, Md.; John Evans, Richmond, Ind.; J. J. Grullemans, Jr., representing J. J. Grullemans & Sons, Lisse, Holland; Lewis P. Lord, Minneapolis, Minn.; John G. Heinl, Terre Haute, Ind.; W. P. Craig, and Martin Reukauf, representing H. Bayersdorfer & Co., Philadelphia, Pa.

Chicago Bowling.

The following teams and individuals of the florists' club bowling league will strive for honors in the bowling tournament for the championship of the city, which is scheduled to open at Bensinger's new alleys, 29 West Randolph street, on Friday, December 1.

Two Five-Men Teams—Orchids, first team: John Zech, John Huebner, Wm. Graff, Joseph Foerster, Allie Zech. Carnations, second team: Wm. Lorman, J. Byers, J. Friedman, E. Schultz, C. Balliff.

Three Two-Men Teams—John Zech and Allie Zech, John Huebner and Joe Foerster, J. Byers and C. Hendricksen.

Five Individuals—John Zech, Allie Zech, Joseph Foerster, J. Byers and C. Hendricksen.

The Carnations bowled some pretty good scores on November 15 and now hold the record for the high team average for three games with the grand score of 812. Allie Zech, of the same team, rolled 245, the highest score yet made, besides having an average of 210 1-3 for the best three games played this year. The Carnations think this is pretty good for a team that is at the bottom of the league and say that a little more of this kind of bowling ought to place them a little nearer the top. Keep right on, boys, but watch out for the Orchids.

The following table shows the number of games won and lost by each team to date:

	Won	Lost		Won	Lost
Orchids	17	4	Violets	10	11
Roses	10	11	Carnations	5	16

The individual and team scores for games played November 15 were as follows:

Carnations.				Orcids.			
Lorman	168	170	149	Huebner	157	157	145
Ayres	153	181	119	Graff	178	119	160

Last Call for Thanksgiving

The large supply of **Beauties, Roses, Carnations, Valley, Violets, Chrysanthemums, Pompons** and **Lilies** that we are receiving are of very good quality. The roses in general are of the best grade with good heads, stem, color and foliage. Our chrysanthemums were never better and the quantity was never larger, so you can rest assured that your order will be filled in full if you place it with us.

Our Goods Are Right

So are our prices. But this is not all. We take the same care with the smallest order as well as the largest and are prepared to fill either or both. We are filling both—and filling them right—that is why we have such a good shipping trade, and it makes no difference where our stock goes we have no complaints. Its fine quality, the care taken in packing and shipping just at the right time, insures its safe arrival and in the best possible condition. Repeat orders prove this, and while we are anxious to secure new customers, the approval of our old ones is even more appreciated. We give personal attention to all orders. Let us get better acquainted. Begin at once

ZECH & MANN, *WHOLESALE FLORISTS, L. D. Phone, Central 3284, 162 N. Wabash Ave.* **Chicago**

NEW HAVEN, CONN.—Several of the Chapel street florists have agreed to cut the price of violets, Yale's popular flower, as a move to combat the Yale flower shop

BLOOMINGTON, ILL.—The business in general has been very good recently, there being several large funerals which used nearly all the available flowers.

BOULDER, COLO.—Charles F. Fawcett has produced a new chrysanthemum which he has named Boulder. It is light lavender in color and the petals are peculiarly whorled.

Pittsburg.

PLENTIFUL SUPPLY.

There is little to be said of the past week's business, excepting that it was fair—some might say good. There is a plentiful supply of everything excepting possibly violets and these promise to come in heavier now. American Beauties have advanced to $4.00 per dozen and maintain that price well. White lilac is now plentiful and is being used extensively. Some of the Killarneys are a little light colored, but Hilda maintains its deep rich color as good as ever.

NOTES.

A. T. Lorch & Co. generally have a vase of their own carnations, sitting in their log-cabin window at the Smithfield street store, of such size that one wonders where they ever got them.

Mrs. E. A. Williams, who gets a good many good things in Sewickley, had one job there this week that called for several hundred special American Beauties and cattleyas.

The A. W. Smith Co. has been making very effective combinations of natural flowers and prepared foliage in their window displays.

The Finleyville Floral Co. are now consigning their cut to the McCallum Co. Carnations are their specialty.

The Ziegler Co. has had several large decorations at Hotel Schenley lately.

Murray McGrew has resigned his position with Randolph & McClements.

The McCallum Co. are handling a very good grade of white lilac.

J.

St. Louis.

PLENTY OF STOCK.

The weather has been warm and cloudy and trade can be said to be only fair. The wholesale houses have a supply of all kinds of stock, there being large quantities of chrysanthemums, which affect the prices on roses. Violets are improving, but the demand for them is not large. Smilax, asparagus and galax are selling well. It is expected that there will be a good sale for violets and chrysanthemums for the Thanksgiving football game.

NOTES.

The Paris Floral Co. has a fine display of chrysanthemums in their large show windows. A large supply of violets, lily of the valley and orchids was also noted.

Hugo Gross is very enthusiastic over his new improved Admiral Avalon violets. He anticipates a crop of fine sweet peas for Christmas.

Adolph Ahner has sold his entire crop of chrysanthemums and is preparing to plant sweet peas and gladiolus.

We are pleased to see W. C. Smith at the store again, having recovered from his recent accident.

Al. Gumiz at Geo. H. Angermueller's was on the sick list last week, but has returned to his duties.

The Riessen Floral Co. had the decorations for the opening of Talbot's new Hippodrome.

George Hartmann is growing his violets on benches and is getting some fine flowers.

James E. Muldoon is growing some fine fancy carnations.

W. F.

Bristol, Tenn.

The business this season has been very good with chrysanthemums in full supply and of fine quality. Carnations are coming in fairly well and violets in good shape. The first killing frost or rather freeze occurred November 3, the temperature falling to 22°. The florists are now busy preparing for the Thanksgiving and holiday trade. W.

ROSES IN SHORT SUPPLY.

There was considerable activity in the market the past week, there being quite a demand for flowers for the debutantes' teas, of which there were quite a number. There were also several important weddings. Roses of all kinds appear to be off crop, American Beauty and Killarney have been scarce all the week and prices have gone soaring. There are quite a few growers who have gone heavily into the double pink Killarney, but at present the buds of this variety are quite light in color, and look a trifle faded. A little cold weather the growers say will remedy this, and the other good qualities will keep this variety to the front. Liberty roses will not be any too plentiful the coming season as many growers found the market so full of this variety last year that they dropped it. Violets have shortened up alarmingly the past week and prices took a bound upward that frightened many timid customers. Cattleyas are certainly the flower for the moneyed man, as in two weeks they have advanced at least one-third in price. It was thought that the great addition to old stocks and the new houses devoted to cattleyas that have been installed the past few years would overstock the market, but it appears in spite of the great quantity thrown on the market at times there is such a demand that very high prices are obtained when the crop shortens. The past week all good flowers brought 60 cents each. Carnations are about to have their inning, as signs of the early passing of the chrysanthemum are in evidence. Many growers say the crop will hardly hold out for Thanksgiving. Superb flowers of W. H. Chadwick, Golden Chadwick and Golden Wedding were the leaders the past week. Major Bonnaffon and Maud Dean were the quick-moving, moderate-priced sorts. Garza, white anemone and Mrs. Carter, single pink, were also good sellers.

NOTES.

Godfrey Aschman is kept busy shipping out his araucarias. Every mail brings orders for this popular plant which is a specialty of his. The stock of azaleas for forcing is the largest he has ever had, and they are an especially well budded lot.

Harry Bayersdorfer says that baskets with zinc linings are now in great demand, flowers arranged in them keep very much longer, being in very wet moss and the added expense for the tins is trifling. He reports a splendid fall business. K.

BUSINESS BETTER THAN LAST YEAR.

The market conditions with but few exceptions are unchanged. It was expected that there would be an extra demand for violets on account of the football game between Yale and Princeton, and the Horse Show which opened Saturday night, but the extra call did not materialize and violets remained at the usual price. Cattleyas are much shorter in supply and selling very well. The same can be said of American Beauty roses, which have advanced almost one hundred per cent. The special grades of all roses have advanced in price. Carnations are doing much better and chrysanthemums remain the same, but are clearing out at a little better price. Lilies are not doing as well. Gardenias are still in limited supply, with good demand. Paper White narcissus are getting very plentiful. Lily of the valley is moving slowly. Sweet peas are improving in quality, but there is only a fair demand for them. The opinion seems to be that business as a general thing is better than at the same time last season.

NOTES.

E. W. Fengar of Newark is sending to Henshaw & Fenrich chrysanthemums of the best quality which have sold for very high prices, when the price at which very high class blooms have been selling is considered. Mr. Fengar is also sending in large quantities of carnations which are exceedingly good.

Chas. H. Totty and Wm. Duckham have returned well pleased with the success of their trip to many western cities. Mr. Totty was greatly disappointed that his entire shipment of chrysanthemum blooms intended for exhibition in Cincinnati were so badly frozen that they could not be staged.

Philip Kessler, who is situated on the top floor of the Coogan building in the Cut Flower Exchange, has been very busy shipping violets and carnations out of town and at present is receiving large shipments of fine lilies from John Meisem, Elmhurst, L. I.

Siebrecht & Siebrecht are receiving lilies and lily of the valley of the finest grade from Wm. H. Siebrecht, Astoria, L. I.; also a good supply of orchids in variety from the Henry A. Siebrecht & Son's greenhouses, New Rochelle, N. Y.

Badgley, Reidel & Meyer are receiving fine gardenias and in chrysanthemums fine Improved Chadwick and H. W. Reiman. Wm. G. Badgley of this firm is sending in good stock of Bon Silene roses from his own place.

Kessler Bros. have the greenhouse in the rear of their store well stocked with palms in great variety, for which they are finding ready sale. This firm is also handling large lots of Begonia Gloire de Lorraine.

The National Flower Show Committee are keeping busy and Chairman Totty announces that the preliminary schedule will positively be sent out before the first of the coming year.

Visitors: George Dorr, Bar Harbor, Me.; T. J. Pierman, Bermuda.

The bowling club is going on very satisfactorily. Several new names have been handed in for membership and the evenings spent on the alleys are pleasant ones. Scores Friday were:

Chadwick	183	200	155	182	200	200

BUSINESS MORE ACTIVE.

There is increasing activity in business and by the time congress meets it is expected a mild boom will be here. So far as this section is concerned, October and November seem to have been misplaced, as we are now having better weather than that of a month ago. While the nights are cool the days are bright and clear and favorable to the growers. Though chrysanthemums are the leading features, roses, carnations, violets, lilies, lily of the valley and sweet peas are also factors, as well as orchids and gardenias, the aristocrats of floriculture. Roses, even American Beauties, are selling cheap. Carnations are not so plentiful and even with the market full of chrysanthemums, good, bad and indifferent, carnation prices are stiffening. On November 18 they wholesaled at three cents, which is a good price under existing conditions. This has been a hard season on carnations in this vicinity on account of the drouth and extreme heat during the summer and the hot weather of September, but they are now getting into better form. It may be that there are other carnation productions "just as good" as Peter Fisher's, but if so we have not seen or heard of them. Judged by the length of time some of the old varieties lasted, Enchantress has had a very long run and does not appear to have in the least deteriorated. At the present time Dorothy Gordon, with us, shows both a better flower and stem than rose pink Enchantress, but is rather shy in blooming. The conditions under which we have been growing both are not ideal, but since cool weather set in both are improving. Beacon may be called a wonder, for it grows right along almost regardless of conditions. The few plants of Gloriosa we have came from the field very small and dry and little was expected of them. However, they took hold well in the house and have made good growth and the few flowers we have cut were large, well formed and a good pink color. The plants of White Wonder that we started with were also very small and sickly looking. It, too, has taken hold well. Up to this time it has shown more inclination to grow than to bloom, which, however, is a good fault if it does not keep it up too long. The few flowers cut have been good. We have a few Shastas which are growing well but whatever the flowers may amount to later in the season, they are now of little account. We do not see anything in the line of white carnations that seems better suited for the market than White Enchantress and White Perfection, though I would not call the former ideal. We have thus far had so little real carnation weather that it would be unfair to condemn any new variety on so short a trial.

NOTES.

There are roof gardens and gardens on the roof, the former being associated in the minds of many with music and refreshments; the latter are sometimes the pet hobby of the janitor or care taker of a large apartment or office building. It remained for Leapley & Mayer, the enterprising young florists at Ninth and G streets, N. W., to establish a garden under the sidewalk. Taking additional space adjoining their store for storage purposes, they finally hit on the idea of growing some stock, not of course to maturity but getting it well started. They have rooted thousands of English ivies and have been moderately successful with other things. The glass in the sidewalk gives a reasonable amount of light, there is steam heat and a certain amount of ventilation, the greatest drawback being the dryness of the atmosphere.

Last week was a very busy one for the Gude Bros. Co. In addition to the Gude-De Shields wedding they had, on the same date, the Roosevelt-Bayne wedding at St. Thomas Church, the whole with the store trade using up about 5,000 chrysanthemums on that date. A specialty at their greenhouses is very fine gardenias.

J. H. Small & Sons expect to move into their new store, Fifteenth and H streets, N. W., about the first of December. In this location they will have much more floor space and greatly improved facilities for window display.

Roman J. Irwin, one of the noted expounders of the virtues of the seeds, bulbs, plants, etc., which he sells, was in the city last week. He is now on his own hook, with headquarters in New York. He is a good fellow.

F. H. Kramer, accompanied by Mrs. Kramer, recently visited New York and is now busy in connection with the opening of the new Imperial theater, he being president of the company.

Alex. B. Garden is now sending in a fine cut of both Major Bonnaffon and White Bonnaffon chrysanthemums.

$3.00

POSTPAID TO Any ADDRESS

SAVES MANY TIMES ITS PRICE

THE AMERICAN FLORIST COMPANY'S DIRECTORY saves many times its price to every one who catalogues or circularizes the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor.

Contains 590 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, foreign merchants, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

Published annually by the

American Florist Co.

440 S. Dearborn St. CHICAGO.

HOLLY-HOLLY-HOLLY

I have just returned from a two weeks' trip through the Holly sections of Delaware, Maryland and Virginia, and have contracted for my supply for the season of 1911 I expect to have several cars of very fine, dark green, well berried Swamp Holly. I will have it packed as usual in regular size cases, 2x2x4, and guaranteed as represented. My first car will arrive in Philadelphia about December 1st. I filled all orders received last year and gave entire satisfaction, and hope to do so again this season. My price this year on orders received up to December 1st is **$3.00 per case.** After that date, at market price, which I am quite sure will be higher on account of scarcity.

HOLLY WREATHS

My Holly Wreaths will be made of the very finest selected dark green Holly on 10-inch hoops, and will be well berried, $10.00, $12.50 and $15.00 per 100, according to quality.

LAUREL WREATHING

My Laurel Wreathing will be made of the brightest Swamp Laurel that it is possible to secure, in 50-yard lengths, Prtce, 2½c and 3c per yard.

MISTLETOE

My Mistletoe, from North Carolina, will be extra selected and full of berries. Per case, $3.50 to $5.00, according to quality.

LYCOPODIUM, in 10-yd. rolls, 5c to 8c per yd.

I make a specialty of the above and guarantee all goods as represented or money refunded. Cash must accompany all orders.

F. B. WOOLEY, 152 Dock St., Reference: 6th National Bank, Mutual Trust Co. **Philadelphia, Pa.**

TRADE GOOD.

The cut flower market continues good as to stock received and sales. Chrysanthemums still hold the first place as to quantity and quality, and sell all the way from three cents for small Ivory to $2.00 and $2.50 per dozen for the largest. Carnations are a little short of the demand and the price is advancing gradually. Violets have increased in price and stock is exceptionally good. A few sweet peas are arriving. A few of the growers are already cutting stevia. Callas and lilies are moving slowly. Orchids and lily of the valley are selling well, and are rather short of the demand. The rose crop has shortened up considerably, and late buyers have had to hustle to fill orders. Killarney are a trifle off color and this is noticeable all over the country at this time.

NOTES.

Wilhelmy Bros. will open their third retail store near the corner of Euclid avenue and E. One Hundred and Fifth street about the last of this month.

One of the largest as well as the most elaborate weddings of this season was the marriage of Mary E. Sanders, daughter of Mr. and Mrs. W. V. Sanders, to Harold T. Clark. The ceremony took place in the Second Presbyterian church November 22. The church decoration was one of the most effective and elaborate the Cleveland public has ever seen. In front of the choir loft and organ were 10 large standards covered with white chrysanthemums, each standard having seven large cathedral candles, producing the effect of a pyramid which covered the entire choir loft. There were three altars each being profusely decorated. Huge pillars on either side, holding 35 cathedral candles, were covered with bunches of W. H. Chadwicks, the largest procurable. The front of each platform was decorated and banked with cibotiums. About 600 long American Beauties covered the largest pillars, producing a tree effect, all tied with huge bows of fish net illusion, in green, back of which were banked large palms. In the front corners of the church two large pyramids of cathedral candles were covered with white chrysanthemums, banked with cibotiums. The festooning throughout was of long Asparagus Sprengeri and white chrysanthemums. Every other seat in the aisle was decorated with bunches of white chrysanthemums and asparagus. An immense arch in the rear was decorated with the same flowers. Two gold pillars in the gallery were covered with American Beauties in tree form, while the entire gallery was hung with festoons. The home of the bride's parents was also decorated on a very elaborate scale. The living room was banked with ferns, while large gold vases were filled with long-stemmed American Beauties and white chrysanthemums. The dining room was decorated with Mrs. Taft roses and American Beauties, the chandeliers hung with asparagus sprays, grapes and Mrs. Taft roses. On the bridal table was a centerpiece of white lilac and Mrs. Taft roses. The porch was enclosed and used as a reception room, and was decorated with American Beauties and large silk electroliers. The parlor was of Killarney roses. The ballroom on the third floor was decorated with Killarney and American Beauties in garlands and festoons. Thirty tables for the guests were decorated with the same roses. The bride carried a bouquet of lily of the valley and white lilac. Frank Smith, of Los Angeles, Calif., had charge of the decorations, ably assisted by Smith & Fetters Co's. crew of decorators. This firm has another large wedding decoration December 2, which will be on a similarly large scale.

CROMWELL, CONN.—During the chrysanthemum season the attendance of visitors on Sundays at the A. N. Pierson greenhouses became so large that the corporation was obliged to make public notice that no one under any circumstances would be allowed to visit the houses on Sunday. One great reason for this was the fact that few men are at work on that day to protect the plants or close doors which the visitors have neglected to do. On other days the public is welcomed to visit any of the houses of the immense establishment.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H. Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

Next annual convention, June, 1912.

ALBERT MCCULLOUGH and wife, of Cincinnati, O., are at Sanibel Isle, Fla.

KENTUCKY BLUE GRASS conditions have developed nothing to change former reports of the great shortage in the 1911 crop. There is not sufficient seed in sight to supply the demand this season.

VISITED CHICAGO: J. Chas. McCullough and wife, of Cincinnati, O., enroute to the coast; A. J. Brown, Grand Rapids, Mich.; J. J. Grullemans, Jr., representing J. J. Grullemans & Sons, Lisse, Holland.

THE domestic crop of white clover is almost a failure and its value is the highest in many years. The home demand is being supplied largely by imported seed. The selling season has not started yet.

F. H. HENRY is said to be away up on Fujiyama dickering with the angels for next season's supply of Japanese bulbs while other dealers are closing contracts with the mortals below. With such aid Mr. Henry may secure the large sizes.

THE holly situation remains about the same. North Carolina stock will be the cheapest in the commission market. Fancy grades from Delaware and Tennessee, suitable for florist trade, is offered practically on last season's cost basis or within 15 to 25 cents per case of 1910 prices.

CHICAGO.—Prices on the Board of Trade, November 22, for grass seed were noted as follows: Timothy, $13.50 to $15.50 per 100 pounds.—The western canners were in session at the Hotel Sherman the past week.—The South Water street commission houses handle large lots of evergreen wreathing as well as evergreen and holly wreaths, shipping to all parts of the middle west and as far east as Pittsburg. The stock of bulk green is scarce with these dealers and they now expect a price of 60 cents or better for 20-yard coils in a jobbing way. Snows the past week in the northern woods have firmed prices on this article, picking evidently being closed for the season.

Vine Seeds.

Advices from Rocky Ford, Colo., are to the effect that there has been another severe snowstorm with a temperature of 16 degrees below zero November 11. Most of the crops have been harvested. There are still a few in the pits, which were covered and protected. It is feared that the severe cold may affect the germination of some of the cucumber crops in that section and also in the vicinity of Ordway, the late crops of watermelon in Kansas and Oklahoma and pumpkin and squash in Nebraska that had not been seeded previous to the cold weather.

The Bean Crop.

November 15.—The condition of the bean crop this year is the lowest as regards quality for perhaps a period of 10 or 12 years. The acreage was large, the crop withstood the dry hot weather well, and the prospect was for a yield of six or six and one-half million bushels, somewhat larger than the crop of 1910. The early beans were harvested at the close of September and the first threshings showed exceptionally fine quality, the beans being clean, dry and free from weather damaged or stained stock.

With the first days of October came a wet period and stormy, rainy weather prevailed throughout the month. About one-half the crop was in the field pulled and was damaged daily by the unseasonable wet weather. These unfavorable conditions continued so long that the late beans, although matured, could not be pulled and many of them are still in the fields unharvested. The largest damage is in the districts of the heaviest soils. The extreme northern sandy sections have the best quality this season. Conservative estimates place the loss at one-third of the crop or two million bushels.

The prices of white pea beans are 25 to 30 cents higher than a year ago. Colored varieties, Red Kidney and Brown Swedish beans, are about the same price as last year. Nine cents advance was lately scored in two days.

Seed Testing Laboratories.

The United States Department of Agriculture announces that on November 1 seed testing laboratories were opened in co-operation with the Louisiana Agricultural Experiment Station, Baton Rouge, La., and the California Agricultural Experiment Station, Berkeley, Calif. Similar laboratories in co-operation with the Oregon Agricultural College, Corvallis, Ore., the Missouri Agricultural Experiment Station, Columbia, Mo., and Perdue University, La Fayette, Ind., are in operation. These laboratories are established and maintained for the purpose of furnishing information as to the quality of agricultural seeds. Samples may be submitted to the Seed Laboratory, U. S. Department of Agriculture, Washington, D. C., or the nearest branch laboratory where they will be identified, examined or tested according to the request accompanying them.

Noxious Seed Laws.

We were impressed with the comments of Henry Nungesser & Co. in your publication of November 4. While there is no doubt there have been abuses of the seed trade in the past by putting out inferior stock, it will appear to any sane dealer that those who make our laws are liable to overdo matters in the way of having too much legislation along the prohibitive line.

As Messrs. Nungesser & Co. say, Dame Nature produces both pure and noxious seeds, and shrewd as the later generations are growing to be, we have never yet to any extent been able to control Dame Nature.

Sane, uniform seed laws are to be welcomed, but spare us from freak legislation.

BALTIMORE, MD.

Denver, Colo.

The condition of the flower market here has been very good, although the fine weather has advanced the chrysanthemum crop considerably. There has been no great surplus of stock and prices have kept firm. Several large funerals have helped to clean up the stock considerably. Carnations are coming in good shape and are bringing fair prices.

CLUB MEETINGS.

The regular monthly meeting of the Colorado Florists' Club was held at T. M. A. Hall, November 6, and the following officers were elected for the ensuing year:

Arthur H. Bush, president.
Edwin S. Kennedy, vice-president.
Edgar P. Neiman, secretary.
Bernard Boldt, treasurer.

Charles R. Root, Edwin S. Kennedy and Emil Glauber, trustees.

A special meeting was held November 13, for the purpose of discussing the possibilities of a flower show in 1912. A committee composed of J. A. Valentine, N. A. Benson and Arthur Bush were appointed to attend to the preliminary arrangements.

NOTES.

Daniels & Fisher Stores Co. held the opening of their new store last week. The whole store was arranged artistically with vases and plants of chrysanthemums. The center aisle was arranged to represent a Japanese garden which was very tasty. The work was executed by Arthur H. Bush, manager of the floral department.

The Park Floral Co. held a chrysanthemum show at their greenhouses and store, Colfax and Josephine streets. The store was arranged to represent a Japanese garden. A lady dressed in a handsome Japanese costume assisted by a Japanese served tea and rice cakes to the visitors.

T. W. Hanna, manager of the Denver Wholesale Florist Co., and Miss Ruby Ordway were married November 4. They are the recipients of hearty congratulations.

N. A. Benson, one of the leading growers here, was recently married and is receiving the congratulations of his friends.

SYRACUSE, N. Y.—At a meeting of the Syracuse Rose Society held November 15 it was decided to assist the state fair commission in its plans for a horticultural and floricultural hall and to ask the legislature for an appropriation for this purpose.

ROCHESTER, N. Y.—At the meeting of the Rochester Florists' Association, held November 13, it was decided to hold a display of flowers at each meeting. A programme of papers for the winter meetings was submitted by George Arnold, chairman of the committee on entertainment, as follows: December, "The Chrysanthemum," C. B. Ogsten; January, "Perennials," J. M. Kellar; February, "Annuals," George Arnold; March, "Roses," Lawrence Cotter of Jamestown; April, "Pruning," John Dunbar. A beautiful display of autochrome photographs showing flowers and views in natural colors, was enjoyed by the members present.

GLADIOLUS GLORY.

Gladiolus

We control the entire stock of

THE NEW TYPE

KUNDERDI "GLORY"

WITH "RUFFLED" PETALS

The broadly expanded, wide open flowers paired by twos, all face in the same direction and are carried on straight stout stalks, fully 3½ feet. From three to eight of these handsome flowers are open at one time. Each petal is exquisitely ruffled and fluted.

The color is a delicate cream pink, with a most attractive crimson stripe in the center of each lower petal, the shade of which is unique in Gladioli. The ruffling of the petals in this new strain has attracted much attention the country over.

Special prices with free cuts, for catalogue use.

Per 100, $7.50. Per 1000, $70.00

ALBERT M. HERR, Lancaster, Pa.

Market Gardeners

Vegetable Growers' Association of America.

H. F. Hall, Boston, Mass., President; C. West, Irondequoit, N. Y., Vice-President; S. W. Severance, 508 Walker Building, Louisville, Ky., Secretary; M. L. Ruetenik Cleveland, O., Treasurer.

CHICAGO, November 20.—Mushrooms, 15 cents to 25 cents per pound; cucumbers, $1 per box of two dozen; tomatoes, 15 cents to 20 cents per pound; 12½ cents to 40 cents per dozen bunches.

ONE million pounds of cabbage were shipped from Niagara county, New York, to New York city in the last four days, and today there is not a barrel left in farmers' hands. The demand for cabbage in New York this year is said to be unprecedented.

Vegetable Marrows.

The summer this year in England and Europe has been exceedingly dry and the vegetable marrows when well cared for and given plenty of root room, according to a writer in Garden Illustrated, have revelled in the heat which has been withering up cabbages, beans, peas and other vegetable crops. It seems as if this vegetable, if it does so well in the intense heat and dryness which has been experienced in England this year, ought to be worth a trial in America, for it is further remarked that these, with potatoes and tomatoes, have been the best products of the year.

Boston.

THANKSGIVING TOO LATE.

There is a feeling that the worst of the agony is about over. Chrysanthemums are still plentiful but are beginning to show some wear. They have ranged lower in price than for many years. Had Thanksgiving been a week earlier the trade would have benefited more than they will on the date which has been appointed, because the surplus would have been taken off the market earlier. There will be a chance for other staples when the Queen of Autumn makes her exit. If India was only nearer the florists might have a chance to unload some chrysanthemums at the Durbar of King George. Everything is about the same in all lines; no advance except a slight rise in roses.

NOTES.

The Horticultural Club of Boston, we understand, is composed of the leading lights and main props of the Gardeners' and Florists' Club. Whether this will weaken the old club we are not prepared to state. We understand the membership is limited to 20, and the dues are $25 per year, but it seems to us that only men of affluence can afford that amount. The purpose we hear is to elevate horticulture. There has really been more elevation from a crust of bread in a garret than from a swell banquet in a hotel, and we wonder if the coffee and sandwiches supplied by the old club were too prosaic for all the members, and that the feast of reason and soul didn't flow fast enough. We feel that a limited club with a high price will not do the trade at large any more good than, nor the desired benefits accrue to them in a club with an open membership and a smaller fee. There is no small class of men who can hold themselves up as ideal and lead the rank and file of the trade. If the club is formed for business on a broad scale it seems niggardly to set a limit. We feel that there is room for a practical talk every month by some seer in his particular line, but let his talk be open to the general trade. More interest will be taken than by those who set themselves on a high pedestal and drop a few crumbs to the multitude. This is a democratic country and in order to have the people heed things they must be done in a democratic way.

There has been enormous coal purchases made for New England firms lately, who are reported to be stocking up with the idea that there is to be a general strike in the coal regions April 1, 1912. Mr. Babson, an economist and statistician, recently made a western trip and visited the mines in different sections of the country which produce seven-tenths of all the bituminous coal that is used, and it is claimed that from his personal observations the heavy buying resulted. We all remember the last strike of the anthracite coal mines, and if both kinds of coal are stopped at the same time results will be still worse. There is a general feeling in the coal trade that coal will be higher. Florists should see that they have enough to keep them going the rest of the season, for there will be uneasiness in many quarters in case of a strike until the settlement is made.

President William Sim has appointed the following committees in connection with the National Sweet Pea Society's exhibition to be held in Boston in conjunction with the Massachusetts Horticulture Society's show, July 13-14, 1912: Executive committee, John K. M. L. Farquhar, chairman; W. A. Burpee, A. C. Zvolanek. Manager of the exhibition, Robert Cameron. Schedule committee, James Wheeler, chairman; Wm. N. Craig, Sidney Hoffman. Committee on medals, Thomas Roland. Commercial growers' committee on prizes and rules, James Wheeler, chairman. Gardeners' committee on prizes and rules, Wm. N. Craig, chairman. Retailers' committee on prizes and rules, Sidney Hoffman, chairman. Seedsmen's committee on prizes and rules, H. E. Fiske, chairman. Other committees will be announced later.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N.Y., Sec'y.
Thirty-seventh annual convention to be held at Boston, Mass., 1912.

YOUNGSTOWN, O.—Supt. J. A. Pettigrew, of the Boston parks, with Mrs. Pettigrew, is expected here this week on a visit to their son, Dr. Pettigrew.

COLLINSVILLE, CONN.—C. W. Atwater has moved his nursery stock and business to Agawam, Mass. He will, however, for the present reside in this town.

TOPEKA, KANS.—The unsightly row of shrubbery which practically surrounded Central Park for years is to be replaced by an evergreen hedge. The shrubbery has caused considerable complaint for it obstructs the view of the park from the driveways.

WITHIN the last ten years a large number of the hickory trees in the northern and eastern states have died, the cause being the hickory bark beetle. The U. S. Department of Agriculture advises the marking of all trees which by the premature dying or falling of leaves in July and August denote the presence of this beetle and the felling of dead trees and cutting out all dead branches and tops of those marked before May 1, when the beetles emerge from their winter quarters under the bark.

SCOTTSVILLE, TEXAS.—The cold wave reached this city November 11, reports the Standard Orchard Co., the thermometer dropping from 70° at nine p. m. to 26° at six a. m., freezing all tender plants. The nursery stock was not damaged, the shedding of the leaves from the peach trees was hastened and they are now bare and the late shedding is satisfactory and desirable. The trees are now in excellent shape to stand the winter. The late shedding of leaves would indicate that they will be late in blossoming next year, thus avoiding late frosts.

Vines Retaining Foliage in Autumn.

The leaves of a few vines are almost as green in October and November as in summer and promise to remain green for some time longer. The best known of these, remarks the Arnold Arboretum Bulletin, perhaps, is a Japanese Honeysuckle, a form of Lonicera Japonica, which is usually known in gardens as Hall's Honeysuckle. In the middle and southern states this vigorous plant has become perfectly naturalized, often crowding out the native plants, and retains its foliage during the winter. Here the leaves are killed by severe cold. As a flowering plant, too, this is one of the handsomest of the vine honeysuckles which are hardy in this climate.

The leaves of the two akebias, Akebia quinquefolia and Akebia lobata, are still fresh and green, and these slender and graceful vines deserve a place in every autumn garden. The small purple flowers do not make much show, and the edible fruit, which is largely consumed in Japan, is rarely produced in this climate.

Clematis paniculata, one of the handsomest of the late summer-flowering species and now one of the most popular hardy plants in the United States, is still covered with leaves as green as they were in July. Another vine is now conspicuous with bright green leaves. This is a Japanese Moonseed, Cocculus Thunbergii.

Propagating Buxus and Euonymus.

ED. AMERICAN FLORIST:

Will you kindly inform us as to the best method of propagating boxwood and euonymus? We tried to root the former last year by taking pieces of the old wood, inserting them in sand and placing them under a bench in a boiler house, but as they showed no growth by April they were thrown out, although we were told they were calloused. How large should the cuttings be? Would they root under sash?

District of Columbia. W. B. C.

The present would be an excellent time in the District of Columbia to make cuttings of the above evergreens, taking shoots of the current year's growth, not necessarily the strongest ones, as the short jointed twigs are usually the best. It will take all winter for these to callus and a frame where most of the cold is excluded and where it does not freeze and thaw frequently will be better than in a boiler house, a cool violet house or pit is an ideal place. It will take at least six months to callus the cuttings, and if those thrown out last spring had been taken care of they would have been fine stock by this time, starting to make roots and growing on with the summer season. E. O. O.

California Association of Nurserymen.

The first fall meeting of the newly-formed California Association of Nurserymen will be held at the chamber of commerce rooms, Los Angeles, November 23-24. The association is affiliated with the Pacific Coast Association and the meeting promises to be of great interest. There will be morning and afternoon sessions on both days of the meeting and on Saturday delegates will be taken in autos to see the sights of the town and vicinity. The topics to be discussed are live ones and among the most interesting are "Credits in the Nursery Business," by Leonard Coates of Morganhill; "Buying and Selling among Nurserymen," by Fred Howard of Los Angeles; "The Problem of Surplus Stock," by Max Crow of Gilroy; "Growing Ornamentals that Sell," by E. H. Rust, South Pasadena; "California Field-Grown Roses," by E. Gill, West Berkeley, and "California's Plant Debt to Australia," by Theodore Payne, president of the Los Angeles Horticultural Society. John Vallance of the C. C. Morse & Co. nurseries, Oakland, is down to speak on "Novelties of Twenty-five Years in California," and in the discussion following this paper Luther Burbank of Santa Rosa and Newton B. Pierce of Santa Ana have promised to take part. Many other speakers are on the programme and their remarks will be looked forward to by members of the local trade. The officers of the association include W. V. Eberly, Niles, president; H. W. Kruckebery, Los Angeles, secretary-treasurer, and Max J. Crow, Gilroy; E. Wightman, Chico, and C. W. Howard, Hemet, executive committee. H. R. R.

Catalpa Bungei.

Catalpa Bungei is pretty well known in the grafted standard form, grown with an umbrella shaped head, and as such has a place in larger ornamental planting.

It may not be generally known that where this tree is grown on its own roots it makes a very beautiful shrub or small tree three to five feet high and nearly as broad, forming a beautiful green clump as well as a striking novelty.

This catalpa is said to be a seedling sport from C. bignonioides. I have had it in cultivation nearly 50 years and never knew or heard of it blooming. E.

Fruit Trees Apple and Peach. Large Stock.
Fine Trees. Prices reasonable.
MITCHELL'S NURSERY, Beverly, Ohio

Discorea sp. Ornamental Yam, Air Potato.
A new rampant climber from Hawaii, with abundant glossy, heart-shaped, strongly nerved leaves. Fine for verandahs. Bears potato-like tubers all along the stems. Tubers for spring planting now ready, $3.00, $4.00 and $5.00 per 100, according to size.

The Storrs & Harrison Co., Painesville, O.

Montreal.

The chrysanthemum show held in the club rooms of the Montreal Gardeners' & Florists' Club was encouraging enough to hold a show on a large scale next year, and steps have already been taken to this end. The cut blooms shown by Hall & Robinson were of highest quality and fully deserved the cultural certificate awarded them. Some of the other exhibitors were Wilshire Bros., ferns; E. J. Hayward, specimen ferns; Geo. Pascoe, Gloire de Lorraine begonias; C. Byford, solanums; J. Pidduck, cut chrysanthemums; Hall & Robinson, orchids, cut chrysanthemums and solanums; J. Luck, chrysanthemum plants and collection of apples.

NOTES.

Real estate around this city has made tremendous advances the last few years, and it is constantly rumored that one or another of those growers, who are favorably located, have sold out at fabulous prices, but so far nothing definite has been given out. Those persistently mentioned are S. S. Bain, Hall & Robinson and P. McKenna & Son, and many more could retire handsomely.

The cut of chrysanthemums has been very profitable to the growers and many of them have decided to plant more houses next year. One grower in particular who grows carnations largely announced his intention of turning his entire plant to the chrysanthemum, the reason given that they pay better and give less trouble.

Hall & Robinson had a large wedding decoration. The bouquets were very handsome, being of the new style resembling the old fashion bouquet with paper holders.

The splendid weather affords lots of time to plant bulbs, which have been planted in large quantities. Some firms plant as many as 150,000.

Bode & Jensen will open a store in St. Catherine street near Crescent on November 15. Their greenhouses are nearing completion.

LUCK.

Kentia Forsteriana, 4 year old, 30 to 35 inches high, $1.00, $1.25 and $1.50.

Kentia Forsteriana, 4 year old, 24 to 26 inches high, 50c to 75c.

Kentia Belmoreana, 4 year old, combination or made up of 3 plants, 26 to 28 inches high, 75c, $1.00, $1.25 and $1.50.

Kentia Belmoreana, combination or made up o 3 plants, 3 year old 24 to 26 inches high, 75c to $1.00.

Kentia Belmoreana, 4 year old, single, 26, 28 to 30 inches high, 75c, $1.00 and $1.25.

Kentia Belmoreana, 3 years old, 5¼ to 5½ in. pots, 20 in high and up, single plants 50c to 60c.

Cocos Weddeliana Palms, made up of 3 plants 4 to 5-in. pots, 30c and 40c; 3-in., 15c, 18c and 20c; 4-in. 25c.

Cycas Revoluta or Sago Palm, the genuine large and long-leaved variety, imported direct from Japan 6-7 in. pots, 5 to 15 leaves to a plant 12c per leaf.

Areca Lutescens, 4-in. pots made up, 18 to 20 in. high 20c to 25c; 5-in. 20 to 25 in. high, 30c to 35c.

Asparagus Plumosus Nanus, 2½-in., $3.00 per 100; $25.00 per 1000; 3-in., $5.00 per 100; 4-in., $10.00 per 100.

Asparagus Sprengeri, large size, 4 in., 15c; medium size, 4 in., 10c; 2½-in., $3.00 per 100.

Ficus Elastica (Rubbers) 5¼ to 5½-in. pots, very fine stock, 25c; 5½ to 6 in pots 25 to 28 in high, 35c, 40c and 50c; 7 in. pots, 30 in. high and up, 75c to $1.00

Cineraria Hybrida Grandiflora, Aschmann's well-known strain, 2¼-in. pots, $3.00 per 100; 3-in. pots, $6 00 per 100; 4-in. 10c

Primula Obconica Grandiflora, assorted colors, in bloom medium large, 5½-in., 25c bushy.

Poinsettias, in bloom 3-in., 15c; large 4-in. 25c; 5½ to 6 in single or branched 35c 40c to 50c.

Cyclamen Grandiflora, 4-in., 25c; 5¼-in., 35c.

Primula Chinensis, John F. Rupp's so well known strain, assorted colors, 4-in., 10c; 5¼-in. pots, $2.50 per doz.

Begonia Gloire de Lorraine.

This is another great specialty of ours. We have grown them very extensively for the past ten years. Our special treatment makes the flowers very bright. We have the bright red and the pink Lonsdale. Have a houseful. Now ready, in bloom for Thanksgiving Day and Christmas, 6 in. pots, 50c, 60c 75c to $1.00; 3-in. pots, 12c to $1 00.

Begonias New Improved Erfordi, Aschmann's Beauty, the finest Christmas and winter blooming Begonia in existence. Their beautiful pink and bright red large flowers are a puzzle to anyone who sees them in bloom: in flower now and all the winter through: large 4-in. pots, 20c; large 5¼-in. pots, 35c. Bear in mind this is an immense bloomer which has no equal.

Begonia Gloire de Cincinnati, 5½ in. pots, 50c to 75c; 6-in., $1.00 to $1.50.

Another specialty of ours are now in. **Azalea Indica.** New stock. They are all in fine condition, full of buds. Now is the time to start for Christmas forcing. We have for Christmas the so well adapted standard varieties—Deutsche Perle double white: Simon Mardner and Mme. Petrick double pink; Vervæneana, double rose variegated. Price: 50c, 60c 75c $1.00 $1.25, $1.50 to $2 00. Easter Varieties—Schryveriana Vervæneana Simon Mardner 50c, 75c, $1.00, $1.25 $1.50 to $2 00; Mme. Van der Cruyssen Niobe, Empress of India, Apollo, Prof. Wolters and others, in bud.

Solanum or **Jerusalem Cherries,** 6 in., full of ripe berries, 25c, 35c and 50c.

Just Arrived with the Azaleas.

A fine consignment of **Latania Borbonica,** in first-class condition, perfect foliage, large stock, 8 good leaves, height given in consular invoice at 35 to 40 in., fit for 7 to 8 in pots, $1.00 to $1.50.

Combination Latania Borbonica (3 plants) in a 6-in. pot, which gives them a fine appearance, bushy about 13 to 14 leaves to a pot, 6-in. pots, 60c, 75c to $1 00

Adiantum Hybridum, the new Maidenhair Fern, large 4-in., 15c; medium size 4 in., 10c.

Three Houses in Ferns

Pot, Not Bench Grown.

Neph. Scottii, Scholzeli and Whitmani, 4-in. pots, 15c to 20c; 5½ to 6-in. pots, 25c 35c, 40c and 50c; 7-in. 75c to $1.00.

Boston Ferns, 5½-in., 35c to 40c; 6-in., 50c; 7-in., 75c to $1.00; as large as a bushel basket.

Neph Cordata Compacta, 4-in., 10c.

Ferns for Dishes, a good assortment, 2½-in. pots $5.00 per 100 large plants.

Fern Balls, imported direct from Japan, already started, 50c.

What Mr. F. J. Michell, of the Well Known Seed House, Henry F. Michell Company, Philadelphia, Said:

"Oct. 28, 1911.

"Have just visited the greenhouses of Godfrey Aschmann and must say it was indeed a great surprise to me. I have never seen a better lot of Araucarias, Azaleas, Ferns and other plants in all sizes and prices as are at Mr Aschmann's."

25 at 100 rates. **Cash with order, please.**
All plants must travel at purchaser's risk.

Circulation in Buyers' Brains

IS the kind enjoyed by the American Florist. Its actual paid circulation we believe, is the largest in its class. The contents are of real present value and are preserved for future reference. Advertisers who realize this establish permanent business with the best trade in the United States and Canada.

Gold Letters

Gummed Gold, Silver and Purple Letters for inscriptions on Floral Designs. Best and Cheapest on the Market. Send for Samples and Prices.

J. Lichtenberger, 1564 Ave. A, NEW YORK

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

Sash that pay for themselves

We know of instances where Sunlight Double Glass Sash have grown crops so much earlier and so much better that the extra prices they brought on the early market paid for the glass themselves.

Two layers of glass instead of one

The enclosed dry air space means that the sash are never covered—and the plants get all the light all the time—and this accounts for their rapid growth and sturdiness. Even in zero weather you need not cover Sunlight Double Glass Sash.

SUNLIGHT Double Glass Sash TRADE MARK

for Hot-beds and Cold-frames

What one man did

Herman F. Kaiser of Lawrenceburg, Ind., writes: "My Sunlight Sashes were put on hot-beds about February 1st, 1910, and planted to cabbage, lettuce and tomato plants. Seven degrees below zero did no harm and everything has done well in the field."

Send for these books

One is our free catalog; the other is a book on hot-beds and cold-frames by Professor Massey. It is authoritative and of vital interest to all professional growers. 4c in stamps will bring Professor Massey's book in addition to the catalog.

Dreer's Peerless Glazing Points

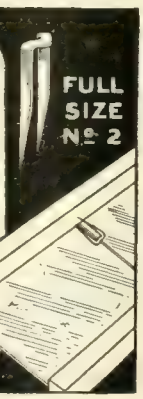
For Greenhouses

Drive easy and true, because both bevels are on the same side. Can't twist and break the glass in driving. Galvanized and will not rust. No rights or lefts.

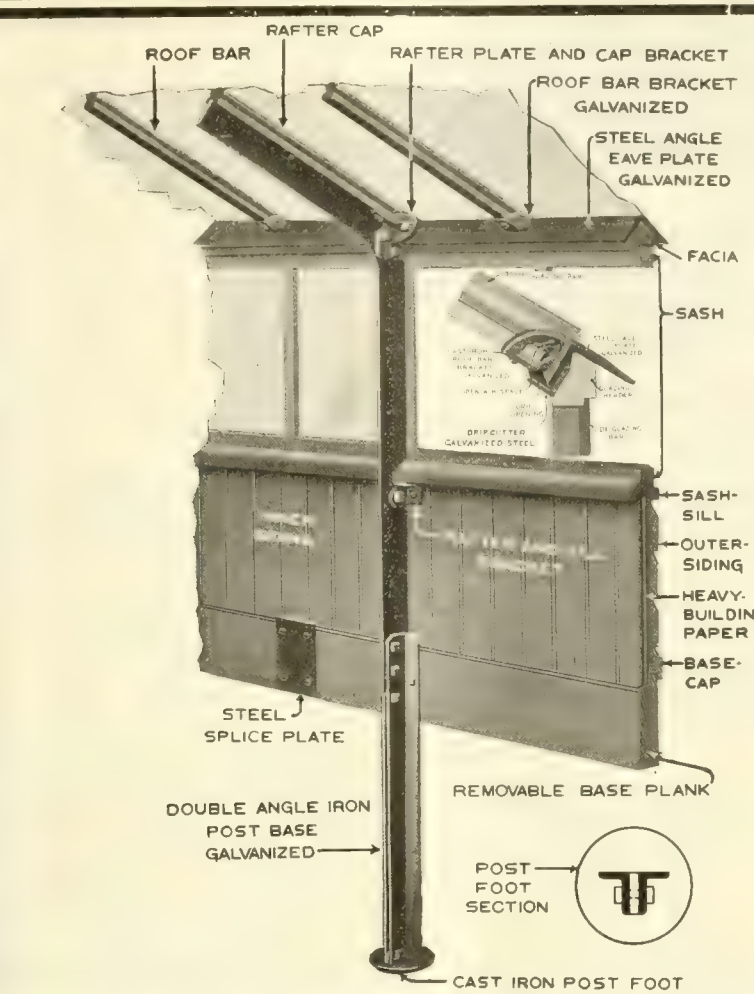
The Peerless Glazing Point is patented. No others like it. Order from your dealer or direct from us.

1000, 75c. postpaid. Samples free.

HENRY A. DREER, 714 Chestnut Street, Philadelphia.



The Early Advertisement Gets There.



Hitchings' iron frame house is made this way at the side. Study it a bit and compare its strong points in your mind, with other constructions built other ways.

Some Thinks

Suppose you were going to buy an automobile tomorrow—would you put your good hard cash into one that had not yet been on the market long enough to prove itself out?

Or would you buy one with a name—one with a record of performances and endurance that answered all your questions beyond all doubt—one with proven facts, not theories, to back it up?

There can be but one answer to that question.

Here then are two more questions:

I. Do you think that one, two or three years are long enough to prove whether a radically new greenhouse construction is enduring? There can also be but one answer to that.

II. Why then take any more risk in buying a greenhouse than an automobile?

Keep in mind the fact that although our Iron Frame construction is right up-to-date in every particular, still it is practically the same solid, dependable, enduring construction that has withstood the storms and strains of over a quarter of a century.

Hitchings' Iron Frame Construction—the construction with a record of not a single blow down in all its years of use—that's the one logical, reasonable, sensible, economical answer to our questions. Answer your answer by getting in touch with us at once and start things moving for that house you are going to put up. An order placed now for delivery first part of next year, we can be working at during the winter, which means we can offer you a bit better price—which means money saved—which in turn means money made—for you. Get busy!

Dept, "N," DETROIT, MICHIGAN

—— Stocks Carrie in——

New York, Chicago, Wichita, Kan., New Orleans, La., Philadelphia, Birmingham, Ala., Memphis, Tenn., Los Angeles, Chatham, Ontario, San Francisco

Omaha, Neb.

Business for the last three weeks has been very brisk and fully up to that of last year if not better. Chrysanthemums are in their glory and sell well. There were many good weddings and coming-out parties which took the chrysanthemums and American Beauties, as well as orchids for corsages and hand bouquets. Roses are now at their best, carnations are getting better every day and more plentiful, violets are still a scarce article. For the last 10 days we have had real winter weather which will have an effect on the prices of flowers. All are looking forward to a big Thanksgiving business.

CLUB MEETING.

The Omaha Florists' Club held its annual election of officers November 16 with the following result:

Paul B. Floth, president.
Chas. Faulkner, vice-president.
Geo. Sorenson, treasurer.
L. Henderson, secretary.
P. Swoboda, W. Adams, H. Meyer, trustees.

The florists made a very fine display of choice chrysanthemums at the club room, especially Chas. Green of Fremont, who showed a light pink W. H. Chadwick of immense size. Mr. Green extended an invitation to club members to visit him at Fremont, which was accepted. After the meeting refreshments were served, and it was decided to have a bowling match the first week in December.

NOTES

Geo. Sorenson of Florence has a new pink carnation which will scale 90 points at least. It is far better than any pink we have up to date. It has a wiry stem, good calax, and is a large flower.

J. C. Vaughan of Chicago was a visitor, coming to attend the wedding of his son, Dr. R. T. Vaughan, who was married to one of Omaha's belles.

J. H. Bath won a $2,000 automobile in a newspaper contest and at the same time a baby boy arrived at his home. Lucky John.

L. Henderson is installing another boiler. This will give him three boilers with plenty of capacity for more houses.

S. R. Faulkner was down town looking over the violets for which he is famous.

P. B. Floth is afraid he won't sell all his chrysanthemums for Thanksgiving.

A. Donaghue has installed two new boilers and says they are working finely.

Hess & Swoboda's two new boilers and Morehead trap work like a clock.

GRIPPE.

Lock the door before the horse is stolen, and insure your glass before it is broken.

Wm. Schlatter & Son, Springfield Mass.

Charleston, S. C.

Business has been very good and, considering that the summer was so terribly dry, the stock is in fair condition.

NOTES.

The recent hurricane inflicted great damage on the C. M. Newman plant. Twenty greenhouses were damaged, the dahlias killed and 20,000 roses injured. He is rebuilding as rapidly as possible. The loss was estimated at $5,000.

Frank W. Kinner has opened a store under the name of the Arcadia Floral Shop.

N.

RED BANK, N. J.—W. W. Kennedy & Son are building a greenhouse 25x165 feet, a boiler and packing house 20x25 feet, and a house 18x75 feet for the storing of bay trees at their nursery on Ridge road, and new boilers will be installed. When completed these will make eight greenhouses in the plant, where there was but one four years ago.

CHICAGO HOUSE WRECKING CO.
35th and Iron Sts., CHICAGO

Nashville, Tenn.

The floral business has had a big boom here the past week and everybody is wearing a broad smile of satisfaction, for all seem to have had a share in the distribution of patronage. The wedding season has opened with a rush and the daily society doings are calling for flowers by the wholesale. Chrysanthemums are in the full flush of their beauty and the florist's stores and windows are in royal array with hundreds of blossoms. The specimen flowers were never better and excellent prices are being realized. The potted plants are abundant, any taste can be suited or any pocketbook conformed to. While there are many thousand flowers on sale the dealers are holding back some of their yellow and white for the great annual football game between Vanderbilt and Sewanee which takes place Thanksgiving day. Many thousand blossoms are used then and the sale of yellow, Vanderbilt's colors, and the white with purple ribbon, is simply phenomenal, for everybody must have one or the other. This is all outside of the regular Thanksgiving call for home and table decorations, which of itself is not small. The Joy Floral Co. say they could cut six thousand blossoms on that day if they have demand for so many. Geny Bros. are a close second and could cut five thousand or more, and Haury & Sons are not to be outdone, and come well up to the other two, to say nothing of the smaller growers who will sell in the market house or at their greenhouses. McIntyre Bros. will be in the running, while Arnold Schmidt, and Allen, from Belmont College, will have a fine lot of blooms this year.

NOTES.

The Joy Floral Co. report a number of large weddings the past week. They have fine chrysanthemums, both blooms and plants, good lily of the valley, plenty of violets, orchids and all kinds of roses of the very best quality.

Geny Bros. have had a fine wedding trade and have filled many large orders. Their chrysanthemums are superb, all the best varieties, and a plentiful supply of potted plants. Violets are coming on in profusion and their carnations are very fine and large. Their roses are blooming in perfection.

The youngest claimants for uptown floral store popularity are not getting left in the demand for flowers but are keeping pace with the others. Haury & Sons have done a fine business since they opened. Their flowers are the equal of any grown in the city. In chrysanthemums, besides the larger varieties, they have in pots many pompons and anemones which they have found very popular. Their carnations are large and fine, and of roses they have a big supply every day. They have a fine growing trade, which from the location of their store in the Tulane Hotel building, is bound to develop largely. M. C. D.

BROOKLYN, N. Y.—The Commissioners of Parks have advertised for bids for the construction of the laboratory and greenhouses of the Brooklyn Botanic Garden.

OFFICERS-ELECT — RICHARD VINCENT, JR., Baltimore, Md., Pres.; AUGUST POEHLMANN, Chicago. Vice-Pres.; JOHN YOUNG, New York, Sec'y; W. F. KASTING, Buffalo, N. Y., Treas. Next meeting at Chicago, August, 1912.

CHRYSANTHEMUM SOCIETY OF AMERICA

Annual convention and exhibition November, 1912. CHARLES H. TOTTY, Madison, N. J., President; C. W. JOHNSON, Morgan Park, Ill., Secretary

AMERICAN ROSE SOCIETY.

Next annual meeting and exhibition at Detroit, Mich., January 10-12 1912. A. FARENWALD Roslyn, Pa., President; PHILIP BRIETMEYER, Detroit, Mich., Vice-President; BENJAMIN HAMMOND Fishkill-on-Hudson, N, Y., Secretary.

THE AMERICAN CARNATION SOCIETY,

Next annual convention and exhibition a Detroit, Mich., January 10-12, 1912. J. A. VALENTINE, Denver, Colo., President; A. F. J. BAUR, Thirty-eighth St. and Rockwood Ave., Indianapolis, Ind., Secretary.

AMREICAN GLADIOLUS SOCIETY.,

Next meeting and exhibition, August, 1912. I. S. HENDRICKSON, Floral Park, N.Y., President L. MERTON GAGE, Orange, Mass., Secretary.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

Next meeting at Boston. Mass., 1912. W. H. DUNN, Kansas City, Mo., Pres.; F. L. MULFORD. Washington, D. C., Sec'y-Treas.

Autumn Poem.

The naked hills lie wanton to the breeze,
The fields are nude, the groves unfrocked.
Bare are the limbs of shameless trees—
No wonder the corn is shocked!

—Anonymous.

SUGGESTIONS FOR THE HOLIDAY TRADE.

Christmas Greens.

The greens for Christmas are a proper part of the florist trade and the procuring of good stock and the arrangement and proper showing of these holiday necessities is attended to early by the wide-awake florist. Too often the handling of this stock is left to the corner grocery or provision store, the proprietor of which procures cheap stock and gets the business because he displays and advertises it, while the florist is backward in letting his customers know that he has the goods and that they are of much better grade than can be procured of his holiday competitor. It is good business to display some of the Christmas greens ten days or two weeks before the holidays and thereby let the trade know that the store or greenhouse will be able to supply the demand. While this may result in a small loss by the drying of these samples, yet the increased sale will more than compensate for this. The sale of Christmas trees can also be made a feature of the holiday trade and a display of them in front of the store and office is certain to attract attention and induce trade.

Laurel.

Next to holly probably more laurel is used than any other green, and in some sections of the country where laurel is plentiful its use exceeds that of holly. Laurel makes by far the most decorative festooning and thousands of yards of this material are draped in stores, residences, halls and churches during the week preceding Christmas. This green is also the most employed in wreaths which can be purchased in all sizes and at all prices. Laurel makes up in wreaths very easily and prettily. The better way is to purchase a single wire wreath frame or if this cannot be obtained handily the ordinary wreath frame can be made into four by cutting out the connecting wires. The sprays of laurel are then bound on to this single wire by a finer wire, the sprays being laid on and the wire passed over the stems in the same manner that festooning is made. If made on the frame, they hold their form when hung much better than those that are bound without any wire or stick to preserve the wreath shape. In decorations where large vases of flowers are arranged a few long sprays of laurel under the flowers gives the arrangement a proper setting and a fine finish. One of the best features of laurel is that it is equally as good outside as in, for the cold has but little effect upon the leaves and it looks as well after repeated freezings and thawings as when first put up.

Holly.

First and foremost of the holiday greens will come the holly, which is closely associated with Christmas, especially with Englishmen and Americans. The holly is said to be very well berried this year and that there will be much more good stock than was obtainable last season, but from present indications the price will be about the same as has prevailed during the last few years. A sample case should be obtained as an early delivery and bunches and made-up work displayed to attract the customer's attention. The balance of the stock can be ordered so as to be received just before the time of delivery and a high grade article to fill the orders will be assured. The uses of holly are many. Much will be sold in bunches for the customers to take home and arrange as their fancy dictates, and these will be hung in the windows and around the rooms of the dwellings. Nice selected sprays should be tied together in different sizes and of different prices for the selection of the buyer. It will surely result in much waste if the open case is at the customer's hands for the branches will be turned over and over and many of the berries broken off, but this can be obviated by having bunches already for delivery or selection. Holly wreaths are always in demand and these should be made of selected pieces with plenty of berries, and if the branches are not

heavily fruited more berries may be wired on. Holly festooning is rarely used, it being much too expensive and the cheaper greens are more often employed. A custom of many dealers is worthy of emulation; short sprays of holly that are well covered with berries are selected and with all boxes of cut flowers, which at this season are mostly presents, one of these sprays is placed on the top of the flowers or neatly tied on the outside of the box with a Christmas red ribbon. This little courtesy of the day is sure to be appreciated.

When the cases of holly are received keep them in a cool place away from all boilers or fire heat. It is far preferable to allow them to be in a freezing temperature than in a warm dry room, but a cool damp cellar is the best location and the leaves will hold their fresh look for many days.

White Pine.

A green that is extensively used in sections of the country where it grows plentifully is the ends of the branches of the white pine. The leaves of this tree are soft and very decorative and the short branches are not only of great value in floral work as a foundation in baskets but can be placed in the pots of plants which are devoid of foliage near the pot in the same manner as boxwood is used. The tips of this tree also make fine wreaths when combined with other greens, and some very attractive arrangements with different sized cones fastened in these wreaths are very popular where they are made and displayed. These wreaths are very unique and are not expensive and as a rule are readily sold to the best class of trade.

Boxwood.

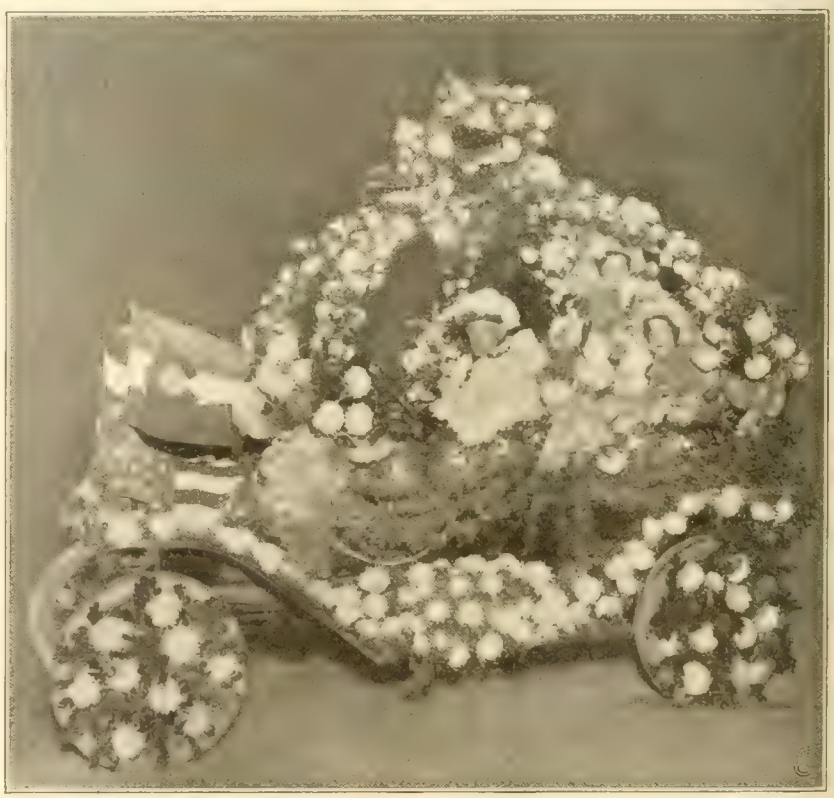
A supply of boxwood has become an actual necessity in all up-to-date florists' establishments doing a retail trade, not only at Christmas but throughout the season. The uses of this beautiful green are many and varied. It makes most beautiful wreaths and these can be arranged either by being bound to a wire or the sprays cut into short lengths and inserted in a frame filled with moss in the same manner that floral work is arranged. This will greatly depend upon where the wreath is to be used. If to be hung in the window it should be of the kind bound on the single wire and made double, that is, both sides finished with the green. Boxwood also makes very showy balls that may be hung from chandeliers, doors or in the windows. A few bunches of red immortelles or winterberries can be placed in these to give the Christmas color. Miniature trees made of boxwood, in the round shape such as globe bay trees, are very decorative and can be used in table decorations or for a table ornament. These as well as the balls are made by making a small round ball of moss and inserting short sprays of boxwood into it. The balls have a wire fastened in the moss by which they are hung and those that represent trees are fastened on the top of a stick with the bark on, the stick being securely placed in a pot. Small sprays are also inserted in moss placed in the small white chinaware and these placed on the table for dinner decorations are very effective. Boxwood can also be used as a green with many flowers where the cut sprays of asparagus are not to be had. Selected sprays are a beautiful green to be used with carnations. Another purpose where boxwood is handy is to place a few sprays in the pot of a plant that has lost its lower foliage, thereby removing the bare look which the plant would otherwise have.

Christmas Trees.

The demand for Christmas trees is increasing every year, and in some sections where they were formerly cut, the woods have been depleted and the gatherers have to go farther back to get what the trade demands. The cedars in many places have been entirely cut out and the greater number of trees now shipped to market are balsam and spruce. The former is the most desired for they have a pleasant odor and are generally of good shape for the purpose of hanging upon them the presents and candles and other ornaments. To successfully handle this trade the dealer should have supports made which will hold the tree erect, for in the cities especially the customer will not have the articles necessary to serve this purpose. Two pieces of three-inch boards about three feet long nailed together, with short pieces on the bottom of the ends of the top piece to make the frame stand level, is a cheap and good arrangement for this purpose. This should be strongly nailed to the base of the tree, and if the tree is large, short pieces of the same sized stock should be nailed from the frame to the trunk. If these are made up in advance it will greatly help the sale of the trees.

Mistletoe.

The sentiment attached to the mistletoe will always cause more or less demand for the sprays at Christmas. While perhaps it should not be classed among the greens, for it is the white berries that make it a salable product, yet it is always associated with the holiday greens. This product must be handled with great care and the cost and loss figured out or it will be found that the profit will be very small. There will always be more or less call for nice sprays of mistletoe for the ancient English custom of hanging the mistletoe and the leading of the young damsel under it and claiming the kiss will always have a place in the Christmas festivities. While the sales of the large bunches will be few for they are necessarily expensive, yet there are many who are willing to pay a good price for nice sprays that are large enough to make a showing in the Christmas decorations that the festivities may be made complete. This stock should be handled carefully and guarded against freezing or the berries will drop off.



AUTOMOBILE DECORATED BY PARK FLORAL CO., DENVER, COLO.

Bouquet Green.

Lycopodium, or as it is otherwise known as bouquet green or ground pine, is again reported this year to be in short supply and that the prices will be high. The wet fall prevented the early gathering of the usual supply, the swamps being full of water and the snows, which fell in the northern sections in November, suddenly terminated the harvest, and as the best quality comes from those sections the quantity placed on the market will be small as compared with some years. When a good harvest of this is obtained it is one of the cheap-

TABLE DECORATION AT THE BOSTON SHOW, NOVEMBER 9-12, 1911.

est greens that the florist receives and is used largely for cheap festooning, and to fill in in floral work. This green is also used in making balls for the same purpose and in the same manner as the boxwood balls, but there will be a necessity of having bunches of red immortelles or winterberries with the lycopodium to give them a nice finish.

Galax and Magnolia Leaves.

These two greens are perhaps not particularly associated with Christmas but they are used extensively at this time as well as at all seasons of the year. There has been a growing custom in many sections of the country of placing some Christmas gift or memento of green or flowers upon the graves of departed relatives, and the galax, magnolia leaves and sprays of leucothoe are used largely for this purpose, wreaths of these being very appropriate and filling the demand. The other greens are also used for this purpose, especially the boxwood and laurel. In making wreaths of galax they should be made very thick and heavy, for freezing weather has a tendency to curl the leaves and if placed outdoors in sections where the weather is apt to be cold, it is well to have leaves enough in the design to cover the frame, for otherwise when the leaves curl the moss can be plainly seen. Magnolia leaves make one of the richest wreaths for this purpose and they are not affected by the weather. Leucothoe is also a very good green for this purpose and if some of the dried flowers and foliage are arranged with this green some beautiful work can be supplied. Statice and wheat are both appropriate for this purpose and add greatly to the appearance.

LA CROSSE, WIS.—The La Crosse Floral Co. made a large and extensive exhibit of finely grown chrysanthemums at the show held in Masonic hall, November 18.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Park Floral Co.'s Automobile.

The automobile which we illustrate was arranged by the Park Floral Co., Denver, Colo., and secured first prize in the parade of November 1 for the best decorated automobile, held under the auspices of the Apple Show or Carnival of Denver.

The arches over the automobile were trimmed with oak foliage and chrysanthemums interspersed with small lights. The wheel guards, wheels and axles were covered with smilax and yellow chrysanthemums. Draperies of smilax and red carnations covered the sides and rear. Baskets of yellow chrysanthemums were placed on the footboards and on top of the arches and bunches of the same flowers tied with huge bows of yellow, satin striped chiffon were placed at the base of the arches. A large piece to represent the seal of Colorado was placed in front of the machine with the American flag over the engine hood. Pennants of the colors of Colorado were also placed in front, on sides and rear. The driver of the machine wore a coat and cap covered with white chrysanthemums trimmed with red, and the two young ladies, Misses Avery Edwards and Leonora Williams, were dressed in floral hats and robes. The whole was very artistically arranged. E. P. N.

Holiday Suggestions.

WREATHS.

Where a very large window is to be ornamented with a single large wreath, one made to suit the size arranged in holly with extra bunches of berries at intervals, can be gracefully attractive by placing in the center of the large wreath, suspended from the inner top, about eight little bells of red immortelles. Also suspend about six from the lower part. These should be of different lengths and attached to red baby ribbons. This, if rightly arranged, makes a rich and most beautiful Christmas window for the fashionable home where novelties are much sought.

This wreath placed in a show window would be a good business inducer. This can also be made of mistletoe, using bells made of red carnations.

The plain red berry wreath, with a shower of mistletoe in the center, falling into pretty clusters of mistletoe berries at the end of each ribbon, is effective.

A Dresden wreath of dainty proportions made of greens can be artistically mounted with a staff through the center, extending above the wreath and made of berries, and the wider top could be arranged with some choice flower if desired, or mistletoe could be placed at the top. This wreath can also be made of red berries and the staff of green with a cluster of carnations at top. The staff, like a distaff, should be daintily made and of slender porportions; a ribbon should finish a most attractive design.

The ivy wreath and also the galax wreath of slender design lend prettily to the suggestions as first described. That is the bell effect. The little bells could also be made of red carnations.

The double circle wreath, that is, two slender wreaths attached at top and lower portion where they are joined by clusters of berries and a pretty bell at the foot between the intersection of the two wreaths can be made very attractive. A three-circle arrangement of this can be fittingly adapted to church decorations.

A. E. KLUNDER.

DETROIT, MICH.—The new flower store of B. Schroeter was formally opened Tuesday, November 13. The store has beautiful furnishings and a large conservatory in the rear full of fine specimens of blooming and decorative plants.

BRIDGEPORT, CONN.—R. H. Hawkins had a window decoration which attracted considerable attention. A miniature foot-ball gridiron was laid containing figures representing the two elevens of Yale and Princeton in their annual battle for supremacy on the foot-ball field just ready for the kick-off.

THE ROSE.

Timing the Crop.

There are several important things to be looked after at this time in order to have things pan out right in midwinter, and to be cutting nice flowers for the holidays one must have strong, well-built-up plants. It is a well-known fact that it doesn't pay to have many cut blooms (or, in other words, heavy crop cutting), during the month of November, when the chrysanthemums have the market corralled. Therefore we always deem it a good idea to do considerable disbudding during the first week in November. Local market conditions in a measure must be considered of course, and many of the growers in small towns handle a fair amount of stock locally, every day, the shippers being the ones usually that are called upon to have an extra amount of flowers for the holidays. In some sections Thanksgiving day furnishes a kind of a clean-up of good stocks; whereas the increase of sales is hardly noticeable in other places. Still we consider it quite a good plan to have a pretty fair cut for Thanksgiving, arranging to have the cut increase gradually until the maximum cut is reached at Christmas.

One is apt to say this sounds all right on paper. Yet with a certain amount of care and watchfulness we can usually control and time a crop with some accuracy. We would suggest to the beginner taking notes and keeping a record of the different work, such as disbudding, planting on certain dates, and (during the whole season) the time required to produce another flower where one has been cut back, and also the time required for the reproduction of a flower from a disbudded stem, etc. As a rule we find it requires from seven to eight weeks to get a crop in for Christmas. From Christmas on it may take nine weeks, in the spring about seven weeks if fairly good weather prevails, and six weeks between crops during the summer months. When cutting the hybrid teas such as the Killarneys, Richmonds, etc., in fact, any variety excepting American Beauty, it is always advisable to have two good eyes on the stem, and it is quite essential that the foliage should be good at the eye below where the bloom has been taken.

From three to five eyes are usually left standing on American Beauties according to the quality of the wood. Some varieties, especially Richmond, being inclined to throw a great many short-stemmed buds can be pinched and made to produce fair flowers on the second and third growth, induced by pinching. We still repeat that there is no set rule for the daily care of the rose, and that much of the work must be left to the judgment of the grower regardless of what others may suggest, owing to various climatic conditions, method of planting, exposure of the houses, and various soils. We can only help or suggest things in a general way, giving little reminders of the different requirements of the rose at stated times throughout the season, and we think any one with a fair amount of intelligence coupled with the determination to succeed, and a love for their work, should (with the combined efforts of the trade papers with many of their columns devoted to cultural notes covering a wide field), succeed.

But to continue our suggestions—from now on all thrifty plants should be watered at least once in 10 days with liquid manure. Fresh cow manure we think preferable to any and all other kinds, and far less liable to injure the plants by over-feeding. We strongly advise against mulching for several reasons during the months of December and January. First, the sun is excluded from the soil when we need all the sunshine possible to help when the evaporation of the soil is greatly reduced,; second, because it makes it a difficult matter for anyone to water evenly. Again, by using manure in liquid form one gets at the economy

Peter Olsem.

Superintendent Chicago Carnation Co.

side of the manure problem. For an exceedingly small outlay of money, considering the time and labor saved, the installation of a three or four-horsepower gasoline pumping outfit will be found a great convenience and it is easily within reach of the small grower. The pipe line used for fresh water can be connected with the pump line, making use of the one line of pipe for both the fresh and the liquid manure water and the installation is comparatively simple. Be sure to have the tank sufficiently large and arranged conveniently for filling and cleaning, the boiler cellar being a good place for the tank, engine, etc., as care should be taken to prevent the water from freezing. Now is the time to remember to build up the plants for the dark days. Therefore avoid a crop by all means, leaving the plants sadly handicapped at the wrong time. E.

Forcing Hybrid Tea Roses.

ED. AMERICAN FLORIST:

Will you kindly inform me if hybrid tea roses should be treated the same as hybrid perpetuals when grown in the greenhouse in the winter?

Massachusetts. A. S.

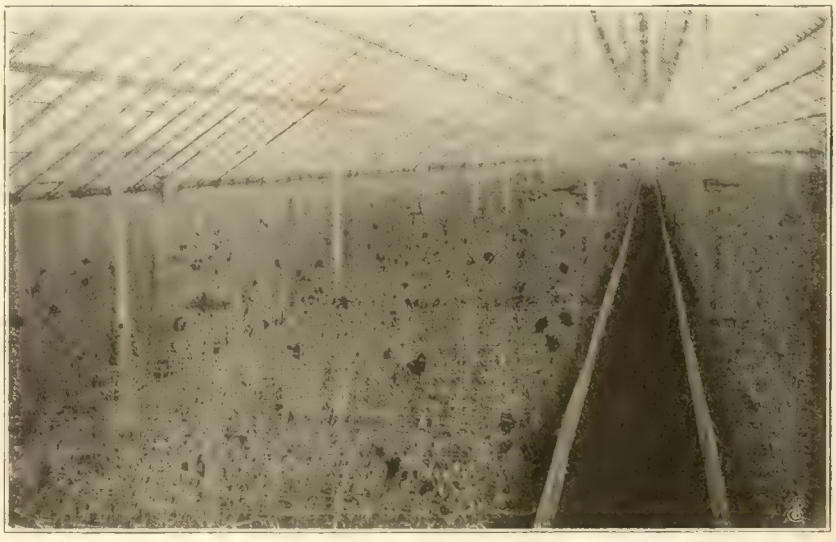
Hybrid tea roses can be forced in the same manner as hybrid perpetuals and they will give a full crop all at once if cut back and treated in this manner. They can also be grown in the same way as the tea roses when they will bloom continuously throughout the season, but will not have many flowers at a time. Many of the commercial roses grown for winter blooming are hybrid teas such as the Killarneys. W.

Roses and Carnations.

ED. AMERICAN FLORIST:

Will you kindly inform me if roses can be grown in the same house with carnations? If so what varieties can be grown? ANXIOUS BEGINNER.

Carnations, to get the best flowers, should be grown in a temperature of 50° at night, but could be grown a little warmer with good results. The commercial varieties of roses, such as Brides, Bridesmaid and Killarney, are generally grown in a night temperature of 58° or 60°. These varieties can be grown in a temperature as low as the carnations, but they will produce but few flowers during the winter and will have to be watered very sparingly. The pink and white Maman Cochets do very well in a cool temperature. Generally speaking, it is not advisable, if the best grade of flowers is desired, to attempt to grow roses and carnations together in the same house. W.



SCARLET SEEDLING CARNATION AT CHICAGO CARNATION CO.'S JOLIET, ILL.

WITH THE GROWERS

Chicago Carnation Co., Joliet, Ill.

No words can describe the quality of stock so well as to have it win premiums after long shipments, and this is what the product of the Chicago Carnation Co. has been doing this fall, being awarded premiums at Springfield, Ill., where almost a clean sweep was scored. At St. Louis, Mo., against the best growers of that section. At Cincinnati where the large growers of the middle west all staged their best blooms and at Milwaukee where the competition was of the closest character. To be able to win first and seconds against such competitors as they have met at these shows is conclusive evidence that the stock is of the finest quality, and that the culture is as high as can be given and a look through the houses of this concern at Joliet, where Peter Olsem holds the directing hand, is proof that this grower is getting the best out of what he has at his command.

In the houses of this concern which comprise two ranges covering 150,000 square feet are growing nearly 200,000 carnation plants of the popular varieties as well as all the novelties of the current year, and also thousands of seedlings of their own production. The Enchantress family are largely represented, White Enchantress being grown in the largest quantity, with Enchantress being the second in number. The varieties with the number of each grown is as follows:

White Enchantress	32,800
Enchantress	14,500
Washington	10,500
White Perfection	9,000
May Day	7,800
Victory	5,000
Pink Delight	5,000
Dorothy Gordon	4,000
White Wonder	3,500
Beacon	3,000
Rose Pink Enchantress	3,000
Scarlet Glow	2,500
Gloriosa, Conquest, Winsor, Princess Charming, Alvina, Afterglow and Shasta, each	1,000
Christmas Cheer, and Bonfire, each	500
Seedlings	12,000

White Enchantress and Enchantress are looking fine and producing large quantities of splendid flowers. White Wonder is showing up exceedingly well, the flowers being of great size and substance and producing a large number of flowers. Pink Delight is proving a great producer and two beds of this variety are of great interest to carnation growers, one in which the plants are now growing for the third year and another the second year. These benches are both full of flowers and the quality is just as good as a bench in the same house planted out this year, and the number of flowers on the old beds far exceeds the younger planting. These plants are partially dried off in June and severely cut back, and after being started are given a heavy mulch. Novelties always make a different showing with every grower until they are fully understood, but in this establishment Washington and White Wonder are producing the best results. This is the home of the former, and the plants are now producing wonderfully and the blooms are of the finest quality. The seedlings are extremely interesting and they are grown in very large numbers. About 15,000 plants were grown from seedlings this year and bloomed in the field, the best selected and planted in the house, and these produced flowers in all the colors known to the carnation. There are many that show great merit both in size and color, but it will take at least two years more trial to fully know their worth. In those being tried the second year are some of very large size and good color which will be given a more extended trial. Of the older seedlings there are some that will no doubt be heard from very soon. A bench of bright scarlet which we illustrate, No. 49, is a great producer and is very early, bearing a full crop for Christmas. The flower is of good size and exceedingly bright in color. No. 186 is another red not so dark as the preceding but a larger flower, and was awarded first premium at Detroit for the best red. This variety blooms early and is a good keeper. It will be disseminated the coming year. No. 150, a light cerise, is an immense flower five inches in diameter and looks very promising. A large variegated, a white penciled with pink, also looks like a coming winner.

A. T. Pyfer.
Manager Chicago Carnation Co.

The propagation and sale of cuttings is a prominent feature of this concern's business and is now in full swing. More than 100,000 cuttings are in the sand at present and the orders for both Washington and White Wonder are being received in good numbers already, many from European buyers are being received, where these two varieties have made a sensation with the growers. The firm is looking forward to an extremely heavy business in rooted cuttings next spring, last year's business being very satisfactory with many complimentary testimonials of the stock sent out.

The product of this establishment is shipped to the Chicago market where it is ably handled by A. T. Pyfer, the manager at 30 E. Randolph street, and the quality of the stock is so high that it readily finds sale upon arrival.

Frank Oechslin, Chicago.

The plant trade for Christmas has grown rapidly and it has been difficult to keep pace with the increased call for both decorative and blooming plants from the retail stores and the holiday shoppers, and the well-known establishment of Frank Oechslin, 4911 Quincy street, Chicago, has been obliged to greatly enlarge their output to meet this ever increasing trade. During the past season six new houses have been erected and these, as well as the large range of older houses, are full of splendid stock to supply much of the demand at this season. These new houses were built of material supplied by the Foley Manufacturing Co. and are of up-to-date construction, containing many of the new features of this firm of greenhouse builders. In these houses are quartered the decorative stock and there are many fine specimens of palms, dracænas, pandanus and ferns ready for the purchaser. Kentias and arecas are of the best salable sizes and in splendid con-

CARNATION PINK DELIGHT AT CHICAGO CARNATION CO.'S, JOLIET, ILL.

dition. Dracaenas are highly colored and fine plants of D. Massangeana were noted and Pandanus Veitchii that would attract attention anywhere by the beautifully variegated foliage. The stock of nephrolepis, both Bostoniensis and many of the sports, showed the finest of culture. The large plants were of superb quality and the smaller sizes were well fitted for house culture. A splendid assortment of rubbers are also grown.

The house of Begonia Gloire de Lorraine was a sight to behold, the plants being finely grown and covered with bloom. Begonia Glory of Cincinnati is beautiful, the flowers being of large size and the large leaves give this plant a most luxuriant appearance. This house was certainly worthy of a long journey to see. Cyclamen are in grand shape, the plants being large and well set with bloom and bud. The colors are varied, from pure white through the white with red tip to the dark crimson, and many of the orange shade were especially attractive. Azaleas are grown in large numbers and splendid plants for the holidays are just showing color and promise to be in excellent condition. All the popular varieties of this season are to be seen and fine specimens of Simon Mardner and Verväeana are just ready to burst forth into full bloom. The pots and pans of poinsettias make a most brilliant showing with their large red bracts almost fully expanded. These are well grown and the foliage is very good. A house of Primula obconica is just coming in flower and some very fine plants will be available for the filling of plant baskets. Thousands of small ferns are now coming on and a fine lot of 4-inch ferns to decorate baskets of plants for the holiday season are ready for this purpose.

The berried and fruited plants occupy a prominent position, especially the Otaheite oranges which were well grown with a goodly number of fruits, just turning their golden hue. Christmas peppers were nicely done and a new variety of pepper, Birdseye, which were covered with their small fruits of the brightest red, are sure to be greatly desired by the retail trade. These plants were of very nice form and the little bright red fruits with which the branches were covered are sure to be attractive features and very popular when presented to the trade. A few very nicely grown chrysanthemum plants are yet left for the late trade, some especially well formed plants of W. H. Lincoln being seen.

The holiday trade has already begun and stock is being shipped out rapidly and the buyers are making their selections, large blocks of stock being seen in several sections with the "sold" card attached. The prospects are for a fine Christmas trade for the stock is all of excellent quality and the demand is for more and more every year.

CHELSEA, MASS.—B. B. Smalley has opened a store at 416 Broadway, near Bellingham square.

FLUSHING, N. Y.—Michael F. Loughham has purchased the greenhouses of A. L. Thorne on Colden avenue.

NEW ROCHELLE, N. Y.—Thieves forced the doors of the greenhouses of Siebrecht & Son during the night of November 22 and stole plants which were valued at $5,000.

Native Trees and Shrubs*.

NATURAL PLANTING.

In the old style gardening we find the arrangement to be formal, but the up-to-date gardener labors for the variety in form and for harmony of the whole. Nothing seems to be easier than to arrange a few trees in the form of a natural and beautiful group, and nothing really is easier to the practiced hand. Yet experience has taught that the average gardener in ornamental planting, almost invariably crowds the trees into a close, regular clump or rows which has a most formal and unsightly appearance, and so much different from the easy, flowing outline of a group of trees or shrubs as they should be planted. Natural groups being formed by trees or shrubs of different distances and sizes, and at different distances from each other, often two or three by a mixture of those of the largest size with others of inferior growth, are full of variety in their outlines and from the same causes no two groups are exactly alike.

Compare the natural or properly planted group of trees with one of the same age and growth, planted nearly at the same distance in a regular form and nearly alike in every respect, you will find the natural groups are full of openings or hollows. Trees advancing before or retiring behind each other, producing a variety of deep shadows and brilliant lights: in walking about them the form changes at every step; new combinations, new lights and shades, new inlets present themselves in succession, and this, of course, cannot be accomplished by one who has never studied along such lines of work.

In many places where new residences are built, or where old ones are to be improved, the grounds will often be found, partially or to a considerable extent, clothed with belts or masses of wood, either previously planted, or preserved from the axe. How easily, if good judgment is used, we may turn these to advantage in the natural style of gardening; and by judicious trimming when too thick, or additions when too much scattered, often produce good effects in the most magical manner.

Planting and grouping to produce the beautiful, fullness and softness of outline, and perfectly luxuriant development is absolutely necessary. This is accomplished by choosing mainly trees of graceful habit and flowing outlines; the after treatment of trees, where the beautiful is aimed at, should be pruning with great care, and indeed scarcely at all, except to remedy disease or to correct a bad form. The luxuriance and development of the trees should be encouraged by good soil, and repeated manurings where the soil is poor.

To produce the natural and picturesque, which is practically the same, the landscape gardener will depend mostly on irregularity. The grouping, therefore, must often be done in the most irregular manner. He will rarely, if ever, use single specimens, as every object should seem to connect itself with something else, and the grouping should be more of the wildness of the finest and most forcible portions of natural woods or forests, planting the trees closely and irregularly. These will grow up into wilder and more striking forms, the outlines will be distinctly different from one another and the limbs sometimes twisted and irregular. The outlines should be intermixed with smaller undergrowth of similar character, flowering shrubs, etc. Sturdy and bright vines such as bittersweet, honeysuckles, clematis, virginia creepers, trumpet vines, all of which should be allowed to clamber over occasional trees in careless manner. The grass should be allowed to grow in a careless and loose state, like that of tangled dells and natural wood. The eye should rest on softly rounded masses of foliage, or single open groups of trees, with finely balanced and graceful heads and branches. A broken or crooked limb, a leaning trunk, or several stems springing from the same base are frequently peculiarities that add to the picturesque. For this reason the gardener desires to encourage a certain wildness of growth, and allows his trees and shrubs to spring up in thickets to assist this effect; he tries to accomplish occasional irregularity of stem and outline, he admires

*Portion of paper read by E. Bollinger, Lake Forest, Ill., before the Illinois State Horticultural Society.

BOSTON FERNS AT FRANK OECHSLIN'S, CHICAGO.

a twisted limb or a moss covered branch or trunk of a tree, and in pruning he therefore is careful to leave precisely what in formal specimens would be the aim to remove; in other words he would direct his mind towards increasing the natural striking and peculiar habit of trees and shrubs. The amateur will easily see that planting, grouping and culture to produce the beautiful and harmonious, require a less artistic eye but more care and attention than performing the same operations to elicit the picturesque and natural effect.

We cannot help but admire a beautiful lawn, a refined and polished landscape garden with all the richness and beauty developed by high culture, we admire the beauty of form, the selection of trees, shrubs and flowers; we admire the graceful curved walks and drives, the silvery waters of the pond, the little winding brooks that sometimes adorn our modern places where water is plentiful, but in the natural landscape garden there is more effect and more striking growth and combinations which we feel is not only work but the work of an artist, one who has not studied nature with an artistical eye and who is not capable of imitating in his plantations the natural in its many variations, should consult those that know. To accomplish the natural we generally look for a comparatively wild or wooded place and I may safely say that if such a place is on hand and if the gardener has the true feeling for his work, he will always find it much easier than if he would strive to produce an ornamental effect, as the majority of the places to be planted for the beautiful must begin nearly anew, choosing places not for wilderness but for openness, sunny plains, planted with more of the formal stately trees and shrubs.

Any person who will take the trouble to reflect for a moment on the great diversity of surface, change of position, aspect views, conditions of soil, residences, public streets, climate, etc., will at once understand how difficult, or, indeed how impossible it is to lay down any fixed or exact rules for arranging plantations of small or extensive estates or parks. What would be adapted to a hilly rolling estate would often be found entirely unfit for adoption in a smooth, level surface and the contrary, but yet the two following principles should be constantly followed and kept in view; namely, the production of the whole landscape and the proper connection of all the different parts or details. In all grounds to be laid out, however, large or small, call for the exercise of good judgment and taste.

The house should be the chief or leading object, should form, if possible, the central point and should be given importance, groups of trees should form the background; and where outbuildings approach the same neighborhood or belong to the same party, should be hidden by planting from the main edifice. I do not mean by that a thick wood should be planted around the building to impede the free circulation of air and shut out the sunlight so necessary for our health, but the object can be easily produced by a comparatively loose plantation of groups of trees and shrubs, so as to give all the effect of a large mass, and will form a screen at once and yet will have a graceful ornamental effect and will give dignity and importance to the house, and all objects not desired kept out of view. A good proportion of evergreens should be used both for the purpose of shelter, richness of color, ornamental effect and sweet healthful aroma. No large growing trees or shrubs should be planted too near the house, as they will make the house damp, small growing evergreens and shrubs I consider preferable. The lawn should approach the house, and its richness of green should be seen from the principal parts of the house.

POINSETTIAS AT FRANK OECHSLIN'S, CHICAGO.

in the lawn appropriate places will be found for a number of trees, single or in small groups, diligent care and study is the principal factor in planting the single as well as the groups of trees and shrubs, and so placed that they will not at some future time interrupt or disturb the finest points of prospect.

Persons who have a small cottage place, a 50 or 100-foot lot, and try with very little expenditure to improve their grounds in a tasteful and pleasing manner, I would advise to use simplicity, plant native trees, a few vines around the porch, and perhaps a few shrubs to hide any possible outbuildings. The rest of the ground should be given to lawn and perhaps to one or two annual flower beds in the front lawn.

The most tasteless and unsatisfactory places are those that are overplanted and those in which without any definite aim everything is attempted. A mixed jumble of discordant forms, forty-seven varieties or more of trees not yet acclimated arranged in one style or another without the least feeling of unity, planting without taste and the improper selection of material. Native trees, shrubs and flowers that have proven to be perfectly hardy beyond doubt should be used only in the small cottage grounds and I would advise to plant such varieties mostly found in your localities. In the parkway or so-called street planting in front of the small suburban lot, in case there are no trees planted at all, use the American White Elm or Sugar Maple if you desire quicker results. Plant the Soft Maple or Carolina Poplar between the elms or maple as a nursing tree, cut them out when they interfere with the permanent trees. Should the parkway be partially planted with trees and only one or two trees are required, plant in harmony with the others; in other words, use the same variety of trees if possible. In the arrangement of large extent of surface where a great many trees are required the variety of plants may be larger and such naturalized foreign trees as the Horse Chestnut, Lombardy Poplar, Ailanthus, Sycamore, Maple, English Elm, Oriental Spruce and Arborvitae, English Jew, Japan Juniper, Normandi Spruce, English Hawthorne, etc. These, however, should not be used as fundamentals. Our American sugar maple is superior in many ways to its European rivals. Compare the White Elm with the European varieties, Huntington Dovie, Superba, etc.; the American variety with its elegant graceful pendulant branches, European upright, stiff, formal. I have no doubt that you have seen streets planted with the European Elm; no doubt you remember the effect. Compare, if you will, an avenue planted with the American White Elm with its branches arching over the street and the European stiff, upright, unattractive. Where large trees and many of them are required for natural planting we should give preference to our American Oaks. The oak grows slow the first five or six years, but after that it grows very rapidly. The oak is one of our most beautiful and useful trees for ornamental planting, and even for street planting. I would recommend it and especially the White Oak, Burr Oak, and Pin Oak.

DEDHAM, MASS.—Adam Kopanus has opened a flower store in the Greenleaf building.

PONTIAC, ILL.—At the thirty-ninth annual session of the Horticultural Society of Central Illinois held here, A. M. Augustine of Normal was elected president.

Broad-Leaved Evergreens in New England.

The general absence of so-called "broad-leaved evergreens" from the gardens of the northeastern United States astonishes European visitors to this country, and their prominence in the gardens of Great Britain, Italy and other temperate parts of Europe often makes American travelers in those countries despondent over the possibility of having really good gardens here; the prominence, too, which has been given in late years here to architecture in garden-making has increased the demand for these broad-leaved evergreens, for they are essential for the decoration of a true architectural garden. This, however, states the Bulletin issued by the Arnold Arboretum, is not a country where many of these plants can be successfully cultivated. The winters are too cold, the leaves give up too much moisture to March winds when the roots are still inactive in frozen soil, and the summers are too hot and dry.

The ilex (Quercus Ilex), the chief ornament in the gardens of Italy, the so-called laurel of English gardens, and the Portuguese Laurel, which are such only in name, being really evergreen cherry trees, the bay and laurestinus, unless cramped in pots, will never be seen in American gardens. This is a region for plants which lose their leaves in the autumn and here many of these plants flourish as in no other part of the world.

The number of broad-leaved evergreens which can really be depended on in eastern Massachusetts is small. The most important are the rhododendrons and the kalmia or laurel. The most successful here of all plants of this class is the broad-leaved laurel, Kalmia latifolia. It is hardier and less particular about soil, and easier to cultivate than even the hardiest rhododendrons, like Rhododendron maximum, Rhododendron catawbiense; and, moreover, it is one of the most beautiful flowering plants in the world. The little native Sheepkill Laurel, Kalmia angustifolia, and the less well known kalmias of northern swamps, K. polifolia and K. microphylla are broad-leaved evergreens also, although these plants are seldom cultivated. The laurels, like the rhododendrons and other plants of the heath family, cannot be grown in soil strongly impregnated with lime, so their use is restricted to a comparatively small part of the country. To the heath family we are indebted for a few other plants of this class. The handsomest of these is Pieris or Andromeda floribunda, a broad low bush with small dark green leaves and abundant conspicuous clusters of dull white flowers. This plant grows naturally on a few of the high mountains of the southern Appalachian region and has long been known in gardens. It is very hardy here and, after the kalmias and rhododendrons, perhaps the most desirable of the broad-leaved evergreens for this region. A Japanese species, Pieris Japonica, which in Japan sometimes attains the size of a small tree, is also hardy, but it blossoms early in the season, and the flowers, which are larger and handsomer than those of the native species, are too often destroyed by frost.

As an under shrub in shady places, for it does not bear exposure to the sun, is another plant of the Alleghanies, Leucothœ Catesbyi, which is perfectly hardy. It has slender arching stems, which grow to the height of several feet and are clothed with large, lustrous, pointed leaves, and the white flowers in axillary clusters are abundant and attractive. To this family, too, belong the wintergreen, or checkerberry, Gaultheria procumbens, and the trailing arbutus or mayflower, Epigæa repens, but these are difficult to cultivate and probably will never take much place in the general garden decoration. More generally useful is another plant of the same family, the bearberry, Arctostaphylos Uva-ursi, which with its long prostrate stems forms a great mat on sandy and gravelly banks in the northern states and in northern Europe. Although rarely cultivated in this country, this is an excellent plant for covering poor soil and just now its bright red fruits make a handsome contrast with the small light green shining leaves.

Interesting, too, among broad-leaved evergreen is Gaylussacia brachycera, the box-leaved huckleberry. This is one of the rarest shrubs of the eastern United States, being found in three stations only, for it is known to grow naturally only in southern Pennsylvania, southern Delaware and in West Virginia. It is found in dry soil in the shade of the forest, spreading over considerable areas by its underground stems. This plant grows only a few inches high, but it is very hardy, adapting itself readily to cultivation, and in the Arboretum grows as well in full exposure to the sun as it does in the shade.

The ledums, or as they are popularly called Labrador tea, are small evergreen plants of the northern hemisphere related to the rhododendrons. Two or three of the species are hardy but difficult to cultivate and require especial care in selected positions; and this is true of two other small evergreen shrubs of the heath family native to eastern America, Leiophyllum buxifolium of the pine barrens from New Jersey southward, and Loiseleuria procumbens of the alpine summits of the White Mountains and northward.

The Old World holly-tree, Ilex aquifolium, which in many forms is often one of the chief ornaments of European gardens, is not hardy here and its American relative, Ilex opaca, a native of the Massachusetts coast and southward, with dull leaves, is a much less beautiful plant. It is, however, the only broad-leaved evergreen which becomes a tree in New England. The inkberry, Ilex glabra, a common shrub in the coast region from Nova Scotia to Texas, where it is found usually in poor soil, is one of the best of the broad-leaved evergreens hardy here, although its small black fruits are nearly covered by the shining foliage. It is more valuable here than the Japanese black-fruited holly, Ilex crenata, although some forms of this plant are fairly hardy here.

The ivy, unless carefully protected, cannot be successfully grown east of Cape Cod, although at Providence, only forty miles from Boston, where the influence of the Gulf Stream is more strongly felt than it is here, the ivy is perfectly hardy; and we have as an evergreen vine only the forms of the climbing Japanese evonymus, Evonymus radicans. These plants are perfectly hardy when once established; they grow rapidly and although not so beautiful a covering for walls as the ivy, they are our only substitute for it. The best form is the var. vegetus which was introduced many years ago into the Arboretum from northern Japan. This form has broader leaves than the others, and flowers and produces its fruit more freely.

The mahonias, or evergreen barberries of our northwestern coast and of Japan and the Himalayas, are not

THE SAN FRANCISCO SHOW.

See Issue of November 18, Page 912.

THE SAN FRANCISCO SHOW.

Exhibit by MacRorie-McLaren Co. See Issue November 18, Page 912.

hardy here except in favorable positions, and cannot be recommended for general cultivation; and of these plants we can depend only on the dwarf species of the Rocky Mountains, Berberis or Mahonia repens. This plant grows only a few inches high and the leaves are lighter green and less lustrous than the better known Oregon grape, Berberis or Mahonia aquifolium.

Two little shrubs of the celastrus family must be included in this list. These are Pachystima myrsinites of the Rocky mountains and Pachystima Canbyi of the mountains of West Virginia. The former is widely distributed and a common plant in its region. It grows to the height of from twelve to eighteen inches and its leaves resemble those of some of the forms of the box. It is, however, less hardy here than its Virginia relative which in the Arboretum forms a broad mass of small leaves only a few inches high and does not suffer from full exposure to the sun.

The different forms of the box-tree of the Orient, Buxus sempervirens, except in exceptional positions, are not hardy in eastern Massachusetts, although west of Cape Cod many of them can be successfully grown, and only the little Japanese species Buxus Japonica seems really hardy here.

This completes the short list of broad-leaved evergreens which can be grown in eastern Massachusetts unless the heather, one or two species of heath, the stemless forms of yucca and the chamædaphne, or leather leaf, can be called broad-leaved evergreens. This last plant, which is common in northern swamps, holds some of its leaves until spring. Although it grows naturally in wet ground, it does well when transferred to drier situations. Among the evergreens might almost be inserted, however, Magnolia glauca. In the south this tree, which grows much larger than it does in the north, retains its leaves until late into the spring, but here they do not lose their beauty and do not fall until December.

Newport Horticultural Society.

An important meeting of the Newport Horticultural Society was held Nov. 14 to consider the proposition of co-operating with the new Garden Association, in holding an outdoor exhibition next June, as was outlined by the association several months ago.

The meeting was opened by President Meikle, who said that J. McLeish, A. M. MacLellan and himself, a committee appointed by the society, had an interesting interview with the officers of the association and were informed that extensive plans were being made to hold a grand display which included many novel features in the way of arrangements. It is anticipated that one of the attractive features will be fancy plantings of shrubs, evergreens and annual and perennial plants in bloom. The show committee will endeavor to induce individuals out of the state as well as those in Rhode Island to aid in the success of the event by making entries in the exhibition. As most of the members of the association are owners of Newport estates, it is expected that the exhibition will be in no small way a society event. The plan of co-operation was received with much enthusiasm by the members and a resolution was unanimously adopted directing the committee representing the society to use their best efforts in support of the movement.

At the close of the session Treasurer Andrew K. McMahon with appropriate remarks presented the silver cups to the several winners at the September show as follows: To John Mahan, gardener for H. D. Auchincloss, the Henry A. Dreer cup for collection of hardy perennial flowers, and the Joseph Breck & Son cup for collection of annuals; to William Gray, the Stumpp & Walter Co. cup for collections of vegetables, and to J. Robertson the Rickards Bros. cup for table decoration.

IN comparing bids on sash, find out whether 1⅜-inch or 1⅞-inch material is used.

ARBOR-VITAE is a good substitute for laurel in festooning in large and lofty decorations.

WE shall be pleased to have reports of the Thanksgiving business from all our readers.

A NEW industry has developed in some sections of the east, the gathering of evergreen boughs which are pressed in bales and shipped into the thickly-settled districts for covering shrubbery and other plants that require protection.

UPPER Michigan men who make a specialty of Christmas trees say that the cut will be heavier than usual this year in view of the large advance orders. One jobber expects his output will be ten carloads. Balsam and spruce are the trees mostly cut.

Personal.

Elmer D. Smith and wife celebrated the twenty fifth anniversary of their marriage November 30.

Important to Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

Chrysanthemum Society of America.

REPORT OF EXAMINING COMMITTEE.

Boston, November 20.—Harvard, crimson, Japanese, scored 87 points commercial scale, 84 points exhibition scale. Exhibited by Elmer D. Smith Co., Adrian, Mich.

The variety exhibited by A. C. Van Gaasbeck, Orange, N. J., at New York November 1 as Seedling No. 1, has been named Helen Van Gaasbeck.

The pompon variety exhibited by Hartje & Elder, Indianapolis, Ind., as No. 59, has been named Fairy Queen.

CHAS. W. JOHNSON, Secy.

Moninger's Catalogues.

The set of catalogues issued by the John C. Moninger Co., 902 Blackhawk street, Chicago, are full of matters of vital interest to florists and in writing for them care should be taken to ask for the right numbers. No. 6 is a book of pipes, valves, fitting and everything for heating, watering systems, etc. No. 7, "The Commercial Greenhouse," all about construction materials. No. 8, "Boiler Catalogue," describing and illustrating their new and wonderful greenhouse heater. These catalogues are all free to any florist who will write and request a copy forwarded to them. In our issue of November 11 the numbers were by error transposed, and we desire to call attention to the correct numbers and respective titles.

Dickens and Scarlet Geraniums.

The Dickens Fellowship, a world-wide organization interested in the adequate observance of the centenary of Charles Dickens' birth, suggests the use of the scarlet geranium as a personal badge and for table and other decoration at functions connected with the centenary. The scarlet geranium was Charles Dickens' own favorite flower, which he grew extensively in his garden at Gadshill. Florists throughout the country may help the centenary and do good business for themselves by having a good supply of scarlet geraniums for the celebration, which will culminate on February 7, 1912, and by announcing the fact to their local committees and to those who will be giving Dickens dinners, dances, etc.

Why Not Tell the Truth?

What can possibly be gained by misinforming the public? The following is from a Kansas paper and quoted as the words of the manager of an establishment: "The last chrysanthemums of the season which will be picked at Christmas are the 'Mrs. Chadwicks' yellow and white. This chrysanthemum curiously was named for Mrs. Cassie Chadwick, who was sent to prison for fraudulently obtaining money from wealthy men. As I understand it the flower was named for her before she had that trouble."

The chrysanthemum is not "Mrs. Chadwick" but W. H. Chadwick and the yellow sport, Golden Chadwick, the former being named in honor of a president of the Horticultural Society of Chicago. By referring to any of the chrysanthemum catalogues, or by reading the trade papers, any grower could easily ascertain that there is no variety of chrysanthemum named "Mrs. Chadwick" and could learn the correct name. It certainly does not help the business to fabricate and holds the profession up to ridicule to promulgate such statements.

Express Controversy Settled.

The tariff and legislative committee of the Society of American Florists are able to announce that in the controversy with the United States Express Co., which has been going on during the past six months, over the inefficient delivery of cut flowers, that the company has acceded to the representations of the committee, and has established a satisfactory and efficient delivery, without an appeal to the Interstate Commerce Commission.

The chairman desires to state that if the florists of the country could only understand the effectiveness of concrete action over individual effort in dealing with corporations, every producer of and dealer in floral products would become a member of the Society of American Florists forthwith.

JOHN G. ESLER, Chairman.

Christmas Trees in Chicago.

The increasing sale of New England cut Christmas trees in Chicago is an interesting matter. Some four years ago the first shipments, about 15 cars, were sold in this market. Last season the trade took about 42 cars, while the estimate for the 1911 season is 65 cars, nearly all the dealers having given up the Wisconsin stock. The Christmas trees shipped from the east here come with a freight charge of only about $90 per car, while the Wisconsin trees, shipped less than one-third of the distance, costs $42 per car. The eastern trees, mostly spruce, are thicker and better shaped, the only objection to them being the fact that in shipments in such large quantities the cutters commence operations too soon and some of the trees if kept too long in a warm place shed their leaves too quickly.

The Late Wellington Hughes.

Wellington Hughes, proprietor of the Hillsdale City Greenhouses, Hillsdale, Mich., died at his home on Hillsdale street November 18, aged 79 years.

Mr. Hughes was born in Utica, N. Y., November 12, 1832, and in 1848 while a young man working at his trade as carpenter and cabinet maker came to Hillsdale, worked on the college buildings and became a student in the college but did not graduate. During the civil war he was placed in charge of a party of bridge builders and returned home after being injured. He then engaged in business as a florist which he followed for more than 40 years. He was a member of Odd Fellows and at his death was the oldest member in the city. In 1861 he married Elizabeth J. Porter who survives him, with their two children, a son and daughter. The funeral was held at his late home November 21 and was attended by a large gathering of friends.

Meetings Next Week.

Albany, N. Y., December 7, 8 p. m.—Albany Florists' Club, 71-73 State street.

Buffalo, N. Y., December 5, 8 p. m.—Buffalo Florists' Club, Columbia Gardens.

Butte, Mont., December 8.—Montana Florists' Club, Columbia Gardens.

Chicago, December 7, 8 p. m.—Chicago Florists' Club, Union Restaurant, 72 West Randolph street.

Dayton, O., December 4, 8 p. m.—Dayton Florists' Club, 37 East Fifth street.

Denver, Colo., December 4.—Colorado Florists' Club, T. M. A. Hall, 1739 Champa street.

Detroit, Mich., December 4, 8 p. m.—Detroit Florists' Club, 112 Farmer street.

Fall River, Mass., December 5, 8 p. m.—Fall River Florists' and Gardeners' Association.

Grand Rapids, Mich., December 4.—Grand Rapids Florists' and Gardeners' Club, office of member.

Hartford, Conn., December 8, 8 p. m.—Connecticut Horticultural Society, County building.

Indianapolis, Ind., December 5, 7:30 p. m.—State Florists' Association of Indiana, State House.

Los Angeles, Calif., December 5.—Los Angeles County Horticultural Society.

Louisville, Ky., December 5, 8 p. m.—Kentucky Society of Florists, Third and Broadway.

Milwaukee, Wis., December 7, 8 p. m.—Milwaukee Florists' Club, St. Charles Hotel, City Hall square.

Montreal, Que., December 4, 7:45 p. m.—Montreal Gardeners' and Florists' Club, Royal Guardians building, 211 Sherbrook street, west.

New Orleans, La., December 6, 8 p. m.—German Gardeners' Club, 624 Common street.

Newport, R. I., December 6.—Newport Horticultural Society.

Philadelphia, Pa., December 5, 8 p. m.—Florists' Club of Philadelphia, Horticultural hall, Broad street above Spruce.

Pittsburg, Pa., December 5, 8 p. m.—Florists' and Gardeners' Club of Pittsburg, Fort Pitt hotel, 10th street and Penn avenue.

Salt Lake City, Utah, December 5.—Salt Lake Florists' Club, Huddart Floral Co., 64 Main street.

Seattle, Wash., December 5.—Seattle Florists' Association, Chamber of Commerce, Second avenue and Columbia street.

St. Paul, Minn., December 5, 8 p. m.—Minnesota State Florists' Association, 510 Snelling avenue, north.

Tacoma, Wash., December 7.—Tacoma Florists' Association, Hotel Tacoma.

Utica, N. Y., December 7, 8 p. m.—Utica Florists' Club, Genesee Hall, Oneida square.

Washington, D. C., December 5, 8 p. m.—Florists' Club of Washington, 1214 F street, n. w.

Wants, For Sale, Etc

One Cent Per Word. Cash with Adv.

For Plant Advs., See Ready Reference Section.

Where answers are to be mailed from this office enclose 10 cents extra to cover postage, etc.

Situation Wanted—Florist. German all-around man wishes position; good references; Chicago preferred. Key 492, care American Florist.

Situation Wanted—Young man wants place as fireman; 17 years experience; good Chicago references. Address Key 504, care American Florist.

Situation Wanted—By first-class orchid grower; long experience in good places; both commercial and private. Address Key 525, care American Florist.

Situation Wanted—By orchid grower; first-class experience; good knowledge of roses, 'mums, carnations, etc.; age 29. Address Key 524, care American Florist.

Situation Wanted—By first class grower of roses, carnations, pot and bedding plants; can give first class references Chicago preferred Key 523, care American Florist.

Situation Wanted—By young lady florist; first-class saleslady; good designer; capable of taking charge; city preferred city references. Address Key 528, care American Florist.

Situation Wanted—Experienced seedsman wishes to make a change; all branches; planting, breeding, growing, cataloguing, packing and selling, farm vegetable and flower seeds Key 520, care American Florist.

Situation Wanted—By first-class florist and plantsman; American, married, strictly sober and reliable; 22 years' experience; A1 grower and propagator, also good designer; eastern states preferred. Address Key 512, care American Florist.

Situation Wanted—By a Scotch gardener and florist; life's practical experience; well up in landscape work, greenhouses, vegetable garden, making up a new place or running a private estate; first class reference in this country and Britain. Key 516, care American Florist.

Situation Wanted—As grower, private or commercial, western states or B. C.; capable of taking charge; design work, good references single age 27, abstainer, disengaged Dec. 3; state wages and full particulars in first letter. E. G. BLAGRAVE, care Frache Bros., Columbia, B. C.

Help Wanted—English speaking gardener; must be single man; private work; vegetable garden and greenhouse; give references. Address Key 514, care American Florist.

Help Wanted—An experienced storeman capable of first-class designing and decorative work; must furnish references and state wages; good position to the right man. FLORIST, 3720 Olive Street, St. Louis, Mo.

For Sale—Five greenhouses cheap on easy terms; net profits $6000 per year. T. A. GETTYS, Amarillo, Texas.

For Sale—A high class, paying floral establishment on Upper Broadway, New York City. J. POST, 5 East 58th St., New York City.

For Sale—Great Falls Floral Co.'s greenhouses and stock. Splendid opening for a hustler with small capital. B. KAPPEL, Great Falls, Montana.

For Sale—Second-hand pipe; a fine lot of pipe and fittings suitable for steam or water lines; send us a list of what you can use and let us quote you. BAUR GAS COMPANY, Eaton, Indiana.

For Sale—Nursery, well established; ½ acre lot, 4 room house, shed, glass, good stock, splendid situation, creek, blue gum trees end of the lot, good business connected; have to sell owing to leaving the country. Cash. Write for particulars; apply WALTER L. BATES, Tennyson Nurseries, 2509 Persimmon St., Fruitvale, Oakland, Alameda Co., Calif.

For Sale—In a nice lively city of about 9,000, a half interest, or will sell all. The only growers of flowers here. Have three greenhouses, 5 000 feet of glass, one dwelling, large cellar, barn and work-rooms; steam heat. Want a man who can take entire charge; married man preferred. Established three years; have good trade. An opportunity for the right one. OVERLAND GARDENS, Laramie, Wyo.

For Sale—10 greenhouses, about 18,000 feet of glass, all new, mostly modern improved business established for 20 years; an 8-room house, barn, 10 acres of land in connection in the town of Rocton on the outskirts of Beloit Wis., about three miles from the post office of Beloit; the only wholesale vegetable plant grower for Beloit market also a shipping trade of 23 surrounding towns; only one greenhouse in Beloit besides ours; population of the town is 18,000; the cause for selling is poor health. J. H. FARNSWORTH, Rockton, Ill.

For Sale

Retail flower store, in a thriving community in western Pennsylvania; store doing a good business and making money; best of reasons for selling; full particulars can be had by addressing

Key 507, care American Florist.

Carnation "Wodenethe"

A Carnation by any other name "might smell as sweet," but it is a fact that very few of them do. The fragrance of **"Wodenethe"** is delightful. It has every other desirable quality, also size, perfect form, purity in color and the calyx positively does not split.

Come and see it growing, then you will also see

BROOKLYN

One of the **finest,** freest blooming Carnations I have ever handled and a "bread and butter Carnation" in every sense of the word.

Price on these two Carnations, **$12.00** per 100; **$100.00** per 1000.

CHAS. H. TOTTY, Madison, N. J.

Los Angeles, Calif.

Regarding the stock on the market there is little to add to our last notes. Chrysanthemums are not quite as plentiful but there are still too many. Up to now the quality of the outdoor stock has been fine but a little roughness is noted already and either rain or high wind will take the quality away and give the greenhouse growers a chance with their late stock. Col. D. Appleton is the best large yellow and Clementine Touset the best white, while for pink Wm. Duckham will most certainly be awarded the palm. Retailers like this fine variety and it is a ready seller. American Beauty rose is in better shape than usual at this time of year, but the other varieties are nothing special. Mrs. Aaron Ward is seen to some extent but as a rule the stems are short to medium only, no really long stemmed stock being available. Carnations are good but several growers have a lot of trouble with a grub that eats the buds before they develop. Orchids are fairly plentiful, Cattleya Trianæ C. labiata and Odontoglossum grande being the principal offerings, with a few flowers of Dendrobium formosum. Lily of the valley has been scarce and high, while the demand for weddings and bouquets has been heavy. Funeral work has been brisk and social affairs are becoming more frequent.

NOTES.

At the monthly meeting of the Los Angeles Horticultural Society, held November 7 at Kruckerbery's hall, there was a good attendance to hear J. J. Reeves, of Beverly, in his address on "Conifers for Southern California." Mr. Reeves has had long experience as a raiser and planter of these interesting trees and his forcible remarks, punctuated with rather stronger invectives than are supposed to be used at pink teas, were listened to with great interest. In the discussion which followed the address many interesting points were brought out and we were taken to Europe and back in fancy by the descriptions given of fine old cedars at various places in the "old country." We would like to give Mr. Reeves' selection of varieties did space permit, but that is impossible. J. Dietrich, Ernest Braunton, Theodore Payne, John Morley, H. R. Richards and others took part in the discussion which went on until after the usual hour of adjournment when the latter proposed a vote of thanks to Mr. Reeves, which was very heartily given, and the meeting adjourned. The portrait in crayon of our first president, O. C. Saakes, was hung in the hall by C. Winsel.

In our last notes we made brief mention of the opening of the Freeman-Lewis store but the opening itself was so much beyond what we expected in this town that it certainly deserves special mention. Chas. Lewis is to be highly congratulated on his opening window which was artistic and good in every particular and free from the crowding that so many retailers here indulge in. The general consensus of opinion seems to be that other Fourth street stores will have to sit up and take notice. The store itself is beautifully fitted and there is ample room. Soft pink silk shades over the electric lights have a very pleasing effect while fancy baskets, hampers and ribbons are tastefully displayed. It is the aim of the partners in this business to carry on a strictly high-class trade and not to handle cheap outdoor stock. Mr. Lewis was a graduate from Smith & Fetters, of Cleveland, O., before coming to this city, so that firms needing any orders carried out in this city can send them here with perfect confidence. Both of these young men have the best wishes of everybody for the success of the undertaking they have started so well.

One of the best wedding orders given in this city for some time was carried out by Wrigfit's Flower Store November 8. The rooms were tastefully decorated in smilax and asparagus with fine yellow and white chrysanthemums. The bride's table was of white roses and lily of the valley, the other tables being decorated with yellow pompon chrysanthemums and Mrs. Aaron Ward roses. The bridesmaids carried muffs of maidenhair fern with a spray of yellow roses and golden ribbon, while the little flower girls' baskets were of Mrs. Aaron Ward roses, the same rose being carried by the maid of honor. The bride's bouquet was a shower of lily of the valley and orchids, her hair ornament being a profuse wreath of orange blossoms hanging low over her shoulders. It was a beautiful affair and reflects great credit on all concerned. The stock is coming in good shape from the greenhouses at Gardena, some excellent American Beauties now being cut.

The store at 337 South Spring street, recently vacated by Mrs. Dolphin, has been reopened under the name of the Alhambra Flower Shop with H. E. Hansen as manager. Mr. Hansen has had considerable experience in the flower business, notably with the Denver Floral Co., Denver Colo.; Kremer, at Salt Lake City, and F. J. Hendershot, at Ogden, Utah.

Everyone in the trade sympathizes with Walter Garbett, of Morris Goldenson's, who is again on the sick list and in hospital. We had all hoped that Walter would have pulled through after the last operation but another has been necessary. Business is good at the store and we noted some elegant American Beauties from Geo. Watson.

At the Los Angeles Flower Market big quantities of chrysanthemums con-

Dreer Special Araucaria Values

POSTPAID TO Any ADDRESS

SAVES MANY TIMES ITS PRICE

THE AMERICAN FLORIST COMPANY'S DIRECTORY saves many times its price to every one who catalogues or circularizes the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor.

Contains 590 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, foreign merchants, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

Published annually by the

American Florist Co.

440 S. Dearborn St. CHICAGO.

tinue to be handled and one order for 70 dozen for one local store was being packed on our last visit. Good stock of roses, carnations and other popular flowers are always on hand here and retailers are evidently beginning to see the advantages of a wholesale market when presided over by a hustler like our genial Charlie Morton, who keeps smiling and busy all the time.

Business is keeping up well at the Redondo Floral Co. and considerable fine funeral work has kept the staff on deck for very long days and well into the nights. Two palls of Killarney roses were among the designs, and besides funerals several wedding orders have been carried out. We noted some magnificent Col. D. Appleton chrysanthemums here.

H. R. R.

Washington.

A LULL IN BUSINESS.

There was something of a lull in the business of the past week but this is usually expected the week before a general holiday like Thanksgiving. The weather has continued generally fair with a moderate temperature. The dealers are looking forward to Thanksgiving with considerable interest for the business it brings will be a fair test for the opening of the season. There are yet many chrysanthemums around the stores but the trade of this week should pretty well clean them up, although there are usually a few that hang on until Christmas. There are plenty of roses, but probably on account of the approach of Thanksgiving, there is a tendency to try and push up the price. We have in the past heard some high sounding orations about ways and means to popularize flowers with the masses but one and the most effective way is seldom mentioned when there are any flowers to sell. That is, at a time when flowers are plentiful at a holiday, to stop trying to bleed the masses by jumping up the price. When flowers are scarce it is another matter, then of necessity they will be high. The plant trade is picking up and in anticipation the retailers are stocking up. In several stores we have noticed fine specimens of J. A. Peterson's Begonia Glory of Cincinnati. Other fine plants noted are crotons and Ficus pandurata from the Robert Craig Co.

NOTES.

The advance guard of the Hollanders has appeared. (For further particulars about the Hollanders, read Motley's History of the Dutch Republic.) Happily for the rest of the world, these Dutchmen have beaten their swords into plough-shares and now grow bulbs—they will tell you so themselves. But they had better watch out. A little bird told us that they send all their best bulbs to Germany and England and send us, that is the great American people, the tailings. What do you think of that?

John H. Lambkin, a landscape gardner, who has been employed at the U. S. Naval Observatory for many years, committed suicide on November 21, by shooting. He was 81 years old. He seems to have been deliberate about the act as he left instructions concerning his burial. He had been a sufferer from rheumatism and heart trouble, but it seems a pity that after weathering the storm and stress of over 80 years, he could not have waited a little longer.

At Geo. H. Cooke's we recently noticed fine specimens of the rose Radiance grown by Geo. Field and he is also sending in a good quality of cattleyas, vandas, cypripediums and other orchids.

Philadelphia Notes.

Robert Craig delivered a lecture on "Progress in Horticulture," one of a course that is being given by the Henry F. Michell Co., in the lecture room of its large store at 518 Market street. Mr. Craig spoke of the history of horticulture from the time he became active in it until the present, reviewing the progress that has been made and promised great things in the years to come. He used to wheel a barrow load of plants to market and was satisfied if he sold out, but now the express companies send their wagons to the greenhouses and haul away carloads at a time. It was the same with the handling of cut flowers which are now sold at prices and in quantities that would have not been thought possible years ago.

H. A. Dreer has also had a very large demand for kentias, but to see the immense collection no one would ever know it. As Mr. Eisele says, we seldom have any vacant space, as something is always waiting for a shift or new importations are crying for room. Phoenix Roebelenii is a favorite here and is seen in all sizes. It is certainly a beautiful palm.

At The Robert Craig Co.'s establishment poinsettias, begonias and cyclamen are fast getting on their showy coats of color. Their stock of these Christmas favorites is in splendid shape.

Joseph Heacock Co. reports an unusually large shipping business in palms to all parts of the country. All the stock is grown in cedar tubs which have many advantages over pots.

Choice sweet peas and a heavy stock of select American Beauty and Killarney roses were prominent features of the Leo Niessen Co.'s stock. They reported many out of town orders.

The Pennock-Meehan Co. were especially strong in Major Bonnaffon chrysanthemums, several of their growers having late houses of this popular variety.

Alfred Campbell is still strong on choice chrysanthemums. W. H. Chadwick, Golden Chadwick and Golden Wedding are seen in perfection.

Berger Bros. handled some very choice single and double violets the past week. The new Princeton rose is also a feature here.

Edward Reid had his large basement full of select blooms, the most of which were gathered together for shipping.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Milwaukee.

Business is fair with plenty of stock to fill all orders with the exception of American Beauties, which were rather scarce. Chrysanthemums are still on the market in quantities, but mostly white, and good yellows are selling readily. There are carnations enough to supply the demand. Lilies are of a fine grade and quality and there is plenty of green stock to fill all orders.

NOTES.

Holton & Hunkel Co. is cutting some fine Killarney roses and report business in all lines as very satisfactory. The shipping business in both plants and flowers holds up very well. The stock is all of fine quality and appreciated by the trade.

M. A. McKenney & Co. report business good. One of their many orders consisted of a casket cover of violets and lily of the valley.

J. M. Fox & Son used large quantities of Killarney roses the past week for numerous receptions and weddings.

Edlefsen-Lediger Co. are still cutting quite a few chrysanthemums which help out considerably.

G. Rusch & Co. are well satisfied with their shipping business as well as their city trade.

C. C. Pollworth Co. is still cutting some fancy chrysanthemums which are selling readily.

W. C. Zimmermann has been very busy the past week with funeral work.

Visitors: F. C. Kesting, West Bend; B. Eschner, Philadelphia, Pa.

VAUGHAN'S SEED STORE
CHICAGO and NEW YORK

Joliet, Ill.

Trade during the fall has been very good, there having been many occasions that called for floral work and there has been much funeral work arranged. The stores and greenhouses all report a satisfactory business with a good supply of seasonable stock. Sunday, November 26, was a busy day for all hands, the funeral of the superintendent of the Joliet Bridge & Iron Works calling for some elaborate designs.

NOTES.

A. C. Rott's commodious store is up-to-date in all particulars, and fully able to accommodate the high class trade of the city. The stock and supplies are of the first quality and a grand fall business has been enjoyed. A table decoration displayed in the window of pompon chrysanthemums with turkey napkins and fittings, was very well arranged and attracted considerable attention.

Joseph Labo and his force of assistants were very busy with funeral work November 26. A large design representing a bridge for the funeral of the superintendent of a bridge and iron company was an elaborate arrangement. The greenhouses were stocked with fine plants, and a very nice grade of carnations was being cut.

The Carter Floral Co. have had a very satisfactory fall business, the stock cleaning up nicely. Plans for spring planting are in progress with a full line of bedding stock already under propagation. Miss May F. Carter, assisted by Henry Weiss, look out for the store work and have built up a flourishing trade.

The Joliet Nurseries have a new perennial dianthus which they have named Joliet. It is dark crimson in colors and they are receiving many complimentary communications regarding it.

Larson & Goranson have enjoyed a very fine fall trade and are producing a nice grade of stock to supply their customers.

Miss Hulda Weiss has charge of the floral department of the Oakwood cemetery.

NATICK, MASS.—Alexander Montgomery, James Wheeler and other florists advocated before the Commercial Club a representation at the hearing before the railroad commissioners in favor of granting freight franchises to the street car lines entering Boston.

Cincinnati.

GOOD SUPPLY TO MEET DEMAND.

In the early part of last week there was an easy market, but toward the middle, owing to the growers beginning to hold stock for Thanksgiving day, especially carnations and chrysanthemums, the market tightened and flowers took a slight advance in price. At the close all lines were selling nicely each day. While there have been rumors and predictions of a general shortage in all lines for Thanksgiving, the indications now are that there will be enough for all orders in everything but American Beauties. Colored carnations and pink roses may also run short, but it cannot be foretold definitely at this date. The supply of these is shorter than the amount of white offered in the same grades. Up to the beginning of this week few local buyers had placed any advance orders, as all seemed to prefer to take a chance on the market at the last minute. The out-of-town florists had their orders in early to be sure that they will be taken care of properly. In chrysanthemums the Major Bonnaffon, White Bonnaffon, W. H. Chadwick, Golden Chadwick, Mrs. Jerome Jones and Thanksgiving Queen are the leaders. Some very good Ivory are among the offerings. The smaller varieties show a very large amount of Diana. While most are good some show that there has been an attempt made to hold them for Thanksgiving, but the grower was forced to cut them before that time. The cut of white carnations is large, while the others, as was noted above, may run short. All the roses are cleaning up quickly. Even the white seems to have come to their own and are selling well. American Beauties of all sizes are scarce and are bringing top prices. Other lines, including double and single violets, lily of the valley, orchids and Longiflorum lilies, are in fair supply and are moving very satisfactorily. Paper White narcissus enjoyed their entree last week, while poinsettias will make their initial bow this week. All lines of greens are in demand with a supply that is fully adequate. Orders are beginning to come in for Christmas decorative material.

NOTES.

P. Weiland is to open a wholesale house at 114 East Third street. He expects to have all ready by December 1.

C. E. Critchell reports a splendid call for Mexican ivy.

Wm. Murphy has engaged quarters on Third street in which to handle his Christmas greens.

Visitor: Martin Reukauf, representing H. Bayersdorfer & Co., Philadelphia. H.

Denver, Colo.

We have enjoyed for the last week what might be called Colorado weather, plenty of sunshine. The result has been more stock of better quality and color. Although the stock has increased, business has kept pace with it and everything is cleaned up at night. Prices do not improve owing to the large crop of chrysanthemums which are sold at low figures to dispose of them, for they do not bring the prices quoted in eastern markets. Everybody's idea seems to be to dispose of them at low prices rather than throw a few away. Extra good quality can be had for $2.00 a dozen while good grades sell at $1.00 and $1.50. Some retailers are selling them at these prices. From present indications there will be plenty to go around for Thanksgiving week. Roses are of good quality and selling well. Carnations are also selling well, while there seems to be a good supply, yet there are none going to waste. Violets are not so plentiful, California stock is being sold on the street but they arrive in poor condition.

NOTES.

The Apple Show held at the Auditorium was the attraction of the week. In the parade on the evening of November 16, the Park Floral Co. were successful in being awarded first prize for the best decorated automobile. The Denver Floral Co. won second. These were the only florists represented. The creditable showing made will be an incentive in the future for others to use natural flowers in the decoration of automobiles.

David Bengley, with the Park Floral Co. for the past four years, has accepted a position with the Elitch-Long Co. as foreman of their plant department.

The Gross Floral Co., at present located at 131 Broadway, expect to be in their new store at 136 Sixteenth street about November 20.

A new store has been opened at 1710 Welton street by Ricketts & McDonald under the name of the Welton Street Floral Co.

Visitors: Ed. Johnson, John Berry, Colorado Springs; N. E. De Golier, Loveland; Carl Espelin, Fort Collins. E. P. N.

WOONSOCKET, R. I.—Miss Ella Mailloux has opened a flower store at 99 Main street.

FRANKLIN, MASS.—M. J. Van Leeuwen has installed a large steam boiler at his greenhouse.

Chicago.

THANKSGIVING TRADE.

The looked for shortage of Thanksgiving stock which had been so freely predicted did not materialize, while on Monday it really seemed as if there would hardly be enough to fill all the orders, yet on Tuesday the stock was rushed into the market in great quantities, especially chrysanthemums and carnations, and it certainly looked at that time that nobody need to fear that their orders would not be filled with anything they might want except American Beauty roses. Chrysanthemums were received by the load and while most of the shipments were of the smaller and medium sized blooms, yet there were large quantities of the large flowers to be had, and the early buyers had an opportunity of making a good selection. The varieties to be seen in largest quantities were W. H. Chadwick, Golden Chadwick, Timothy Eaton, Yellow Eaton, Major Bonnaffon, White Bonnaffon and Dr. Enguehard. There were also some Nagoya, Thanksgiving Queen, December Gem and Golden Wedding. Most of the stock was in very good condition, but there was some that had been kept a little too long. Some Major Bonnaffons that the outer petals were beginning to turn, and Dr. Enguehards that were very light in color. Pompons and anemones were also to be had in large quantities, and they are all known under the former name in the market parlance. Diana was to be seen in quantity, but the anemone Garza was also to be had in beautiful sprays and it was much preferred to Diana. Mrs. Beu, the bronze pompon, is used extensively by all the retailers for the Thanksgiving table decorations. American Beauties of all grades are short of the demand and many of the dealers are having difficulty in filling the early orders that were booked, to say nothing of those that were received later. Richmond was in great supply and of excellent quality, but the shortage of American Beauty made a heavy call for this rose and some of the wholesalers thought that there would not be enough of this rose to fill all the orders. Killarney was received in great quantities, and of all grades the color of most of the stock was excellent, and large shipments of this popular rose were made. My Maryland was in grand shape and was very popular with many of the buyers. Mrs. Jardine and Mrs. Marshall Field were also purchased heavily, for these roses are very beautiful for certain purposes, especially in table decorations, which are in so much demand at this season. There were orders for all the Mrs. Aaron Ward that could be furnished. White Killarney was the principal white to be had and there has been unusual calls for this rose for funerals, so it was meeting with good demand. Carnations were shipped in heavily and of fine quality. Beacon, O. P. Bassett and Victory were eagerly sought and there was a good call for Washington and the other dark pinks. Enchantress was also in great demand. The whites were in large supply and a little bit slow. Violets were of fine quality and the demand was good. Gardenias also received a good call and the supply was fair for this season of the year. Orchids, especially cattleyas, were in good demand and the receipts were small, so the prices were advanced considerably. There were, however, plenty of cypripediums and some splendid stock was offered. Phalænopus and dendrobiums are also shown. Lilies are not received in any great quantities and the demand is small, but callas are quite plentiful. Some splendid lily of the valley is to be had and the supply is about equal to the demand, the prices holding firmly. Sweet peas are improving in quality and the quantity is increasing. They are to be had in white, pink, lavender and purple. Paper White narcissus are very plentiful, there being all that there is call for and at times a little more than are required. Roman hyacinths are also becoming more plentiful. Stevia is offered freely and used in large quantities. Mignonette of fine quality, snapdragon in white and pink, and marguerites, both white and yellow, are staple goods. One of the houses is showing some fine lupins that are quickly taken by the best trade. Poinsettias are being shown by the retailers', but it is a little early, this being particularly a Christmas flower. The supply of greens is good and the quality all that can be asked. The retailers' windows are bright with the Thanksgiving displays and the doors and outside decorated to attract the attention of the public. Many blooming plants are shown which add greatly to the display.

NOTES.

Poehlmann Bros. Co. has leased the second floor of the Yale building, East Randolph street, which they expect to occupy the latter part of this month or the first of January. The present quarters at 32-34-36 East Randolph street are far too small to conveniently handle their rapidly increasing business, and it was for this reason, John Poehlmann said, that the change will be made. The new store, which is large and well lighted, will be equipped to handle and dispose of the large quantities of stock with the least trouble and to the best advantage.

Peter Reinberg

30 E. Randolph St., CHICAGO

Wietor Bros. had their share of the Thanksgiving trade and N. J. Wietor and his force of assistants were kept on the jump filling the many orders that kept coming in. The well-known wholesaler is looking for a banner year for the outlook is bright and the crops of carnations, American Beauty and other roses are in exceptionally fine condition and promise heavy cuts for the Christmas trade.

D. Papatony, junior partner of the Briggs House Florists, slipped and fell while stepping out of the store door Sunday, November 26. He was removed to the Presbyterian hospital, where it was found that he was internally injured. The later reports are that he is improving, but will probably be away from the store for some time.

J. B. Deamud Co. is showing a very fine grade of lupins that find favor with the trade. It is of a most delicate color of pink, just off the white and the spikes are long and strong. The beautiful flowers are used either in vase or basket work and they attract attention wherever placed.

The Raedlein Basket Co. is enjoying a very busy season and is filling a large number of orders for baskets of every description. This firm has met with much success since they opened a store here three years ago and now enjoy both a splendid local and shipping trade.

Lubliner & Trinz's store presents a most pleasing appearance in its new coat of green and pink enamel. Joseph Trinz and Wm. Lubliner are through with jury service and are again waiting on the splendid trade that their firm enjoys.

V. Bezdek, of the Northwestern Floral Co., is able to be about with the use of crutches and is again seen in the greenhouses. Jas. Prenicka is well pleased with the condition of the carnation crops and is looking for heavy cuts for Christmas.

Buchbinder Bros., manufacturers of florists' ice-boxes, are in communication with retailers throughout the country who are contemplating improving their stores by installing one of this firm's latest style refrigerators.

The stock that is arriving at Vaughan & Sperry's store is of fine quality and the kind that makes and keeps customers. Both the local and shipping trade is very good and is continuously increasing.

E. E. Pieser and his storemen, N. P. Miller and Michael Fink, put in a busy week at Kennicott Bros. Co.'s store where large quantities of choice chrysanthemums were sold daily.

Samuel Seligman, "Sprinkleproof Sam," representing Wertheimer Bros., New York, was in the city this week with a fine line of samples and several new stories.

The film manufacturers are butting into the florist business by showing the public in richly colored pictures how easy it is to grow and sell cut flowers.

Vaughan's Seed Store have reshipped large stocks of spirea and lily of the valley this week. There is a little demand as usual for holly for Thanksgiving.

E. C. Amling in speaking for the company which bears his name says that the Thanksgiving trade was very satisfactory and up to its usual standard.

E. H. Hunt is well fixed on baskets, ribbons, holly and other supplies for the holidays and is now prepared to fill all the orders that may come in.

H. Van Gelder, of Percy Jones, is strong on green goods as well as cut flowers and plants and is offering smilax of unsurpassed quality.

Louis Winterson says that the demand for Christmas greens is fair at present, with the outlook very encouraging.

J. A. Budlong is well supplied with all kinds of seasonable stock, especially Richmond roses of fine quality.

Harry Blewitt has recovered from a severe cold and is again making his regular visits to Irving Park.

Wieland & Risch are showing a fine grade of gardenias, daisies, sweet peas, mignonette and poinsettias.

WEITOR BROS.

162 N. Wabash Ave., CHICAGO.

Frank and Mrs. Paszkiet are very grateful to their friends for the many valuable presents received at the wedding which occurred November 22. At the reception held in Miczkiewicz's hall among the guests were noted N. J. Wietor, Gus Alles, William Kidwell, Charles Drissler, William Homberg, H. E. Griffin and Ed Kirsch, who made the trip in Mr. Kidwell's automobile.

The rose cut at the Peter Reinberg range is very heavy now and increasing every day. Richmond is in elegant shape and some extra fine blooms are in the daily receipts at the store. Killarney and Mrs. Marshall Field are also in prime condition. A large crop of carnations is now also forwarded every day.

The Geo. Wittbold Co. will have to either raise the roof of their greenhouses or cut their poinsettias if the plants continue to grow as they have during the past few weeks. The heads are of large size and brilliant in color. The other stock is also in fine condition and is a credit to this well known firm.

The Chicago Flower Growers' Association had a very busy week. The receipts of stock of all kinds was very large and Manager Frese and his corps of assistants were kept on the jump shipping out the stock. They had some of the finest chrysanthemums to be seen on the market.

Fred Lautenschlager says that the boiler business continues to be good and that his firm, Kroeschell Bros. Co., has booked four telegraph orders this week. Butler & Son, of Santa Cruz, Calif., were the latest to join the ranks of this firm's many customers.

George Economopolis was one of the many florists who bought Poehlmann Bros. Co.'s fancy Killarney roses with which to supply his high class trade. The stock was mostly shipped to his store in Des Moines, Ia., where nothing but the best is sold.

Bassett & Washburn are cutting a fancy grade of Rhea Reid and Killarney roses and O. P. Bassett and Enchantress carnations. Trade was very brisk at this house this week and all hands were kept busy filling the orders that were received.

John Kruchten is featuring a fine grade of gardenias which are now arriving in much larger quantities. The roses and carnations are of their usual good quality and some fine blooms of both can be obtained at this house this week.

Canger & Gormley had their share of decorations for social functions this month, having many fine dinners at which the newer and popular roses were freely used, and were the recipients of much praise from their customers.

George Reinberg says that he is again cutting from the Richmond and American Beauty rose houses that were damaged some time ago and that from present indications it looks as if he will have a big cut for Christmas.

The schooner Rouse Simmons, Captain H. Schuenemann, laden with Christmas trees and bouquet greens is moored at the North Clark street bridge where the genial skipper is ready to meet his old customers.

The next meeting of the Florists' Club will be held at the Union Restaurant, 72 West Randolph street, November 30, at 8 p. m. Officers for next year will be nominated at this meeting.

John Zech and his able assistants put in a very busy week at the Zech & Mann store where the trade was so brisk that they hardly had time to go out for lunch.

Hoerber Bros.' carnations are arriving in exceptionally fine condition and are a credit to this enterprising firm and its successful grower.

F. O. Franzen, the Summerdale avenue florist, is using the screens of four moving picture theaters for advertising purposes this month.

Lewis P. Lord, of the Lord Plant Box Co., Minneapolis, Minn., left on November 24, to drum up trade in Boston and New York.

Chas. Zapfe who recently started in the retail business at Fifty-first street and South Park avenue, is enjoying a fine trade.

The Pulverized Manure Co. shipped 20 carloads of Wizard Brand manure to the Athletic baseball park in Philadelphia this week.

Wm. F. Schofield had several large designs for the funeral of Alderman Bauler which was held on Wednesday, November 29.

E. P. Kreimer, of the Duluth Floral Co., Duluth, Minn., was in the city this week buying stock for Thanksgiving trade.

Art Christianson, Paul Blome & Co.'s popular young store man, is making frequent Sunday trips to Joliet. Wonder why?

Chas. W. McKellar is the recipient of a fine assortment of orchids which are selling fast and bringing fancy prices.

Peter Sgoros says that he is going to build a store on his property on West Harrison street in the spring.

F. Weissgerber is making many improvements to his residence on North Hamilton avenue.

Edw. Amerpohl, of Janesville, Wis., was a welcome visitor this week.

Mrs. Fred Sperry leaves for Florida this week.

We make these a specialty. Can supply them all the Year. Once tried you will have no other

Mrs. A. Guillaume and son, of La Crosse, Wis., were seen in one of the large automobile salesrooms of this city this week inspecting one of the latest model touring cars.

Miss Pearson, Vaughan & Sperry's efficient stenographer, celebrated her nineteenth birthday with a party at her home on Sunday, November 27.

B. Eldredge, of Belvidere, died suddenly of heart disease at the Great Northern hotel, Tuesday night, November 28.

Visitors: H. A. Fischer, Kalamazoo, Mich.; Theo. Miller, St. Louis, Mo.; —Herbert, Atco, New Jersey.

Chicago Bowling.

The bowling tournament for the championship of the city opens at Bensinger's new alleys, 29 West Randolph street, Friday, December 1. At 10 o'clock p. m. on the opening day the Orchids and Carnations meet in the contest on the third floor, representing two five-men teams of the florist league. A. Zech and J. Zech and J. Foerster and J. Huebner are scheduled to bowl at 7 p. m. Sunday, on alleys 17-18-19-20 on the fourth floor and at 9 p. m. J. Byers and C. Hendricksen in the two-men teams. The following individuals will bowl at 8 p. m. on the respective alleys: A. Zech and J. Zech, 11-12, and J. Foerster, 13-14. At 10 p. m. J. Byers and C. Hendricksen, 13-14.

On Wednesday evening, November 25, the Carnations and Roses won two and lost one game to their opponents, the Orchids and Violets.

The following table shows the number of games won and lost by each team to date:

	Won	Lost		Won	Lost
Orchids	18	6	Violets	11	13
Roses	12	12	Carnations	7	17

St. Louis.

BRIGHT WEATHER AND GOOD BUSINESS.

The weather has been clear and bright and trade has been fairly good. Chrysanthemums have been in large supply, but they are beginning to shorten up and the indications are that Thanksgiving will clean them up. American Beauties are scarce and the prices on carnations and violets has advanced. White lilac and Paper White narcissus are selling well. The demand for all greens is good. Asparagus, smilax and Mexican ivy find ready sale. The retailers are preparing for Christmas both in decorations and plants.

NOTES.

Grimm & Gorly disposed of several hundred yellow chrysanthemums for the University of Columbia football game and Vincent Gorly was one of the spectators. They also received an order from the St. Louis National League Baseball club for the funeral of Wm. H. Russell, president of the Boston club, in New York. Charles Smith, formerly with Edwin Denker, St. Charles, Mo., is now manager at the greenhouses.

Ludwig Zimmer has a good trade at the Biddle market where has has been located for some years. He closes his business during the summer months and this year made a trip to Europe.

Charles Freshman opened his store in the Planters hotel November 25. He is a hustling worker and all wish him success.

The Florists' Union meets every Monday. Business of importance is expected to be presented at the next meeting.

The W. C. Smith Wholesale Floral Co. are showing fine violets, chrysanthemums and roses.

C. A. Kuehn is receiving splendid lily of the valley and a fine grade of roses.

The Bronsman Floral Co. has opened a store at 4243 Easton avenue.

Otto Sanders made a special display of W. J. Pilcher's violets.

H. G. Berning had a large shipping trade the last week. W. F.

Pittsburg.

PLENTY OF STOCK FOR THANKSGIVING.

We can see the end of the chrysanthemum season, which is in very plain sight. All the smaller grades are now scarce. Some of the late Timothy Eatons, Mlle. Jeannie Nonins, Dr. Enguehards and Major Bonnaffons of fine quality are still with us in quantity. Paper White narcissus, Roman hyacinths and stevia are arriving in quantity. Lilies are moving very slowly. Violets are more plentiful and a good quantity is promised for Thanksgiving day.

NOTES.

Raymond J. Daschbach has purchased the business of Karl Klinke in the Jenkins Arcade, taking possession November 27. Mr. Daschbach is very well known in the trade and should make a success at this location. Murray McGrew will be his assistant.

E. J. McCallum is passing out the cigars in pairs because of the arrival November 21 of twin boys. Both mother and babes are doing finely.

Chas. Peterson of E. Liverpool, O., and H. Glenn Fleming of Fairmont, W. Va., expect to spend the winter in the south.

John Martin of McCallum Co. has returned from a short visit among the out-of-town trade.

L. J. Rowe, Titusville, has opened a very fine store in the business section of that town. J.

Providence, R. I.

The annual meeting of the Florists' and Gardeners' Club of Rhode Island was held in Swarts' Lodge rooms November 20 with a good attendance and President Robert Johnston in the chair. The reports of the officers and committees showed the organization to be in a satisfactory and flourishing condition. The committee on co-operation with the Rhode Island Horticultural Society reported that they had assisted at the recent fall exhibition with much success. O. H. Williams of Johnston and John Marshall, North Providence, were elected to membership. It was decided to hold a banquet and E. A. Appleton, Alexander Macrae and Michael Sweeny were appointed a committee to make the necessary arrangements and report at the next meeting.

The election of officers for the coming year resulted as follows:

E. A. Appleton, president.
Cornelius Hartstra, vice-president.
James Hockey, treasurer.
William E. Chappell, secretary.
H. C. Neubrand, Cornelius Hartstra and James Dillon, trustees.
Henry C. Bout, librarian. C.

King Construction Co.'s New Device.

MAKES BATTLESHIPS UNSINKABLE.

The King Construction Co. held a successful test on the battleship North Carolina in New York October 31 of their compressed air system for preventing the sinking of disabled vessels. The air is forced into the damaged compartment with pressure enough to expel the water. The new battleship Utah is to be equipped with this device and it will make the vessel practically unsinkable.

STOCK IMPROVED—PRICES HIGHER.

The feature of the week was the football game between the Army and Navy, this annual event always brings to town a large number of society folks, who are entertained by the resident leaders of the exclusive circles and this calls for a number of more or less elaborate dinner decorations, which in addition to the flowers worn at the game, kept the surplus down to the minimum. Violets were in good demand, but the greed of the growers or the dealers or both, boosted the prices until the public refused to buy; $1.50 per hundred was asked for both double and single fancy stock and pretty much all that came in was held as fancy. The usual result followed as there was plenty offered of the very best at $1.00 later in the day. The quality of the rose stock in all varieties is much improved since the cold weather set in and some fine flowers are seen, with some of the fancy Killarney and other select varieties, selling as high as $15 per hundred. Mrs. Aaron Ward, Prince de Bulgarie, and Melody are selling well, they being much in demand for debutante lunches. The chrysanthemum is still in evidence. W. H. Chadwick, Golden Chadwick, Mlle. Jeanne Nonin, Major Bonnaffon and Golden Wedding are leaders. It looks as if there would be plenty for Thanksgiving, although some of the growers who supply large quantities, like W. K. Harris, are entirely cut out. The chrysanthemum growers generally say they have had a fairly good season, the later varieties going better than the early sorts, which at one time were a little too plentiful. Sweetpeas are seen in several shades and with longer stems, they will be a factor in the business from now on, being a pretty handful at a moderate price. Double and single violets are getting into winter form and are meeting with good sale. Cattleyas are held very high, nothing good under 75c each, which is about the figure at any time. Storemen report a good demand for houseplants, everybody apparently getting the house in order for the Thanksgiving gathering. The wholesale men report good out of town orders for Thanksgiving, chrysanthemums, roses, carnations and violets being in very good demand.

MARKET IMPROVING.

The wholesale cut flower market continues to show signs of improvement. The supply of chrysanthemums is shortening up and prices are somewhat better for the smaller grades. The high class blooms are still bringing good prices and clearing out well. Carnations are not plentiful and of good quality with prices unchanged. Violets are in sufficient supply for the demand. Gardenias are of much better quality with prices about the same. Sweet peas are more plentiful and of fine quality, with only a fair demand. Lily of the valley is meeting with ready sale, but the prices do not vary very much from week to week. Lilies are not doing as well and even the best are accumulating with all the dealers. The same can be said of Paper White narcissus. Roman hyacinths are arriving in limited quantities and are disposed of quickly. In orchids, cattleyas are scarce and have reached the highest prices of the season, for there are not enough to supply the demand. Cypripediums are selling slowly at their usual price, which seems to remain stationary. Dendrobiums and oncidiums are not going well. American Beauties have dropped in price, but the quality has much improved and the shipments are much heavier. Top grades of Mme. Chatenay, Lady Hillingdon, Radiance, Prince de Bulgarie and Richmond are always in demand and the prices obtained are good, but the same cannot be said of Brides and Bridesmaids; the top grades of these two varieties are only moved with the greatest difficulty. Killarneys are doing somewhat better. Mrs. Aaron Ward is also much called for, as are the choice blooms of My Maryland. There is the usual quantity of mignonette, bouvardia and daisies in the market. Lilac is very much better in quality, but meets with only fair demand. Smilax of extra fine quality is going much better, but the market is still overstocked with greens of all kinds of inferior quality, though the Florida asparagus has improved very much in the past few days.

NOTES.

A very serious explosion on the west side Thursday raised havoc with the stores in that vicinity. The show windows and cases of Ed. Grunewald at Seventy-second street and Columbus avenue were completely demolished and the front of Dard's store in Seventy-second street near Columbus avenue was blown out and the store badly wrecked. The accident was caused by workingmen thawing out sticks of dynamite on a small stove.

There was a reunion of some of the original members of the New York Gardeners' Society on Friday evening, November 24, and it was decided to have a dinner about December 19, and if the affair was successful the occasion would be made an annual event. Joseph A. Manda, Wm. E. Marshall and James I. Donlan were appointed a committee to make arrangements.

A few days ago the large automobile van of C. C. Trepel, who has charge of the flower department at Loeser's in Brooklyn, while on a trip to Robt. Craig Co., Philadelphia, for a load of palms, caught fire and was completely destroyed. The accident occurred near the greenhouses of Henry George on Staten Island. The loss was $6,000.

Wm. P. Ford, who has one of the best locations in Twenty-eighth street, being near Broadway, has been extremely busy of late. The roses and carnations handled by Mr. Ford are of very fine quality, but the American Beauties are especially fine and are disposed of quickly.

Even at this early date many are making arrangements to attend the convention and exhibition of the American Rose Society and the American Carnation Society to be held in Detroit January 10 and the outlook is that there will be enough delegates to fill two cars.

Chas. H. Totty is making shipments of the new rose Sunburst to Henshaw & Fenrich, and though they are short stemmed they are already in great demand and sell on sight. C. F. Bertanzel, Roslyn, is also making shipments of fine chrysanthemums to this firm.

Grover E. Asmus, son of the late E. G. Asmus, West Hoboken, N. J., surprised his friends November 6 by going for a walk with Miss Johanna L. Berhold and returning as man and wife. The couple are now in Atlantic City on a wedding trip.

While chrysanthemums are gradually getting on the wane, Traendly & Schenck are still receiving blooms of the best quality and this firm is also fortunate in having a fine supply of orchids at this time.

Edward Slattery, for many years with Thorley, but now with W. J. Palmer & Son, Buffalo, has been in town several days visiting friends and looking up novelties for Christmas.

Jacob Hauck of Bloomfield, N. J., is shipping choice chrysanthemums to J. K. Allen. Mr. Allen is also receiving large shipments of bulb stock from A. V. D. Snyder, Ridgewood, N. J.

Fredk. W. Smyth, who was in the Eye and Ear hospital several days for an operation caused by an ulcerated tooth, has returned to business completely recovered.

E. W. Holt, representing the Revere Rubber Co., will attend the exhibition of the Maryland State Horticultural Society in Baltimore during the present week.

President-elect R. Vincent Jr. of the S. A. F. is to be with us this week.

Friday night at the bowling alleys was made more interesting as the two high scores in two games won 15-pound turkeys. The winners were Capt. Chadwick and Jos. Fenrich. John Everitt, Alec Mackenzie and Wm. Scott were visitors at the alleys and took part in the earlier games. The scores for the evening were:

Chadwick	246	200	188	Young	163	132	146
Rickards	131	132	162	Moltz	123	135	112
Scott	99	141	142	Holt	127	113	148
Manda	110	165	143	Nugent	91	134	
Fenrich	198	160	223	Marshall	168	140	
Kakuda	149	163	108				

Y.

Boston.

FOOTBALL GAME CAUSES DEMAND.

"All quiet along the Charles" was the word up till the end of the week, when the Harvard-Yale football game brought an influx of visitors and a consequent call for more flowers. Dinners and parties were quite prevalent, and of course they had that chic style which marks all college blowouts, and there was a good call for flowers both Friday and Saturday. According to the press the hotels were overflowing with transients for the game. Red and blue were the colors most in demand. Carnations of the red varieties were not any too plentiful. John Barr of Natick had as good a lot of red carnations as came to the city and these were picked up as soon as they reached the market. All are looking expectantly towards Thanksgiving, but there will not be any scarcity, we believe, of material, and that day being the opening gun of the festal season, all are looking forward to things getting down to a somewhat business basis. Carnations and roses are still keeping up as to quality, but some of the growers of both say their plants are off crop. The lack of these flowers will be offset by the chrysanthemums and many expect this will be the finishing day of the Autumn Queen.

NOTES.

A notable gathering occurred at the State House Friday, November 24, before the Railroad Commissioners, in favor of express delivery by electric railways. It was one of the best representations of business men of all classes we ever had the pleasure to attend. The attorneys for the electric roads made nice speeches, but they paled before that of the prominent business men from all over the state, who came to tell what Boston needed in the way of express on the trolley lines. Presidents of commercial and business men's clubs, mayors and others told what was needed to extend the business of their particular section. There are trolley roads north and south of Boston and the connecting link or key to success of all is the Boston Elevated system, and the voice of all was that the wishes of the people be granted. This has been before the legislature twice and both times has been turned down, and the hearing before the above commission was the result. We saw some of our prominent florists in the assemblage and wondered why the two clubs that are so interested in horticultural matters did not send a representative to plead for the florists. P. Welch was the only wholesaler we noticed there. The florists will benefit by this class of express, as there are many on the lines of electric railroads who are far from steam railways. Taking time, lower rates, etc., into consideration, it may be expected much will be saved.

A call at Welch Bros.' store found that they had rearranged their basement on a basis for quick handling, and yet on a plan which shows off the goods to the best advantage. Buyers can see at a glance what they want and it will be a saving of time both for the house and those who trade there. They have made an importation of baskets of special design with tin receptacles for holding flowers. The completeness in the supply line would be difficult to describe, but a glance at the different counters gives the buyer an easy way to make his choice. The box companies they represent are Hummell & Downing, Sefton Mfg. Co. and Bangor Box Co.

VAUGHAN'S SEED STORE

CHICAGO and NEW YORK

HOLLY-HOLLY-HOLLY

I have just returned from a two weeks' trip through the Holly sections of Delaware, Maryland and Virginia, and have contracted for my supply for the season of 1911. I expect to have several cars of very fine, dark green, well berried Swamp Holly. I will have it packed as usual in regular size cases, 2x2x4, and guaranteed as represented. My first car will arrive in Philadelphia about December 1st. I filled all orders received last year and gave entire satisfaction, and hope to do so again this season. My price this year on orders received up to December 1st is **$3.00 per case.** After that date, at market price, which I am quite sure will be higher on account of scarcity.

HOLLY WREATHS

My Holly Wreaths will be made of the very finest selected dark green Holly on 10-inch hoops, and will be well berried. $10.00, $12.50 and $15.00 per 100, according to quality.

LAUREL WREATHING

My Laurel Wreathing will be made of the brightest Swamp Laurel that it is possible to secure, in 50-yard lengths. Prtce. 2½c and 3c per yard.

MISTLETOE

My Mistletoe, from North Carolina, will be extra selected and full of berries. Per case, $3.50 to $5.00 according to quality.

LYCOPODIUM, in 10-yd. rolls, 5c to 8c per yd.

I make a specialty of the above and guarantee all goods as represented or money refunded. **Cash must accompany all orders.**

F. B. WOOLEY, 152 Dock St., Reference: 6th National Bank, Mutual Trust Co. **Philadelphia, Pa.**

To FLORISTS and DECORATORS

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H. Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice-President; C. E. Kendel, Cleveland O., Secretary and Treasurer.

Next annual convention, June, 1912.

MINNEAPOLIS, MINN.—J. E. Northrup and family left November 29 for California to winter near Los Angeles.

J. W. EDMUNDSON, of Braslan Seed Growers Co., San Jose, Calif., started on his annual contracting trip November 25.

C. C. MORSE & CO., of California, are showing some of their products in a special railway car from that state which is in Chicago this week on a general eastern states trip.

HOLLY breaking has begun both west and east. Much depends on the weather, freedom from storms, severe cold and the like, as to whether we shall see a glut or high prices.

BOUQUET GREEN prices have had a wide variation this week, no well fixed market existing. Holders are asking from $7.50 to $10 and even $12.50 per 100 pounds, depending on the outlook as the different individuals regard it. There is hardly likely to be any surplus though the western supply is more generally distributed than usual.

CHICAGO.—Prices on the Board of Trade, November 29, for grass seed were noted as follows: Timothy, $13.50 to $15.50 per 100 pounds.—South Water street dealers in Christmas greens are selling 20-yard coils of evergreen wreathing at 60 cents to 75 cents per coil, according to quality.—Potato prices have stiffened the past ten days, partly owing to frost damage.

Enjoyed the Bulbs.

"This beautiful weather," said James Wilson, the secretary of agriculture, at a luncheon in Washington, "sends one, in thought at least, back to the farm."

Mr. Wilson smiled.

"I heard of a farm the other day," he said, "to which a certain congressman sent a gift of rare lily bulbs from the department. The farmer's wife acknowledged the gift thus:

"'Dear Sir: Thank you for the particularly fine onions, which were greatly enjoyed with last evening's steak.'"—Washington Star.

The Pea Situation.

FROM A GROWER'S STANDPOINT.

I think my competitive growers will agree with me when I make the statement that the growing of garden peas under contract, for both the seed and canning trade, has ceased to be a profitable business for several years past. This, however, is due largely to short crops which have been curtailed by the method under which the grower has been obliged to operate. If the dealer had been willing to pay a sufficient price that would enable the grower to produce his peas under cultivation, conditions might have been far different to the present situation. It is not to be expected that farmers will cultivate their crops of peas unless they are paid a fair compensation for doing so. Therefore, it seems to me that if we are to have better conditions, it is right square up to the dealer to say whether he is willing to pay more for a better article or whether he is willing to continue as in the past, satisfied with inferior stock and very uncertain deliveries. As a grower I may say that it is only such stocks as were grown under cultivation that yielded any peas to speak of the past two seasons, while those broadcast yielded but little more than the seed planted, and in many instances less. Consequently the grower is obliged to charge off big losses for stock seeds lost. It seems we have all been living too much on hope, only to be doomed to disappointments and heavy losses. How long the grower can continue to do business on the old lines, it seems to me, depends largely upon the size of his bank account. Would it not be to the dealers' and consumers' advantage if we change the present method of growing seed peas by producing peas of high quality? This can be done if the stock is grown under a proper state of cultivation and while the dealer will have to pay a little more, is it not worth while? The present prices at which peas are being held for prompt shipment seems abnormally high, and yet when the crop situation is taken into consideration, they are not high. If the majority of the farmers in Wisconsin and Michigan, which are the two largest pea growing states, had received $10 per bushel for their crops of peas the past season, they would not be receiving as much for the use of their lands as if they had planted almost any other crop, even including hay. It therefore behooves the trade to make it possible for the pea grower to educate the farmer to cultivate his peas and thus continue the industry, otherwise some of us will have to go out of business, as far as producing peas in Michigan and Wisconsin is concerned.

PEA-GROWER.

["Pea-grower" wishes to see the views of other pea-growers expressed in these columns. Ed.]

Insect Powder.

By the decision of the Insecticide and Fungicide Board, issued August 26, 1911, the term insect powder, when used without qualification, means an insecticide made from the powdered flower heads of the following species of chrysanthemums: Chrysanthemum (pyrethrum) cinerariaefolium, Chrysanthemum (pyrethrum) roseum, and Chrysanthemum Marshallii Aschers. Insect powder, unqualified, cannot be properly applied to an article which consists in whole or in part of insect flower stems. The use of the powdered stems would constitute an adulteration under the law. Insect powders made of any other substance shall be qualified, such as hellebore insect powder or tobacco insect powder, according to the ingredient from which it is made.

Tarrytown Horticultural Society.

The regular meeting of the Tarrytown Horticultural Society was held on Friday evening, November 17. President Brunger occupied the chair and there was a good attendance. Two honorary members were elected and two applications for membership received. The competition in roses for the prize offered by John Brunger was close and a number of fine vases were shown. The prize was awarded to John Elliot, with a vase of My Maryland. A cultural certificate was awarded to Edward Threthewey for a vase of Wells' Late Pink chrysanthemums. Messrs. Scott, Brewer and Jamieson acted as judges. J. W. Smith was accorded a rising vote of thanks for the capable manner in which he had performed his duties as manager of the fall show. The next meeting will be carnation night. G. M.

TORONTO, ONT.—The parks committee has decided to purchase 11½ acres extending from Davenport road to St. Claire avenue west of Oakland avenue for park purposes. Profanity in the parks was discussed and the police instructed to watch persons addicted to its use.

ANNOUNCEMENT.

New Rose Sunburst

Color, orange and gold, very intense. **Bud** incredibly long---pointed and plump---opening into a **Big Rose. Stems** always stiff and long. A great **keeper.** In a **class** by itself. Raised by M. Pernet-Ducher from whom we bought the American rights. In order that Eastern growers might see the variety under culture, we made arrangements with Mr. Charles H. Totty, of Madison, N. J., to grow part of our stock.

It will be **disseminated** in America on March 1, by C. H. Totty and The E. G. Hill Co., and on the same date in Europe by M. Pernet-Ducher.

PRICE—$30.00 per 100; $250.00 per 1000, for own root.
$5.00 per 100 additional for grafts.

The rose has already made a splendid record both in this country and abroad. On our own place, in addition to all its other good points, it has made fine quality, blooming plants in less time than any variety that we have ever planted in the bench.

Cucumber and Melon Wilt.

ED. AMERICAN FLORIST:

Some time ago I noticed an article in the Market Gardeners' column of your valuable publication regarding the wilt of cucumbers. This is a very important subject to quite a number of growers in this vicinity, as it does much harm every season, chiefly under glass in late spring. The article in question stated that the trouble was caused by a small worm at the base of the plant and that by putting tobacco dust or lime at base of plant it could be prevented as the damage was all done at that point. With the growers here there are many cases where one branch of a plant will suddenly show the trouble and by removing this at once the plant can often be saved. So far as we can judge it is the same wilt as that which frequently attacks the whole plant at once. If the statement of MARKETMAN is correct, that the trouble there is caused at the base of the plant ours must be of a different nature. We would be pleased to have further light on this subject.

Ontario. J. L. H.

Regarding the wilt of cucumbers and melons, both indoors and in the field, the scientists tell us the trouble is of bacterial origin, hence cannot be reached by any outside remedy; in fact, they admit that there is at present no known remedy at all. The only method of control is to destroy the affected parts or the whole plant. That there is good ground for their claims is proved by experiments we have made ourselves and that is that pinching ends or laterals either by finger or by knife is disastrous, where the bacterial wilt exists, as such injuries to the vines opens them to the attack of the bacteria. At one time we had a row of a hundred cantaloupe plants, in eight different varieties, strung on strings in single stem fashion like we grow cucumbers under glass. They certainly made fine growth and set fruit beautifully, but as soon as the wilt appeared the whole row collapsed in about a week, not one plant escaping. We attribute this to the repeated pruning necessary, thereby carrying or inoculating the disease. Some of our experiment stations advise along this line that the striped bug is the medium which spreads the disease from place to place, hence any repellant measures for the bugs would also reduce our wilt disease. Thus they admit the striped bug is a factor to the wilt disease. We believe that also, and go a step farther and believe it to be the whole trouble. That as long as the bugs are absent all is well and as soon as they appear trouble commences. We believe that if growers of greenhouse cucumbers could or would effectively keep the striped cucumber bug out of their houses the wilt trouble would disappear. To accomplish this every ventilator opening would have to be screened and doors kept closed, and no opening allowed whatever. "J. L. H." admits that the trouble appears in late spring; if he would observe a little closer he would probably find that the malicious bugs come first and the disease a few days after.

When we located here four years ago we raised the finest crops of both melons and cucumbers we ever had. Our pickle vines were loaded with fruit when frost came. That fall we noticed for the first time thousands of the yellow bugs eating the frosted pickles and immature melons—during the growing season we never saw a bug. And that also ended our success with vines unless at great expense. We noted this season that all cucumber crops in our vicinity failed after a certain date. When questioned the growers expressed various opinions. One blamed the early drouth, another the great heat, the next one the heavy rains. Still another, the cool nights, or the rust, but an investigation in each case disclosed the punctured roots at the ground line. And in each case the affected fields commenced to die from the southwest corner and lived the longest in the northeast corner. This means that the bugs came in with the prevailing wind and commenced business in the nearest corner. Most growers of melons and cucumbers realize that these bugs are a great menace, but very few know the extent or exact nature of the damage. We claim the greatest damage is done at the ground line and underground by the larvae of these bugs, by puncturing the sap-bearing cells, and this in most cases is the true cause of the wilt.

Semi-Evergreens Shrubs.

The poverty of the gardens of the northeastern United States in broad-leaved evergreens is due to our climatic conditions, but the following plants which retain their foliage unchanged in color until late in the season are mentioned in the Bulletin issued by the Arnold Arboretum. By the use of such plants it is possible to make a garden which will appear during October and November almost like a garden of broad-leaved evergreens. Most of these plants have come from Europe, although a few Chinese and North American shrubs retain green foliage through November.

One of the best known plants of this class is the European Blackthorn, Rhamnus catharticus. This is a large shrub, or in favorable positions a small, round-headed tree. The leaves are bright green and the branches covered with small black berries in autumn. This is a very hardy, fast-growing shrub, and when gardeners had less material to choose from than they have now it was often planted in this country. Now it is rarely seen except in plantations made many years ago. This is true of another European shrub, Ligustrum vulgare, the common privet. This was once much planted in the eastern United States, especially in forming hedges, and it has always been used in Europe for this purpose. In recent years, however, it has been neglected here in favor of some of the privets introduced from eastern Asia, although none of these are as useful garden plants. The European privet is a tall, round-topped shrub; the leaves are still as green as at midsummer and make the best possible background for the large clusters of shining black fruits. There is a form of this plant with yellow-green fruit but this is less desirable than the black-fruited form. The European privet is one of the hardiest of plants; it grows quickly into a large, round-topped shrub; it is not particular about soil; it bears the shears well, and so can be used in hedges or cut into fantastic shapes. Europe has made comparatively few valuable contributions from its native flora to the gardens of this country and the privet is one of the best of them.

The handsomest semi-evergreen shrub, perhaps, now in good condition in the Arboretum is an Evonymus. It is a broad shrub, ten or twelve feet high, with bright green leaves which will not fall for several weeks. The fruit is small, sparingly produced, and hardly noticeable. This remarkable plant is called Evonymus Hamiltonianus, var. semipersistens, and nothing is known of its origin although it is not improbable that it is a native of some part of China, and it is possibly a distinct species rather than a variety of another plant.

Some of the honeysuckles might find a place in an autumn garden for the leaves of several species are still perfectly green. The best known of these are two Chinese species which have been cultivated in this country for at least half a century, Lonicera fragrantissima and Lonicera Standishi. These are large hardy shrubs and produce their fragrant flowers in early spring before the leaves appear. The leaves of a few other species are still untouched by autumn. The most conspicuous of these are Lonicera Xylosteum from Europe and northern Asia, Lonicera tibetica from western China and Thibet, a low plant with slender spreading branches, and Lonicera Ledebourii from California.

Nearly all the plants of the elaeagnus family retain their leaves until late in the autumn, but the only one in the collection which is still as green as at midsummer is the Sea Buckthorn, Hippophae rhamnoides, a widely distributed shrub or small tree of Europe and central Asia. The male and female flowers are produced by different individuals and the female plant is attractive when the branches are covered with orange-colored persistent fruits.

Several European yellow-flowered plants of the pea family are now conspicuous from the bright green color of their leaves. Some of the most beautiful autumn plants among them are Genista Germanica, Genista pilosa, Genista tinctoria, Genista elata, Cytisus nigricans, and Cytisus capitatus. These are all small low shrubs, well suited for small gardens. Another yellow-flowered plant of this family, Coronilla Emurus, of southeastern Europe, grows to a larger size but it is equally green in the first week of November.

The leaves of few American plants retain their summer color until November. An exception, however, is Leucothoe racemosa from the southern Appalachian mountains. A very different plant but one still as green is the Chinese Matrimony Vine, Lycium Chinense. This has long, wand-like, arching or prostrate stems which with a little support can be made vine-like and used to cover trellises. It is a useful plant for draping walls and when planted as a shrub in masses it soon makes an impenetrable barrier. The scarlet shining fruits which are abundantly strung along the branches add greatly to the autumn beauty of this hardy plant.

Berberis Neubertii, a hybrid between the common barberry, Berberis vulgaris, and the evergreen Berberis or Mahonia Aquifolium, is a plant little known in American gardens. It is a moderate-sized, broad-topped shrub with large dark green leaves which remain on the branches with little change of color through November. This plant does not bloom freely and rarely produces fruit, but it is one of the hardiest and handsomest of the shrubs with semi-persistent foliage which have been introduced into the Arboretum.
